(a) The record of the Department includes lockouts as well as strikes but a lockout or an industrial condition which is undoubtedly a lockout, is not often encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused but a separate record of such strikes is maintained in the Department. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of importance. Information as to a strike involving a small number of employees for a short period of time is frequently not received until some time after its commencement.

(b) Strikes unconcluded at the end of the previous year are included in these totals.

**TABLE G-2.—STRIKES AND LOCKOUTS, JULY 1958, INVOLVING 100 OR MORE WORKERS**  
(Preliminary, subject to revision)

# **SPECIAL BULK SUBSCRIPTION OFFER**

**A 12 MONTHS' SUBSCRIPTION**

**TO THE**

## **LABOUR GAZETTE**

**For  
Only**

# **\$1.00**

**Per  
Subscription**

**FOR GROUPS OF FIVE OR MORE SUBSCRIBERS  
WHEN DELIVERED IN BULK TO ONE ADDRESS**

This special offer cuts the regular price of a LABOUR GAZETTE subscription in half. The saving is made possible by the reduction in mailing and handling costs that results when the magazines are despatched in bulk. To take advantage of this offer, subscribers must place their order through one person and accept delivery at one address.

Send remittance by cheque, postal note or money order, payable to the Receiver General of Canada, to The Queen's Printer, % Supervisor of Government Publications, Ottawa.

## manpower and labour relations

# REVIEW

ECONOMICS AND RESEARCH BRANCH

---

### Current Manpower Situation

After allowing for average seasonal influences, employment registered a moderate decline between July and September, breaking the uneven advance that had been maintained since early spring. However, large and sometimes irregular changes in both the labour force and employment are likely to occur at this time of year, as the result of a sharp drop in harvesting, fishing and food-processing operations, the end of vacations, the return to school and the upturn in forestry and automobile manufacturing. In addition to the usual cross-currents, underlying trends this fall have been further obscured by industrial disputes involving (directly or indirectly) upwards of 50,000 workers.

The number of persons with jobs in September was estimated to be 5,888,000, a drop of 137,000 from a month earlier and 51,000 less than last year. The decline in the current month was limited to male workers, 80,000 in agricultural and 57,000 in non-agricultural industries. These changes were not very different from the average of the last two years. There was no net change in the number of women employed during the month, a moderate decline in agriculture offsetting gains elsewhere. Changes in female employment have no consistent pattern at this time of year, largely because of irregular shifts in the timing of labour requirements of food-processing firms.

In spite of a decline in the number of persons with jobs, there were more people actually working in September than in August. The biggest factor here, of course, was a decrease of over 300,000 on vacation. In addition, however, the number on temporary layoff (chiefly in automobile manufacturing and coal mining) fell from 37,000 to 14,000. On the other hand, moderate increases were registered in the number working less than a full week because of short time and turnover.

The number of persons withdrawing from the labour force exceeded the drop in employment. Consequently, the number without jobs and seeking work fell from 281,000 in August to 271,000 in September. To this decline might be added the above-mentioned drop of 23,000 in the number on temporary layoff. The seeking work figure was 4.4 per cent of the labour force this September compared with 3.2 per cent in September 1957.

The drop in the labour force since mid-summer has been unusually large, accentuating the downward trend that has been in progress since spring. In the third quarter the labour force was, on the average, just over 1 per cent

greater than a year earlier. This compares with a year-to-year margin of over 3 per cent during most of last year and this spring.

Part of the reason for this progressive narrowing of the margin over last year was a relatively slow population growth which, in turn, stems largely from the cutback in this year's immigration program. Population growth (14 years and over) averaged only 17,000 a month in the third quarter of 1958, compared with 27,000 a month in the same period last year.

A drop in the proportion of the population of working age participating in the labour force has also been a factor of considerable importance in slowing down the growth of the labour force. The ratio was 54.0 per cent in September, compared with 54.8 per cent a year earlier. If the participation rate in September had been the same as last year, there would have been about 90,000 more persons in the labour force. There are various reasons for the decline in par-

ticipation rate, one of the more important being the scarcity of job opportunities. It is notable that the fall in participation rate is most marked in the younger and older age groups.

## Women's Employment

Although, as stated above, the number of women with jobs in September was unchanged from a month earlier, some 58,000 more women had jobs in August this year than a year before. This offset to a considerable extent the estimated drop of 80,000 in jobs for men.

The industries which suffered the greatest loss of jobs had a lower level of employment this year for both men and women, and in fact the loss of jobs for women was in some industries greater, percentagewise, than for men. However, the industries most affected—among them manufacturing and construction—employ a high proportion of men. For this reason even a considerably smaller proportional drop in male employment resulted in a much greater numerical loss.

The increase in employment for both sexes is in industries in which women are well established, particularly service and trade. A larger number of both men and women are now employed in these industries than was the case a year ago.

Agriculture is the big exception to the general rule that the drop in jobs in an industry has affected both sexes. That industry was by far the greatest factor in the year-to-year change in the employment situation. Agriculture alone accounted for more than half of the net increase in jobs for women. On

the other hand, more than three-quarters of the net drop in men's employment could be attributed to agriculture. The agricultural industry contributed more than twice as much as did manufacturing to the total drop in number of jobs for men.

The employment situation was less favourable than a year ago for men of all ages, but teen-agers were hardest hit. Of the women, teen-agers were the only group with a slight drop in percentage employed in August 1958 as compared with a year ago.

## Employment Trends in Agriculture

The agricultural labour force showed a further decrease this year, continuing the long-term decline of the postwar period. In the first seven months of 1958 the average number of workers attached to farming was estimated to be 713,000, which was some 24,000 fewer than in the same period last year. The decrease would have been even greater but for the fact that female workers in agriculture increased by some 11,000 from 1957 to 1958. This increase can be attributed largely to the fact that a greater number of women on farms were doing farm work this year in order to fill the gap left by the movement of farm owners and their sons to non-agricultural occupations. The total male labour force in agriculture declined by some 35,000 since last year. This drop was distributed among own account workers, self-employed and unpaid family workers; the number of male paid workers in agriculture increased slightly.

Almost 70 per cent of the female labour force in agriculture are unpaid family workers. This female group was entirely responsible for the expansion which occurred this year, a sharp reversal of the postwar trend. Paid family workers showed virtually no change over the year. This category has held fairly constant throughout the postwar period.

As might be expected, the occupational distribution of male and female farm workers differs quite markedly. Unpaid workers constitute almost 70 per cent of farm employment for females but less than 20 per cent for males. For females, this group declined in relative importance during the past 10 years, from 87 per cent to 70 per cent, while it showed virtually no proportionate change for males.

More than half of the male work force in agriculture is self-employed. This group declined sharply in both relative and absolute terms during the postwar period. In the summer of 1958 the number classified as self-employed was almost 200,000 lower than a decade earlier. The number of paid workers in this group declined about 30,000 during the 10 year period 1948 to 1958. Unpaid family workers showed a slightly greater absolute decline (42,000) though in relative terms the decrease for this group was not as sharp.

The regional distribution of the agricultural labour force differs little from last year. The largest group was in the Prairie region, which accounted for about 40 per cent of the total. The Atlantic and Pacific regions made up for 8 per cent and 4 per cent of the total respectively. Ontario and Quebec shared about equally in the balance.

Apart from a slight increase in British Columbia, farm employment was lower than last year in all regions. There was a notable drop in the Prairie Provinces despite the fact that the female work force increased substantially. In fact, virtually all of the increase in female farm employment in Canada occurred in this region. In August, the number of female workers in agriculture in the Prairie region was estimated to be 18,000 higher than in 1957. This drop was more than offset, however, by a drop of 35,000 in the number of male workers in agriculture.

#### DISTRIBUTION OF LABOUR MARKET AREAS

| Labour Market Areas     | Labour Surplus* |              |              |              | Approximate Balance* |              | Labour Shortage* |              |

(a) Distribution of these figures between male and female workers can be obtained from *Labour Force*, a monthly publication of the Dominion Bureau of Statistics. See also inside back cover, April issue of Labour Gazette.

(b) See inside back cover.

(c) These percentages compare the cumulative total to date from first of current year with total for same period previous year.

# Labour-Management Relations

## The Bargaining Scene

The number of major agreements affected by bargaining activity declined further in October to 74 agreements covering 386,900 workers. Conciliation activity has also declined slightly from last month's figure. The number of agreements reached between September 15 and October 15 was ten, covering 39,000 workers. All but one of these agreements have been through conciliation proceedings. They include agreements in the coal mining, paper and construction industries.

As a part of the survey and analysis work in collective agreements carried out by the Economics and Research Branch, it has proved practicable to keep abreast, with a minimum of time lag, of approximately 1,000 representative agreements. Of these, 223 have been revised and received in the Branch. The table below shows the distribution of wage increases reported under these 223 agreements. Of these 223 agreements, 57 per cent were signed for periods of one year or less, and 41 per cent for periods ranging from more than one year but less than three. About 16 per cent of the agreements signed for one year or less made no provisions for wage increases, while the figure for all agreements reviewed was 9 per cent.

### DISTRIBUTION OF WAGE INCREASES PROVIDED BY 223 AGREEMENTS SIGNED IN 1958

| Total Amount of<br>increase—cents<br>per hour | Term of Agreement |                                         |                 | Total |

## CONCILIATION SERVICES IN CANADA

## WORK STOPPAGES ARISING FROM INDUSTRIAL DISPUTES

# Manpower Situation in Local Areas

## ATLANTIC

Employment decreased seasonally in the Atlantic region during September and students and other short-term workers withdrew from the labour force. At September 20 the number of persons with jobs was estimated to be 508,000, some 9,000 fewer than in the previous month and 21,000 fewer than a year earlier. Coal mining production continued at a reduced level as staggered layoffs were still taking place at the Sydney Mines. Pulpwood logging in Newfoundland showed a further decline, reaching a much lower level than last year. Total manufacturing employment changed very little during the month; increased hirings were reported in a number of steel plants but these gains were largely offset by a layoff of about 100 workers at the Saint John Ship-yards.

The low point in economic activity appears to have been reached in the Atlantic region early in the year. Persons with jobs (adjusted for seasonal variations) increased more than 2 per cent from March to August, reversing the downward trend which began in July 1957. The increase made up for only part of the earlier losses, however, so that the number of persons with jobs in September was still substantially lower than last year. The level of unemployment has been consistently higher than in 1957.

While the declining trend in business activity was arrested early in the year, it is still not clear whether the forces responsible for the recession have altered enough to bring about a period of sustained expansion. The pattern so far has been one of adjustment, with relatively small production and employment gains. Most economic indicators of the region have shown no appreciable improvements in recent months and this trend is likely to persist for the next few months. Inventories of pulpwood are still excessive. Some manufacturing plants have also been hampered by excessive stocks. The increase in new orders for manufactured goods has been largely confined to the steel industry. Two rail orders for export will keep the DOSCO steel plant's rail mill working at capacity for at least three months.

An upturn in construction activity would have a strengthening influence on the economy of the region. Some revival of activity can be expected in this sector since contracts for all types of construction have been slightly higher this summer than in the same period last year. The higher value of contracts has not as yet been reflected in an upturn of employment, because many of the jobs scheduled to begin earlier in the year were delayed.

# CLASSIFICATION OF LABOUR MARKET AREAS—OCTOBER 1, 1958.

→ The areas shown in capital letters are those that have been reclassified during the month; an arrow indicates the group from which they moved. For explanation of classification system, see inside back cover.

Six of the 21 areas in the region were reclassified during September, three from substantial surplus to the moderate surplus category and three from balance to the moderate surplus category. At October 1, the area classification was as follows (last year's figures in brackets): in moderate surplus 13 (7); in balance 8 (14).

### Local Area Developments

**St. John's** (metropolitan) was reclassified from Group 3 to Group 2. The dispute at the St. John's waterfront was settled during the month but port activity remained slack. Temporary layoffs were reported in construction owing to the fact that the waterfront dispute resulted in a shortage of building materials.

**New Glasgow** (major industrial) was reclassified from Group 1 to Group 2. Rehiring at the Eastern Car Company boosted manufacturing employment during the month. Total manufacturing employment was still substantially lower than last year, however, owing to reduced orders for freight cars from the railways.

**Sydney** (major industrial) was reclassified from Group 1 to Group 2. Staggered shutdowns continued in coal mining but employment was somewhat higher than in the previous month. Scheduled cutbacks in coal production were reported to have concluded at most of the mines by the end of the month.

**Grand Falls and Bridgewater** (minor) were reclassified from Group 3 to Group 2.

**St. Stephen** (minor) was reclassified from Group 1 to Group 2.

### QUEBEC

Employment declined more than seasonally in the Quebec region during September. The decline was in part associated with the withdrawal of students and other seasonal workers from the labour force. In the week ended September 20, the number of persons with jobs was estimated at 1,630,000, some 45,000 lower than the previous month and 14,000 less than a year before. Despite the drop in the number of persons with jobs, the number actually at work increased from 1,558,000 to 1,591,000 during the month, as workers returned from vacations. The level of unemployment was substantially lower than in August as the labour force showed a greater contraction than employment. The construction industry, particularly housebuilding, was very active during the month. Forestry employment increased sharply in accordance with the usual seasonal pattern, though operations were at a somewhat lower level than last year.

An upturn in economic activity occurred in this region early in the spring but full recovery appears to be still some distance away. Some of the basic weaknesses which accounted for the downturn last year are still in evidence, so that business activity in general continues to be fairly sluggish. There has been little recovery, for example, in world demand for commodities such as base metals, wood products and paper products which figured prominently in the earlier boom. There has been some strengthening in the domestic market for a fairly wide range of products but as yet production and employment gains have been rather modest.

The low point in employment (apart from seasonal) was reached in this region in March. Since then, the trend has been erratic, although the gains have been quite substantial. Persons with jobs, on a seasonally adjusted basis, increased by 4.5 per cent between March and June, making up for most of the loss that occurred in the preceding nine months. Employment edged downwards again during the past three months, however, as a result of temporary layoffs in various parts of manufacturing.

In September, the number of persons with jobs was estimated to be 14,000 lower than a year ago. Unemployment was much higher than a year before but the year-to-year difference narrowed noticeably since early in the summer owing to a slowing down in the growth of the labour force during recent months. For the first seven months of 1958 the labour force showed an average year-to-year increase of 65,000. In September the difference amounted to only 20,000.

At October 1, the area classification was as follows (last year's figures in brackets): in substantial surplus, 1 (0); in moderate surplus, 19 (11); in balance, 4 (13).

### Local Area Developments

**Montreal** (metropolitan) remained in Group 2. Total industrial employment was about 3 per cent lower than a year ago. Manufacturing accounted for most of this decline. Employment was sharply lower than last year in railway rolling stock and the electrical apparatus and supplies industries.

**Quebec-Levis** (metropolitan) remained in Group 2. Employment in Quebec was down slightly from a year ago owing to weaknesses in certain parts of manufacturing. Construction employment continued at a somewhat higher level than last year.

**Ste. Agathe-St. Jerome** (minor) was reclassified from Group 3 to Group 2.

### ONTARIO

Employment in Ontario declined seasonally during September. As a result, most of the temporary farm help and many other seasonal workers withdrew from the labour force. The number of persons with jobs at September 25 was estimated to be 2,181,000, about the same as a year before but a drop of 39,000 from the previous month. Agriculture accounted for about 60 per cent of the month-to-month decline. Unemployment showed little change during the month and the year-to-year increase was the smallest since the beginning of this year. As a result of labour-management disputes in Toronto, Sudbury and Hamilton, more than 40,000 workers were tem-

porarily out of work by the end of September and many other workers were indirectly affected.

Economic conditions in the region showed some signs of improvement. Construction activity, both in the residential and non-residential sector, continued at a high level. The number of housing units started in larger centres during August was almost one-third higher than a year earlier, and total starts for the first eight months of the year were about 64 per cent above last year's level.

Some improvement appears to be taking place in manufacturing. The motor vehicle industry made a promising start on the production of 1959 models, although output was curtailed in the second half of the month by strikes of automobile workers in the U.S. which interrupted the flow of indispensable parts from that country. Increased activity was reported in a number of iron and steel products firms; in others, steel shortages caused temporary layoffs, the largest of which occurred at a Toronto farm implement plant. Apart from this, activity in the farm implements industry continued at a high level. The home appliance industry is stepping up production.

The region's weak spots continued to be textiles (except clothing), railway rolling stock manufacturing, and forestry. Lack of orders caused two major textile plants at Hamilton to discontinue operations and a third to reduce staff drastically. Employment in the railway rolling stock producing industry, which has been steadily declining since 1957, reached a new low with the layoff of about 500 workers for an indefinite period. Forestry employment showed no change during the month and remained substantially lower than a year ago.

Six of the 34 labour market areas in the region were reclassified during the month, all but one to categories denoting less unemployment. At October 1, the area classification was as follows (last year's figures in brackets): in substantial surplus, 0 (2); in moderate surplus, 13 (6); in balance, 21 (26).

### Local Area Developments

**Metropolitan Areas where classification unchanged:** *Hamilton* (Group 2). The Stelco strike dominated the labour market picture but caused only a moderate rise in unemployment. Two major textile plants are ceasing operations because of lack of orders, and a third plant drastically reduced its staff; about 700 textile workers were affected. Another 500 employees were laid off from the railway rolling stock plant. *Ottawa-Hull* (Group 3). Employment conditions continued to improve in most industries. Construction workers had to be brought in from other areas to meet the demand. *Toronto* (Group 3). The demand for labour from most manufacturing industries showed a noticeable increase. The iron and steel products industry reported considerably

increased activity, notably in the manufacturing of machinery for the construction industry. Construction suffered a severe setback as a result of the labour-management dispute.

**Windsor** (metropolitan) was reclassified from Group 1 to Group 2, chiefly as a result of the resumption of work by the motor vehicle industry.

**Major Industrial Areas reclassified from Group 1 to Group 2:** *Cornwall:* The reclassification was due mainly to increased construction activity. *Oshawa:* Resumption of motor vehicle production resulted in reclassification.

**London** (major industrial) was reclassified from Group 2 to Group 3; the reclassification was due mainly to improvement in seasonal industries, particularly food processing.

**Chatham** (major agricultural) was reclassified from Group 2 to Group 3, due mainly to agriculture and food processing. *Pembroke* (minor) was reclassified from Group 3 to Group 2.

## PRAIRIE

Employment in the Prairie region declined seasonally during the month. Persons with jobs at September 20 were estimated at 1,047,000, a decrease of some 33,000 from mid-August and 5,000 from the year earlier. The drop in employment over the month was accompanied by a similar decline in the labour force. Consequently, unemployment showed little change, although it was still higher than last year. Completion of grain harvesting was responsible for all of the decrease in employment. Non-agricultural employment showed a slight gain in a month when it usually declines.

Effects of the economic recession during 1958 were less noticeable in the

Prairie region than in other regions in Canada. Employment (seasonally adjusted) dropped 4 per cent from the peak in 1957 to the trough in January 1958. Since January employment improved and was higher than a year earlier in most months.

The increase in industrial activity was largely due to an upturn in construction and to the steady expansion in the trade, finance and service industries. Construction employment was about 8 per cent lower in January than in the same month of the previous year but since March it has been higher than a year ago. Residential construction, which showed unusual strength in the last quarter of 1957, continued its upward trend in 1958. From January to July, new housing starts were 51 per cent higher than for the same period last year and, at the end of July, the number under construction was more than 40 per cent higher than a year ago. Non-residential construction showed strength from June on, noticeably in the business and engineering sectors; industrial construction was, however, markedly lower than last year.

Manufacturing employment has been, on the average, about 3 per cent lower than last year, although the gap has narrowed in recent months. The main weaknesses were aircraft parts factories, railway shops and iron and steel plants. On the other hand, food and beverages and printing industries showed further gains.

Steady expansion in the trade, finance and service industries continued; the combined employment in these industries was, on the average, some 3 per cent higher this year than last year. These industries account for about one-third of the total non-farm employment.

The transportation industry showed lower employment, averaging 4 per cent less during the eight-month period this year than last; smaller coal, ore and grain shipments were contributing factors. Employment in coal mines, especially in Alberta, declined substantially as production dropped by one-fifth during the eight-month period. In the oil industry also, there were staff reductions owing to export difficulties.

At October 1, the classification of the 20 labour market areas was the same as a month earlier (last year's figures in brackets): in moderate surplus, 2 (0); in balance, 18 (20).

### Local Area Developments

**Calgary, Edmonton, Winnipeg** (metropolitan) remained in Group 3. Total industrial employment in August was at or only slightly below the year-earlier level in all three areas. The largest gains over the year have been in residential building activity. In September, unemployment showed a small increase in Calgary contrasted by slight declines in Edmonton and Winnipeg.

**Fort William-Port Arthur** (major industrial) remained in Group 2. Employment declined in this area during the month whereas it usually increases at this time. Reduction in logging activities was one of the main reasons for the decline in employment; work force reductions, which began in August, continued in September. Logging employment during the three weeks of the month was, on the average, more than 30 per cent lower than in the corresponding period a year ago. There were further staff reductions at Canadian Car and Foundry and at Port Arthur shipbuilding plants as current contracts neared completion.

### PACIFIC

Employment dropped by about 11,000 to 522,000 in September, a slightly smaller decline than usual for this time of the year. The gap between this year and last year narrowed and at mid-September was only 9,000 below that of a year ago. Unemployment fell moderately during the month but remained considerably higher than a year earlier.

The basic demand for labour, which has been improving slightly for some months, was given a further boost by improved logging weather and the settlement of two major industrial disputes. One of these, in the construction industry, had been in progress for four months and was largely responsible for the fact that employment in the industry was down by one-third from last year, in spite of a two-thirds increase in the number of new houses

started. The strike settlement was followed by a brisk demand for construction workers, which helped to reduce the seasonal decline in employment.

A marked recovery in the demand for lumber this year has been reflected in a 10-per-cent increase in production and full staffs in most sawmills. Logging (and some sawmilling) activity, which was sharply curtailed during most of the summer because of fire hazard, increased in September, particularly on Vancouver Island. Some summer logging camps were not reopened, however, owing to the short time left in the season.

Increased activity in construction and logging was reflected in related manufacturing industries, notably steel

fabrication, woodworking and sheet metal firms. Weaknesses in some parts of manufacturing persisted, however. Shipbuilding employment continued to decline as government defence orders neared completion. Employment in the iron and steel products group as a whole was sharply lower than last year in spite of the beneficial effects of the recovery in construction and logging. In non-ferrous metal production employment was about 15 per cent lower than last year.

Mining employment in August was 20 per cent lower than a year earlier. There was little apparent change in September although a further reduction in some operations was expected as a result of recent reductions on the export of lead and zinc to the United States.

Unemployment declined moderately in the region, a particularly sharp drop occurring in Central Vancouver Island as logging camps were reopened. The classification of 11 labour market areas<sup>1</sup> was as follows (last year's figures in brackets): in moderate surplus 6 (2); in balance 5 (9).

### Local Area Developments

**Vancouver-New Westminster** (metropolitan) remained in Group 2. Employment in all major industries except sawmilling was down in August from a year earlier. During September the back-to-work movement in construction and logging caused a moderate reduction in unemployment. A season of high earnings for fishermen and cannery staffs came to a close. The sockeye salmon pack amounted to a new record of more than a million cases, and is reported to be already sold, leaving no carry-over to create difficulties next year.

**Central Vancouver Island** (minor) was reclassified from Group 1 to Group 2. The lifting of fire-season restrictions allowed thousands to return to work in logging and construction. Unemployment dropped to its lowest level in 10 months.

**Prince Rupert** (minor) was reclassified from Group 3 to Group 2. Unemployment increased seasonally at the end of the fishing season. Logging and sawmilling at interior points were retarded by wet weather.

<sup>1</sup>One area (Kitimat, B.C.) was added to the survey this month.

# NOTES OF CURRENT INTEREST

## **Housing Important Source Of Jobs, Minister Says**

Housing was of great importance not only in providing homes for Canadians but also in providing jobs, particularly during the winter, Labour Minister Starr said in an address September 8 marking the opening of National Home Week.

Speaking to the Home Builders' Association of Ottawa, Mr. Starr stressed the necessity of carrying much of the home-building industry's activity over into the winter months.

### **Employment for 375,000**

The 1958 program in Canada, he said, would provide employment directly or indirectly for 375,000 men. He noted that "the estimated labour content for a new home was six months work for two men on site and three men off site," or, in another way, "three months work for four men on site and six off".

It was also estimated, the Minister said, that a family moving into a new home spent \$1,500 for furnishings and other equipment. "Again more work," he added.

The Government's home-building target for the year was 150,000 units, Mr. Starr pointed out. By the end of July, 88,000 units had been started—an increase of 43 per cent from the comparable period last year. Completions by July 31 totalled 67,000 as against 59,000 at the same date in 1957. The number of completed but unsold homes was lower than last year.

Concerning the Government's contribution towards an increase in home construction, Mr. Starr said that loans through Central Mortgage and Housing had totalled \$386 million in the 12 months "since the original lending program was announced".

This new spending power had been "reflected in a greatly increased activity among the banks and lending institutions," he stated.

Government spending, the Minister said, was being aimed at lower-income homes, and this had "liberated a segment of the housing market that had been relatively stagnant".

Recommendations on housing put forward at the Winter Employment Conference, held in Ottawa last July, were being considered by the Government, the Minister said.

## **July Housing Starts Up 13 Per Cent over 1957**

Housing starts rose 13 per cent in July to 15,300 units from 13,512 a year earlier, the Dominion Bureau of Statistics reports. Completions rose almost 11 per cent to 9,660 units from 8,710. Units in various stages of construction at July 31 increased more than 28 per cent to 92,169 from 71,827 a year ago.

During the first seven months of this year, starts and completions of new dwelling units reached postwar peaks, exceeding the previous high reached in 1956.

Starts in the January-July period this year numbered 88,177, compared with 62,359 in the same period of 1957; completions numbered 67,968 compared with 59,145.

According to the U.S. Bureau of Labor Statistics, non-farm housing starts totalled 111,000 in July of this year. The decline of 4,000 units from June was less than usual, and the July 1958 total exceeded the 1957 figure by 13,000 units, or nearly 14 per cent.

## **Canada Will Increase Aid to Colombo Plan**

Speaking to delegates to the Commonwealth Conference on Trade and Economic Affairs in Montreal last month, Prime Minister Diefenbaker said that Canada will substantially increase its economic aid to underdeveloped countries.

Other sources indicated that the increase might be as much as 50 per cent. In the eight years that the Colombo Plan has existed, Canada has contributed \$200,000,000. It was believed that Canada's contribution increase would be contingent upon increased contributions to the plan from other Commonwealth countries.

### **1,000th Trainee Arrives**

The 1,000th Colombo Plan trainee to receive technical training in Canada, Mohammed Saeed, of Pakistan, arrived in Ottawa September 29. A graduate in mechanical engineering, he will spend about six months in Canada studying design, construction and operation of gas transmission lines.

## **Two Union Groups Urge Abolition of Moonlighting**

The practice of "moonlighting" was condemned and its abolition recommended by two different labour groups at separate meetings during the past month.

The 125-member Canada Council of the United Automobile Workers (CLC), meeting at Port Elgin, Ont., unanimously approved a resolution condemning moonlighting.

"This is one area where a union can legitimately co-operate with management," a UAW spokesman said. "Any worker holding two jobs ought to be made to choose which one he wants to keep".

At the monthly meeting of the Fort William-Port Arthur and District Labour Council a resolution was passed urging that affiliates of the Council be circularized, urging them to curb "moonlighting" among their members as a means of spreading available work among more people.

The Council also called for a meeting with Unemployment Insurance Commission officials at the local level to see if a program could be drawn up to deal effectively with the "moonlighting" problem.

## **Coal Mine Labour Shows Greatest Cost Increase**

The annual survey of Canadian coal mines operating costs and revenues for 1957 shows that the greatest increases in costs were registered by labour, maintenance repairs and supplies and distribution.

Operating costs for the industry as a whole increased 56 cents or 8 per cent to a total of \$7.54 per ton.

Labour costs per net ton of marketable coal produced, for Canada as a whole, made up 45.7 per cent of total costs. Maintenance, repairs and supplies accounted for 16.1 per cent of total costs.

### **Sales Revenue Drops**

Revenue from coal sales at \$7.06 per ton was a decrease of 10 cents or 1.4 per cent. The loss on the actual production and sales of coal before miscellaneous income and stock adjustments amounted to 48 cents per ton compared with 18 cents profit in the previous year.

For the year, the industry realized a profit of 16 cents per net ton on its combined underground and stripping operations, a decrease of 4 cents per ton from the average profit for 1956.

Total expenditure for the industry as a whole for labour and workmen's compensation was \$47,145,000, an average of \$3.63,

an increase of 20 cents, per ton. Maintenance, repairs and supplies at \$1.21 per ton increased 16 cents, the total expenditures for 1957 being \$15,771,000.

Increases per man-day production were reported for four areas, ranging as follows: Alberta Mountain, 18.6 per cent; Nova Scotia and New Brunswick, 9.4 per cent; Alberta Domestic (underground), 4.4 per cent.

Decreases were reported for three areas, as follows: Saskatchewan, 6.7 per cent; British Columbia and Yukon, 1 per cent; Alberta Domestic (stripping), 0.5 per cent.

The industry as a whole showed a 5.3-per-cent increase in per man-day production.

## **Farm Cash Income Sets Record for Half-Year**

Cash returns to Canadian farmers from the sale of farm products were estimated by the Dominion Bureau of Statistics at a record \$1.3 billion in the first six months of this year.

This was about 9 per cent higher than the estimate of \$1.2 billion for the like period in 1957.

The increase in farm income compared with a year earlier can be attributed in the main to the sale of live stock and animal products; returns from field crops were slightly lower.

## **Plan 3rd Annual Session On Man and Industry**

The third annual session of the Round Table on Man and Industry, a conference arranged by the School of Social Work of the University of Toronto, will be held November 2 to 7. The second session was held last November (L.G., Dec. 1957, p. 1326).

Three major issues will be considered at the meeting: community planning and organization, community relations and participation, and personal satisfactions.

In connection with the first, the meeting will deal with the adequacy of the agencies that determine present and future use of land to ensure an appropriate distribution of land among industrial, commercial and residential users; with the adequacy of agencies that determine the supply of and demand for housing to ensure a sufficient supply of housing, especially for the lower groups; and with the adequacy of all levels of government to ensure the adaptability of the Canadian people to the impact of industrialization.

Under "community relations and participation" the meeting will discuss whether the disappearance of traditional, relatively static communities has left a gap in personal and community life, and if so, how it can be filled.

Under "personal satisfactions" the session will enquire into the inequalities of opportunity between the sexes, age groups, occupational groups, income groups and geographical groups.

---

### **Canadian Credit Unions Increase Membership**

Canadian credit unions added 206,440 new members during 1957, bringing the total of 2,200,000, compared with some 2,000,000 at the end of 1956, according to the 1958 Credit Union Yearbook, recently released by the Credit Union National Association (CUNA).

Other figures show the same substantial growth during 1957, but also reflect a slower rate of increase than in preceding years.

Canada had 4,351 credit unions at year-end, compared with 4,275 at the end of 1956. Total assets of the unions stood at \$884,412,645 at the end of 1957.

---

### **Drop Escalator Clause in New Brewery Contract**

The former cost-of-living escalator clause was dropped from the agreement signed last month between the International Union of Brewery and Soft Drink Workers and Brewers Warehousing Limited to end a seven-week strike in the Ontario brewing industry. The contract expires December 31, 1961.

A compromise was reached on a union demand that the beer distributing company discontinue the practice of employing outside trucking firms to make deliveries during busy periods. The company agreed, where possible, to hire unmanned trucks and call on idled members of the bargaining unit to drive them.

Other terms of the settlement include an immediate 6-cent hourly wage increase, a further 10 cents effective October 1, 1959, and another 12 cents October 1, 1960.

Employees who have worked at least 25 weeks in the preceding year will receive an additional one week of vacation during the winter months, after completing three years service, to help stabilize employment during the winter layoff period.

A \$5,000 life insurance policy, company paid, will be given to all company employees, in place of the \$3,000 previously in effect at most companies.

### **Ford-UAW Agreement May Set Industry Pattern**

The Ford Motor Company and the United Automobile Workers in Detroit on September 17 reached agreement on a three-year contract, after 98,000 employees had been on strike for six hours. It was the first agreement in this year's negotiations in the United States automobile industry.

The agreement provides for improved supplementary unemployment benefits, higher pensions, severance pay for workers permanently laid off, some improvements in other fringe benefits, and an increase of 8 cents in the base hourly rate of certain skilled trades employees.

The Ford settlement was expected to be followed by similar agreements with General Motors and Chrysler Corporation, and was also expected to give a lead for settlements in the automobile industry in Canada, where agreements with all three of the large manufacturers have expired and negotiations had been marking time waiting for the situation in the United States to become clearer.

The annual improvement factor remains at 2½ per cent a year, or 6 cents an hour, whichever is greater; the cost-of-living formula remains as before.

Improvements in the supplementary unemployment benefit plan include the following:

—Benefits will continue to be paid to keep take-home pay at 65 per cent of regular earnings after the fourth week of layoff, instead of being reduced to 60 per cent after the fourth week as has been the rule.

—Benefit will be paid to keep take-home pay at 65 per cent of regular earnings in a short work week in which an employee's earnings are too high to allow him to qualify for state unemployment compensation.

Lump sum payments to employees permanently laid off will range from 40 hours pay for a person with two years service to 1,200 hours pay for a person with 30 years or more of service.

Modest increases in retirement benefits are provided. For the purpose of computing years of credited service, 1,700 hours will be taken as constituting a year, instead of 1,800 hours as previously.

For the first time in the union's history, members of the United Automobile Workers at the "Big Three" plants in the United States had been working without a contract since the end of May, when the previous contracts expired.

## **U.S. Unemployment Drops To Year's Lowest Level**

Unemployment in the United States declined in August to its lowest point since January, while employment stood at its highest figure for the year after rising for six consecutive months, according to estimates issued jointly by the U.S. Departments of Commerce and Labor.

Unemployment at mid-August was estimated at 4,699,000, which was 600,000 less than in July but more than 2,000,000 above the total of August 1957. The seasonally adjusted rate of unemployment, however, reached the postwar peak of 7.6 per cent of the labour force attained during the coal strike in October 1949. This adjusted rate has remained fairly constant since spring.

Employment at mid-August was 65,367,000—200,000 higher than in July but still 1,000,000 below the July 1957 figure.

The number of persons drawing unemployment insurance dropped by 86,900 to 1,953,900 in the week ended September 13, the Department of Labor has reported. This was the smallest number since last December.

---

Unemployment in Britain, after declining between mid-June and mid-July, rose to 446,000 by mid-August. This figure represents 2 per cent of the labour force, compared with an unemployment figure representing 1.2 per cent in August 1957.

At mid-July the unemployed numbered 412,000; at mid-June, 429,000.

---

## **AFL-CIO Orders Affiliates To End Teamster Pacts**

Affiliates of the AFL-CIO have been warned to end any mutual aid pacts with the International Brotherhood of Teamsters, in a resolution adopted at the quarterly meeting of the AFL-CIO Executive Council. Expulsion is presumably the price of refusal.

The Council's order does not apply to co-operation with the Teamsters at the local level. Unionists will not be forbidden to observe Teamster picket lines or give other co-operation "within the framework of traditional union assistance".

The constitution of the AFL-CIO states that one of the guiding principles of the organization is "to protect the labour movement from any and all corrupt influences" and from undermining efforts of all who are opposed to basic principles of democracy as a way of life, both inside and outside of the trade union movement.

The constitution also expressly directs affiliates of the federation not to recognize any organization that has been suspended from or expelled from the Federation for violation of the constitution.

There are in existence alliances or agreements between nine AFL-CIO affiliates and the Teamsters. Proposals for agreements between the Teamsters and several other AFL-CIO affiliates are in various stages of negotiation.

Only this summer the International Longshoremen's Association and the National Maritime Union joined the Teamsters in a "conference on Transportation Unity" (L.G., Aug., p. 844). Joseph Curran, NMU President, cast the lone dissenting vote on the AFL-CIO Council's resolution.

### **Council's Statement**

The Councils statement says: "This Executive Council declares it to be the policy of the AFL-CIO that any alliance or agreement formal or informal between an affiliate of the AFL-CIO and the International Brotherhood of Teamsters be cancelled; further, that this above stated principle applies to any proposals for new alliances or agreements between the corrupt leadership of the International Brotherhood of Teamsters and any AFL-CIO affiliate."

---

A special convention of the International Brotherhood of Teamsters has been called for next February by President James R. Hoffa, despite objections by union monitors who say they will seek a court order to block it.

Mr. Hoffa says the convention is for the purpose of getting himself re-elected and thereby rid the union of the monitors' supervision under terms of a court order.

---

## **Steelworkers Convention Votes to Expel "Rebels"**

The ninth constitutional biennial convention of the United Steelworkers, held in Atlantic City in September, crushed a rebel faction led by a man who polled more than half the number of votes obtained by President David McDonald in an election in February 1957.

The convention took steps to bring to trial and expel the "traitors," chief of whom was Donald C. Rarick, President McDonald's opponent in the 1957 election. Only two of the 3,500 delegates voted against the purge.

The convention served notice that the Steelworkers would insist on "substantial" improvements in wages, hours, and other main contract provisions in its negotiations with the steel industry next year.

President McDonald and other leaders warned the delegates that the winning of their demands might involve a long strike. Spokesmen said that the union was determined to obtain a reduction in the present basic eight-hour day and 40-hour week.

The convention unanimously approved an investigation into the practicability of establishing through collective bargaining a complete health plan for union members and their families. The industry would be asked to pay the entire cost of the scheme, estimated at \$100,000,000.

The union pledged full support to 7,500 of its members then engaged in a strike against the Steel Co. of Canada in Hamilton.

Hon. Michael Starr, Minister of Labour for Canada, was one of the speakers at the convention. The Minister outlined the steps the Government had taken to deal with unemployment in general and winter unemployment in particular, and the measures it had taken to mitigate the hardships of unemployment on those affected by it.

#### **Harmful Effects**

He pointed out the harmful effects of strikes on employment. A strike in a big, basic industry, he said, tended to give rise to a "whole series of layoffs...in smaller, subsidiary industries, so that you end up with a chain reaction in unemployment".

"The right to strike is not one which can be lightly interfered with," the Minister said. "However, the danger is that recurrent crises in the field of essential public operations will continue to build pressure for more and more government intervention," he warned.

He urged Management and Labour to show more flexibility, more tolerance and more regard for mutual interest, rather than the things which divide them so that they might be able to avoid or minimize this danger.

---

#### **IUE to Redouble Efforts To "Demolish" Rival UE**

A resolution calling for redoubled efforts to "demolish" the United Electrical, Radio and Machine Workers of America was unanimously adopted by the eighth convention of the International Union of Electrical, Radio and Machine Workers in Philadelphia last month.

The resolution also called for an all-out organizing effort in Canada, the South, the Midwest, the West Coast, and Puerto Rico.

The IUE, now the biggest union in the industry, was chartered by the CIO in 1949, after the United Electrical Workers had been expelled from the Congress. The

membership of UE has dropped from 450,000 in 1949 to about 50,000. The IUE now claims 365,000 members. In Canada, UE has 24,000 members; the IUE, 16,000.

A constitutional change on strike procedure was adopted by the convention. If endorsed by the membership, the constitution will be changed to let conference boards determine what majority will be required to authorize a walkout. At present, strikes cannot be called unless approved by a vote of delegates representing two-thirds of the members employed by a company.

James B. Carey was re-elected President and Al Hartnett, Secretary-Treasurer; both have held those positions since the union's founding. Mr. Carey's salary was raised \$3,000 to \$25,500 a year and Mr. Hartnett's \$4,000 to \$22,500.

---

#### **New Bakery Union Adopts Constitution**

Provisions of a constitution were approved by 300 delegates attending the first constitutional convention of American Bakery and Confectionery Workers International Union (AFL-CIO) in Atlantic City last month.

The new union represents 177,000 workers, more than half of the membership of the old Bakery and Confectionery Workers' International Union that was expelled from the AFL-CIO after its top officers, headed by James Cross, had defined a mandate to clean up the union.

The constitution of the new union is designed to prevent abuses recently disclosed in some U.S. unions, and provides that the 18-member general executive board, governing body between conventions, must always have a majority divorced from any financial connection with the international. Conventions will be held every four years.

The union will have a paid president, secretary-treasurer and five regional vice presidents. In addition, each of the union's five regions will elect two general executive board members, who will receive no salary from the international.

---

#### **Printers Will Demand 30-Hour Work Week**

At its centennial convention in San Francisco, the International Typographical Union called for a 30-hour work week for printers. Locals will be instructed to seek the shorter hours at bargaining tables.

## **Newspaper Guild Sets Goal of 50,000 Members**

The American Newspaper Guild, whose membership now stands at 30,500, at its annual convention in San Jose, Cal., set itself a goal of 50,000 members and adopted a program designed to assure adequate defence funds.

The convention also:

- Approved an increase from 25 to 30 cents, effective next January 1, in the defence fund portion of the monthly per capita payment to the international.

- Ordered all locals to earmark 5 per cent of dues revenues, beginning next year, for local defence funds.

- Applied minimum dues standards to all locals.

- Endorsed the AFL-CIO Ethical Practices Code and adopted constitutional revisions to meet the letter of the code.

- Pledged an all-out assault on "right-to-work" legislation and voted \$10,000 to support the drive.

- Expressed support of recent U.S. legislation that rejects the claim by federal departments "of blanket authority to restrict the public's right of access to public records and documents".

## **UMW Condemns Sale Of Ships to Cubans**

A resolution condemning the sale of Canadian National Steamships vessels to a Cuban firm "to break a strike by Canadian seamen" was strongly endorsed by delegates to the 27th convention of District 26, United Mine Workers of America, held in Truro, N.S., in September.

A resolution urging the convention to "take the necessary steps to become affiliated with the Canadian Labour Congress" was referred back to the resolutions committee, which earlier had recommended rejection of the motion.

The federal Government was asked in another resolution to nominate an employee representative to the Dominion Coal Board.

In other resolutions the UMW group sought to establish \$14 a day as basic pay, to replace the \$11.54 now prevailing; get a 40-hour work week in the coal industry; obtain a three-way pension plan; have removed the over-40 employment ban; get payment for eight statutory holidays instead of four, and longer vacations-with-pay periods.

In an address to the delegates, Rev. Andrew Hogan of St. Francis Xavier University urged establishment of a vocational training school in the Cape Breton area,

and warned in his remarks that Labour should be on guard against increasing propaganda to the effect that Labour is to blame for the current recession.

## **AFL-CIO Signs Agreement With Organizers' Union**

The AFL-CIO has reached an agreement with the union of its organizers, the Field Representatives Federation.

The agreement provides for pay raises from \$130 to \$140 per week, retroactive to July 7; a union shop, severance pay of one week's salary for each year of service, and other improvements. However, nothing is provided for 100 organizers who were discharged last January (L.G., Feb., p. 165), except a nominal agreement to review discharges on the request of workers.

Another provision of the agreement is that the final step in settling any disputes over interpreting the contract will be a binding decision by two members of the AFL-CIO Executive Council appointed by President George Meany.

John Collins was elected President of the union; Leon De Broux, Vice President; and Robert Graham, Secretary-Treasurer.

## **Gross National Product Shows Moderate Gain**

The value of Canada's total output of goods and services, after seasonal adjustment, showed a moderate gain between the first and second quarters of 1958, following the weakness that had developed earlier, according to the Dominion Bureau of Statistics.

In value terms, production of goods and services in the non-farm sector rose by about 1 per cent. It is estimated that the greater part of this value increase reflects a further rise in final product prices, so that the volume of output showed little change.

During the first six months of 1958 wages and salaries amounted to \$16.1 billion compared with \$15.7 billion in the same period in 1957, an increase of 2.7 per cent. Corporation profits before taxes in the same period totalled \$2.3 billion, a decrease of 14.8 per cent from the total of \$2.7 billion during the same six-month period of 1957.

The number of unemployed in Britain rose 30,000 between August 11 and September 15 to 476,000, the highest since May 1952. The figure represented 2.2 per cent of the working population; a year earlier, 1.2 per cent were unemployed.

## **CBRE Changes Name On 50th Anniversary**

Criticism of the federal Government's "hold-the-line" policy on wages, a three-point expansion program, an increase in union dues for its members and affiliation of the CCF Party and the Canadian Labour Congress were major subjects dealt with at the 50th anniversary convention of the Canadian Brotherhood of Railway Employees and Other Transport Workers, held in Vancouver in September.

A change in the name of the union to the Canadian Brotherhood of Railway, Transport and General Workers was approved by the more than 400 delegates.

CBRE President William J. Smith said that the country's present labour troubles are largely due to the wage policies urged by the Government. He noted that the Government asserts that it takes the same tough line with business that it takes with Labour, but he disputed that claim.

### **"Meaningless Claim"**

This is a meaningless claim, he contended, since the Government does have at its disposal a means of obstructing Labour—the conciliation process—while in the vast majority of industries it has nothing whatever to say about prices.

"What sounds fair and equal in theory," said Mr. Smith, "is in practice a completely one-sided affair."

Mr. Smith felt that the only discernible effect of the policy "has been a worsening of labour-management relations to the point where there is now more serious labour trouble than at any time since the war."

The delegates approved a three-point program of expansion providing for:

- Aggressive organizing in the road transport field previously dominated by the Teamsters' union;

- Creation of a "home" for thousands of members of national and local unions of general workers;

- A campaign to enrol unorganized groups of general workers.

The convention voted to increase dues to \$3 per month from the present \$2, primarily to finance the planned expansion of the organization beyond the transport field.

A. R. Mosher, first President of the CBRE and now an Honorary President of the CLC, called on all trade unionists to support the CCF-CLC political alignment. He believed it was time that Labour took a hand in politics, since in the past it has been a case of Labour going to the polls to "vote for representatives of Management to go to Parliament to make the

rules under which labour-management negotiations are carried on".

Considering unemployment in the country, the convention expressed fear over the effects of automation on industry, and urged the federal Government to fight it on all fronts.

Addressing the convention, CLC President Claude Jodoin stated that the union movement will fight for its rights come what may. He noted that while Canadian Labour was ready to co-operate internationally, "we do not need any outsiders to tell organized labour what it has to do".

Donald MacDonald, CLC Secretary-Treasurer, told the convention that anti-labour forces are at work in Canada and that there was no room for complacency in this regard.

Labour Minister Starr cautioned Labour and Management to hold down industrial disputes, so as not to add to Canada's unemployment. "When we are on the high road to economic recovery it is no time for reckless driving by either side," he said.

Mr. Starr told the delegates he believes "we have worked our way out of the worst of the slump and are on our way back".

He thought unemployment in Canada this winter might be as bad as last but, he assured the convention, "every measure will be taken to deal with the situation as it develops".

William J. Smith was unanimously re-elected President. Elroy Robson was re-elected Vice President over contenders Alex Porter of Toronto and Bob Smeal of Victoria, B.C. Don Secord was unanimously re-elected Secretary-Treasurer.

## **Canadian AGMA Members Join with Actors Equity**

Canadian members of American Guild of Musical Artists, an affiliate of Associated Actors and Artists of America (AFL-CIO-CLC), have merged with Actors Equity Association (AFL-CIO) following a year of negotiations.

The merger brings Equity strength in Canada to 800 members. Affected are the National Ballet and the Opera Festival Association of Toronto.

The merger means one less union card for performers to carry and one less set of dues and initiation fees to pay.

During July, 1,611 accident claims were received from persons in the employ of the federal Government, compared with 1,427 for July 1957, the Government Employees Compensation Branch has announced.

## **Urges Government Body To Deal with Automation**

A national plan and a special government commission to deal with automation was recommended last month by a Montreal lawyer, Philip Cutler, in an address to the 40th annual meeting of the Canadian Bar Association.

Automation will soon be revolutionizing the Canadian way of life, he said.

"Only a comprehensive plan worked out by representatives of management and labour, sitting with government and public bodies, can make automation work for society," he suggested.

While automation brings with it the possibility of strife, hardship and uncertainty, dislocation, over-abundance and want, it also "has all the ingredients for a life of plenty, increased production, increased services and greater leisure," he said.

---

## **May Commodity Imports 12.5 Per Cent Below Peak**

Canada's commodity imports in May were valued at \$485,100,000, a decline of 12.5 per cent from the all-time high for any month, \$554,100,000, recorded in May last year, the Dominion Bureau of Statistics reported last month.

Total for the January-May period was \$2,123,700,000, down 13.6 per cent from last year's five-month peak of \$2,450,600,000.

Among major commodities there were lower values in May and the five months for industrial machinery, pipes, tubes and fittings, rolling-mill products, cotton and wool products, rubber products and coal, but increased values for fruits and aircraft and parts.

Values were lower in the month but higher in the cumulative period for vegetables, sugar and products, and paper.

---

## **Items of Labour Interest in House of Commons**

**August 25**—Majority report of federal conciliation board in dispute between Canada's major railways and their non-operating employees has been accepted by unions, Hon. Michael Starr, Minister of Labour reports.

In the dispute between the British Columbia Shipping Federation and the 1,500 members of the International Longshoremen's and Warehousemen's Union, a federal conciliation officer was appointed on March 25; when he was unable to settle the dispute

## **Immigration in 1st Half Down Sharply from 1957**

Immigration to Canada showed a marked decline for the first six months of this year: 67,744 new arrivals compared with 182,416 for the same period in 1957.

However, during the second quarter of 1958, a total of 46,501 immigrants entered Canada, an increase of 25,258 over the total during the year's first three months, according to the Department of Citizenship and Immigration.

There was a sharp year-to-year drop in the number of immigrants from most countries. Immigrants from the United States increased in the six-month period to 4,700 from 4,532.

Of the 67,744 immigrants who arrived in the first six months this year, 35,742 were destined to the labour force; the occupational group of 10,806 of the newcomers was "manufacturing, mechanical and construction"; of 5,952, service; of 5,011, labourer; of 4,107, clerical; of 3,544, professional; of 3,076, agricultural; and of 1,289 commercial.

---

## **Gain Dental Insurance In Collective Bargaining**

Non-profit dental insurance for its members has been obtained through collective bargaining with Helena Rubinstein Inc., by a New York local of the Oil, Chemical and Atomic Workers International Union.

Coverage will become effective November 1 through Group Health Dental Insurance, Inc., first non-profit dental plan in the United States. The plan provides that members may use their own dentist. Benefits are comprehensive and include the most frequently needed dental services.

The local's president said the agreement heralds a trend of collective bargaining for dental benefits to complete the health package.

---

a board was formed on April 15; its majority report was presented on July 25 and was rejected, Mr. Starr stated. The Government was still trying to effect a settlement.

Official report covering recommendations made to the Government at the National Winter Employment Conference would be available to the Government in a few days so that it could be studied carefully, the Minister of Labour announced.

*Second reading*, including partial clause-by-clause discussion, given Bill C-55, to be known in short form as the Broadcast Act. Purpose of the Bill is to establish an independent board of broadcast governors to regulate broadcasting in Canada and provide for continuance of the Canadian Broadcasting Corporation.

**August 26**—*Clause-by-clause* discussion of Bill C-55 completed. The Bill was given third reading and passed.

**August 28**—*Lower-cost homes* will be available through new plans prepared by Central Mortgage and Housing Corporation, the Minister of Public Works announces. The homes, if built in remote, sparsely populated areas, will cost about \$5,000; if built in small centres, about \$8,000.

*Final approval* given Bill C-56, to authorize construction of a bridge across Lubec Channel between the State of Maine and the province of New Brunswick.

**August 29**—*Time required* to review suggestions for amendments of the Industrial Relations and Disputes Investigation Act will be a governing factor in deciding when amending legislation will be introduced in the House, the Minister of Labour asserts. He noted that three national organizations had not yet submitted recommendations for amendments: Canadian Labour Congress, Railway Association and Canadian Construction Association.

*Proposed Bill of Rights* would be given first reading during the current session of Parliament and would then be carried over to the next session before final action was taken on it, the Prime Minister suggested. All parties agreed to this procedure.

**September 1**—*Labour Day* marked by tributes to Labour from House leaders of all parties.

*Saskatchewan River Dam Project* agreement, following lengthy discussion, given unanimous all-party approval. The agreement was signed July 25, the Prime Minister advised, in introducing the resolution and requesting its approval.

**September 2**—*Unemployment insurance benefits* are not available to persons concerned with a work stoppage arising out of a labour dispute, the Minister of Labour asserts. "...Whether a stoppage of work arising from a labour dispute is legal or illegal has no bearing on the payment of unemployment insurance. No consideration whatsoever is given to the merits or demerits of the matter in dispute..."

*Second reading* given Bill C-51, designed to prevent "dumping" by providing authority to value imported goods at a price that includes a reasonable profit.

**September 3**—*No federal funds* were paid to the province of Quebec on behalf of unemployable persons last year, since the province has not yet signed an agreement with the federal Government under the Unemployment Assistance Act.

*Government housing loans* to small builders, in certain cases, to be increased from 25 to 50 as a means of combatting unemployment this winter, Minister of Public Works announces. A builder must have used his first 25 loans, however, before obtaining further loans. If a builder has used 10 of his original 25 loans, he may obtain only 25 loans—not 40. But if a builder has used his first 25, he is now eligible for 25 more. The Minister hoped the plan would allow for 160,000 housing starts in 1958.

**September 4**—*Expenditures for advertising* to encourage winter employment will be on a per capita proportion of population in each region of the country, the Minister of Labour tells Commons.

*Summary in French* of the proceedings at the National Winter Employment Conference, held in Ottawa July 14 and 15, will be made available, the Minister of Labour says.

*Mediation in dispute* between the West Coast Steamships and the Seafarers' International Union and two other unions involved is being carried out by Eric Taylor, Labour Minister Starr reports. Matters in dispute have been reduced to four. In the matter of the longshoremen's strike, pensions were the chief issue, the Minister asserted, and he hoped that discussions on it would soon be resumed.

**September 5**—*Bill of Rights* to assure Canadians recognition and protection of human rights and fundamental freedoms, introduced in the House by Prime Minister, given first reading and, with approval of all parties, placed on the Order Paper for consideration at the next session.

*Bill No. C-51*, designed to eliminate dumping of foreign goods in Canada, given second reading after lengthy debate. During the debate the Prime Minister drew attention to favourable comments on the Bill made by leading officials of the textile unions and the United Automobile Workers. Bill given third reading and passed.

**September 6**—*First session* of 24th Parliament brought to close.

# Technological Change in the Household Appliance Industry

Continued trend towards mechanization, greater volume of production from individual plants seem probable, states newly published third report produced by research program on training of skilled manpower

A continued trend towards mechanization in the household appliance industry and a greater volume of production from individual plants in the industry seem probable, it is stated in a report on technological changes and skilled manpower in that industry just published by the Department of Labour.

The report\*, the third in the series being produced under the Department's Research Program on the Training of Skilled Manpower, was prepared by the Economics and Research Branch. The first two reports were: No. 1, *Progress Report* (summarized in the *LABOUR GAZETTE*, Aug. 1957, p. 940) and No. 2, *Technological Changes and Skilled Manpower: Electrical and Electronics Industry, Heavy Machinery Industry* (L.G., Nov. 1957, p. 1281).

The latest report is based on field work by Prof. William Bruce of McGill University and Prof. Jacques St. Laurent of Laval University.

The many different kinds of technological change proceed at different rates in different plants, largely because of the differing economic positions of the firms concerned, the report points out. The most important changes tend to be introduced by firms with a large volume of sales and access to large reserves of capital.

The other main conclusions of the study are:

—In recent years, while the physical volume of production has been increasing, the number of production workers employed by the plants included in the present survey has been decreasing. Output per employee has been increasing as a result of technological changes.

—Few employees have been laid off as a direct result of technological changes. However, when layoffs occur during periods of business recession, it seems possible that they may be due in part to earlier technological changes, rather than due entirely to market conditions.

—Employers in most cases have planned the introduction of technological changes in such a way as to minimize the displacement of employees. It is desirable to continue this policy, and to provide for the retraining of displaced employees when this is required to fit them for other jobs.

—The proportion of manpower employed in direct production tends to be reduced by technological change, relatively to the proportion employed in such functions as engineering, quality control, maintenance, and tool-making. These latter functions require a much higher percentage of skilled and highly skilled manpower than direct production. The relative demand for skilled and highly skilled manpower is therefore increasing.

—In such functions as maintenance, the level of skill required is rising, chiefly because of the need for more theoretical knowledge of such subjects as electronics, hydraulics, or metallurgy.

—The volume of engineering work done in Canadian plants is increasing, in spite of the widespread use of imported designs.

—The mechanization of office work has been proceeding perhaps still more rapidly than that of production. However, this has been accompanied by a rapid increase in the volume of office work, and in the variety of data required by management, and the rapidity with which it is processed. Total office employment has been increasing in the plants surveyed, unlike production employment.

—In several fields, including engineering, maintenance, quality control, office work, and others, there is an increasing demand for workers trained to higher levels than in the past. There is especially a demand for more intensive training in such abstract fields as mathematics, physics, chemistry, metallurgy, electronics, or hydraulics. This fact is important in the planning of future vocational training.

The household appliance industry was chosen for study, the report says, first because it is a highly mechanized mass-production industry in which technological improvements are likely to occur frequently,

\**Technological Changes and Skilled Manpower: Summary Report on the Household Appliance Industry.*

and secondly because the volume of production is "reasonably measurable" because it consists of a few products produced in large numbers. Nine leading plants in the industry in Ontario and Quebec were visited (more than 90 per cent of the industry is situated in these two provinces).

### Changes in Production and Employment

Statistics for six of the nine plants included in the survey show that during the years 1949 to 1957, while there was on the whole a substantial upward trend in production, the number of workers employed decreased slightly. The number of supervisory and office employees, however, rose during this period from 22 per cent of total employment in 1949-51 to 32 per cent in 1955-57, though this increase was not quite enough to counterbalance the drop in the number of production workers.

### Types of Technological Change and Effects

The report mentions four main types of technological change: the introduction of new products or more complicated products, changes in production processes, changes in materials, and changes in organization within the plant.

Changes in production methods usually require the investment of capital. The rapidity of these changes varies from one plant to another, depending on the firm's ability to finance the changes, as well as other economic factors.

Changes in the kind of materials used, such as the use of plastics instead of metals, may lead to a saving of labour in production. The introduction of improved machines may have the same result. Such machines usually require fewer operators for a given volume of output. The operators may not require more skill than those of the old machines, but they may have more responsibility.

Since the more highly automatic machines are likely to turn out a more uniform product the work of inspection may be reduced. However, the inspectors who remain may need to have more skill.

### Displacement of Manpower

The survey uncovered a considerable number of examples of the displacement of workers by technological change in the nine plants visited. The total effect of such changes on employment during the nine-year period covered is shown in one of the tables in the report.

"It is impossible", the report notes, "when employment decreases substantially, as it did, for example, between 1953 and 1954,

to estimate how much of the decrease is due to technological changes and how much to a decline in sales... Moreover, the difficulty of distinguishing technological unemployment from cyclical unemployment may be increased by a lag in the manpower effects of technological change."

It is also pointed out that technological changes in a plant in one industry may have effects on employment, either favourable or unfavourable, in other industries or in other plants in the same industry.

As to the effects on the workers directly displaced by technological changes, the report says: "However, a gradual reduction in the number of jobs available in a plant, due to technological progress, does not necessarily result in heavy layoffs. The normal turnover of employees may be great enough to enable this reduction to be made merely by not hiring replacements for those who leave, without any actual layoffs of employees. This means, of course, that some people who would under former conditions have obtained jobs in this particular plant are now no longer able to do so. The impact of displacement is thus passed on from the actual employees of the plant to this anonymous group outside, which may consist of young people entering the labour force, of those currently unemployed from other causes, or of older people or others who are marginal members of the labour force.

"These people who are indirectly affected by displacement will not feel the impact at all, if the economy is growing and employment in general is expanding rapidly. At such a time, the impact of displacement may be dissipated without perceptibly affecting anybody. In actual fact, during the last decade, the rapid growth of the Canadian economy has both encouraged technological change and made its effects easier to absorb."

### Demand for Different Types of Manpower

"One broad result of technological changes appears to be a decrease in the demand for manpower for direct production processes—machine operators, for example—relatively to the demand for indirect plant labour, i.e., workers in maintenance, the toolroom, engineering. Such a trend is likely to mean a relative increase in the demand for skilled workers..."

One of the tables in the report shows that while only 2 per cent of production workers in eight plants surveyed were classed as highly skilled and 11 per cent as skilled, 19 per cent of maintenance workers were highly skilled and 48 per cent

skilled, and among toolroom workers 40 per cent were highly skilled and 50 per cent skilled.

Regarding the effect of technological changes on the degree of skill required of production workers the report says:

Do technological changes result in changes in the type of worker required on the production line? Do the new, more complex machines require more highly skilled operators? In this respect the effects are varied. Examples can be found in which the new process requires a higher level of skill than the old. On the other hand, it is stated by some managers that the average level of skill required of production workers is decreasing as processes become more automatic.

It appears dangerous to generalize on this point. However, whether or not a higher level of skill is required, the demands on the worker may increase in other ways. The newer processes of production have a higher output per hour, and the rhythm is usually less flexible. Each worker supervises an increased quantity of equipment. The cost of a single mistake is therefore likely to be greatly increased. The worker may therefore be required to show greater alertness and a greater sense of responsibility.

With regard to the effect of progress on the demand for professional engineers, although the report mentions certain conflicting tendencies, it states:

In comparison with some other industries, relatively few graduate engineers are employed in the household appliance industry... However, as a result of technological advances and of some of the other trends which have been mentioned, it seems probable that requirements for engineering personnel will increase in the industry more rapidly than the total number of employees. This

means an increasing demand, not only for engineers, but also for highly skilled engineering assistants, for draftsmen, and for various other types of highly trained manpower, such as model makers or process planners.

The report adds that the level of skill required of maintenance workers is rising because of the increasing complexity of equipment. In addition to electricians there is now a demand for electronic technicians. In addition to plumbers and steamfitters, men are required who understand hydraulic and pneumatic systems. Maintenance welders must be able to deal with a greater variety of metals and with new techniques.

It seems likely, according to the report, that changes in the industry are bringing about an increase in the proportion of total plant labour employed in toolrooms, of which, as already mentioned, about 90 per cent was found to be skilled or highly skilled.

"There appears to be a gradual tendency towards the employment of somewhat fewer but somewhat more skilled inspectors, for a given level of output," the survey found.

The introduction of electrically-controlled calculating and other machinery into plant offices has resulted in only small reductions, and sometimes no reduction, in office staff, the report states. However, "without the machines... there would probably have been a much greater increase in employment for office workers, but the work would have been done less efficiently."

---

## 1958 Research Grants Announced

Four universities receive grants under Labour Department-University Research Program for studies in labour-management relations field by faculty members or graduates, bringing to 33 number of grants made

Research grants to four Canadian universities have been authorized under the Labour Department-University Research Program. Such grants, for research in the field of labour-management relations, are made by the Department of Labour each spring under the joint research program with the country's universities.

The four universities that received grants this year were: McGill University, University of Ottawa, University of British Columbia, and University of Alberta.

The projects approved under the program, which were proposed by members of the staff or graduate students of the four universities, and the persons who will undertake them, are:

1. A study of the effect of technological change on union-management relations (with reference to the dieselization of the Canadian railways), by T. D. Williams, graduate student, McGill University.

2. A study on labour-management relations in metal mining industries of the Noranda area, by Prof. Jean Mehling of the Faculty of Social, Economic and Political Sciences, University of Ottawa.

3. A study of arbitration in the settlement of disputes between teachers' organizations and school boards in British Columbia, by R. K. Davies, graduate student at the University of British Columbia.

4. A study of labour arbitration in British Columbia, by J. S. Dietrich, law student at the University of British Columbia.

An additional grant has also been approved for the completion of a study undertaken last summer on the experience with the supervised strike vote in Alberta and British Columbia, by Prof. F. R. Anton of the Economics Department, University of Alberta.

The five grants authorized this year bring to 33 the number of studies that have been supported under the program. To date, 17 studies have been completed and forwarded to the joint Labour Department-University Research Committee, on whose recommendations the grants are paid.

The studies for which grants were authorized in 1956 were listed in the July 1956 LABOUR GAZETTE, page 834. The studies for which grants were authorized in 1957 were:

"The Juridical Extension of Collective Agreements in the Quebec Building Industry," by the Rev. Gerard Hebert, S.J., McGill University.

"Labour Relations in the Canadian Basic Steel Industry," by A. M. Kruger, University of Toronto.

"The Supervised Strike Vote in Alberta and British Columbia," by Prof. F. R. Anton, University of Alberta.

Studies for which grants were authorized during the period 1951 to 1953 inclusive

The demand for construction workers appeared to be increasing in most areas of Canada at the beginning of last month, according to the monthly employment summaries prepared by the regional offices of the National Employment Service.

There were shortages of skilled construction workers in the Quebec, Ontario and Prairie regions and a shortage appeared to be developing in the Atlantic region. In the Pacific region, however, large surpluses of such workers were available.

In Quebec these shortages, as before, were being overcome by the transfer of workers from surplus areas.

In the Maritimes, work on highways was employing a large number of construction workers but the use of heavy machinery was reported to be cutting into the need for manpower.

The Pacific region reported that all employment offices there had a labour surplus, with a broad range of skills and occupations, and that any demand could be met without difficulty.

and for the years 1954 and 1955 were respectively listed in the April 1954 (page 540) and in the July 1956 (page 834) LABOUR GAZETTE.

Several studies supported by the program have been published as books:

R. C. Pratt and S. J. Frankel, *Municipal Labour Relations in Canada*, Industrial Relations Centre, McGill University, 1954, 87 pp.

H. A. Logan, *State Intervention and Assistance in Collective Bargaining*, University of Toronto Press, 1956, 176 pp.

A. W. R. Carrothers, *The Labour Injunction in British Columbia*, CCH (Canadian) Limited, 1956, 176 pp.

C. H. Curtis, *Labour Arbitration Procedures*, Department of Industrial Relations, Queen's University, 1957, 90 pp.

M. Bouchard, *Théorie du salaire et conventions collectives*, Faculté des sciences sociales, économiques et politiques, Université de Montréal, 1957, 329 pp.

Summaries of the first four books have been published in the LABOUR GAZETTE; 1954, p. 1274; 1956, p. 1239 and p. 1502; 1957, p. 540. A summary of the fifth book will appear in a later issue.

Also, a volume edited by Prof. H. D. Woods of McGill, composed of five of the studies dealing with the settlement of industrial disputes in various industries, is now in the process of publication.

Employment in manufacturing was generally good, except in the Atlantic and Pacific regions.

In Nova Scotia's steel manufacturing and transportation equipment manufacturing employment had dropped, and in Vancouver machine shops and engineering establishments were operating below usual capacity. Sheet metal shops in British Columbia were still affected by labour disputes in the construction industry and, as a result, a large number of experienced tradesmen remained unemployed.

Domestics, waitresses, cooks, nurses and qualified stenographers were in short supply across the country. Laundry and dry cleaning employees were needed in all regions except the Atlantic, and experienced bookkeepers were needed in the Halifax area.

Most regions indicated an unfavourable job situation for youths. The Quebec region reported a 50-per-cent drop in job vacancies for youths, and in Ontario, unemployment was thought to have encouraged many young persons to return to school.

# McGill University's 10th Annual Industrial Relations Conference

On general theme, "Labour Relations—Retrospect and Prospect," five speakers discuss major issues in union-management relations, legal problems of arbitration, and labour relations in the past and future

"Labour Relations Trends—Retrospect and Prospect" formed the theme of the 10th industrial relations conference at McGill University September 11 and 12. The conference, which marked the tenth anniversary of the founding of the University's Industrial Relations Centre, was attended by some 215 delegates representing business concerns, labour organizations, employers' organizations, other universities, and federal, provincial and municipal governments.

The conference was addressed by six speakers. They, and the titles of their addresses, were: Prof. H. D. Woods, Director of the Industrial Relations Centre, "Major Issues in Union-Management Relations" (paper prepared in collaboration with Adam Bromke, Department of Economics and Political Science, McGill); Bora Laskin, Professor of Law at the University of Toronto, "Some Legal Problems of Arbitration"; William J. Smith, National President, Canadian Brotherhood of Railway Employees and Other Transport Workers, "Retrospect and Prospect in Labour Relations"; and Edward Benson, Industrial Relations Manager, Consolidated Mining and Smelting Company, "Business and Labour Relations, Past and Future".

Frederick Harbison, Director of the Industrial Relations Section and Professor of Economics, Princeton University, was the speaker at the conference dinner. He spoke on "Industrial Relations in the United States—Past and Future".

Robert Cox, Chief of the Special Research and Reports Division of the International Labour Office, who acted as chairman at the panel discussion that closed the conference, spoke briefly on "Some International Aspects of Labour Relations".

The panel consisted of the principal speakers at the conference, with the exception of Prof. Harbison, who was unable to remain for the discussion. William Smith also left early without taking part.

## Prof. H.D. Woods

State intervention, with its provision for certification of bargaining units and its compulsion on the parties to bargain in

good faith with the object of reaching agreement in a written contract, may have introduced elements of rigidity that create new problems in labour relations, said Prof. H. D. Woods, Director of the Industrial Relations Centre, in the opening address of the conference. He was presenting a paper prepared in conjunction with Adam Bromke, research assistant in the Centre.

He mentioned the following "elements of rigidity":

—The establishment of a bargaining unit is accompanied by a series of vested interests in the *status quo*; but changes in the economy may call for alteration of the unit.

—Minority rights may be injured by the establishment of a monopoly right to bargain collectively.

—The elimination by law of the organizational strike may play into the hands of an anti-union employer, and delay or prevent collective bargaining from taking place.

—The legal compulsion to arrive at a written contract has diverted attention from more flexible methods of adjustment and "encouraged excessive legalism in labour relations. It appears to have discouraged initiative in working out experiments in joint machinery and tended to pour all collective bargaining into a common mould."

Prof. Woods said that "the contract concept of the agreement has had a great deal to do with the introduction of the annual crisis and had probably encouraged the parties to adopt a military as well as a militant attitude towards industrial relations."

Most labour relations acts, the speaker said, provide for compulsory intervention in the settlement of disputes that arise during the life of an agreement; but this has not been entirely successful in preventing strikes and lockouts during that period. A quarter of the strikes that occurred in Canada during 1956 had taken place during the life of an agreement, in spite of legal prohibitions and "no-strike or lockout" clauses. Although these strikes accounted for only 4 per cent of the workers involved in strikes during the year and 5 per cent of the time lost, they did show a considerable degree of failure.

Although during a 40-year period strike activity had been high in times of inflation, there is no evidence that in the long run strikes are becoming more numerous or more severe, the speaker said. "On the whole," he added, "strikes as a factor in labour relations are declining."

The new feature of the Industrial Relations and Disputes Investigation Act of 1948, compared with the 1907 Act, was the adoption of positive measures to ensure that employees were able to organize to bargain collectively with their employer. The new Act "carried forward into public peacetime labour policy the measures which were developed in the wartime emergency," the speaker pointed out.

"The major objective of the Labour Relations Boards is to eliminate recognition disputes," he said. "A decade of experience proves that this goal... has to a very large extent been accomplished."

In spite of this, the adoption of the certification procedure has brought problems of its own. Prof. Woods outlined its main shortcomings as follows:

- Certification was merely a formal recognition, which was of little use unless it could be enforced in practice, which did not always happen.

- The fairness of certain criteria used in the process of certification was questioned by both Labour and Management.

- Certification tended to establish rigidities, to encourage reliance on third party machinery, and it had the effect of preventing collective bargaining in cases where the minimum requirements were not met.

The fundamental criterion for certification accepted in Canada as well as in the United States was that to be granted certification a union must have the support of the majority of the workers affected, he explained. This was in contrast to the "pluralistic system of trade unionism prevalent in some countries of Europe" under which more than one union might bargain for employees in the same group.

The "basically monolithic system" in force on this continent offered "virtually no protection for a minority union or a minority group," but it "satisfied our North American taste for bigness," and by favouring strong unions it established "a healthy balance of power" as against large companies.

Despite the general acceptance of the principle of majority representation, the provisions of the various labour acts and the rules of the labour relations boards are often criticized on the ground that they prevent the expression of the true sentiments of the workers, Prof. Woods said.

The criticism that the certification procedure in some provinces does not follow the criterion of majority representation is true to some extent, he went on. As an example he cited Ontario, where in a representation election those not voting "virtually vote against the union".

Since as an average in that province 12 per cent of the workers abstain from voting, it suffices for the opponents of the union to win 44 per cent of the actual vote to prevent the union from being certified. In other words, what is required in Ontario is a minimum majority of 56 per cent.

Conversely, Saskatchewan requires a union to gain 50 per cent of the vote providing the majority of eligible voters participate in the voting, so that it is theoretically possible for a union to win certification with the support of less than 30 per cent of the workers.

Moreover, the purpose of certification can be killed by delay in signing a collective agreement; the "exceedingly lengthy" conciliation process can be used for that purpose, he said. The brief submitted by the Ontario Federation of Labour to the Select Committee on Labour Relations established that the minimum time required to complete the process was more than 11 weeks but that the average time taken was 28 weeks.

The speaker distinguished between recognition *de jure*, recognition *de facto* and *bona fide* recognition. The labour relations board, he said, could bring about the first two but it could not ensure the third.

"Administrative measures... can eliminate a lot of abuses, but still cannot ensure that collective bargaining is conducted in good faith. This is up to the negotiating parties themselves," Prof. Woods asserted.

The fact that certification deals effectively with only one out of the three stages of recognition to a large extent explains the unions' insistence on inclusion of the closed shop or union shop clauses in collective agreements.

The insistence of the unions on union security, however, was not to be explained as due merely to the desire to strengthen recognition. Union security provisions also enormously strengthened the position of the unions in dealing with the employees, and were an effective means of maintaining union discipline. In fact the abuse of such power was a source of increasing concern even among the friends of the union movement.

On this vexed question of union security, Prof. Woods said that "the argument in favour of the compulsory check-off is quite strong within the existing framework of the Canadian labour legislation". It rests on the fact that since certification empowers

the union to bargain for all employees in the unit, it seems natural that all should be required to contribute to the union's finances.

On the other hand, "the argument against compulsory union membership, though of an entirely different nature, is equally strong," he said. "It is basically the same type of argument which has been originally put forward to promote trade unionism. It is inspired by the humanitarian motives of defending the underprivileged and the weaker against the more fortunate and the stronger."

Although majority rule was the essence of democracy, so also was respect for the rights of a minority. Consequently there was little justification for trade unions to compel any individual to become a member. "In doing so," said Prof. Woods, "they destroy the same philosophy which enabled them to secure their present position."

The time is ripe for a fresh appraisal of unions and management and the public interest, he declared. "The most important people to do the appraising are not the university odd-balls but the participants and those directly connected with them.

"Is it totally unrealistic to think of a diversion of some of the vast quantity of defensive thinking now being devoted by Management and Labour in their own interest to a joint pool of intellectual effort directed to joint rather than antagonistic solutions?"

Concluding, Prof. Woods said:

"There is abundant evidence that unionism needs to face up to the implications of its emerging power position, needs to solve internal problems created by its own growth, problems involving its relationship to its own members as centralizing proceeds at the expense of local control, and problems concerning its changing relationship with Management and the public.

"Management would do well to demonstrate more clearly that it believes what it so often publicly professes about collective bargaining.

"Segments of both could do with a code of ethics."

In the question period that followed his address, Prof. Woods said that his general point of view was that it was desirable to do away with conciliation boards as far as possible. He suggested that their use should be restricted to "public interest disputes" such as those involving railways.

Replying to a delegate who questioned the extent or desirability of what Prof.

Woods had described as *bona fide* recognition of unions by employers, he said that he thought such recognition existed rather widely. Some managers had a genuine interest in preserving collective bargaining, Management and union were bound to have conflicting objectives, and he thought that these were enough to preserve a certain degree of conflict, which was in some ways desirable.

### Prof. Bora Laskin

A three-man board of arbitration is a waste of manpower and time, asserted Bora Laskin, Professor of Law at the University of Toronto and one of the leading students of constitutional law and labour law in Canada, in the afternoon address on the first day of the conference.

The argument for single arbitrators of a public character was equally applicable to the various labour relations boards, he added. "It is high time that the bipartisan or tripartite composition of these boards be altered in favour of full-time public boards."

At the same time he expressed the opinion that "arbitration, as the obligatory ultimate step in grievance adjustment, has emerged as the most durable statutory contribution to peaceful industrial relations".

Labour relations boards, conciliation boards and arbitration boards are today's machinery for the encouragement of collective bargaining and the enforcement of collective agreements, he stated. "Resort to the courts to challenge or repress an alleged illegality in purpose or in behaviour has not been ousted by (these) tribunals," he explained, "but the effect of our legislative pattern of labour relations regulations has, by and large, been to postpone resort to the courts until the statutory agencies have had a chance to function."

The nominee of either disputant on an arbitration board will "almost invariably... project the party interest when he sits as an arbitrator," the speaker said.

"There should be no need for either Labour or Management... to have their respective cases argued twice," he continued. "Indeed, one certain way to raise the status of arbitration would be to free the chairman from the post-hearing pressures of his associates. Some chairmen, very wisely, ignore their party-oriented colleagues until they have sifted and analyzed the case by themselves."

In order to do away with "the present personalized kind of selection and rejection of chairmen," Prof. Laskin suggested that the arbitration of labour disputes should

either be absorbed into the existing legal and judicial system or be established "on a separate but equally full public basis".

Although it is common practice for the chairman to be appointed by the Minister of Labour if the parties do not agree in choosing one, the speaker pointed out that considerations of political expediency often hamper the Minister in his choice. The plan sometimes adopted by Management and Labour of choosing a single arbitrator or a rotating panel of arbitrators to serve for the term of a particular agreement showed a realization of the difficulties of *ad hoc* selection, he remarked.

"This has the added virtue of ensuring some consistency of interpretation. One of the vexing problems raised by *ad hoc* arbitrators is the variation in decisional principles in the interpretation of the same agreement," Prof. Laskin said. "The *ad hoc* three-man board of arbitration is least likely to product that consistency."

The speaker argued against the idea that "an interpretation once put upon an agreement is binding on succeeding arbitrators under the same agreement. I know of no principle of law that requires one arbitrator to bow to a principle expressed by a predecessor under the same agreement," he said.

Precedent as an operative theory depends on the existence of a hierarchy of adjudication; and there is no such thing in labour arbitration; nor would I espouse appellate arbitration tribunals. Forced adherence to awards of preceding arbitrators can lead only to aridity.

The lack of a record other than what the board itself can amass, because of the expense of shorthand reporters, makes deliberation more necessary than speed in arbitration hearings, he said.

Prof. Laskin defended the prominent role played by lawyers in arbitration, which, he said, was lawyer's work "in the sense that it calls for the technique and skills of the lawyer's craft adapted to the area of industrial relations.

"Arbitrators are variously engaged in developing a common law of collective agreements; they are making labour relations law rather than finding it."

There were two theories of collective agreement administration, he said: the "residual rights theory," which holds that a collective agreement is merely a restriction on otherwise unlimited management powers, and the theory that the collective agreement establishes a regime of order to which both employer and union must subscribe. The first theory contains many fallacies, he asserted, the most important

being that it ignores the shift from individual to collective bargaining. The second theory was a "more realistic starting point" for arbitrators.

In the vast majority of arbitration cases, the tasks of interpretation and decision may be competently discharged without bringing into play either of the theories. The terms of the agreement will be sufficiently expressed to embrace the issues.

One case where this is not so, Prof. Laskin said, is the contracting out problem. Arbitrators have divided on grievances arising out of the contraction of work forces or the refusal to supplement work forces because the work previously done within the unit has been assigned to an outside contractor. And the division has been on the lines of the two theories.

"The residual rights theory may be regarded as a reflection of strict interpretation of a collective agreement, an interpretation which minimizes the creative role of an arbitration tribunal," the speaker said, and he pointed out that perhaps the most important way in which the restrictive interpretation has been applied has been in regard to remedies for breaches of the agreement.

Except in unjust discharge cases, where agreements commonly stipulate the redress to be made, arbitrators were generally unwilling to insist on redress or to award damages. "To me this is an abdication of adjudicative authority," Prof. Laskin said. A refusal to award damages against an employer or a union where there is a proven violation causing damage was "a failure to provide the sanction which is envisaged by the assumption of the collective agreement obligation".

It was true, he said, that an arbitration board had no means of enforcing awards; but this could not be a criterion of its powers, since most statutory tribunals were in the same position. "Voluntary compliance works in labour arbitration no less than in respect to orders of more august statutory tribunals," he pointed out.

In a discussion earlier in his address of the evolution and deflection of legal doctrine, Prof. Laskin said there was no more drastic example in the field of labour relations than the Aristocratic Restaurants case (L.G., 1951, p. 1553), which "relieved trade unions of liability for what may be termed peaceful picketing".

Compared with earlier liberalization of doctrine, the most recent judicial experience with conspiracy and picketing issues in Canada "evidences a hardening," he continued. The judgments in cases concerned with refusal to cross picket lines have developed "a rather formidable basis of

liability of the picketers by finding that the real purpose of the picketing was not to advance the interests of the union in improved labour conditions, but rather to interfere with the employer's contractual relations with third persons by the establishment of a picket line in the foreknowledge that union sympathizers will not cross it. As a technique for outlawing even peaceful picketing, this approach leaves little to be desired, reminiscent though it is of labour law of 50 years ago."

There are indications, he said, that the courts are disposed to protect individual members against the arbitrary use of power by union officials, and to make union constitutions and bylaws conform to standards of reasonableness. It was a safe guess that should the judiciary be unable to provide adequate protection, "legislative redress will be forthcoming".

The speaker said that in his view a union certified as a bargaining agent was in duty bound to accept as members persons in the unit, as well as others who would be employed in the unit if union membership were not a condition of employment.

In reply to more than one question about the right of an employer, after an agreement was signed, to contract out work that had formerly been done by employees within the bargaining unit, Prof. Laskin declined to give any general opinion on the point. Each case must be treated on its merits, he said. In some cases he was of the opinion that an employer would be quite wrong to contract out work.

But, on the other hand, for example, where management had a choice between contracting out a certain kind of work and giving up that line of business altogether, "What are you going to do about it?" he asked. He stated emphatically that it must be realized that a collective agreement was not a guarantee of a job.

### **Prof. Frederick Harbison**

Trade unionism in the United States reached and passed the peak of its influence and power during the 1948-58 decade, in the opinion of Frederick Harbison of Princeton University, speaker at the conference dinner. Prof. Harbison is Director of the Industrial Relations Section and Professor of Economics at Princeton.

Going back 35 years, Prof. Harbison sketched the state of American industrial relations in the "so-called 'golden twenties', when there were no unions in the basic industries, collective bargaining was a term never used in polite society, there were practically no people in personnel work

much above the rank of chief clerk and the average employer regarded his workers with a sort of calloused indifference".

In those days, Prof. Harbison said, even the few companies who "in paternalistic fashion were concerned with the welfare of their workers... took every possible measure to make sure that workers never talked back and... would crack every union head that popped up".

All this was changed in the "New Deal Era". Helped by labour legislation and government encouragement of union organization, the industrial unions established the beach-heads of collective bargaining in steel, rubber, and automobiles," he went on. "Within the space of eight years all the industrial power centres which for years had been the impregnable fortresses of the open shop were transformed into bases of union power."

During this period, Prof. Harbison said, it was the great depression, the weight of public opinion, and the pressure of government, rather than the still not very powerful labour leaders, which "brought the big employers to their knees".

The speaker enumerated as the main development of the period:

The emergence of a national labour policy which guaranteed workers the right to join unions of their own choosing...and which openly advocated and encouraged collective bargaining as an indispensable institution of American capitalism.

The growth of new and quite idealistic unions in the basic industries...

The emergence for the first time of industrial relations as a top-level concern and function in most major corporations...

The identification of the liberals, or progressives, with the cause of unionism...

The World War II period, Prof. Harbison said, was best characterized as a period of "government seizure of collective bargaining". The prohibition of strikes and the determination of wages and conditions by government labour boards meant that "the basic decisions in industrial relations were made by those in charge of wage and price stabilization. In this period unions became firmly rooted in the industrial plants as a result of government-imposed maintenance of membership clauses."

Before, during, and after the war it was generally believed that Labour had a great and growing political power, "but the political power of Labour turned out to be a myth," the speaker said. It was the favour of the government of the time that gave this appearance of power; and, except in strictly local affairs, Labour never had much direct influence on the voters.

Passing to the 1948-58 period, Prof. Harbison mentioned a number of its main features. These included:

—A change from the simple encouragement of unions to the control of certain collective bargaining issues and labour union practices.

—The development of collective bargaining between large employers and large unions into "a business instead of a struggle".

—"Management no longer has a free hand in making the rules under which Labour is paid and works."

—Union leaders have become service agents for their constituents and the workers are becoming more and more willing to leave the making of rules to their leaders. "They pay their dues to the union and expect protection and benefits in return, and it is becoming increasingly difficult for them to participate effectively in union affairs."

—American employers are no longer on the defensive in collective bargaining. "They know what they want, and they know what they want to keep labour leaders from getting."

—The idea of voluntary membership in unions had practically disappeared by 1958. The vast majority of contracts provided for some form of union shop and most of the workers had no objection to it.

—"Corruption within unions has become a major problem."

—"The one-time sympathy of the liberals and progressives for the cause of organized labour has all but vanished." The unions are now powerful enough to take care of themselves, and in the eyes of the public have become pressure groups intent on the special interests of their leaders and members.

On the stationary, or declining, power of unions in the United States, Prof. Harbison pointed out that union membership as a proportion of the labour force has not been rising and may have been declining. This may partly be the result of the indifferent success in organizing white-collar workers.

What political influence Labour ever had, Prof. Harbison said, is dwindling. "The American public has come to fear rather than to favour unions. Congress is moving in to regulate the internal affairs of labour organizations."

The unions were now "pretty much on the defensive," he asserted, defending themselves against the employers, against Congress, and against the loss of members owing to "technological developments over which they have little control".

Summarizing, the speaker said that the unions and collective bargaining were becoming more mature, more stable and more legalistic; and also less important by comparison with other problems looming up in industrial relations.

The central industrial relations problem of the future will have its roots in a probably critical shortage in most categories of high-talent manpower, he predicted.

In the past, effort directed towards securing fair treatment for the common man had aimed at conformity and consistency. "But the skills and the concepts which have been useful in dealing with the common man are not always those most appropriate for dealing with high-talent manpower," Prof. Harbison observed. Such people want recognition as individuals, as originators of ideas, and as professionals.

He expressed the opinion that "unions will be subjected to a great deal more government regulation of their internal affairs". Whereas in the 1930's the government had been concerned with the workers' right to have unions of their own choosing, in the future its concern would be to protect their right to have union leaders of their own choosing.

Unions will not "provide inflationary pressures in the future any more than in the past," Prof. Harbison asserted. Wages and prices in the past three decades had been affected only slightly by unions and collective bargaining, he believed.

### William J. Smith

A continuance of the increasing demand for fringe benefits if governments "continue to lag behind public acceptance of the idea of co-operative action in the fields of health, old age security and unemployment protection"; and pressure for a further shortening of hours of work "as a means of combatting loss of jobs through automation... if labour is forced to cope with this problem on its own" were foreseen by William Smith, President of the Canadian Brotherhood of Railway Employees and Other Transport Workers, as matters that would probably bulk large in collective bargaining of the future.

Mr. Smith also predicted that if the present recession continues there would be a revival of labour's demand for greater equality in the distribution of wealth—a demand which had receded in the expanding economy we have had since the Second World War.

Two trends in collective bargaining that stood out in the decade following the war, the speaker said, were the increase in union security provisions and the gains made in

so-called fringe benefits. Another was the "negotiated increase in leisure time". Under fringe benefits he mentioned pensions, health and welfare, and, latterly, unemployment benefits. The greater leisure had come about through the shortening of the work week, paid vacations and paid statutory holidays.

During this period, "little progress was made towards greater equality of income. The pie is bigger but Labour's share remains roughly the same," he pointed out.

All the various forms of union security, including the different forms of check-off and the Rand Formula, with the exception of the closed and union shop, had been invented since 1946, the speaker remarked. Yet, strangely enough, he said, the two latter forms, which had been in existence since the last century, were the ones that had lately "come into public disrepute".

The partial success of "right-to-work" campaigns he ascribed partly to the rise of industrial unionism. As long as craft unionism was dominant people had seen the necessity for the unionist to protect "a skill he had taken years to learn". The right to do so was recognized as analogous to the right of the legal and medical professions to guard their standards.

Now, however, the need for the closed shop even for skilled tradesmen was lost sight of because "people think in terms of the predominant form of organization, in the big, mass-production industries".

Mr. Smith said that "union security will not be the issue nationally that it has been over the past 10 years unless Management and legislators set out to make it so." The principle of the check-off would continue to be recognized, but labour would make little effort to extend the closed or union shop, nor Management to get rid of it where it already existed, he thought.

"The increasing emphasis on fringes in the past 10 years represents a major social phenomenon," the speaker remarked. But "few unionists would suggest that collective bargaining is the best way to provide health, old age and unemployment protection services. Companies' varying ability to pay leads to a very uneven system of protection. Also, collective bargaining exerts only an indirect pressure on firms that are unorganized."

Trends in social security in collective bargaining, he said, are dependent on the kind of action our Governments take or fail to take. If the public authorities were to institute a really comprehensive system of social security, such things as pensions, medical and hospital plans, and unemploy-

ment benefit to supplement government action would cease to be collective bargaining issues.

Mr. Smith mentioned supplementary unemployment benefit as "the clearest case of concessions won at the bargaining table supplementing government action".

There will be a great deal of pressure, I would expect, over the next 10 years to improve our unemployment insurance legislation, and government response to this pressure will determine very largely whether supplementary unemployment benefits become a widespread collective bargaining issue.

The shortening of working hours, the increased length of vacations and the introduction of paid statutory holidays, negotiated through collective bargaining over the past 10 years, had brought about an average reduction of 522 hours a year in working time, Mr. Smith pointed out. This was "a truly remarkable reduction when one considers how long the 48-hour week remained as a standard".

The speaker believed that the one significant reason why Labour would continue to press for more leisure time was automation. "I, personally, am not too fond of the shorter work week as a means of combatting loss of jobs through automation, but I must confess that I can think of no other means if Labour is forced to cope with this problem on its own," he said.

Unless government and industry co-operated more than they seemed inclined to do in mitigating the effects of automation on employment, Mr. Smith said he could foresee strenuous efforts by unions to protect the jobs of their members by shortening the work week.

Other important collective bargaining issues raised by automation included: drastic changes in job classification, even when layoffs do not become serious; "the question of how the extra wealth created by automation should be distributed"; the need for providing jobs in government, commerce and trade to take the place of those lost in factories; and the "spectacular shift away from so-called production work to white-collar occupations, a trend that will be accelerated by automation".

Unionism will spread to white-collar workers, he thought, but this will bring changes to unions that become predominantly white-collar and changes in collective bargaining relationships.

Employees of the federal, provincial, and municipal governments have been denied full collective bargaining rights which, to be meaningful, "must include the right to withdraw their services," the speaker said. He asserted that the establishment of collective bargaining rights with governments is of major importance.

The "maturity" of Labour and Management which was assumed by many people in this country to have been reached during the past 10 or 15 years, and the disappearance of much of the bitterness, Mr. Smith attributed largely to the fact that business, for the most part, "has been having a picnic". He said good relations are relatively easy to maintain when Management is always in a position to make an offer and Labour is always able to produce an increase.

Turning to another aspect of collective bargaining, the speaker said: "The trend towards professionals on both sides of the bargaining table is probably irreversible. It need not be a bad trend, but combined with the extremely legalistic approach adopted by some conciliation boards, it could have the effect of removing wage determination from the control of those most vitally concerned—management and the employees. This would be a disaster over the long run."

What labour relations experts appeared to him to lack, Mr. Smith said, was "in some instances a clear appreciation of the employee attitudes peculiar to a specific firm or industry". No collective agreement could possibly cover every contingency, and "in the past the agreement was in practice supplemented by the recognition of a sort of 'natural justice'." In an industry with which he was unfamiliar, these practices represented only confusion to the man whose specialty was employee relations, with the result that he was likely to fall back on a strictly legalistic approach to employer-employee relations.

This attitude, the speaker said, in industries where the agreement was freely violated may be an improvement. In other industries where the agreement was applied with understanding and intelligence it can be a definite step backwards.

Referring to the pressure by trade unions for greater equality of income, which appeared to subside during times when wages were rising rapidly, the CBRE President said if the change in the business climate continued so that wage increases became hard to justify on the ground of increased profits or increased productivity, then greater equality of income can be expected to become the important issue it once was.

Social stability is possible in a static economy only where the basic economic relationships between classes of people are generally accepted by all. This is not the case in North America. Rightly, I think, our working population will not accept being stalled on the road to the kind of life they desire, if all around them, and in advertisements, they see that sort of life being lived.

If a static economy, or a pronounced slowing down in the pace of development, was to be our lot for the next decade or so, then, the speaker asserted, "managements dedicated to peaceful employee relations will have to lift their eyes from their own balance sheets and attempt to meet the aspirations their own advertisements and our democratic way of life have combined to create".

When asked to contrast some of the views he had expressed with what Prof. Harbison had said in his address, Mr. Smith said he thought there was an element of truth in Prof. Harbison's statement that employees have come to look upon organized labour as a business proposition. He thought that too many had come to regard a union as an insurance society. This conception of trade unionism was wrong and harmful, he thought. He believed that a protracted period of depression would show the workers that it is a social movement.

When asked to explain his statement that the union must not be regarded merely as the opposite number of management, Mr. Smith said that in his judgment trade unionism was basically a social movement whose objective was to secure a more equitable organization of society.

In reference to what he had said about the likely effect of a prolonged recession being a revival of Labour's demand for greater equality in the distribution of wealth, Mr. Smith was asked who, in 1958, were the "haves" and the "have-nots". The "haves" he defined as those who were enjoying the fruits of industry without contributing proportionately to their production, for example, bondholders and shareholders.

In replying to a question about the extension of bargaining rights to government employees, Mr. Smith reiterated that a government should give its employees the same rights it had compelled private employers to grant to theirs. He admitted that strikes in public services caused inconvenience to the public, but he asserted that union leaders had in no instance endangered the public welfare. He distinguished between danger and inconvenience. Essential services were protected, he said.

When asked by a union representative to justify the distinction he had drawn between craft unions and industrial unions in relation to the closed or union shop, Mr. Smith made it clear that although he questioned the need for these forms of union security for industrial unions it was his "firm opinion" that an employee in a mass-production industry had an obligation

to contribute to union funds—an obligation which should be enforced by means of a compulsory, irrevocable check-off. But he would give such employees the right to decide whether or not to join the union.

### Edward Benson

A lack of honesty in leadership in both Labour and Management and too much surrender to third parties of the basic relations between employer and employees were among the undesirable outgrowths of the postwar period of prosperity, said Edward Benson, Industrial Relations Manager, Consolidated Mining and Smelting Company, in an address on the last afternoon of the conference.

By honesty in leadership in the labour relations scene, he explained, he meant giving honest leadership to the people who depend on management men and union officials to give them proper direction.

Mr. Benson urged the need for the development of "some sound fundamental philosophy" in industrial relations which would be accepted by the leaders of both Capital and Labour, in place of the policy of political expediency which had characterized the postwar period.

The past 10 years have produced two important facts, he said: the emergence of the trade unions to a big power status, and the establishment of "a sort of permanent battleground between organized labour and management".

With the generally accelerated pace of industrial activity, the result of the lack of some well-considered and fundamental personal philosophy in human relations has been a "lamentable tendency to conduct ourselves in these fields on the basis of a crisis judgment," Mr. Benson asserted.

He added that he thought some people concerned with these activities "preferred to do business in this manner".

During the postwar period we had witnessed the transfer to the trade unions of a great deal of the power that had formerly rested with the employers, he went on. Where formation of an association of employees for group representation to the employer concerning conditions of employment normally would be the result of an impetus from within the group, in most cases in the major industries in this country it is the result of an impetus from without the employer's organization and generally by non-employees.

In connection with this development he said he could not admit that a person who travelled from some distant place to organize a group of employees was primarily interested in their welfare, and he

pointed out that "this development has caused the employer, in many cases by default, to surrender to the group representative too many areas of his employee relations which properly belong as a matter between the individuals concerned.

"To put it more bluntly, I do not think any factor has caused the loss of employee individualism more than has the growth of big unionism over the past decade," Mr. Benson said.

The growth of the trade union into a big business had resulted in many union officials becoming full-time employees, and there was "a very natural tendency for those who have such positions to seek to perpetuate themselves in office".

The continued successful existence of men in these positions "depends to a considerable extent on their maintaining as wide a gap as possible between management and its employees," he said.

Management, on its side, the speaker suggested, had contributed to the establishment of such a gap by its preoccupation with other matters.

With the development during the past decade of Labour's own group of professionals to match the professionals who now represented the employer, Mr. Benson thought "that one of our principal concerns should be that the professionals on both sides develop some consistent fundamental philosophy in the industrial relations outlook which will assure that all concerned are given a fair deal over the long term".

The fact that the St. Lawrence Seaway was "subject to complete closure at a word from Jimmy Hoffa" was another cause for concern. The railroad firemen's strike was another instance "which demonstrated that tremendous concentration of power in the hands of a few individuals can shake our entire economic structure," Mr. Benson said. Although he agreed that legislative action was necessary "to minimize such possibilities" he wondered whether it got at the root of the matter.

Returning to the question of honest leadership, he said he thought neither side emerged "with an unblemished record on this score".

Our leading trade unions have been guilty of putting political expediency ahead of forthrightness, he said. Even those trade union officials who privately admitted that "the tremendous rate of improvement in the living standards since 1945 cannot be sustained *ad infinitum* balk at confronting their principals with any future possibilities other than the continuation of the upward spiral".

Management on its side had also shown a similar lack of honesty, the speaker said. "I consider that over the past decade management actions in a number of instances have been responsible for conditioning the average employee to the view that the 'pie in the sky' philosophy proposed by some trade union leaders had some basis in fact. At the peak of the boom there were a good many wage settlements arrived at on a 'peace at any price' basis."

He then asked: "What are we doing to give honest leadership with respect to what the country generally and what our own employees particularly can expect from productivity gains?"

The Gordon Commission had estimated that a computation of a rise in productivity of 2½ per cent a year during the next 25 years might be optimistically high. If this estimate were accepted how could the wage increases granted in the 13 postwar years be reconciled with honest leadership, the speaker asked.

He referred to the current concern across the country with respect to the various labour statutes governing labour relations. He said that he was not concerned with the appraisal of these statutes, "but only with the attitude of mind which recent widespread criticism of them seems to exhibit".

It was hardly reasonable, Mr. Benson said, to expect those who had come to believe that when Management said "No" it did not mean "No" to adjust themselves overnight to the changed condition in which it did mean "No". As a result of the change there have been a number of major upsets in the labour field and the accompanying criticism of the formal labour relations machinery has been to some extent due to the natural tendency to search for a whipping boy.

The speaker deplored the development during the past decade of "a sort of fear complex on the part of management and organized labour". One form of it was deliberately generated by certain labour leaders who created in the minds of their constituents an apprehension about the intentions of their employers about such things as wage reductions, alleged speed-ups, etc., in order to make their constituents look to them for protection.

Another kind of fear was that which caused Management to balk at breaking new ground "because of a fear of being trapped in some indefinable way by the unions, or fear that departure from the established conventions will give them the status of the ugly duckling in the industrial relations barnyard."

He believed the same fears exist at the executive level in many leading trade unions. About the only significant labour relations experiment in a major industry during the past 10 years was the General Motors formula.

The employer is afraid to break new ground because he fears abuse which, because of contractual factors, he will be powerless to correct. The union, on the other hand, is afraid to surrender any of the basic protections it has built up. "They view with jaundiced eye the introduction of a benefit (such as sick leave for hourly rated employees) if it is left to the presumably benevolent ministrations of the employer.

"The sooner both sides tackle the main problem from the point of view of what each can undertake to allay and to guarantee removal of the other's fears, the better off we will all be," he said.

As to the future, the speaker said that during the present lull in our industrial activity leaders on both sides should consider the wisdom of continuing the conduct industrial relations programs "on a crisis basis". Here was where the need came in for "some sound fundamental philosophy" to govern policy.

"I think that labour in some areas should consider a bit of house-cleaning. I am not thinking in terms of getting rid of the relatively few obviously corrupt labour barons... I suggest that, beginning at the lowest level, the ballot box be reinstituted as the prime instrument in the trade union's arsenal. I, for one, have too much faith in the sound common-sense of the ordinary working man to be afraid of the consequences of any amendments which are made which assure that in the making of every major decision the man at the bottom of the heap gets his say."

In conclusion he said that "we should cease the process of proceeding from crisis unto crisis as we have done during these last 10 years... In industrial relations, a crash program gets you only a crash."

### Robert W. Cox

Robert Cox, Chief of the Special Research and Reports Division of the International Labour Organization, who acted as chairman at the panel discussion that closed the conference, spoke briefly on "Some International Aspects of Labour Relations".

"Of all the unanswered questions in world affairs," he said, "perhaps the one with the greatest long-term significance concerns the road which will be taken by the countries in Asia and Africa in which the bulk of the world's population lies."

Considering what kind of assistance could be given most effectively to such countries, he said that the first question in this connection was whether there were any universal principles in labour relations. He thought there probably were, and put freedom as one of these basic principles.

Freedom had different meanings for different people, and there is nothing universal about the idea of freedom, he said. But, he believed, "underlying these differences there is a common core which may be expressed as respect for the dignity and integrity of the human person." This implied "a further respect for the individual's right to express his personality through association in a group with others."

These ideas are "fundamental in any viable system of human relationships. They are basic to labour relations."

The speaker referred to the ILO's planned world-wide inquiry into conditions relating to freedom of association in all the member countries. He described it as a "new departure in international action on freedom of association".

The first two of these studies are to be carried out in 1959, at the invitation of the governments concerned, in the United States and in the Soviet Union. Mr. Cox said that this was the first time that governments had accepted international missions to make studies of this kind on human rights questions; and he expressed the view that it opened up "the prospect of a new type of international collaboration, and should reinforce efforts to lay a sound foundation for the healthy growth of labour relations throughout the world".

## Panel Discussion

To open the panel discussion, the chairman, Robert Cox, referred to Prof. Woods' remarks about the need for getting away from the appeal to third parties in labour-management disputes. This he contrasted with Prof. Laskin's emphasis on the growing resort to the assistance of third parties, and the development of a common law of labour relations. Was there agreement or disagreement here between the two speakers? he asked.

Prof. Woods said he thought there was a clash between his and Prof. Laskin's views. He, like Prof. Laskin, believed in a common law in labour relations, but they each might not have in mind the same kind of common law. The unwritten parts of company policy, or traditional practices within the company, formed an unwritten law. This kind of common law was a good thing. What he objected to was the institutionalizing of labour relations. Many arbi-

tration cases are decided in relation to the common law of the parties to the agreement. But he doubted whether a common law between different sets of parties was good.

Prof. Laskin said that a lawyer, like a doctor, was a trouble-shooter. You could not get a do-it-yourself kit with which to settle disputes. He agreed with Prof. Woods as to the desirability of flexible procedures. Arbitrators were not looking for work, and if the parties could agree between themselves to work under cover of a collective agreement in practices that were not touched by the agreement he was quite satisfied.

Prof. Woods said that he was not suggesting that a third party's hands should be tied. It was not a question of restraining him, but of getting rid of him. Much went on between the parties outside the scope of the agreement, and he would like to see more of this, and less reliance on the contract. If relations were made too rigid he could see in the renegotiation of the agreement little alternative to an annual crisis, because negotiations during the term of the contract were not provided for.

"Can you abolish third party intervention?" asked Prof. Laskin. Prof. Woods said that in England continuing agreements were the rule: when a dispute arose the parties negotiated; when they could not agree they had a strike.

Prof. Laskin said that he was satisfied if the parties wanted to rely on strikes. He pointed out that in the United States a legal strike was possible during the term of an agreement. He suggested that the long-term agreement at General Motors might have been responsible for the deterioration of relations between the parties.

Mr. Benson, in reply to a question from a delegate, said that he believed in the desirability of the parties' coming together more often during the term of an agreement. Contracts tie down only the main things, he said, and causes of disagreement keep on cropping up that call for settlement as they come up.

Referring to the opinion expressed by William Smith in his address that in future Labour would be satisfied with a check-off rather than the union or closed shop, a questioner wanted to know whether this would be to the advantage of Labour if it meant that the union lost enough members to lose also its certification. Would not the lack of a union or closed shop increase the danger of raiding?

Prof. Woods, replying in the absence of Mr. Smith, contended that the closed shop had originally not had much to do with union security, that it was rather a job protection device. He said that he would be surprised if a union lost members if it had a compulsory irrevocable check-off. If a union lost members under such a condition it might be a good thing for it to make way for another union.

Adam Bromke pointed out that in moving to form a new political party the Canadian Labour Congress would be following British rather than United States trade union policy, and he said that he would be interested to see how American unions would operate within a basically British policy. He said that in Canada, in contrast to the feeling in European unions, there was no great political enthusiasm.

Prof. Woods thought that what Prof. Harbison had said in his address about unions' having becoming business rather than social organizations should not be applied to Canada. He said that in Quebec there was a great deal of idealism in the labour movement.

On the subject of human relations, he said that we did not yet know a great deal about what motivated people. In arbitration cases often the real issue behind the dispute was not before the board. He gave an instance of a dispute in which a union had presented what appeared to be an absolutely unreasonable case. When he had come to look more closely into the matter, however, he had found that the real cause of discontent was quite different from the ostensible one. He said that he thought unions should make more effort than they do to get at the real issues.

# Provincial Labour Federations Hold Annual Conventions

Central labour bodies in New Brunswick and Nova Scotia held annual meetings in September. Unemployment, the Chignecto Canal and sale of Canadian ships to Cuban firm among subjects discussed by delegates

## New Brunswick Federation of Labour

Delegates to the 2nd constitutional convention of the New Brunswick Federation of Labour (CLC) heard seasonal employment called the province's principal problem, and heard requests for the establishment of a provincial housing commission, for a renewed drive for an early start and early completion of the Chignecto Canal, and for provincial legislation to give all government employees the right to organize into a trade union of their choice.

The convention, held in Saint John September 8, 9 and 10, was attended by nearly 200 delegates.

### President's Address

James A. Whitebone, Federation President, in his address to the convention's opening session urged that a housing commission be set up for New Brunswick. The need for adequate housing, he said, was still far ahead of the supply available.

Other provinces, Mr. Whitebone pointed out, had established housing commissions with wide powers.

He expressed some criticism of the provincial Government's failure to enact many of the measures requested by organized labour, but he voiced appreciation for those measures that had been enacted.

Mr. Whitebone urged amendments to the provincial Labour Relations Act to provide for voluntary revocable check-off of union dues, and extension of the Act to include unions of the Government's own employees. Although the Government did recognize such unions, Mr. Whitebone said, they should be brought within the scope of the Act.

The President expressed concern over what he called the "obstruction and evasions" which, he said, were being met by employees of the New Brunswick Liquor Control Board in their attempt to negotiate a collective agreement.

In view of this, he urged that a determined effort be made to obtain amendments to the Labour Relations Act or the Civil Service Act, or both, "in order that the rights of government employees' unions may be clearly defined..."

Underemployment and unemployment remained at alarming levels, Mr. Whitebone said, and this was still "a major problem which the authorities have so far been unable to solve". He emphasized that unemployment had become a national problem and no single unit of government, industry or society could solve it alone.

The Federation should continue to press for public works, Mr. Whitebone said, citing current and contemplated construction projects as a bright aspect of the employment situation.

Automation, he suggested, should be studied carefully as a contributing factor to widespread unemployment. He warned, however, that it would be foolish to fight the inevitable, since automation had become an accepted adjunct of modern industry.

Concerning injunctions in labour disputes, the Federation President scored the growing use of *ex parte* injunctions. He said that Labour was not insisting that injunctions be abolished, but should press for a curb on the use of injunctions in labour disputes. He recommended that a determined effort be made to obtain an amendment to the Judiciary Act that would provide that no injunction be issued until both sides had ample opportunity to present their case.

Mr. Whitebone urged that a renewed and intensified campaign be begun for an immediate start and early completion of the Chignecto Canal. He believed New Brunswick was entitled to measures to replace to some extent the employment and income that will be lost to the province when the St. Lawrence Seaway was opened.

### Premier Hugh John Flemming

Seasonal employment was named New Brunswick's principal problem by the province's Premier, Hon. Hugh John Flemming, in his address to the convention.

Premier Flemming said seasonal unemployment was keeping the province's per capita income at about two-thirds of the Canadian average. The only remedy for such conditions, he said, was to increase secondary industries.

The labour movement in New Brunswick, he said, was constantly taking on new stature. "The statistics on days lost by strike action are fantastically low in the province and wages and conditions of labour have shown great improvement."

The Premier said the Atlantic Provinces had missed the boom because "tight money regulations" had choked off the area's economic pick-up just as its results were beginning to be felt.

### Claude Jodoin

Canadian Labour Congress President Claude Jodoin called on the Federal Government for amendments in the legislation for old age pension and children's allowances, and for new legislation for a comprehensive national health plan and pension plan.

Referring to the sale of eight Canadian National Steamships vessels, Mr. Jodoin said: "We need a merchant marine for security and other reasons and we can't have this if we sell the last eight boats we have in the country."

Ships in a Canadian merchant marine should be manned by Canadian seamen, the CLC President added.

At New York City last month, a Canadian picket line, members of the Seafarers' International Union, halted the loading of a Cuban ship. It was the first time Canadian unionists had picketed a ship at that port.

Longshoremen refused to cross the SIU picket line.

He rejected suggestions in some Canadian publications that the CLC was controlled by organizations in foreign countries. CLC policy was instigated by the CLC and not by organizations in the United States or Britain, he declared.

Commenting on criticisms about Labour's entry into politics, Mr. Jodoin said that other citizens have the right to take part in politics, why not Labour. The CLC, he stated, would reserve its right to be represented in government and to criticize government.

### Resolutions

A number of amendments to the provincial Labour Relations Act were requested by the convention, including one that would allow the Board to prosecute, on its own behalf, any employer considered guilty of unfair labour practices.

Angus MacLeod, Saint John, said that under present regulations if an employee was to sue an employer he would face the danger of losing his job. On the other hand, he said, the union should not be made an entity because then the employer could sue the union.

Other requested amendments to the Act would:

- compel any employer purchasing a business to be bound by the terms of the collective agreement in existence;

- permit the majority of those voting to decide certification votes;

- make it illegal to count votes unless witnessed by a representative of the union and would provide that the representatives be notified of the vote counting not less than 48 hours in advance.

Pictured at the annual convention of the N.B. Federation of Labour (left to right) are: President James A. Whitebone, Premier Hugh John Flemming, Hon. A. E. Skaling, Minister of Labour, Claude Jodoin, President, Canadian Labour Congress

When local unions are being transferred to national or international unions, the application, accompanied by proof that it was made by the majority of members, should be accepted without a vote, the delegates decided.

The convention also asked:

—That no application for decertification of a union be considered until a year from the date of certification.

—That the Labour Relations Board decide who will be covered by the certification order.

Delegates rejected a resolution that would have made all decisions of the Labour Relations Board final and not subject to appeal.

Further resolutions requested legislation that would:

—Give government employees the right to join unions of their choice, bargain collectively and sign collective agreements.

—Prohibit foreclosing or evictions when unemployed persons were unable to keep up mortgage payments or rent.

The federal Government was urged:

—To “revive” a Canadian merchant marine and to provide construction and operation subsidies.

—To grant prevailing rate employees the same benefit accorded civil service employees on vacation and sick pay, and the same bargaining rights as employees in private industry.

Two resolutions requested provincial legislation for higher wages. They would:

—Institute a minimum wage order of \$1.25 an hour for male workers, with time and one-half after 40 hours.

—Grant female workers equal pay with male workers for equal work performed, a minimum wage of 75 cents and time and one-half after 40 hours.

The convention asked for Judiciary Act amendments that would:

—Prohibit the granting of *ex parte* injunctions.

—Permit no injunctions restraining the internal functions of a union to be granted until both parties are heard.

A continued effort to have a destroyer built in the Saint John drydock was urged by the Federation. With six or seven ships to be built and only five provinces with shipbuilding yards, one of the contracts should come to Saint John, it said.

Freight rate structures were criticized by the convention and the provincial government was urged to take every action, in co-operation with the federal Government, to correct the “inequalities”.

In other motions the convention asked for:

—A program of public works.

—A system of public assistance to help the unemployed who have exhausted their unemployment insurance benefits.

—An increase in the old age pension to \$75 per month with the age limit dropped to 65 years and without a means test.

—An amendment to the Vacation Pay Act to entitle employees to two weeks vacation with pay.

—An increase in the rate of vacation pay from 2 per cent to 4 per cent.

—Free school books to all public school students up to and including Grade 13.

—Abolition of provincial sales tax on all clothing and footwear for children up to high school leaving age.

—A housing commission modelled after that in Nova Scotia.

—Legislation to prohibit discrimination against any person seeking accommodation or requesting services in hotels and restaurants because of colour, race or creed or national origin.

The provincial Workmen's Compensation Board was asked to amend its regulations to allow full-time employees of labour unions to come under the Act.

The possibility of a new political party was discussed by the convention but was

thrown out. President Whitebone told the delegates that no action should be taken until word had been received from the CLC on what action it had taken.

Rigid enforcement of the New Brunswick Highway Safety Act was stressed by the convention. It asked that motor vehicle insurance be made compulsory and for the inauguration of a periodic medical check on drivers.

### Election of Officers

All Federation officers were re-elected. James A. Whitebone was elected President for his second consecutive year. Prior to the merger of the province's two labour organizations he had served 25 consecutive terms as President of the New Brunswick Federation of Labour (TLC).

Vice presidents elected were: Angus MacLeod, Saint John; Michael J. Kenney, Newcastle; Charles H. Malchow, Bathurst; Rolland Blanchette, Edmundston; W. Arthur MacLean, Fredericton; and Ralph J. Boyd, Moncton.

William F. McCarlie, Saint John, was re-elected Secretary-Treasurer.

## Nova Scotia Federation of Labour

Criticism of the federal Government for selling the Canadian National (West Indies) Steamships fleet to Cuban interests, and of the Nova Scotia Government for imposing a sales tax to help finance the national hospital scheme, was voiced at the third annual convention of the Nova Scotia Federation of Labour (CLC), held in Halifax September 8, 9 and 10.

Ben O'Neil, of Sydney, was re-elected President of the Federation. Serving with him will be: Vice Presidents John Lynk, Dominion; Leo MacKay, Stellarton; Arthur MacKenzie, Truro; Tom Shiers, Windsor; Sinclair Allen, Halifax; and Clary Webber, Liverpool. Hugh MacLeod, Dartmouth, was re-elected Secretary-Treasurer.

In welcoming the 161 delegates to the convention, Nova Scotia Premier Robert L. Stanfield expressed the hope that the employment situation in the province would improve in the fall and winter months.

The Nova Scotia Government has been working closely with other Atlantic provinces to boost employment, the Premier noted.

The Government was giving every attention to the problem of unemployment in Nova Scotia, Labour Minister Stephen Pyke told the delegates. But he pointed out that government alone cannot cope with the situation; it was a problem "for persons at every level of society."

Mr. Pyke called attention to the fact that the Nova Scotia Government has more than \$4,000,000 in public works projects nearing completion, and that in the next two years some \$13,000,000 in new projects will be under way. But this was not enough, he noted. The main opportunities for jobs must be provided by private industry, and this called for expansion of existing industries in Nova Scotia.

Stan Devine, Halifax business agent for the Seafarers' International Union, criticized the federal Government for selling the CNS fleet for "less than the cost price of one of the eight freighters". He also noted that the new owners, "who took over the ships after a strike by the SIU for higher wages," were using Cuban seamen to man the ships as "international scabs".

Delegates "deplored" the imposition of a sales tax to finance the national hospital plan in Nova Scotia. A resolution condemning the tax was passed by the delegates.

A resolution calling for the provincial Government to strengthen the Trade Union Act by providing for the elective union shop as a statutory condition where a majority of the employees wish to have such form of union security was passed unanimously.

*(Continued on page 1182)*

# U.S. Congress Passes Welfare and Pension Plans Disclosure Act

New law requires registration of employee welfare and pension plans and publication of annual reports on their operations. Legislation arose from discovery of many instances of corruption, abuse of funds

The United States Congress has passed a new law requiring the registration of employee welfare and pension plans and the publication of annual reports on their operations. The act was signed by the President on August 29 and will come into effect on January 1, 1959.

The new legislation resulted from the investigations of various Congressional committees during the past five years, which revealed many instances of corruption and abuse of funds by administrators of employee welfare plans.

While there was general support from employers and labour and both parties in Congress for some type of government regulation in this field, there were sharp differences of opinion on the type and extent of control required. President Eisenhower stated that he signed the bill because it "establishes a precedent of federal responsibility in this area", although he felt that it did not give sufficient power to the administrative authority to uncover and prevent abuses. The act is generally considered as merely the first step in the development of legislation to cover employee pension and welfare plans.

During the last few years, six states have passed welfare fund disclosure laws: Washington in 1955, New York in 1956, and California, Wisconsin, Connecticut and Massachusetts in 1957.

The new federal act will cover foreign and interstate commerce, that is, any industry affecting trade, commerce, transportation or communication between states or between any state and any foreign country or other place. In this sphere it will apply to all employee welfare or pension benefit plans covering 25 employees or more, with certain specified exceptions, whether established by employers or employees' organizations or jointly.

Plans administered by the federal Government or a state government or any agency of these, plans maintained solely for the purpose of workmen's compensation laws or unemployment compensation disability insurance laws, and plans administered as a corollary to membership in a fraternal benefit society and exempt from

taxation under Section 501 (a) of the Internal Revenue Code are not covered by the legislation.

"Employee welfare benefit plan" is defined as any plan, fund or program established for the purpose of providing for its participants or their beneficiaries, through the purchase of insurance or otherwise, medical, surgical or hospital care or benefits in the event of sickness, accident, disability, death or unemployment. "Employee pension benefit plan" means any plan, fund or program established for the purpose of providing retirement benefits for its participants or their beneficiaries, by the purchase of insurance or annuity contracts or otherwise. This includes any profit-sharing plan providing benefits at or after retirement.

The legislation requires the administrator of a welfare or pension benefit plan to publish a description of the plan and an annual financial report. The "administrator" is the person or persons designated by the plan or the collective agreement as being responsible for the ultimate control of the money received, or, if no such person is designated, the person or persons actually having this responsibility.

A description of every plan must be published within 90 days after the act comes into effect, or within 90 days after the plan is established, whichever is later. It must be signed and sworn to by the administrator and must give the names and addresses of these persons, their position in the company or union, if any, and any other position or employment they hold. The name, address and description of the plan must also be given and the type of administration. If there are trustees other than those persons defined as the administrator, their names and addresses must be stated. A copy of the plan must be included, or, if the plan is mentioned in a collective agreement, this fact must be stated and a copy of the agreement included.

The description must give the source of the financing of the plan and the identity of any organization through which benefits are provided. It must state whether the

records are kept on a calendar year or on a policy or other fiscal year basis, and must give the date the policy or other fiscal year ends. Procedures to be followed in presenting claims for benefits, and the remedies available under the plan where claims have been denied either in whole or in part, must be described. Any amendments to the plan making changes in the information included in the original description and not required to be included in the annual report must be added to the description when they come into effect.

Annual financial reports signed by the administrator must be published within 120 days after the end of each calendar year or fiscal year on which records are based. The report must contain a summary statement of the assets, liabilities, receipts and disbursements of the plan and must specify the number of employees covered, the amounts contributed by employers and employees, and the amounts paid out in benefits. There must also be a detailed statement of the salaries, fees and commissions charged to the plan, specifying the amounts of these, the recipients, and the purpose for which they were paid.

All this information must be sworn to by the administrator or certified by an independent public accountant based upon a comprehensive audit conducted in accordance with accepted standards of auditing. The act states that this does not require an audit of the records of any institution providing insurance or investment for the plan if its books are subject to examination by any agency of the federal Government or the government of any state.

If the plan is unfunded, the report need include only the total benefits paid and the average number of employees eligible for participation during the past five years, broken down by years. If applicable, there should be a statement that claims under the plan may be paid only from the general assets of the employer.

If some or all of the benefits under the plan are provided by an insurance carrier or other organization, the annual report must specify the premium rate and the total premiums paid to each organization, the approximate number of persons covered by each class of benefits, and the total claims, dividends and other sums paid by each organization. In addition, any amounts held to provide benefits after retirement and the remainder of the premiums must be shown.

The names and addresses of the brokers or agents to whom commissions or fees were paid must be stated, as well as the amount paid to each and the purpose for which it was paid.

If the insurance company concerned does not keep separate records for the various groups it serves, it will be sufficient to publish a statement as to the basis of its premium rate, the total amount of premiums received from the plan, a copy of the insurance company's financial report, and a detailed statement of any specific costs incurred by the company in connection with the plan.

Special details are required in connection with the manner in which the fund is invested. The report must describe the type and basis of funding, actuarial assumptions used, and the number of employees both retired and non-retired covered by the plan. Where the plan is funded either in whole or in part through a contract with an insurance carrier, the report must show, except for benefits completely guaranteed by the carrier, the amount of current and past service liabilities based on those actuarial assumptions, and the amount of all reserves accumulated under the plan.

Where the plan is funded through a trust, the report must also include a statement showing the assets of the fund broken down by types, such as investment in government bonds and other bonds and in corporate stocks. The assets must be valued on the basis regularly used when reporting to the United States Treasury Department, or if such reporting is not required, at the aggregate cost or present value, whichever is lower. A detailed list of all investments in securities and properties must also be included. Any loans made to the employer or union or any trustee or officer of the fund must be reported, stating the terms of each loan and the name and address of the borrower.

If the plan is unfunded, the only information required is a statement of the total benefits paid to retired employees for the past five years, broken down by year.

Copies of the description of the plan and of the latest annual report must be available in the main office of the plan for examination by any participant or beneficiary. The administrator must send a copy of the description and a summary of the latest annual report to any participant or beneficiary who requests this in writing.

Two copies of the description of a plan and of every annual report are to be filed with the Secretary of Labor and made available for examination in the public document room of the Department of Labor. The Secretary of Labor is required to prepare forms for these descriptions and annual reports and to make them available to the administrators of employee welfare and pension plans on request.

The penalty for wilful violation of the requirement to publish these documents is a fine of up to \$1,000 or a prison term of not more than six months. United States district courts are given jurisdiction to restrain violations of the Act for cause shown.

If an administrator refuses to make public the reports within 30 days to any participant or beneficiary who has made a written request, he becomes liable to pay the participant \$50 a day, plus court costs. Any participant or beneficiary may take action to recover this penalty in a court of competent jurisdiction.

False statements in any document sworn to by the administrator of a plan will make him subject to prosecution by the federal Government on a charge of perjury.

The act states that in the case of a welfare or pension plan covering employees in two or more states, no state law can require the publication of information to duplicate the information required by this federal law, provided that copies of the documents are filed with the state agency concerned and are distributed to participants and beneficiaries as may be required by state law. However, any state is free to obtain additional information on employee welfare and pension plans and to regulate them in other ways.

The enforcement provisions contained in the bill as finally passed by Congress are considerably different from those in the original Senate bill. The Senate bill put

the duty of enforcing the disclosure requirements on the Secretary of Labor, giving him wide powers to make investigations and issue orders. The House of Representatives shifted the responsibility of enforcement from the Secretary to the employees participating in welfare plans, chiefly on the grounds that government supervision would be too expensive and time-consuming. It was also felt that the Senate bill provided for unduly severe penalties and could result in prosecution for innocent mistakes.

Before passage of the bill, employers sought to have all welfare plans administered by employers exempt from the disclosure legislation. They maintained that Congressional investigations had revealed abuses only of union-administered funds, and argued that disclosure of the operations of their welfare funds would violate professional confidences in the field of fund investment. The bill as passed covers all pension and welfare plans regardless of the type of administration.

Before the adjournment of Congress, the view was expressed in both Houses that this measure is only a first step in the regulation of employee welfare and pension funds. A Republican Senator announced his intention to propose that the Senate Labor Committee or a joint committee of the two Houses be authorized to study the reports filed with the Secretary of Labor under the new act in order to compile information that would enable Congress to establish more adequate legislation in this field.

---

## Industrial Fatalities in Canada during Second Quarter of 1958

Deaths from industrial accidents\* increased by 55 from the previous quarter. Of the 297 fatalities in the April-June period, 75 occurred in construction industry, 44 in transportation and 39 were in mining

There were 297\* industrial fatalities in Canada in the second quarter of 1958, according to the latest reports received by the Department of Labour. This in an increase of 55 from the previous quarter,

in which 242 were recorded, including 30 in a supplementary list.

During the second quarter there were six accidents that resulted in the deaths of four or more persons in each case. Eighteen construction workers were killed June 17 at North Vancouver, B.C., when a bridge under construction collapsed dropping them into the water. A fire on board a trawler off the coast of Nova Scotia resulted in the deaths of seven fishermen on April 30. Four of the men were drowned when the lifeboat used to leave the burning

---

\*See Tables H-1 and H-2 at back of book.

The number of industrial fatalities that occurred during the second quarter of 1958 is probably greater than the figure now quoted. Information on accidents which occur but are not reported in time for inclusion in the quarterly articles is recorded in supplementary lists and statistics are amended accordingly. The figures shown include 74 fatalities for which no official reports have been received.

# INDUSTRIAL FATALITIES IN CANADA

Second Quarter of 1958

601-REU

vessel capsized and the other three died from exposure. Five Royal Canadian Mounted Police officers were drowned in Lake Simcoe, Ont., on June 7, when the motorboat they were using on a night patrol capsized during a storm.

There were three accidents that cost the lives of four persons in each case. On April 14, four loggers were drowned in Georgia Strait, B.C., when the barge *Daryl D* sank during a storm. Four men employed on a construction project were electrocuted at Warren, Ont., on May 26, when the scaffold on which they were working contacted a high voltage wire. On May 24, four railway employees were killed at Pointe Au Baril, Ont., when a through train collided with the caboose of a work train.

Grouped by industries (see chart p. 1132), the largest number of fatalities, 75, was in construction. This figure includes 37 in highway and bridge construction, 23 in miscellaneous construction and 15 in buildings and structures. In the same period last year, 81 fatalities were recorded in this industry: 29 in buildings and structures, 27 in miscellaneous construction and 25 in highway and bridge construction. During the first quarter of 1958, 58 fatalities were listed: 25 in highway and bridge construction, 20 in miscellaneous construction and 13 in buildings and structures.

During the quarter, accidents in the transportation industry resulted in the deaths of 44 persons, including 17 in steam railways and 12 in each of the water transportation and local and highway transportation groups. For the same period last year, 51 deaths were reported; of these, 18 occurred in water transportation, 12 in steam railways and 8 in each of the air transportation and local and highway groups. During January, February and March of this year, 22 deaths were recorded, of which 9 were in steam railways and 8 in local and highway transportation.

Mining accidents caused the deaths of 39 persons, 27 occurring in metalliferous mining, 8 in coal mining and 4 in non-metallic mineral mining. During the same period last year, 38 fatalities were recorded in this industry. These included 26 in metalliferous mining, 7 in coal mining and 5 in non-metallic mineral mining. In the first quarter this year, 38 deaths were reported:

21 in metalliferous mining, 10 in non-metallic mineral mining and 7 in coal mining.

In manufacturing there were 32 fatalities; of these 7 were in iron and steel, 6 in transportation equipment and 5 in each of the wood products and paper products industry groups. For 1957's same period, 51 deaths were reported, including 12 in both the iron and steel and wood products group and 5 in each of the transportation equipment and non-metallic mineral product groups. Work injuries during January, February and March 1958 resulted in the deaths of 41 persons, of which there were 11 in each of the wood products and iron and steel groups and 7 in the transportation equipment industry.

Accidents in the logging industry resulted in the deaths of 32 persons during the second quarter of 1958, a decrease of 7 from the 39 that occurred during the same period last year. In the first quarter this year, 30 lives were lost in this industry.

There were 26 industrial fatalities in agriculture during the quarter under review, the same number as reported for the same period a year ago. During the first quarter of 1958, accidents in agriculture resulted in 9 deaths.

An analysis of the causes of the 297 fatalities recorded during the quarter (see chart p. 1132) shows that 79 (26 per cent) of the victims had been involved in "collisions, derailments, wrecks, etc.". Within this group the largest number of deaths were caused by automobiles and trucks (27), watercraft (27) and tractors, load-mobles, etc. (16). In the classification "struck by tools, machinery, moving vehicles or other objects," 71 (24 per cent) deaths were recorded; of these 42 were in the category "other objects," 19 involving "moving vehicles" and 10 were caused by "tools, machinery, etc.". "Falls and slips" were responsible for 68 fatalities during the period, all of which were the result of falls to different levels.

By province of occurrence, the largest number of fatalities was in Ontario where there were 113. In British Columbia there were 60 and in Quebec 37.

During the quarter under review there were 98 fatalities in April, 92 in May and 107 in June.

The industrial fatalities recorded in these quarterly articles, prepared by the Economics and Research Branch, are those fatal accidents that involved persons gainfully employed and that occurred during the course of, or which arose out of, their employment. These include deaths that resulted from industrial diseases as reported by the Workmen's Compensation Boards.

Statistics on industrial fatalities are compiled from reports received from the various Workmen's Compensation Boards, the Board of Transport Commissioners and certain other official sources. Newspaper reports are used to supplement these data. For industries such as agriculture, fishing and trapping, and certain service groups, newspaper reports are the Department's only source of information; therefore coverage may not be as complete as for those industries covered by compensation legislation.

# Successful Rehabilitation—XI

Eleventh in a series of articles on success in rehabilitation achieved through the precise matching of the handicapped person to the job

*This is the eleventh in a series of articles illustrating that the particular demands of any job—the unique combination of skill, aptitudes and attitude required in the worker—can often be met by a disabled person, not by coincidence but by a precise matching of the person to the job.*

*It was written by Morton Wilson, Prairie Regional Public Relations Officer, Unemployment Insurance Commission.*

The efforts of six agencies or organizations were pooled to bring about the successful rehabilitation of a tradesman afflicted with a disease that is almost always accompanied by tragedy—alcoholism.

The man was a carpenter who because of his continuous and heavy drinking had lost one job after another, as well as his confidence and self-respect, his friends and, finally, his wife and family. His family had been placed in the care of the Children's Aid Society; he had been arrested and imprisoned many times; he had been unable to keep the many jobs that had been found for him through the regular channels of the National Employment Service.

Once more he was brought before a magistrate, who asked if there were any good reason why the man should not be sent to penitentiary. The probation officer sought an answer from an NES special placements officer, brought in because the regular NES channels had proved unable to be of any more help, who recommended that the man attend the clinic for alcoholics in Toronto. When the Magistrate asked him whether, voluntarily, he would take treatment at the clinic he agreed.

When he returned from Toronto and announced that he was cured and looking for a job, the Special Placements Officer first advised him to get in touch with the local Alcoholics Anonymous branch, which was scheduled to meet the following evening. The NES officer wanted the man to meet friends who could help him to keep away from liquor and from the danger of slipping back into his old habits. Also, the Special Placements Officer wanted the man to make an effort to help himself.

When the man reported back to the National Employment Office that he had attended the "AA" meeting and would continue his association with "AA", the NES officer soon ran into difficulty during interviews which followed, when it came to light that the carpenter was deeply in arrears

to his Union, and was ashamed to approach his former union brothers. Without a union card he would have difficulty accepting any carpenter work in the area.

Moreover, he hadn't even enough money to buy working clothes and was deeply worried about not being able to feed his large family.

The Special Placements Officer then spoke with officials of three groups: the John Howard Society, the Welfare Department, and the local Carpenters' union. The John Howard Society provided money for working clothes; the Welfare Department assured that the man's family would be provided for until he had a job. The secretary of the union asked for a letter outlining the situation that could be reviewed by the union's board of stewards. When the NES officer wrote the letter he spoke of the opportunity presented in this case for the union to help a fellow tradesman.

Meanwhile, during the few days before an answer could be expected from the union, the man was advised to see his parish priest.

A couple of days later, now provided with working clothes, he was referred by NES to a temporary job which would be helpful until word was received from the union.

Then the answer came: the union recognized its responsibility to a former member, and reinstated the man for a three-month probationary period, spreading the payments of arrears over a long period so that they wouldn't cause his family any hardship.

Now, once again he was able to do the skilled work for which he was trained. While depressed conditions in construction at the time kept him from this work for a short period, the NES office found suitable carpenter employment for him, and he is happily pursuing his chosen trade today. He is also attending his "AA" meetings regularly, going to church with his family, and finding a place for himself in community affairs.

Successful rehabilitation in this case called for the co-operation of six agencies or organizations: the John Howard Society, Alcoholics Anonymous, the city's Welfare Department, the Brotherhood of Carpenters and Joiners, the church, and the Special Placements Division of the National Employment Service.

# International Northern Great Plains Conference on Rehabilitation

Research in all phases of rehabilitation, especially in pre-vocational testing and evaluation, is now major need, Cleveland doctor declares

Research in all phases of rehabilitation was now a major need, particularly in prevocational testing and evaluating, and in predicting motivation, delegates to the Eighth Annual International Northern Great Plains Conference on Rehabilitation and Special Education were told. The conference was held at Saskatoon.

Dr. Mieczyslaw Peszcynski, Chief of the Department of Physical Medicine and Rehabilitation, Highland View Hospital, Cleveland, Ohio, also told the conference that the field of rehabilitation had matured and must now evaluate and criticize its own work. He stressed the need for the co-ordination of services and improvement in inter-professional communication. The shortage of qualified personnel was cited by Dr. Peszcynski as a leading factor impeding progress at the present time.

\* \* \*

In Newfoundland a series of weekly radio talks on the problems of the handicapped is being broadcast by a St. John's radio station. The series was arranged by the Provincial Co-ordinator of Rehabilitation.

The series, called "The Other Worker," presents talks by representatives of voluntary agencies and government departments, and other individuals interested in rehabilitation. Interviews with handicapped persons and employers who have disabled workers on their payroll are planned.

\* \* \*

The Canadian Welfare Council in a policy statement entitled "Social Security for Canada" includes the following:

"Another major objective of a social security program should be to help employable persons maintain or regain the ability to be self-supporting, and to help handicapped persons to develop abilities which would permit their entry into gainful employment."

Under what it terms "basic considerations for a public assistance program," the Council's statement says:

"The number of persons requiring public assistance should be reduced as much as

possible, both through the adoption of preventive measures and through the development or expansion of social insurance and/or statutory welfare payments. The importance of prevention cannot be too strongly stressed. Preventive measures should include maintaining a high level of employment, employment policies that encourage the hiring of people of mature years, retirement measures that will allow people to work beyond the usual retirement age, vocational guidance and training, and the rehabilitation of the disabled...

"One of the objectives of a public assistance program, as of all social welfare measures, should be to enable people to live as normal lives as possible. Programs, therefore, should make available such health and social services as may contribute to rehabilitation and prevent further development of the factors that contribute to dependency, such as ill health, lack of occupational skills, poor personal relationships, or bad family management. In any consideration of, or planning for, public assistance, adequate recognition should be given to these related services, which are an integral and essential part of a total program."

\* \* \*

Ottawa Neighbourhood Services has announced that it will erect another building. This will be the second new building for the Services within a two-year period. Approximately 65 handicapped persons are currently employed in its workshops.

In Montreal a new organization, the "Association of Blind Workers of Montreal", has been formed. In collaboration with the Canadian National Institute for the Blind, the new group will seek to find more and better jobs for the blind and to prove that a blind worker can do a job with great ability if given the opportunity".

\* \* \*

At Fredericton the Kinsmen Club presented a \$1,500 cheque to the Forest Hill Rehabilitation Centre. The money will be used to furnish two rooms at the Centre.

# Change in Women's Employment Situation, July 1957 to July 1958

The Dominion Bureau of Statistics recently reported that "employment for men at July 1, 1958 was 5 per cent lower than at July 1, 1957. Employment for women was down 2 per cent over the year."\* At first glance this seems to contradict the figures from the regular monthly labour force sample survey, which show an over-all increase in female employment of 57,000 between July 1957 and July 1958.

It should be pointed out that the figures on employment and payrolls are as reported by employers of 15 or more persons, and they do not include agriculture. With the exception of agriculture, the figures from the Labour Force Survey as well as employment and payrolls data show that industries with a higher level of employment in July 1958 than a year earlier recorded gains for both men and women whereas those that were down were down for both sexes.

The gains were in service, trade, finance and public utilities. According to the Labour Force Survey, by far the greatest rise was in the service industry, which accounts for roughly one fifth of the total working force. Because more than 40 per cent of all women workers are in the service industry as against 14 per cent of working men, an increase in the number of service jobs makes a greater impact on the employment situation of women than of men.

The big drop in number of persons with jobs took place in manufacturing. Women as well as men were affected. In fact the percentage drop was greater for women.

In agriculture the sexes exhibited quite distinct patterns of employment: female employment was up 23,000 while employment of men fell by 50,000. Since agricultural workers make up a much higher proportion of the male than of the female labour force, the drop in agriculture alone was equal to 70 per cent of the 72,000 decrease in total male employment. The change in the opposite direction for women meant that 40 per cent of the 57,000 increase in employment of women was attributable to agriculture. The service industry provided by far the greatest addition to jobs for women; agriculture provided the next most important addition.

Because a high proportion of service workers are employed in establishments where there are fewer than 15 workers, the report on employment and payrolls deals with only a fraction of the number in this industry as reported in the Labour Force Survey. Many factory workers are also in establishments too small to report.

The subdividing of data on employment and payrolls helps to throw light on why the increase in women employed in the service industry swells the labour force totals more than those on employment and payrolls. Hotels and restaurants account for more than half of the workers in the service industry reported in *Employment and Payrolls*. In this segment of the industry men outnumber women somewhat, but the difference is not great. In laundries there are nearly twice as many women as men but in the recreational and business services men far outnumber women; employment in these services has increased 17 per cent as against less than 5 per cent for the service industry as a whole. This helps to explain why the percentage increase in employment in the service industry as reported in *Employment and Payrolls* is somewhat greater for men than for women, while the labour force figures show a gain for women of 7 per cent as against just 2 per cent for men.

Among the main reasons, therefore, for the discrepancy between the two sets of figures are the fact that reports on employment and payrolls come from employers of 15 or more (which excludes a higher proportion in the service industry, for example, than in others), and they do not include agriculture.

The change in the women's employment situation between July 1957 and a year later may be summarized as follows: there was a considerable drop in the number of women with jobs in manufacturing; except for the service industry, which provided by far the greatest addition to jobs for women, increase in farm work was the most important factor in the over-all rise in female employment. Since agricultural workers are not reported in *Employment and Payrolls* it showed a net drop in employment of women.

\**Employment and Payrolls*, July 1958, p. 3.

## 50 Years Ago This Month

**W. L. Mackenzie King retires from post of Deputy Minister of Labour to seek election as Member of Parliament. Prime Minister reveals that Government considering establishment of a separate Labour portfolio**

The resignation of W. L. Mackenzie King from the post of Deputy Minister of Labour during the previous month was reported in the *LABOUR GAZETTE* of October 1908. Mr. King, who had been Deputy Minister since the Department was established in 1900, gave as his reason for resigning his intention of running for election as Liberal candidate in his native constituency of North Waterloo.

In the course of his reply to Mr. King's letter of resignation, the Minister, Hon. Rodolphe Lemieux, said: "I am satisfied that your career of usefulness has but commenced, and that our common country will get great good from this bold and original step which you have taken."

The 24th annual convention of the Trades and Labour Congress of Canada, held in Halifax in September, was reported at length in the October 1908 *LABOUR GAZETTE*. Every province except one had been represented. The delegates numbered 91; 34 representing 19 Trades and Labour Councils and 57 representing 47 trade unions.

In its summary of the report of the TLC executive, the *LABOUR GAZETTE* said: "The hope was expressed that the present time will witness the union of all workers to place labour members on the floor of Parliament".

The report of the executive referred to the large influx of immigrants during the year, and reaffirmed its previous stand on the question. It also referred to the good results of the work of a representative who had been sent by the Congress to Great Britain to acquaint prospective emigrants with labour conditions in Canada. Later the convention decided to ask for a contribution of 10 cents per capita from local unions to enable the executive to send another representative.

Resolutions adopted by the convention included one which approved restrictions on immigration from the Orient.

Another resolution asked that the trades immediately affected by the Industrial Disputes Investigation Act be requested to submit to the executive council their suggestions for "amendments to make the bill effective from the working class standpoint," that the executive council should endeavour

to get the Government to enact the amendments suggested, and that if the Government refused to do this the Congress should take a referendum of the trades affected on the advisability of repealing the Act.

Other resolutions passed asked for:

—Measures for more effective enforcement of fair wage schedules in government contracts.

—An immediate increase in the pay of letter carriers "in keeping with present conditions".

—The setting aside by the respective governments of enough land in every province to provide funds for a supply of free school books, such land to be "held in perpetuity as public property".

—The establishment by the Government of Canada of an old age pension fund.

—The executive for Quebec to be instructed to start an agitation to force the provincial government to grant free education.

—The abolition of the requirement of a \$200 deposit by candidates for election to the House of Commons.

Wage rates were generally stationary during September 1908, but on the whole they were lower than at the same time the year before. However, a number of mechanics and labourers employed by the provincial Government at Quebec City had their wages increased from a range of \$8.75 to \$10.50 to a range of \$10.50 to \$12.25 a week.

On September 21 the first section of the Grand Trunk Pacific Railway completed for traffic was formally opened at Winnipeg. This section ran from Winnipeg to Wainwright, Alta., a distance of 666 miles. At the outset three trains a week each way were to be run by the construction company which still controlled the line. The Moose Jaw-Edmonton line of the CPR was also opened during September.

Speaking at Berlin, Ont., on September 24, the Prime Minister, Sir Wilfrid Laurier, said: "The time has come when the Government feels that it should create a department of labour". He said he intended to submit the question to his colleagues "and the representatives of the people of Canada in Parliament".

# TEAMWORK in INDUSTRY

At the beginning of this year a carefully-planned safety campaign was put into operation at the St. Thomas, Ont., plant of Canada Iron Foundries. The campaign was effective from the very start—in April, the Secretary of the Safety First Committee, T. H. Wood, was able to report that there had been only three lost time accidents, compared with 10 in the same period in 1957, while accidents requiring medical attention had dropped from eighteen to ten.

All plant employees at Canada Iron Foundries have been divided into six groups of equal size, the assignments being made in such a way that plant hazards are shared as equally as possible. The six groups thus have an equal chance of achieving a safety record.

In effect, these six groups compete against each other every month for the honour of the plant safety record and for the cash award that goes with it.

Each group starts the month with 1,000 points, and points are deducted whenever a member incurs a penalty. A daily record of the standings of the six groups is kept on a large notice board within the plant and each day a plant employee, whose clock number is posted, is responsible for bringing the board up to date.

A group loses points for any of the following reasons:

1. Compensation case—5 or more days lost—150 points
2. Lost-time accident—1 to 4 days lost—100 points
3. Failure to report an accident immediately—100 points
4. Medical aid requiring treatment by a doctor—50 points
5. Failure of a group leader to attend a Safety First meeting—50 points
6. Failure to carry out instruction given by a doctor or nurse—25 points
7. Failure to change the Work Safety Record Board—25 points

The group which ends each month with the fewest penalties—that is, with the highest number of points—wins a cash award of \$30. A group member found not wearing the prescribed safety shoes or safety glasses is not eligible for a share in his group's winnings. Each month the com-

pany also awards a \$10 cash voucher to the member of an employee's family who can repeat the safety slogan for that particular month, when asked for it by telephone. In this way, the company hopes to extend the idea of safety first beyond the plant to the home of all employees.

A representative from each group is appointed to the plant Safety Committee. Appointments are for a six-month term, and are rotated among the members of the group.

Three of these group leaders carry out a weekly inspection of safe working conditions in each department and a report of this inspection is circulated to the various shop supervisors for their attention.

The safety campaign at Canada Iron Foundries has the full support and co-operation of local 4815 of the United Steelworkers of America, which represents the employees.

\* \* \*

After careful study over the past several months by the management of North Western Pulp and Power Ltd., Hinton, Alta., and the officers of Local 855 of International Brotherhood of Pulp, Sulphite and Paper Mill Workers, it was decided to form a Mutual Interest Board as another medium to weld together the good employer-employee relations existing at this time.

The Board makes possible the active participation of employees in plant operations.

The purpose of the Mutual Interest Board is to promote such matters as improvement of company services, safety, good public relations, recreation and social programs, lower operation costs, less tardiness, less waste, less damage to equipment, and good housekeeping.

\* \* \*

A new booklet, *Teamwork in Action*, has been released by the Labour-Management Co-operation Service and is available to interested parties through field representatives of the Service or directly from Ottawa.

The booklet deals with the practice of joint consultation in six Canadian companies as described in various issues of *Teamwork in Industry* during 1957.

Establishment of Labour-Management Committees is encouraged and assisted by the Labour-Management Co-operation Service, Industrial Relations Branch, Department of Labour. In addition to field representatives located in key industrial centres, who are available to help both managements and trade unions, the Service provides various aids in the form of booklets, posters and films.

# INDUSTRIAL RELATIONS AND CONCILIATION

## Certification and other Proceedings before the Canadian Labour Relations Board

The Canada Labour Relations Board met for two days during August. The Board issued five certificates designating bargaining agents and ordered one representation vote. During the month the Board received ten applications for certification, one application for revocation of certification, and allowed the withdrawal of three applications for certification.

### Applications for Certification Granted

1. National Association of Broadcast Employees and Technicians, on behalf of a unit of office, general service, radio and television employees of Northern Radio-Radio Nord Inc., employed by the company at its head office in Rouyn, and at stations CKRN and CKRN-TV in Rouyn, CKVD in Val d'Or, and CHAD in Amos, all in Quebec (L.G., Aug., p. 881).

2. Canadian Guards Association, on behalf of a unit of security guards below the rank of sergeant employed by Canadian Arsenals Limited at Long Branch, Ont. (L.G., Aug., p. 881).

3. Canadian Brotherhood of Railway Employees and Other Transport Workers, on behalf of a unit of unlicensed personnel employed by Northumberland Ferries Limited, Charlottetown, P.E.I., on ferries operating between Wood Islands, P.E.I., and Caribou, N.S. The Seafarers' International Union of North America intervened. (L.G., Sept., p. 980).

4. Elliot Lake—Stanleigh Office Workers' Union, Local 1574 of the Canadian Labour Congress, on behalf of a unit of office and technical employees of the Stanleigh Uranium Mining Corporation Limited at Elliot Lake, Ont. (L.G., Sept., p. 980).

5. Quirke Lake—Can-Met Office Workers Union, Local 1575 of the Canadian Labour Congress, on behalf of a unit of office and technical employees of Can-Met Explorations Limited at Quirke Lake, Ont. (L.G., Sept., p. 980).

### Representation Vote Ordered

Brotherhood of Locomotive Engineers, applicant, Canadian National Railways (Newfoundland District), respondent, and Brotherhood of Locomotive Firemen and Enginemen, intervener (L.G., Aug., p. 882). The Board directed that the names of both the applicant and intervener be placed on the ballot (Returning Officer: W. L. Taylor).

### Applications for Certification Received

1. Transport Drivers, Warehousemen and Helpers' Union, Local 106, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of employees of Husband Transport Limited, operating in and out of its Montreal terminal (Investigating Officer: C. E. Poirier).

2. International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, on behalf of a unit of maintenance employees of Wheeler Air Lines Ltd., St. Jovite, Que. (Investigating Officer: C. E. Poirier) (see Applications Withdrawn).

3. The Association of Drivers of Canadian Coachways Ltd., on behalf of a unit of bus drivers employed by Canadian Coachways Ltd., Edmonton, Alta. (Investigating Officer: D. S. Tysoe).

4. International Union of Operating Engineers, Local 115, on behalf of a unit of construction equipment operators employed by Dawson & Hall Limited in the Yukon Territory (Investigating Officer: D. S. Tysoe).

This section covers proceedings under the Industrial Relations and Disputes Investigation Act, involving the administrative services of the Minister of Labour, the Canada Labour Relations Board, and the Industrial Relations Branch of the Department.

5. International Union of Operating Engineers, Local 115, on behalf of a unit of construction equipment operators employed in the Yukon Territory by the John A. MacIsaac Construction Co. Ltd., Whitehorse, Y.T. (Investigating Officer: D. S. Tysoe).

6. International Union of Operating Engineers, Local 115, on behalf of a unit of construction equipment operators employed by the Poole Construction Company Limited in the Yukon Territory (Investigating Officer: D. S. Tysoe).

7. District 50, United Mine Workers of America, on behalf of a unit of employees of AMF Atomic (Canada) Limited, Port Hope, Ont. (Investigating Officer: T. B. McRae).

8. Western District Diamond Drillers' Union, Local 1005, International Union of Mine, Mill and Smelter Workers, on behalf of a unit of employees of T. Connors Diamond Drilling Co. Ltd., employed in the Yukon Territory (Investigating Officer: D. S. Tysoe).

9. International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, on behalf of a unit of maintenance employees of Wheeler Air Lines Ltd., St. Jovite, Que. (Investigating Officer: C. E. Poirier).

10. Automotive Lodge 1857, International Association of Machinists, on behalf of a unit of mechanics employed by Gill Interprovincial Lines Ltd., Vancouver (Investigating Officer: D. S. Tysoe).

## Scope and Administration of Industrial Relations and Disputes Investigation Act

Conciliation services under the Industrial Relations and Disputes Investigation Act are provided by the Minister of Labour through the Industrial Relations Branch. The branch, also acts as the administrative arm of the Canada Labour Relations Board, in matters under the Act involving the board.

The Industrial Relations and Disputes Investigation Act came into force on September 1, 1948. It revoked the Wartime Labour Relations Regulations, P.C. 1003, which became effective in March, 1944, and repealed the Industrial Disputes Investigation Act, which had been in force from 1907, until superseded by the Wartime Regulations in 1944. Decisions, orders and certifications given under the Wartime Regulations by the Minister of Labour and the Wartime Labour Relations Board are continued in force and effect by the Act.

The Act applies to industries within federal jurisdiction, i.e., navigation, shipping, interprovincial railways, canals, telegraphs, interprovincial and international steamship lines and ferries, aerodromes and air transportation, radio broadcasting stations and works declared by Parliament to be for the general advantage of Canada or two or more of its provinces. Additionally, the Act provides that provincial authorities, if they so desire, may enact similar legislation for application to industries within provincial jurisdiction and make mutually satisfactory arrangements with the federal Government for the administration of such legislation.

The Minister of Labour is charged with the administration of the Act and is directly responsible for the appointment of conciliation officers, conciliation boards, and Industrial Inquiry Commissions concerning complaints that the Act has been violated or that a party has failed to bargain collectively, and for applications for consent to prosecute.

The Canada Labour Relations Board is established under the Act as successor to

the Wartime Labour Relations Board to administer provisions concerning the certification of bargaining agents, the writing of provisions—for incorporation into collective agreements—fixing a procedure for the final settlement of disputes concerning the meaning or violation of such agreements and the investigation of complaints referred to it by the minister that a party has failed to bargain collectively and to make every reasonable effort to conclude a collective agreement.

Copies of the Industrial Relations and Disputes Investigation Act, the Regulations made under the Act, and the Rules of Procedure of the Canada Labour Relations Board are available upon request to the Department of Labour, Ottawa.

Proceedings under the Industrial Relations and Disputes Investigation Act are reported below under two headings:

(1) Certification and other Proceedings before the Canada Labour Relations Board, and (2) Conciliation and other Proceedings before the Minister of Labour.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, Halifax and St. John's, Newfoundland. The Territories of two officers resident in Vancouver comprises British Columbia, Alberta and the Yukon and Northwest Territories; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; three officers resident in Toronto confine their activities to Ontario; three officers in Montreal are assigned to the province of Quebec, and a total of three officers resident in Fredericton, Halifax and St. John's represent the Department in the Maritime Provinces and Newfoundland. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

## Applications for Certification Withdrawn

1. Automotive Lodge 1857, International Association of Machinists, applicant, and Gill Interprovincial Lines Ltd., Vancouver, respondent (L.G., Sept. p. 980). (A new application affecting this same unit of employees was submitted later in the month.)

2. Hotel and Restaurant Employees' and Bartenders' International Union, Local 28, applicant, and Canada Railway News Company Limited, respondent (Great Northern Station, Vancouver) (L.G., Sept., p. 980).

3. International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, applicant, and Wheeler Air Lines Ltd., St. Jovite, Que., respondent (see Applications Received, item 2; a new application affecting this same unit of

employees was submitted later in the month).

## Application for Revocation of Certification

Members of bargaining unit employed on *MV Imperial Namu*, *MV Imperial Nanaimo*, and *Barge No. 10*, applicants, the Seafarers' International Union of North America, Canadian District, respondent, and Imperial Oil Limited, Vancouver, respondent (Investigating Officer: D. S. Tysoe). The application was for revocation of the certification issued by the Board May 28, 1957, to the Seafarers' International Union of North America, Canadian District, in respect of a unit of unlicensed employees, including cooks, employed by the company aboard the vessels named (L.G., July 1957, p. 840).

# Conciliation and other Proceedings before the Minister of Labour

## Conciliation Officers Appointed

During August, the Minister of Labour appointed Conciliation Officers to deal with the following disputes:

1. Smith Transport Limited and Transport Drivers, Warehousemen and Helpers Union, Local 106 (Conciliation Officer: R. Trépanier).

2. Superior Cartage (Lakehead) Limited and Local 990, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (Conciliation Officer: J. S. Gunn).

3. Canadian Broadcasting Corporation (Building and Maintenance Employees) and Association of Radio and Television Employees of Canada (Conciliation Officer: F. J. Ainsborough).

4. Hill the Mover (Canada) Limited, Ottawa, and Local 419, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (Conciliation Officer: F. J. Ainsborough).

5. Hill the Mover (Canada) Limited, Toronto, and Local 419, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (Conciliation Officer: F. J. Ainsborough).

## Settlements by Conciliation Officers

1. Canadian Arsenals Limited (Gun Ammunition Division), Lindsay, and International Union of Operating Engineers, Local 796 (Conciliation Officer: F. J. Ainsborough) (L.G., Sept., p. 980).

2. B.C. Airlines Limited, Vancouver, and Canadian Brotherhood of Railway Employees and Other Transport Workers (Conciliation Officer: D. S. Tysoe) (L.G., Aug., p. 882).

3. Union Steamships Limited, and Seafarers' International Union of North America, Canadian District (Conciliation Officer: G. R. Currie) (L.G., Aug. p. 882).

4. Radio Roberval Inc., and the Syndicate of Employees of CHRL (Conciliation Officer: C. E. Poirier) (L.G., Aug., p. 882).

5. Stanleigh Uranium Mining Corporation Limited, Algoma, and International Union of Operating Engineers, Local 796 (Conciliation Officer: F. J. Ainsborough) (L.G., May, p. 494).

## Conciliation Boards Appointed

1. Canadian Pacific Transport Limited, Winnipeg, and Canadian Brotherhood of Railway Employees and Other Transport Workers, Division 198 (L.G., Aug., p. 882).

2. Robin Hood Flour Mills, Limited, Calgary, and United Packinghouse Workers of America, Local 326 (L.G., July, p. 755).

3. Empire Stevedoring Company Limited, Canadian Stevedoring Company Limited, Western Stevedoring Company Limited, Louis Wolfe and Sons (Vancouver) Limited, Victoria and Vancouver Stevedoring Company Limited, and Local 507, International Longshoremen's and Warehousemen's Union (L.G., June, p. 629).

4. Canadian Broadcasting Corporation and National Association of Broadcast Employees and Technicians (L.G., Sept., p. 980).

## Conciliation Boards Fully Constituted

1. The Board of Conciliation and Investigation established in August to deal with a dispute between Canadian Pacific Transport Limited, Winnipeg, and Canadian Brotherhood of Railway Employees and Other Transport Workers, Division 198 (*see above*) was fully constituted in August with the appointment of Dean G. P. R. Tallin, QC, Winnipeg, as Chairman. Dean Tallin was appointed on the joint recommendation of the other two members, Harold J. Riley, QC, and Alistair Stewart, both of Winnipeg, who were previously appointed on the nomination of the company and union respectively.

2. The Board of Conciliation and Investigation established in August to deal with a dispute between Robin Hood Flour Mills Limited, Calgary, and United Packinghouse Workers of America, Local 326, (*see above*) was fully constituted in August with the appointment of Irwin A. Blackstone, Calgary, as Chairman. Mr. Blackstone was appointed by the Minister in the absence of a joint recommendation from the other two members, Hugh John MacDonald, MLA, QC, and Robert Scott, both of Calgary, who were previously appointed on the nomination of the company and union respectively.

3. The Board of Conciliation and Investigation established in July to deal with a dispute between Polymer Corporation Limited, Sarnia, and Oil, Chemical and Atomic Workers International Union, Local 16-14 (L.G., Sept., p. 981) was fully constituted in August with the appointment of Prof. C. H. Curtis, Kingston, Ont., as Chairman. Prof. Curtis was appointed by the Minister

in the absence of a joint recommendation from the other two members, G. C. Richardes, Windsor, Ont., and Gordon Milling, Toronto, who were previously appointed on the nomination of the company and union respectively.

## Board Reports Received during Month

1. Association of Lake Carriers (Canada Steamship Lines Limited, N. M. Paterson and Sons Limited, Colonial Steamships Limited, Upper Lakes and St. Lawrence Transportation Company Limited, Mohawk Navigation Company Limited, Hall Corporation of Canada, Beaconsfield Steamships Limited, Sincennes-McNaughton Line Limited, and La Verendrye Line Ltd.) and National Association of Marine Engineers of Canada, Inc. (L.G., July, p. 756). The text of the report is reproduced below.

2. Guy Tombs Marine Services Limited, Montreal, Davie Transportation Limited, Montreal, and Quebec Paper Sales and Transportation Limited, Quebec, and Seafarers' International Union of North America, Canadian District (L.G., June, p. 630). The text of the report is reproduced below.

## Strikes following Board Procedure

1. Newfoundland Employers Association Limited, St. John's, and Longshoremen's Protective Union (L.G., Sept., p. 983). Employers declared suspension of general cargo shipping at St. John's effective August 21, 1958.

2. Shipping Federation of British Columbia and International Longshoremen's and Warehousemen's Union (Locals 501, 502, 503, 504 and 508) (L.G., Sept., p. 992). Stoppage of work occurred August 21.

# Report of Board in Dispute between

**Association of Lake Carriers  
and**

**National Association of Marine Engineers of Canada, Inc.**

The Board of Conciliation and Investigation appointed under the provisions of the Industrial Relations and Disputes Investigation Act in this matter presents herewith its unanimous report.

The Board was composed of H. Carl Goldenberg, QC, chairman; Francis Gerity, nominee of the employee; and Colin A. Gravenor, nominee of the bargaining agent.

Proceedings before the Board opened in Montreal on May 28, 1958, and were concluded on June 11, 1958. Each party presented its case at length and was afforded an opportunity for rebuttal.

The Board finds that the parties reached agreement or understanding with respect to a number of demands made by the union and that 10 matters remain in dispute.

Having heard and examined the submissions of the parties, the Board finds and recommends on the said matters as is hereinafter set out.

## PART I

### General Considerations

In its consideration of and recommendations upon the several proposals put forward by the union, the Board has found it

necessary to consider the status and general position of the engineer officers serving on a vessel. This arises out of an inconsistency between the union's claim in respect of the status of its membership and some of its proposals which in fact deny the status claimed.

The engineer officer is not just another employee of the shipowner. His position must be one of responsibility since, in any case, this is assigned by the provisions of the law. Before an engineer officer can achieve status he must possess a certificate of the proper class, as set forth in appropriate enactments of the Parliament of Canada. The conduct and ability of an engineer officer may be made the subject of an inquiry as to his competency, misconduct or default while serving as an officer on board a Canadian ship. As a holder of such a certificate he may find it cancelled or suspended if he is found wanting in these respects.

In addition to the responsibilities assigned by law, an engineer officer is in fact in charge of machinery during his watch and, as such, responsible for his performance and for the work of the unlicensed personnel under his supervision. In the carrying out of any necessary work upon the ship's machinery, not only are his own skills directly involved but he must direct other personnel and labour. Accordingly, his work and status are not in the same category as in the case of the unlicensed personnel.

In coming to its several recommendations, the Board has borne these facts in mind. Any other consideration of their problems would lead to engineer officers being categorized merely as mechanics under the direction of a chief engineer.

The Board has also found it necessary to consider the general situation of the Great Lakes shipping industry in the light of the approaching completion of the St. Lawrence Seaway. In this connection it has taken cognizance of the report of the Royal Commission on Coasting Trade, which was recently tabled in the House of Commons. It draws particular attention to the following paragraph appearing on page 107 of the report.

The greatest concern expressed was with respect to the future of Canadian registered lakers in competition for inland bulk cargoes, including the inland movement of grain destined for export. The trades at stake are both coasting and international. *The fears appear justified.* Under present tax structures, a specialized ocean-going bulk carrier on U.K. registry may have an advantage not

During August, the Minister of Labour received the unanimous report of the Board of Conciliation and Investigation established to deal with a dispute between the National Association of Marine Engineers of Canada, Inc. and the Association of Lake Carriers, Montreal (Canada Steamship Lines Limited, N. M. Paterson & Sons Limited, Colonial Steamships Limited, Upper Lakes & St. Lawrence Transportation Company Limited, Mohawk Navigation Company Limited, Hall Corporation of Canada, Beaconsfield Steamships Limited, Sincennes-McNaughton Line Limited, La Verendrye Line, Ltd.).

The Board was under the Chairmanship of H. Carl Goldenberg, QC, Montreal, who was appointed by the Minister in the absence of a joint recommendation from the other two members, Francis Gerity, Toronto, and Colin A. Gravenor, Montreal, nominees of the association and union respectively.

The text of the report is reproduced here.

only over a Canadian registered laker built in Canada but also over one built in the United Kingdom or otherwise acquired at comparable costs. While existing lakers would be operated for their remaining useful life, competition may force Canadian operators to arrange in future for the seasonal chartering of suitable United Kingdom vessels built for the purpose.

(The emphasis is ours.)

Our analysis of the situation leads us to conclude that the industry and, therefore, its employees face an uncertain future, which lends emphasis to the difficulties with which we have been confronted. This uncertainty arises from the competition which is in prospect from ships of Commonwealth and foreign registry. It must be conceded that these ships can be built and operated at substantially lower cost than the ships of the Association of Lake Carriers. The employer has not hitherto had to meet such competition except from such small vessels as have been able to pass through the St. Lawrence canal system, a requirement that severely restricted their carrying capacity.

Stability with its necessary ingredient, labour peace, is considered by the Board to be essential at this time. The Board recognizes the fact that the employees have made very substantial progress in wages, hours, and working conditions during the past few years. It is of the opinion that some of the further objectives which they may seek would be better deferred until the employer has had an opportunity to prepare to meet the anticipated competition. Among the problems which the employer faces are the tolls which will be charged for the use of the Seaway and the requirement

of considerable financing to build replacements for obsolete ships which cannot be expected to use the new facilities economically. There are also other problems to be solved.

WE ARE, THEREFORE OF THE OPINION THAT THE INDUSTRY AT THIS STAGE MUST BE ASSURED OF A MINIMUM PERIOD OF STABILITY AND THAT THE MINIMUM IS AT LEAST TWO YEARS. ACCORDINGLY:

- (1) We recommend a two-year collective agreement, and this recommendation is basic.
- (2) We must also emphasize that our recommendations which now follow, considered as a whole, are, in our opinion, the maximum concessions that each party can fairly be asked to make at the present time.

## PART II

### Principal Issues

#### *Hours of Work*

The union demands a normal work week of 5 days of 8 hours each, Monday through Friday, and compensatory payment for all hours worked in excess of 40 hours per week. The employer submits that the nature of the operation on the Great Lakes makes it physically impossible to inaugurate a regular 40-hour week. Since neither party was prepared to recede from its position, the door was closed to discussion of an alternative basis.

Having considered the representations of the parties, the Board finds that 3 important facts emerge, of which it must take cognizance:

First: The industry is a seasonal one having some 8 months of the year in which navigation can be safely conducted, although the period of employment of the engineer officer is longer than that of the unlicensed personnel. Even where the full season of navigation is available to the employer, cargoes do not always offer so as to enable the ships to be continuously employed.

Second: The nature of the cargo carried, together with the methods of loading and discharge, make rapid turnaround at terminal ports a prime consideration of efficient management.

Third: It appears to us to be impossible for an owner operating on the Great Lakes to schedule his operation in such a way as to reproduce conditions of shore employment to which a 5-day, 40-hour week can be effectively applied. There is, further, an apparent difference between the shipping operation on the Great Lakes and vessels operating in a regular and scheduled ferry

service. In this connection the Board notes that the concluding paragraph of clause 8 ("Rates of Pay") of the last agreement between the parties reads as follows:

It is expressly acknowledged and agreed by and between the parties hereto that the above rates of wages compensate the marine engineer officers for the fact that the nature of the operation of the company's vessels renders it impossible to effect any reduction of actual working hours, notwithstanding that in previous negotiations the association requested a reduction of working hours to forty (40) hours per week; and that the above rates of wages have been granted to and accepted by the association and the marine engineer officers in full satisfaction of all demands for the institution of a forty (40) hour week.

The Board finds that operating conditions on the Great Lakes have not changed since this paragraph was agreed to.

Considering all of the foregoing, as well as the actual and potential competitive aspects of the Great Lakes operation, the Board finds that it cannot approve the union's demand. However, since the employees, owing to the nature of the employment which they have voluntarily chosen, are not in a position to enjoy some of the benefits available to employees in other industries, the Board is of the opinion that they are entitled to a compensatory payment in lieu thereof. Accordingly, having regard to the position of the engineer officer and to the continuity and length of his employment during the navigation season, the Board recommends as follows:

All engineer officers covered by the agreement between the parties shall be entitled to receive 24 days' basic pay in lieu of vacation, instead of 16 days as provided in clause 9 of the last agreement; that for shorter periods of service they shall receive a pro rata payment; and that, if separated from their employment, they shall be entitled to receive their vacation pay regardless of the cause of separation.

#### *Wages*

In the last agreement between the parties wages were on a 30-day monthly basis, 8 hours per day. The union now demands that the monthly wage shall apply to a 5-day, 40-hour week with overtime at increased rates for all work performed in excess of 8 hours per day and on Saturday and Sunday. It was submitted by the employer that the union was in effect demanding an increase of more than 60 per cent. An exhibit filed by one of the companies showed that when applied to its operations the proposed increase ranges from 58.2 per cent to 61.1 per cent. This was not denied by the union.

Having given careful consideration to the submissions of the parties and having examined relevant facts, including existing

wage schedules and earnings and changes in the Consumer Price Index since January 1, 1956, the Board rejects the union's demand and recommends as follows:

The rates of pay of engineer officers shall be increased for each classification by 9 per cent, of which an increase of 5 per cent shall be retroactive to the beginning of the 1958 navigation season and the remaining 4 per cent shall become effective at the beginning of the 1959 navigation season.

With respect to overtime, the Board recommends that in no case shall the overtime rate for engineer officers on an hourly basis be less than that paid to unlicensed engine-room personnel, and that the overtime rates shall provide for appropriate differentials.

#### *Manning Scale*

The union has requested that the employer place in effect a minimum manning scale for each vessel as an integral part of the collective agreement. The employer maintains that its ships are more than adequately manned, that it is subject to and bound by the provisions of the Canada Shipping Act, and that the requirements of its underwriters must be met in maintaining adequate insurance to cover the fleets.

The union's proposal is new. There was no provision for a manning scale in previous collective agreements between the parties. The Board finds that the adequate manning of steamships and the efficiency of personnel are generally conceded to be matters connected with the seaworthiness of the ship. In this respect the Board has taken notice of certain statutory provisions enacted by the Parliament of Canada, namely, The Canada Shipping Act, 1952, chapter 29, and The Criminal Code, 2-3 Elizabeth II, chapter 51. The attention of both parties is drawn, more particularly, to Section 407 of the Canada Shipping Act, which reads as follows:

407. (1) Every steamship registered in Canada shall be manned with a crew sufficient from the point of view of safety of life for the purpose of her intended voyage, and shall, during such voyage, be kept so manned.

(2) If any of the provisions of this section are not complied with in the case of any steamship, the owner, if in fault, is liable, in respect of each offence, to a fine not exceeding five hundred dollars, and the master, if in fault, is liable in respect of each offence, to a fine not exceeding two hundred and fifty dollars.

In consideration of the foregoing and of the special provisions of Section 115 (1) of the Canada Shipping Act, which requires that ships be provided with certificated engineers according to a scale set out therein, and of Section 115 (2) of the Act, which requires that there be such number

of engineers as will assure reasonable periods of watch, having due regard to the length of any voyage and other related circumstances, the Board finds that it cannot recommend a minimum manning scale as demanded by the union.

### *PART III*

#### *Other Issues*

##### *Pay in Lieu of Vacations*

The union demands that all engineers shall receive 10 per cent of their daily rate for every day of employment with the company.

The Board's recommendation on pay in lieu of vacations is embodied in its recommendation under the heading "Hours of Work".

##### *Statutory Holidays*

The union demands penalty rates for work done on 8 statutory holidays. The Board finds that this would involve a scheduling of steamship operations as in an industrial plant on shore, which is not practical, and, therefore, cannot recommend that this demand be granted.

##### *Guaranteed Season Salary*

The union demands that all engineers shall be guaranteed a minimum of 9 months' work from fit-out to lay-up.

The Board understands that the navigation season for marine engineers is at least nine months and longer in certain cases and does not recommend that the union's request be granted.

##### *Security Watch*

The union demands an additional day's pay during fit-out, lay-up and dry-docking periods, if an engineer is required to remain aboard for security purposes only after completing his 8 hours work or on Saturday and Sunday.

The Board finds that it cannot recommend that this demand be granted.

##### *Premium Rates*

The union demands a premium rate of \$2 per hour for engineers required to work in boilers, furnaces and other enclosed hot space. The Board cannot recommend that this demand be granted.

The union also demands a premium rate of \$2 per day for engineers on vessels carrying explosives in 100 ton lots or over. The Board is advised that agreement on this demand has been reached by the parties and recommends that effect be given to such agreement.

### *Subsistence Allowance*

The union demands that officers be paid \$12 per day for room and board ashore when such accommodation is not available aboard the vessel.

The Board finds that the employer as a general rule pays the bills for reasonable room and board ashore for marine engineers when proper vouchers are produced. While the Board cannot recommend that the union's request be granted, it is of the opinion that the parties can agree on a mutually satisfactory provision with respect to subsistence allowance.

### *Duties Other Than Those of Engineer*

The union demands that engineers shall not be required to perform certain work such as scaling, painting, chipping, firing the boilers, etc., and that if required to perform such duties they shall receive payment on the basis of overtime rates.

The Board notes that Clause 15 (b) of the last agreement between the parties reads as follows:

Except in emergency, marine engineer officers will be required to do only the work and perform only the duties normally expected of one of his rank.

It appears to the Board that the matter in issue is properly covered by the wording of Clause 15 of the last agreement combined with the grievance procedure. Upon the representations made, the Board is of the opinion that scaling, painting, and chipping, are not properly duties to be performed by a marine engineer, and that if an engineer is called upon to perform such duties or other duties not properly those of an engineer, he should have recourse to the grievance procedure.

Accordingly, the Board does not find it necessary to recommend a change in the existing provision.

The whole of the foregoing comprising the unanimous report of the Board is respectfully submitted this 30th day of July, 1958.

## Report of Board in Dispute between

**Guy Tombs Marine Services Limited, Montreal, Davie Transportation Limited, Montreal, and Quebec Paper Sales and Transportation Company Limited, Quebec**

**and**  
**Seafarers' International Union of North America, Canadian District**

The Board of Conciliation and Investigation appointed under the provisions of the Industrial Relations and Disputes Investigation Act in this matter herewith presents its report.

During August the Minister of Labour received the report of the Board of Conciliation and Investigation established to deal with a dispute between the Seafarers' International Union of North America, Canadian District, and Guy Tombs Marine Services Limited, Montreal; Davie Transportation Limited, Montreal; and Quebec Paper Sales and Transportation Company Limited, Quebec.

The Board was under the chairmanship of H. Carl Goldenberg, QC, Montreal, who was appointed by the Minister in the absence of a joint recommendation from the other two members, Marcel Belanger, C.A., Quebec, and Bernard Boulanger, Montreal, nominees of the companies and union respectively.

The text of the report is reproduced here.

The Board was composed of—H. Carl Goldenberg, QC, chairman; Marcel Belanger, nominee of the employers; Bernard Boulanger, nominee of the bargaining agent.

Proceedings before the Board opened in Montreal on June 6, 1958, and were concluded on June 25, 1958. Each party presented its case at length and was afforded an opportunity for rebuttal.

At the final hearing before the Board the union reduced its demands to four, covering hours of work, wages and overtime, statutory holidays, and a manning scale. The parties could not reach agreement on these matters.

Having heard and examined the submissions of the parties, the Board finds and recommends on the said matters in dispute as is hereinafter set out.

### *Hours of Work*

The union demands a normal work week of five days of eight hours each, Monday

through Friday, and compensatory payment for all hours worked in excess of 40 hours per week. The employers submit that the nature of their operation makes it physically impossible to inaugurate a regular 40-hour week. Since neither party was prepared to recede from its position, the door was closed to discussion of an alternative basis.

Having considered the representations of the parties, the Board finds that the industry is a seasonal one having some seven months of the year in which navigation can be safely conducted, and that it appears to be impossible for an owner to schedule his operation in such a way as to reproduce conditions of shore employment to which a 5-day, 40-hour week can be effectively applied. The Board has sought a solution to this problem but has failed to find any.

Considering the foregoing, the Board finds that it cannot approve the union's demand. However, since the employees, owing to the nature of the employment which they have voluntarily chosen, are not in a position to enjoy some of the benefits available to employees in other industries, the Board is of the opinion that they are entitled to a compensatory payment in lieu thereof. Accordingly, the Board recommends as follows:

All employees covered by the agreement between the parties shall be entitled to receive 21 days' basic pay in lieu of vacation, instead of 14 days as provided in clause 8 of the last agreement, and that for shorter periods of service they shall receive a pro rata payment.

In consequence, it is the recommendation of the Board that clause 8 (a) of the last agreement shall be amended by substituting (21) for (14) in the second line thereof, and that clause 8 (b) shall be amended by substituting (21) for (14) in the third line thereof and 21/270ths for 14/270ths in the fourth line thereof.

#### *(a) Wages*

The union demands from the employers the same improvements in wages as it has requested from the Great Lakes shipping industry so that the employees be placed on an equal plane with the seamen on the Great Lakes. It demands that the monthly wage shall apply to a 5-day 40-hour week with overtime at increased rates for all work performed in excess of eight hours per day and on Saturday and Sunday. It was submitted by the employers that the union was in effect demanding an increase of 125 per cent in present wages. It was further submitted by the employers that having regard to their ability to pay, no increase is warranted at the present time. The union took issue with the employers' position.

The Board has given careful consideration to the submissions of the parties. It finds that the employers' operation is very different from that of the Great Lakes shipping industry both in its nature and in its financial results. Accordingly, having examined the relevant facts, including existing wage schedules and changes in the Consumer Price Index since January 1, 1956, the Board rejects the union's demand and recommends as follows:

The rates of pay of the employees covered by the agreement between the parties shall be increased for each classification by 9 per cent, of which an increase of 5 per cent shall be retroactive to the beginning of the 1958 navigation season and the remaining 4 per cent shall become effective at the beginning of the 1959 navigation season.

The employers' nominee on the Board dissents from this recommendation and recommends no increase in wages, as appears more fully from the memorandum of dissent hereinbelow.

#### *(b) Overtime*

With respect to the union's demand for overtime, the Board recommends no change in the provisions of the last contract.

#### *Statutory Holidays*

The union submits that the employees only receive five of the eight statutory holidays recognized by the employers. The Board points out that the union is under a misapprehension in this respect since Saint-Jean Baptiste and All Saints' Day, which fall within the navigation period, were substituted for New Year's Day and Christmas Day in the last agreement.

The union demands that penalty rates be paid for work done on statutory holidays. The Board finds that this would involve a scheduling of the steamship operation as in an industrial plant on shore, which is not practical, and, therefore, cannot recommend that this demand be granted.

#### *Manning Scale*

The union demands that the employers place in effect a minimum manning scale for each vessel as an integral part of the new agreement in order to promote safe working conditions for crew members. The employers maintain that their ships are adequately manned and that they are subject to and bound by the provisions of the Canada Shipping Act.

The Board finds that the adequate manning of steamships and the efficiency of personnel are generally conceded to be matters connected with the seaworthiness of the ship. In this respect the Board has taken notice of certain statutory provisions enacted by the Parliament of Canada, namely, The Canada Shipping Act, 1952,

chapter 29, and The Criminal Code, 2-3 Elizabeth II, chapter 51. The attention of both parties is drawn, more particularly, to Section 407 of the Canada Shipping Act, which reads as follows:

407. (1) Every steamship registered in Canada shall be manned with a crew sufficient and efficient from the point of view of safety of life for the purpose of her intended voyage, and shall, during such voyage, be kept so manned.

(2) If any of the provisions of this section are not complied with in the case of any steamship, the owner, if in fault, is liable, in respect of each offence, to a fine not exceeding five hundred dollars, and the master, if in fault, is liable in respect of each offence, to a fine not exceeding two hundred and fifty dollars.

In consideration of the foregoing, the Board cannot recommend a minimum manning scale as demanded by the union.

The whole respectfully submitted this 31st day of July, 1958.

#### MINORITY REPORT

On the question of wages, the employers' nominee cannot share the opinion of his colleagues. He acknowledges their having recognized the particular situation in which the companies involved were finding themselves, in recommending the status quo as to hours of work, the two-watch system, and the difference in wages paid on the Lakes and those paid by the companies concerned.

He is however of the opinion that, in recommending the same percentage increase as that recommended for employees on Lake vessels, the present Conciliation Board does not take into account the evidence of inability to pay which was submitted by the employers involved.

As a matter of fact, the employers submitted that the operation of their vessels was marginal inasmuch as transport costs them more per ton and per cord than it would cost were they to have recourse to the services of their principal competitors, i.e. the goëlette (schooner) and the railway. Moreover, the employers submitted their financial statements, which showed considerable losses. The employers' nominee is afraid that the proposed increase might lead to the eventual abandonment of operations. Already, since the opening of the navigation season, two vessels have had to be laid up for want of work.

For these reasons, the employers' nominee feels in duty bound to recommend no increase. The wages paid by the companies concerned are altogether reasonable and compare favourably with those paid in forestry operations, the main activity of the Donnacona Paper, parent company of Quebec Paper Sales and Transportation Company Limited. They compare even more favourably with the wages paid on the goëlettes where a sailor would not receive more than \$125 to \$150 per month. The age of seamen in the employ of the companies varies from 18 to 25 years and the occupation necessitates no apprenticeship or particular competence.

(Sgd.) MARCEL BELANGER.

## Minority Report of Board in Dispute between

Certain of the Canadian Railways  
and  
17 Unions of Non-Operating Employees

• *The majority report of the Board covering this dispute was published in the September issue of the Labour Gazette. The minority report was not carried at that time due to space limitations.*

On all issues other than the very important one of wages, the Board is unanimous. To this extent I would like to express my concurrence with the findings and recommendations of the majority report. I regret, however, the necessity for recording, respectfully but firmly, dissent on the basic wage problem. Although there are many, if not

most, portions of the majority report in this area to which I would be prepared to subscribe, I find they justify rather different conclusions. The realities are nonetheless inescapable even if some of them may be unpleasant. To ignore a malady is not to cure it.

In differing with my colleagues, I would like to express my appreciation for their unflinching courtesy, patience and kindness and my admiration for their conscientious devotion to the duties imposed upon them in the course of very lengthy proceedings.

All members of the Board have been most impressed and very much assisted by the very intensive study and thought evidenced in the presentations of both contending parties.

The latest increase in wage rates for non-operating railway employees came into effect on June 1, 1957. This occurred only seven months before commencement of the period in respect of which this Board is called upon to make its recommendations. It also coincided, although this could not have been foreseen by the members of the 1956 conciliation board or either of the protagonists before it, with the very eve or possibly the cold dawn of a recession.

Average hourly earnings of CNR and CPR non-operating employees stood at 76.5 cents in 1946. By January 1, 1956, they had risen to \$1.467. Since June 1, 1957, the average has been computed by the employees representatives at \$1.628. This 112.8-per-cent increase was not matched by an equivalent in take home pay as some of the benefits took the form of a reduced work week.

Apart from the improvement in wage rates, important objectives of the employees have been attained in the way of fringe benefits—a health and welfare plan, increased vacations with pay, statutory holidays and other items. During the years 1953, 1954 and 1955 there had been no change whatsoever in wage rates—a factor which weighed heavily with the last Board but which applies in reverse today. *"In the present case"*, said the Taylor Board in 1956, *"it must be remembered that the employees before us have not had any increase in wages since September, 1952, by virtue of an agreement which terminated at December 31, 1953."* In the light of four stages of increases introduced successively in 1956 and 1957, the contrast with the present situation must be noted.

Submissions before the conciliation board over which Mr. Justice Kellock presided in 1954, dealt exclusively with fringe benefits. The recommendations resulted in appreciable gains to employees and costs to the employers not translated into any change in the statistics of hourly earnings. Indeed, the concentration on these fringe benefits as the issue for the 1954-1955 period has been advanced by the employees as the major explanation for the lag between the wages of railway non-operating labour and those in durable goods industries which the present Board and its immediate predecessor have been asked both to correct for the future and redress, by additional upward adjustments, for the past. As expressed by the employees spokesman at

During July, the Minister of Labour received the Report of the members of the Board of Conciliation and Investigation appointed under the Industrial Relations and Disputes Investigation Act to deal with the dispute affecting the 17 international and national railway labour organizations, representing approximately 128,000 non-operating employees, and the Canadian National Railways, Canadian Pacific Railway Company, Toronto, Hamilton and Buffalo Railway Company, Ontario Northland Railway, Algoma, Central and Hudson Bay Railway, Midland Railway of Manitoba, and Railway Express Agency Inc.

The Board was under the Chairmanship of the Hon. Mr. Justice H. F. Thomson, Regina. The other members of the Board were Philip F. Vineberg, Montreal, the nominee of the companies and David Lewis, Toronto, the nominee of the joint negotiating committee for the unions.

The Report of the chairman and Mr. Lewis, constitutes the report of the Board. The minority report was submitted by Mr. Vineberg.

page 5698 of the transcript "...The evidence I think is pretty clear that what separated us from the durable goods standard in the last few years was the very protracted fringe benefit negotiations that allowed the gap to build up..."

The very emphasis on welfare and holiday benefits during this period only serves to underline their importance to both parties. If, as was contended, the railway employees were only seeking to match by these gains advantages available to labour in durable goods industries, then the alleged pre-existing parity between the two groups did not apply in terms of their aggregate remuneration. If, on the other hand, these gains, when added to existing pension plan and other benefits, had the effect of giving railway non-operating employees an advantageous position by comparison with the others, then the present disparity is not as great as claimed. In either event the 112.8-per-cent advance in average wage rates for the period above-mentioned has been substantially augmented by advances in fringe benefits. It might be added that one of these benefits—a contributory health and welfare plan entailing payment of 2½ cents per hour per employee by the railways and the resultant costs relating thereto—was only initiated as recently as January 1, 1957. Moreover, in measuring the results of wage increases in recent years it must be remembered that certain attendant pension costs which are geared to wage levels mount successively and correspondingly with each increase.

Fulfilment of all the employees' requests, as originally presented, would entail an annual addition to costs for Canadian

National Railways and Canadian Pacific Railway Company of \$130,063,000. If corresponding changes were made in favour of all their other employees, the amount would be \$192,941,000. This compares with an estimated net rail income *before fixed charges* in 1957 of \$17,431,000 for the CNR and \$40,200,000 for the CPR or an aggregate of \$57,631,000 for the two railways combined. Such a result represents a return, again before fixed charges of only 1.43 per cent on the net rail property investment of both railways combined. Invested at this rate, one might ask how much rail property would have to be set aside without interest or other fixed charges or any capital or amortization whatsoever to yield a sufficient sum just to pay the extra costs. The answer would embrace not only all the existing rail assets but also, in addition thereto, more than twice its equivalent. For at a continuation of the present rate of return it would be necessary to provide well over thirteen billion dollars of rail property—substantially over three times what is now invested—and free it from the prospect or obligation of any return whatsoever either in interest or capital, or any provision for amortization, in order for the two railways to meet the requests and maintain their present unimpressive net earnings position!

If the 1957 rate of return was low, there is little, if anything, to suggest any likely improvement in 1958. Any conceivable application or modification of the equation would not remove it from the realm of its staggering consequences.

One of the employees requests—dealing with health and welfare—has been removed by mutual agreement from the items on which this Board is called upon to advance recommendations. While relatively modest, the arrangements impose increased costs on the railways. Another issue has been indirectly removed from the purview of the Board by the parliamentary adoption of the Annual Vacation's Act which will ensure to all railway hourly rated employees two weeks' vacation with pay after two years of service in lieu of the present arrangements where they now receive one week's vacation annually until completion of three years' service. Whatever the origin of the change these items, along with the recommendation for increased vacations for employees with over 35 years service, involve additional costs to the railways.

The costs of the employees' requests for wage increases alone as estimated by the railways amounts to \$97,312,000 for the organized employees before us. The unions estimate, choosing a different basis, that

implementation of their wage proposals would total something very close to \$94,500,000 per year. One need not pause to evaluate the precise difference between the two appraisals. Without counting the additional costs to follow if equivalent benefits are granted to others, a 1-per-cent wage increase would cost \$4,464,700; a one-cent-an-hour increase, \$2,772,500. If the same rate of increment be added for all the other employees the corresponding aggregate annual costs would be \$6,895,500 and \$4,138,500 respectively. To apply the wage recommendations of the majority report would therefore add over fifty-seven million dollars to the annual wage bill.

These demands, and these suggested increases, come at a time when railway traffic has been on the decline. The downward movement has been under way ever since the second quarter of 1957 and has not yet been arrested. CNR operating revenues on Canadian lines fell from \$680,392,388 in 1956 to \$662,717,454 in 1957. Operating expenses rose from \$623,009,858 to \$645,814,952. In the process, net rail operating revenue before fixed charges declined from \$48,181,617 to \$12,383,971. This left \$26,170,037 in 1956 after fixed charges but resulted in a deficit of \$16,374,204 in 1957.

On the Canadian Pacific Railway, net railway earnings before fixed charges fell by some \$3,000,000 in the 1957 year over the immediately preceding period. CPR railway revenues in 1957 declined by \$17,706,914 over the corresponding figure for 1956; expenses were reduced by \$14,607,495. Actual gross ton miles of freight carried declined \$8,252,200. On its 1957 record the CPR rate of return on net rail property amounted to 2.91 per cent—substantially lower than investors would be able to obtain in the purchase of government bonds and contrasting with a yield of 5.14 per cent which the CPR had to offer in an issue on the securities market in February 1958.

In testimony before this Board the CNR originally estimated that without any change in labour costs a decline of \$52,000,000 could be anticipated in net earnings for 1958 over 1957 with a consequent increase in the resultant deficit. These returns were predicted upon implementation of all the recently approved Board of Transport Commission increases in freight rates but the Cabinet decision cancelling a projected 3.6-per-cent general freight rate increase will have a further seriously depressing effect upon returns to the order of approximately \$5,000,000. For the first five months of 1958 the worsening over

the corresponding period of the previous year had already amounted to \$38,000,000. The CPR estimate contemplates a projection in 1958 of the 1957 situation on the assumption that no increase in labour costs will develop. An anticipated drop of about seven million dollars in revenue would be offset, barring wage changes, by savings due to further dieselization and other improvements. Again the anticipated net for the year 1958 will be substantially below the permissive level of earnings established by the Board of Transport Commissioners.

The employees contend that railway costs and ability or inability to pay are irrelevant. Briefly stated, the argument runs along the following lines: Wage rates must be determined by the inflexible application of an objective "durable goods" standard to ensure that they conform to the levels of comparison previously adopted. If the railways are subjected to meagre returns on capital, this must be the result of public policy. In any event, railways must pay the same price for materials, for capital, for services, and therefore for labour as any other purchaser. Railway earnings are circumscribed by the statutory Crowsnest Pass grain rates, currently no higher than the 1897 level, and also by heavy losses on the compulsory operation of unremunerative passenger services. Railway rates are delimited by the rulings of the Board of Transport Commissioners and, at very least, there are delays in adjusting the rise of rates to any cost increases, whether through wage changes or otherwise. These conditions obtain by virtue of public policy. It was neither intended nor is it just, runs the argument, that railway employees be called upon, as a class, to subsidize through unduly low or unfair wage rates, the financial burdens dictated by a policy designed to benefit the Canadian economy as a whole.

Within appropriate limits, the argument is not without merit. Railway labour alone can not bear the contribution to political and economic nationhood of our trans-continental railway systems. But, does it? At very most, public policy in its demand on the railways is constant while the earnings of the railways fluctuate sharply. I have been unable to find any expression of public policy which would suggest that the present results are simply what was deliberately intended by governmental action—whether parliamentary, administrative or judicial. Indeed, in the recapitalization of the CNR in 1952, formulations of public policy indicated an intention that it should thereafter operate at a profit. As we have seen, this result is not being

achieved at the present time. Some of the recent changes in railway policy such as the "bridge subsidy" and increased payments under the Maritime Freight Rates Assistance Act reflect a growing concern over the position of the railways and the impact of compensatory freight rates on various segments of the Canadian economy. The 1951 Royal Commission on Transportation in speaking of the privately owned railway system expressed the view "*...It should be recognized that in addition to fixed charges, a private company must over a period of time have sufficient earnings to pay reasonable dividends to its shareholders and set aside reserves for a rainy day*". The CPR's record today does not meet this standard. While recognizing that railway wages can not be fixed by what the consumers of railway services are prepared to pay, the commission found it desirable to assert that "*...railway employees must bear in mind that they have a common interest with the companies in keeping the cost of operation within limits which will enable the railways to compete on a fair basis with other transportation agencies*".

The Board of Transport Commissioners has fixed a permissive level of earnings for the CPR as a guidepost in its determination of freight rates. This, the CPR has been unable to attain. For 1957 the permissive level of net rail earnings before fixed charges was set at \$51,521,000 while the actual returns, computed on the same basis as adopted by the Board, only reached \$43,200,000. The CPR contended and endeavoured, in vain, to have adjudicated before the Supreme Court of Canada that this permissive level made no allowance for retained earnings. By any measurement, the results have fallen far short of the enunciated fair rate of return.

The erosion of the freight rates structure derives not from any professed elaboration of public policy but from the inexorable results of alternative forms of transportation—trucking, pipe lines, automobiles and water carriage. A recent study on transportation prepared for the Royal Commission on Canada's Economic Prospects found that while Canadian railways carried 84 per cent of all freight traffic in 1928, this proportion had declined to 60.5 per cent in 1953. One of the exhibits produced before us showed that by 1956 the percentage had fallen to 57.1. Meanwhile over half of all railway gross earnings are absorbed by payroll expenses. If pension and health and welfare expenses be added labour costs accounted for 60 per cent. The law of supply and demand has not been repealed. Part of the railways financial

position is, of course, attributable to statutory rates and other governmental restrictions. However, apart from and independent thereof, the fortunes of the railways are interlocked with the same considerations of costs and selling prices as govern all industry. There are times, circumstances and undertakings when the ability to meet higher costs is present more than others. For the Canadian railways such an ability exists less in 1958 than it did even in 1956.

An interesting study of "Maintenance of Way Employment on U.S. Railroads" by Prof. William Haber and others, published by the Brotherhood of Maintenance of Way Employees, was submitted by the unions in the present case as Exhibit U-10. At page 165, the authors advance the apt comment: *"Over the long run, only prosperous employers can have prosperous employees."* Since the railroads will always face strong competition from trucks, busses, passenger cars, aircraft and ships, productivity growth is essential if stagnation or even decline are to be avoided." (italics mine.)

While the gap between actual earnings and the permissible level of earnings runs counter to public policy, it is nonetheless real. Moreover, when wage costs in recent years have been increased, an offsetting rise in freight rates in the face of competing alternative forms of transport is less and less productive of compensating returns to the railways. Exceptions are made to the highest level of general freight rates or "class rates" in favour of rates for special commodities for various stipulated raw materials and primary products but where competition impinges the railways must necessarily accept competitive and special agreement charges at lower levels. The Board of Transport Commissioners as the chosen instrument of public policy may thus approve a particular level of rates which the realities of the situation make possible of application to a lesser and lesser degree. The evidence discloses the increasingly frequent instances when the railways are unable to exact the rates judged to be fair and reasonable by the Board of Transport Commissioners. Where new increases are projected, however permissible they may be in the view of the governing authority, a possible resultant loss of traffic must be weighed. The disparity between rates approved by a public board and the level of charges which the competitive aspect will permit is not without relevance to the wage situation. In its last judgment issued on December 27, 1957, the Board of Transport Commissioners reiterated its concern with the "narrowing base" on which freight rate increases are applied. After

elaborating in tabular forms the results of its waybill analyses, the board observed:

It will be noted from the above table that the proportion of the revenue from "class" rates has declined materially since 1949 and is now only approximately one-half of the 1949 proportion. Class rates are the highest rates charged by the railways and it is apparent that a large part of the class-rated traffic has either been diverted to highway transportation or, if still hauled by the railways, is now carried at lower commodity rates, competitive rates, or agreed charges.

On an earlier occasion in its judgment on freight rates in March 1953, the board had observed:

Consequently the board is becoming increasingly concerned as to the long-term ability of the Canadian economy to continue indefinitely to bear successive increases in freight rates on the scale of the recent past. We have been urged by provincial counsel not to lose sight of the necessity, in the nation's interest, of stemming further inflationary influences. Even if such a consideration should lie within our competence, this board, nevertheless, becomes powerless in the face of increased wage costs to the extent with which we are here confronted.

We likewise have been repeatedly warned by counsel for the provinces as to the danger of the railways pricing themselves out of certain important transportation markets in the not too distant future and of the dangers in the approach of the law of diminishing returns. When precisely the saturation point may be reached no one appears to be in a position to say. It also has been indicated to us that if there is a real danger of the railways pricing themselves out of such markets there may be an equal danger of railway labor, in like manner and degree, substantially pricing itself out of its present type of employment.

In passenger traffic, the inhibiting effects of competition—unrelated to any deliberate formulation of public policy—are even more marked. The volume of revenue passenger miles for the CNR in the relatively prosperous 1956 year amounted to only 45 per cent of the 1945 total. Even if the returns for the latter year are substantially discounted because of wartime conditions, there is no denying the steady downward pattern. Notwithstanding many service improvements, no means of arresting the trend has as yet been devised. The number of automobiles on the public highways grows apace. In the five year period from 1952 to 1956 inclusive, automobile registrations increased from 2.30 to 3.17 millions. During the same period, revenue passenger miles recorded on the domestic services of Canadian airlines increased by 75 per cent. In the period between 1945 and 1956, the volume of revenue ton miles carried by inter-city trucking services increased almost fourfold. The forces that have produced these changes with their resultant impact on the fortunes of the railways continue to operate.

In an exhibit filed, for other reasons, with this Board embodying the submissions of the chairman of the CNR to the Royal Commission on Canada's Economic Prospects, the position in which the railways find themselves has been summarized in the following stark manner: "*The present situation is one which finds the railway industry preoccupied with the struggle for viability.*"

While ability to pay is not the sole criterion for determining wage rates, it has considerable impact on the degree and timing of any wage changes and an ultimately arresting influence on the pace of any upward movement.

To whatever degree they may have espoused the durable goods standard, previous boards of conciliation have also recognized some of the limiting factors imposed by financial considerations. The report of the board presided over by Mr. Justice J. O. Wilson in 1950 emphasizes the burden of the competitive position in the following terms:

Under certain conditions a union may be well advised to accept a lesser wage, with continuity of employment, rather than to insist on a higher wage, which may threaten that continuity. The competitive position of the railways viz a viz truck and water competition must always be kept in mind by union leaders as well as by railway managers, with a view to insuring that rail transportation does not price itself out of the market. That this can be done has been, we think, pretty clearly demonstrated in the coal industry, both in the United States and Canada, during the past few years. The changeover from coal to cheaper and more reliable forms of fuel has assumed the proportions of a stampede.

In the arbitration award of Mr. Justice Kellock in the same year is to be found the following statement:

The employees say that if they are to be denied warranted wage increases because the railways cannot get necessary revenue, they are in an "economic trap".

One can agree that such a denial would have the effect stated, but this does not establish that no regard can be paid to the fact that payment of the wages of railway employees can come from railway revenue only, the rates upon which they depend being subject to the jurisdiction of the Board of Transport Commissioners. An industry in a position to increase the price of its product without the necessity of considering any outside factor other than the probable effect of the increase on the volume of sales, is in a very different situation from that of a railway subject to the regulative jurisdiction I have mentioned, as well as to competition arising from road, water and air transport.

The chairman of the last conciliation board dealing with this subject in 1956 concluded that while he recognized "*that the wages of the employees of the railways*

*have remained unchanged since September, 1952, it is also a fact that to attempt to establish parity with 'durable goods' would place far too heavy a burden on the earnings and finances of the railways.*" Such a finding applies, "*a fortiori*" at the present time.

During the course of the hearings the employees strenuously objected to a comparison between railway machinists and those in the gold mining industry. It developed that gold mining wage rates are substantially lower than prevails elsewhere. Railway representatives agreed to a substitution but what keeps gold mining wage rates low? The depressed nature of the industry imposes an inevitable curb on the employees prospects for wage betterment. Any contention on their part that wage rates must result from what others are paying or that the price of gold is fixed by public policy may sound impressive but the measure of upward change is nonetheless governed by the progress of the industry. Similarly, while the durable goods industries have been treated before railway conciliation boards as a conglomerate mass, the various components of the durable goods aggregate inevitably reflect the same situation. Those few industries in the much vaunted durable goods group which felt the burden of marketing difficulties in generally prosperous times were simply unable to advance wage rates as rapidly as the others. Being unable to do so, they did not. For example, a "Review of Man-hours and Hourly Earnings, 1946-1956" published by the Dominion Bureau of Statistics, dealing with increased hourly earnings in 1955 in the durable goods division had occasion to comment on the agricultural implement industry, one of the constituent elements in durables not sharing fully in the general prosperity in the following terms:

A lower-than-average increase (2.3 per cent) was recorded in agricultural implement factories, largely accounted for by decreased employment and hours, caused by lack of export and domestic orders.

A conciliation board can do no more than recommend, in the interests of industrial peace what would be the fair level of labour return and what would be the fair pace of adjustment of such return if all the forces of supply and demand in the market were allowed free play. One of these forces is inevitably the financial position and prospects of the employer. On the railways these impinge all the more because of several factors. The 60-per-cent labour cost is abnormally high in contrast with the position in durable goods where the corresponding ratio is less than half.

The railways with their heavy fixed capital investment to say nothing of government controls and the restraints imposed by the public interest can not lightly abandon particular lines or services that competition has made unprofitable.

Maintenance costs in the railways are relatively much higher than in durable goods or other manufacturing operations. These costs are not easily related to revenues. They bulk all the larger when competitive conditions depress the volume of traffic. Almost half of all railway employees are engaged in the maintenance of the physical plant. Maintenance of way and maintenance of equipment operations may be deferred somewhat or even reduced but it is one of the realities of the situation that the size of the total plant and the requirements for its maintenance are not and cannot be directly contracted from pre-existing levels proportionately to, and quickly upon, a reduction in the flow of traffic. In 1957, the CNR spent \$140.4 millions on road maintenance alone—21.7 per cent of total operating costs. On maintenance of equipment \$139.4 millions or 21.6 per cent was expended. The relative CPR position was roughly comparable. Weather conditions in 1957 were exceptionally favourable—an advantage not duplicated so far by the 1958 experience. Labour is the major element in these maintenance costs. Any increase in wage costs, not offset by increasing revenues, would exert pressures unparalleled in the experience of durable goods or other manufacturing industries. There are few, if any, industries reflecting such rigidities as beset railway economics. Increased labour costs add to these rigidities. They can, in turn, only subtract from the ultimate employability of the railways and its labour force.

As a corollary of the fact that labour costs take up so much of all incoming dollars, it may be noted that the total gross revenue output per CNR and CPR employee in 1956 averaged only \$6,390. If some provision, however meagre, is allowed for other expenses, what is there left to divert? The equivalent return for all durable goods employees was \$15,052. Moreover, in the period from 1945 to 1956, the railway output per employee had risen 45.8 per cent—considerably less than half the rise in hourly earnings for non-operating employees during the corresponding period—by contrast with 136.2 per cent gross in durable goods. With all of their impressive emphasis on technological improvement, entailing great capital expenditures, the railways have simply been unable to match

the pace of rationalization attained in such industries as those forming the durable goods group.

Of the \$6,390 received by the railways in 1956 for each employee, as already noted, about 60 per cent went into payrolls, pensions, and health and welfare costs. A study of the railways' annual statements discloses expenditures of over \$1,000 per employee on materials. Gross capital expenditures per employee that year totalled \$1,553. If some came from new loans other borrowings of the past had to be repaid. Again, incidentally, if comparison is made with durable goods industries, less than a quarter of total revenue in this group went into payrolls while gross capital expenditure per employee was only \$635. The negotiating area in which more of the aggregate inflow might be diverted into payroll envelopes—even if all considerations of fixed charges and returns on capital are ignored—was very narrow indeed in 1956 and even narrower today. For the current year labour costs have gone up by comparison with 1956, while revenues have gone down. If there was any margin for discussion, it has been all but obliterated. Unless buoyant revenues not now in sight relieve the strain, the impact of any increased wage costs for all employees can only threaten the security of employment of many of them. Any significant changes in employee compensation must, at least in some measure, be judged by the resources available to meet such compensation and the consequences that arise when a serious imbalance results.

Any suggestion that the employees alone have been or are called upon to bear the brunt of the railways competitive struggle, either insofar as it emanates from public policy or otherwise, appears to be answered conclusively when one reflects that, in comparing 1945 and 1956, while average hourly earnings of non-operating employees were doubled the rate of return on railway operations to the CPR shareholder actually decreased by 11.5 per cent. For the CNR, last year's deficit and its projected aggravation in the current year, even before the impact of any wage increase that may result from the present controversy, bears eloquent testimony as to where the loss must fall and as to who pays the bill. The increased costs to the Canadian consumer through rising freight rates add a resultant burden to the Canadian economy rendered all the more difficult precisely because it is concentrated on a narrow base. The financial evidence discloses that we are long past the point of diminishing return and what is at issue in the present dispute strikes

at the very employability of the Canadian railways and their personnel.

The case of the unions has been based on wages in durable goods industries. Within this grouping are to be found a wide heterogeneous variety of undertakings: Aircraft, motor vehicles, shipbuilding, railroad and rolling stock equipment, saw and planing mills, furniture and other wood products, agricultural implements, hardware, tools, heating and cooking appliances, fabricated and structural steel, iron casting, machinery manufacturing, primary iron and steel, sheet metal products, aluminium products, brass and copper products, non-ferrous smelting and refining, heavy electrical machinery and equipment, radios and radio parts, batteries, refrigerators, vacuum cleaners and appliances, miscellaneous electrical products, wire and cable supplies, clay products and glass and glass products.

It is contended that "unmodified parity with the durable goods industry" must be granted as the established and accepted standard. Previous boards of conciliation have placed considerable emphasis on this standard, although, as the majority report points out in detail, with many reservations and qualifications. While the record is such that durable goods wages cannot be ignored, it does not follow that an automatic "unmodified parity" or a defined percentage thereof has become so established that this Board has no other function in wage matters than to measure one against the other and offer recommendations to eliminate the disparity.

Before the 1950 board, the nominee of the unions offered the following observations, in a different context, as part of his minority report:

In any case dealing with wages and working conditions it is not an answer to a request for improvement in wages and working conditions to point out, even if it be so, that the wages and working conditions existing are comparable to or even identical with those existing in other industries. To accept such a proposition would bring about absolute and final stagnation in all industries.

My esteemed and experienced colleague, the nominee of the unions before the present Board, who occupied a similar post in 1952 and 1956 remarked on the first of these occasions:

My respectful difference with my colleagues is that I cannot accept as valid the proposition that the earnings of the railway employees should be mechanically placed at the same level as the average earnings of the durable goods group.

It might be added that the nominee of the railways on these two boards had similarly not followed a consistent conclusion on the subject of parity with durable goods industries.

Whatever the observations about endorsing a durable goods standard, what are the results? For the last five years parity has not existed. In greater or lesser measure average hourly earnings for durable goods employees exceeded the corresponding average for non-operating railway employees. Indeed, this Board, along with its predecessor, has been asked at one and the same time to maintain parity on the basis of past precedent and to approve additional increases in order to compensate for the degree of parity which has not existed.

One of the main features distinguishing durable goods industries lies in the extraordinary advances of most of its component elements not so much during recent years alone as during the war and immediate postwar period. Starting from a common base of 1935-39 equals 100, the index of production for durable goods stood at 332.9 in 1957 compared with only 235.2 in non-durables. This level of difference has been relatively more or less constant for the last few years. Durable goods industries as a whole, and even to a lesser degree, non-durable goods firms have waxed while the railways have waned.

The comparison with durables has found favour on the grounds that, of all the alternatives hitherto presented their labour force approximated to the closest degree as a composite group to the non-operating railway workers in range of work, variety of skills, distribution of male and female employees, territorial allocations and regularity of employment. This was expressed in the report of the board over which Mr. Justice R. L. Kellock presided in 1952, in the following terms:

In the inquiry as to a standard furnished by industry outside the railway industry with which wage rates in the railway industry may be justly compared, it is obvious, as already indicated, that the criteria of comparison should include as far as is reasonably possible, such matters as similarity of work and working conditions, similarity in the proportions of male and female employees and skilled, semi-skilled and unskilled workers, as well as wide territorial distribution and regularity of employment.

In relation to durable goods, however, apart from the male-female division, the evidence discloses rather widespread discrepancies. This applies most in the territorial allocation of employees. It is established that urban employees generally enjoy a higher level of compensation than those who are similarly employed in rural communities. Amongst durable goods workers, fully 73.4 per cent were concentrated in the 32 largest metropolitan areas of Canada; the corresponding proportion for railway non-operating employees is 55.7 per cent. In the

high wage province of Ontario are to be found only 26 per cent of railway non-operating employees compared with 55.4 per cent of all those in durable goods industries. Indeed, 90 per cent of all durable goods employees are to be found in the highly industrialized region of Quebec, Ontario and British Columbia where only 60 per cent of the non-operating railway personnel are located. The railway average level of earnings covers workers in the smallest hamlets as well as the largest cities. If a correction was made for this factor alone by comparing wages region by region, instead of invoking one over-all national average against another, over one-half of the gap between durable goods employees and those of the railways in the non-operating category would be eliminated.

Regularity or otherwise of employment is another element whose importance has come to the fore within the past year. On a common base of 100 in 1949, the index of employment and income on January 1, 1957, adjusted for seasonal variations stood at 130.0 in durables and 107.5 in non-durables. For February 1957, the comparable levels were 118.3 per cent and 104.3 respectively. The proportion of decline was thus almost three times as great in durables as in non-durables. While precise figures were not adduced, all the available evidence attests to the railways ranking high in affording employees stability of employment. Durable goods employees bear the brunt of any slackening of production by a wholesale loss of jobs. Durable goods employers reduce their labour costs in declining periods by reduction of manpower. While the same forces tend in the long run to operate in the railways, the pace is much slower. Operating as they do on a nation-wide continuous service basis, the railways have been obliged to accept their labour costs as partaking more closely of the quality of fixed charges. To dictate changes in the same direction and pace as the level of wage rates in durables cuts much more deeply into the railways' position where the escape valve of reducing employment is blocked. In any event comparability with durables on the score of regularity of employment appears more and more tenuous in the light of the unemployment crisis of the last twelve months.

The bargaining range of employees in durable goods contrast sharply with those of the railways because more than twice as high a proportion of railway revenues are required to meet labour costs as is the case in durable goods manufacturing

or manufacturing generally. Exhibits R-16A and 16B reflect this continuing differential in striking degree.

While costs stand in such sharp divergence, what about prices? Adopting the year 1945 as a base of 100, rail freight revenue per ton mile had advanced to 159.3 in 1956. Passenger train fare rates during this period rose all of 10 per cent. These may be compared with the equivalent 1956 price index for the following durable goods industries:

|                                                                               |       |
|-------------------------------------------------------------------------------|-------|
| Wood products .....                                                           | 196.1 |
| Iron products .....                                                           | 203.4 |
| Hardware .....                                                                | 236.8 |
| Steel and metal work .....                                                    | 187.6 |
| Plumbing, heating and other equipment .....                                   | 182.0 |
| Other residential building material .....                                     | 206.5 |
| Copper and its products .....                                                 | 346.1 |
| Lead and its products .....                                                   | 295.2 |
| Zinc and its products .....                                                   | 254.2 |
| Clay and allied material products .....                                       | 202.3 |
| Plate glass .....                                                             | 156.8 |
| Window glass .....                                                            | 162.4 |
| Pottery .....                                                                 | 125.5 |
| Electrical equipment and materials (non-residential building materials) ..... | 192.5 |
| Electrical equipment and fixtures (residential building material) .....       | 218.8 |

Compared with durables and with industry generally, the railways have been placed in a vise. Labour costs are doubly high while the acceleration of revenues to offset any increases is sharply braked. Any decision demanding a common rate of wage advance not only tightens the squeeze but narrows what is left to squeeze.

Durable goods industries are essentially concentrated in manufacturing enterprises. Some relatively incidental maintenance work is involved in certain segments bearing a counterpart to the maintenance of equipment operations in the railways but the main equivalent of production work is to be found in the running trades whose wages have not been included in the computation of average hourly earnings under review before this Board. If a general over-all analysis is made of railway employees' wages, inclusive of those in the running trades and excluding office employees who are also not embraced in the durable goods plant returns, the 1956 average hourly earnings per railway employee amounted to \$1.690 compared to \$1.632 for durable goods employees. The November 1957 equivalents were \$1.789 and \$1.766 respectively. In other words, if railway employees as a whole instead of only those in the non-operating category were to be compared, their average rates would emerge at a higher level than that of the durable goods labour force.

The most ardent advocate of the durable goods standard has never suggested that

the employees in these industries offer an equivalent counterpart to the railway non-operating personnel. At most the standard was advanced as a rough rule of thumb guide to compare one widespread cross section with another. For the first time, in hearings before conciliation boards, the railways have testified to a detailed occupational comparison based on an attempt to recreate a composite cross Canada labour force regionally distributed in the same manner as railway non-operating workers and carrying out either the same or equivalent types of jobs. A number of the detailed comparisons, especially in the maintenance of equipment area, was drawn incidentally from segments of the durable goods industries. Many of the challenges to comparability directed, in some instances not without justification, at the standard proffered by the railways could, with equal or greater force, be applied against the durable goods standard. The results of the lengthy inquiry drives home all the more forcefully that CPR and CNR employees can as composite labour forces only be compared with each other, a practice which could serve no purpose when their collective bargaining is conducted on a basis of equality in wage rates for similar classifications. Any other comparison whether with durable goods or otherwise meets with very considerable difficulty and serves to emphasize the dissimilarities along with the similarities. The outside industry composite wage study presented by the railways has been less convincing in some of its detailed aspects than in others but on the whole even after adjustments are effected it substantiated the position of the railways that existing wage rates are not out of line with comparable levels in outside industries reasonably distributed on the same pattern.

Genesis of the underlying approach of this railway method of comparison may be found in the procedure adopted by the National War Labour Board in its study of railway employees' wages in 1944. This was explained in the report of the National War Labour Board of July 31, 1954, in the following terms:

The Board caused an examination and study to be made of the wage rates received immediately prior to the war by employees in a large and representative group of industrial and other establishments in all parts of Canada. In making the examination and study we were careful that the establishments under review were not only representative of all parts of Canada but also of the various types of industry in the country, and care was also taken to make sure that the establishments examined and studied had in their employ a wide enough range of classifications to embrace classifications reasonably

similar or comparable to as large a number as possible of railway classifications. Similar information was obtained with respect to wage rates received by employees in these same establishments at the date of this application and comparisons were made with wage rates received by railway employees at the same dates.

Further details of the method of procedure were elicited by inquiry from the unions' representatives addressed to the Department of Labour, the answer to which was reproduced in Exhibit U-17. It indicates that the National War Labour Board compared various occupations in the railways and in industry generally. Many of these reflected the same occupational classification for which the railways in their study were to find comparisons in 1957 although there is no evidence that any particular outside comparisons were the same or not. The railway study of 1957 applied on a broad and widespread scale what the National War Labour Board had done in its 1944 study—i.e., measure the wages of railway workers against those in similar or comparable occupations in outside industries. Spokesman for the employees while broadly admitting the similarity in techniques protested against the lack of objectivity in a study made by one party to the dispute by comparison with an analysis emanating exclusively from a government agency. While this objection is understandable, no one can or did deny that in those areas where differences of opinion were possible the choices ultimately adopted were selected in good faith. There was a comprehensive effort to measure like with like and comparable with comparable. Many tests and examinations, whether imposed by university professors or others, necessarily entail application of subjective evaluation. This does not in itself detract from the wisdom of the testing or the usefulness of the results. I would not be prepared to recommend that the railway standard, in the form submitted to us, be adopted as an inflexible guide. What is not a guide may be a check. In this case, the check confirmed that, in broad general terms, current non-operating railway wage levels are not out of line with what is reasonably comparable.

In applying the ultimate comparisons, the National War Labour Board, in 1944, observed that:

Due allowance had to be made for the security and pension rights enjoyed by employees in the railway service as compared with those enjoyed by employees in other industry.

The Wilson Board in 1950 had commented:

In making these comparisons it must be remembered that the incidental advantages

enjoyed by rail workers are generally greater than those granted to other Canadian workers. Records show that the continuity of employment in the railroad industry is relatively high, which must have the effect of increasing average annual earnings. The employees have the benefit of pension plans. They and their families are entitled to a considerable measure of free transportation. Certain employees are given free housing and others free uniforms. In the aggregate these factors add considerably to the advantage of railway employment.

The evidence discloses that the CNR disbursed in pension expenses per man hour in the year 1946 a sum of 14.2 cents while the CPR expended for similar purposes in the twelve-month period September 1, 1956 to August 31, 1957, 12.7 cents per each man hour. At the present time, annual contributions to the Pension and Health and Welfare plans for employees amount to \$41,000,000 for the CNR and \$22,000,000 for the CPR. Pension plans, and to a lesser extent, health and welfare, are becoming widespread in durable goods industries but they are far from universal. No measurement of any alleged disparity with durable goods industries even to the extent to which it may be applicable can be made without appropriate adjustments measuring the relative differential on this score. Furthermore, as explained at the outset, important additional gains in health and welfare and other fringe benefits have been registered in recent years, again requiring appropriate corrections to any comparisons with durables that may be attempted. Railway employees enjoy extensive free transportation privileges. It has been suggested that these cost the railways nothing because the trains are running anyway whether their employees come aboard for free transport or not. Even railway employees, however, would have occasion, outside of their duties, to travel by rail, and some of the trips whether out of necessity or pleasure would be made even if the free transport privilege were not extended. At very least, therefore, the railways must lose or, to be more exact, expend by way of labour costs the equivalent of what they would otherwise receive in passenger fares if employees did not enjoy this privilege. The evidence discloses that this is not inconsiderable. In 1956, the CNR had 150,947 long service passes outstanding in favour of 60.3 per cent of all employees; 382,190 trip passes were issued, of which it was estimated that approximately 40 per cent were for business connected with the railways, and 29,312 one-half rate orders were issued. Some of the passes avail for the benefit of pensioners rather than current employees of the railway. Lesser benefits in the way of dwellings on a free

or reduced basis, incidental commissions and gratuities, inured in favour of a relatively small portion of the total number of employees but collectively they would serve to augment the ultimate aggregate compensation entering into any scales of comparison.

Furthermore it might be noted that any discrepancy between the pay of railway employees and that for comparable work elsewhere of the extent and duration contended in the unions' submissions would tend to create serious difficulties on the part of the railways in obtaining personnel. The evidence discloses the reverse to be the case.

Changes in the price level have modified the real gains in wages that are expressed in the upward move of nominal earnings. They have also modified, of course, the purchasing power of any residue of monies available to the railways after payment of wages. On a base of 1949 equalling 100, the consumer price index calculated by the Dominion Bureau of Statistics was 77.5 in 1946, and 118.1 in 1956. By December 1, 1957, the index had moved upward to 123.1 and after successive monthly increases it has remained fixed at 125.1 for May and June in 1958. The unions have submitted evidence showing that for the period from 1945 to April 1958, the rise in real hourly earnings for CPR employees amounted to only 27.7 per cent compared with a 113.1 per cent rise in nominal money earnings. This is certainly a striking reminder of the declining purchasing power of our currency. Without trying to unravel cause and effect, any upward revision in wage rates at the present time will be partially self-defeating in further reducing the dollar's purchasing power. The last Conciliation Board recommended an 11-per-cent increase in wages for the period from January 1, 1956 to December 31, 1957. During this interval the consumer price index rose from 116.8 to 123.1 per cent—a 54-per-cent increase. One-half of the last wage increase has thus been absorbed by rising costs. When placed against the background of the general pattern in the last 13 years during which almost three-quarters of the wage increase was similarly attenuated, the relative increase in real wages resulting from the decision of the last conciliation board emerges as much more substantial than the long range equivalent. From the date of the application of the last wage award until the present time, the cost of living has increased less than 3 per cent and is at least momentarily levelled off. For this reason in a period of acute financial struggle for survival in

# LABOUR LAW

## Changes in 1958 in Canadian Annual Vacation Legislation

Four acts dealing with annual vacations passed at 1958 legislative sessions, including first federal vacation with pay legislation. Only two provinces now lack laws establishing minimum vacation standards

Four acts dealing with annual vacations were passed at the 1958 legislative sessions. Parliament enacted the first federal vacation with pay legislation applicable to the industries subject to federal jurisdiction, Nova Scotia enacted a Vacation Pay Act, and the New Brunswick Vacation Pay Act, previously limited to mining and construction, was extended to fish, fruit and vegetable packers. The Saskatchewan Annual Holidays Act was amended to provide for a three-week vacation after five years service.

The New Brunswick amendment came into force June 30, the federal Act on October 1, and the Nova Scotia Act will come into force January 1, 1959. The three-week vacation provision in Saskatchewan became effective on the first date after September 30, 1957 on which any employee became entitled to at least his fifth annual holiday.

With the coming into force of the Nova Scotia Act next January 1, all provinces except Newfoundland and Prince Edward Island will have legislation establishing minimum vacation standards. There is also an Ordinance in the Yukon Territory, and, as mentioned above, the federal Act applicable to shipping, railways, air transport, interprovincial road transport, the communications industries, banks, grain elevators and feed mills, certain mining operations, and federal crown companies. A statutory requirement upon employers to give annual vacations to their employees under certain conditions is thus close to being general throughout Canada.

The first such enactment was the Ontario Hours of Work and Vacations with Pay Act passed in 1944, which provided for a week's vacation with pay. In the same year Saskatchewan passed the Annual Holidays Act providing for a two-week vacation after a year's service, effective from 1946.

Vacations with pay were made a legal requirement in Alberta in 1946 by orders under the Labour Welfare Act (now the Alberta Labour Act) requiring one week after a year's service and two weeks after two years. That year also British Columbia passed its first Annual Holiday Act providing for a week's annual paid vacation, the Act being replaced effective July 1, 1957 by one which requires two weeks. In 1946, also, Quebec amended the Minimum Wage Act and the Collective Agreement Act to permit the issuance of orders providing for vacations with pay and issued a general order establishing a minimum of one week. In the following year, 1947, Manitoba passed the Vacation Pay Act requiring employers to give one week's vacation with pay, amending it in 1951 to provide for an additional week after three years. An Ordinance was passed by the Yukon Territorial Council in 1950 providing for a two-week annual vacation. The New Brunswick Vacation Pay Act was passed in 1954, to take effect June 30, 1955.

### Coverage

The new federal Act and the Nova Scotia Act, like most of the other vacation legislation, have wide coverage. The federal Act does not exclude any employees, but authorizes the Governor in Council to exempt by regulation; the Nova Scotia Act, like the Acts of most other provinces, exempts domestic servants and farm workers, and also exempts employees in lumbering and commercial fishing. Additional exclusions may be made by regulation.

This section, prepared by the Legislation Branch, reviews labour laws as they are enacted by Parliament and the provincial legislatures, regulations under these laws, and selected court decisions affecting labour.

## Entitlement to Vacation

Under the federal Act, entitlement to a vacation is expressed in terms of a "completed year of employment," by which is meant continuous employment with one employer for a period of 12 consecutive months beginning with the day the employee commenced work or any subsequent anniversary thereafter, or for a calendar year or other year approved in relation to any federal work, undertaking or business by the Minister of Labour under the regulations. If, at the end of a completed year of employment, whether begun before or after the coming into force of the Act, and including a year begun within two years prior to the commencement of the Act, an employee has less than two years' service with one employer he is entitled to a vacation of one week and if he has two or more years he must be given a two-week vacation. No work requirements are set out but provision is made for the issuance of regulations to deal with the question of absences from employment.

Under the Nova Scotia Act, an employee is entitled to a paid vacation of one week if, after January 1, 1959, the date the Act comes into force, he has worked for at least a year for one employer. There is also a work requirement (90 per cent of the regular working hours during the year). Besides the year's service requirement, which is common to all the Acts, specific work requirements are set out as well in the legislation of New Brunswick, Manitoba, Alberta and British Columbia—225 days in the year in New Brunswick, Alberta and British Columbia and 95 per cent of the regular working hours in Manitoba.

Under the Nova Scotia Act an employee who works less than the prescribed 90 per cent of the regular working hours must be given an allowance equal to 2 per cent of his earnings within a month after the 12-month period ends. In New Brunswick, Alberta and British Columbia an employee who does not meet the work requirements is also entitled to a vacation allowance, payable within 30 days of his anniversary date in Alberta and British Columbia and within four months in New Brunswick.

The annual vacation requirements set out in the new legislation (one or two weeks in the federal Act, depending on service; one week in Nova Scotia, and two or three weeks in Saskatchewan, depending on service) and the minimum vacation pay required, are compared with the similar provisions in the other jurisdictions in the table below.

## Transfer of Business

The federal Act, like the legislation of Manitoba, Saskatchewan, Alberta and British Columbia, provides that where a business is sold, leased, or otherwise transferred from one employer to another, the employment of an employee will be deemed to be continuous and uninterrupted for the purposes of computing annual vacation and vacation pay.

The Quebec Minimum Wage Act also provides that vacations with pay granted by an ordinance according to the duration of an employee's services are to be calculated according to the period during which he has been employed at the same enterprise without regard to changes of ownership.

The new Nova Scotia Act, and the other vacation laws, do not deal with this subject.

The federal Act and the Nova Scotia Act provide that vacations must begin not later than ten months after the completed year of employment. Similar limits are imposed in the other jurisdictions, except that the period is 12 months in Quebec and four months in the Alberta order and in New Brunswick.

Under the federal Act, if a special holiday for which wages are paid to an employee without working occurs during the vacation period, an employee is entitled to an additional day with pay. The Nova Scotia Act stipulates that if a holiday, which is not defined, occurs during a vacation period, the vacation must be lengthened by one working day. In Manitoba, Saskatchewan and British Columbia, employers are also obliged to give an employee an additional day if a statutory holiday to which he is entitled occurs within the vacation period. In Alberta, an employee must be allowed an extra day where a statutory holiday in which the employer's place of business remains closed occurs within the vacation period but the legislation does not specify that it is to be a day with pay.

## Vacation Pay on Termination of Employment

In line with the requirements of the earlier vacation pay legislation, both new Acts provide for the payment of vacation pay on termination of employment. Even if an employee has not completed a year which would entitle him to a vacation, he is deemed to be entitled to vacation pay for the proportion of the year he has worked, so long as he has had a specified period of continuous service, 30 days under the federal Act and three months under the Nova Scotia Act.

## MINIMUM ANNUAL VACATION STANDARDS

| Minimum Annual Vacation                                                         | Minimum Vacation Pay                                                                                                                                                                                                                                                                                                                                            |
|---------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <i>Federal Act:</i><br>One week after one year; two weeks after two years.      | 2% of wages for the year for one-week vacation; 4% for two-week vacation. Wages means gross wages or salary, whether in cash or in kind, and includes vacation pay and overtime.                                                                                                                                                                                |
| <i>Nova Scotia:</i><br>One week after one year.                                 | 2% of earnings for the year. Earnings shall include cash value of board and lodgings.                                                                                                                                                                                                                                                                           |
| <i>New Brunswick:</i><br>One week after one year.                               | 2% of earnings for the year. Earnings means the pay received for all work done.                                                                                                                                                                                                                                                                                 |
| <i>Quebec:</i><br>One week after one year.                                      | Regular weekly pay if engaged and paid by the week or longer period; otherwise 2% of earnings between May 1 and April 30, including vacation indemnity. During vacation the employer must continue to provide benefits such as board, pension and group insurance payments, sick benefits, etc.                                                                 |
| <i>Ontario:</i><br>One week after one year.                                     | 2% of pay received for work done during working year.                                                                                                                                                                                                                                                                                                           |
| <i>Manitoba:</i><br>One week after one year; two weeks after three years.       | Regular pay; if on an incentive basis, the amount is to be based on average weekly production in six months preceding vacation. If meals or lodgings are part of wages, cash value is to be included in vacation wages if employee does not receive them during vacation.                                                                                       |
| <i>Saskatchewan:</i><br>Two weeks after one year; three weeks after five years. | Average wage, which in first four years means 1/26 of total wage, and after fifth year means 3/52 of total wage. Total wage means all remuneration the employee is paid or is entitled to be paid, including deductions, overtime, annual or special holiday pay, cash value of board or lodging.                                                               |
| <i>Alberta:</i><br>One week after one year; two weeks after two years.          | Regular pay for each week of vacation. Regular pay for week for monthly rated employee is monthly wage divided by 4½; if paid by the hour, day or week the actual rate for preceding period; if on piece work or commission, average for term of employment or preceding 12 months, whichever is shorter. Regular pay includes cash value of board and lodging. |
| <i>British Columbia:</i><br>Two weeks after one year.                           | 4% of total wages and salary. Wages includes any compensation for labour measured by time, piece or otherwise.                                                                                                                                                                                                                                                  |
| <i>Yukon:</i><br>Two weeks after one year.                                      | Vacation wage, which means 1/26 of total wage. Total wage means all remuneration employee is paid or is entitled to be paid including deductions, annual or special holiday pay, cash value of board or lodging, but not any bonus, incentive pay, overtime pay, or shift differential.                                                                         |

In Quebec, British Columbia and Saskatchewan there is no specified period of service upon which entitlement to vacation pay on termination depends, a 30-day requirement having been removed from the Saskatchewan Act this year. There is a 30-day requirement in Alberta and in the Yukon, and three months in Ontario unless the employment has been discontinued by the employer.

In Manitoba, vacation wages are payable on termination only if the employee has worked at least 95 per cent of the regular working hours during a period of 11 continuous months or more, in which case he is entitled to the wages he would have received had he completed a year's service, one week's wages or two weeks' wages depending on his length of service.

### Postponement of Vacation

A new provision added to the Saskatchewan Act by the 1958 amendment authorizes the Lieutenant-Governor in Council to make regulations providing for the postponement of one week of each annual vacation for a period not exceeding four years, if the employer and employee agree and the Minister approves. To ensure employees of the vacation wages to which they are entitled, employers may be required to deposit vacation pay in a trust account or to furnish a bond approved by the Minister of Labour, or some other form of guarantee. There is no comparable provision in any of the other Acts, except that the federal Act authorizes the Governor in Council to make regulations "defining the circumstances and conditions under which the rights of an employee

may be waived or the enjoyment thereof postponed”.

### Effect on Collective Agreements

Generally speaking, as in the other Acts, the provisions of the new legislation do not interfere with more favourable plans but will take precedence over an agreement containing less favourable terms. However, the federal Act contains a provision that if there is any inconsistency between the Act and the provisions of a collective agreement entered into before the coming into force of the statute, the provisions of the agreement will prevail until the agreement expires. Moreover, agreements signed after October 1 may take precedence over the statute if they contain vacation provisions approved by the Minister of Labour.

This last provision was introduced during the debate on the bill, the Minister of Labour explaining that many collective agreements had provisions for the granting of annual vacations with pay which had operated satisfactorily for a number of years and that though some provisions might conflict with the Act, the sum total might be considered by the parties affected to be more satisfactory for their purposes than the vacations-with-pay provisions provided by the legislation. This is somewhat similar to a provision in the British Columbia Act which states that the Act does not apply to an employer or his employees who have entered into an agreement for the granting of an annual holiday or pay in lieu thereof and the agreement has been approved by the Minister.

### Vacation Stamp System

The Nova Scotia Act provides for a vacation stamp system for employees in the construction industry who are frequently employed by several employers during the year. The system may be extended to any work designated by the Governor in Council.

Stamps equivalent in value to 2 per cent of the worker's earnings during the period of employment must be affixed by the employer to the stamp book within 10 days of termination of employment. The employee may cash his stamps at a char-

tered bank any time after one year from the date he began to work for the employer who issued him his stamp book. The Minister with the approval of the Governor in Council may make reciprocal arrangements with other provinces for the cashing of vacation stamps.

Vacation stamp systems are already in effect in New Brunswick, Quebec, Ontario, Manitoba and Alberta. A vacation credit system could be provided for by regulation in British Columbia and for any appropriate employment in the federal industries under the authority in the federal Act for the Governor in Council to make regulations “for the calculation and determination of vacation and vacation pay in the case of seasonal and temporary employees or in other suitable cases”.

In Quebec, the vacation credit system applies to manual employees in the construction industry who work for several employers in the course of a year and may be extended to other workers. In Manitoba, transitory construction workers in the Greater Winnipeg area are covered by the stamp system, and the Alberta stamp system is at present limited to the construction industry, although it could be extended to other industries.

In New Brunswick and Ontario, the stamp system has a somewhat wider use. In New Brunswick, it applies to temporary employees in construction and mining and, since June 30, employees of fish, fruit and vegetable packers whose employment is not continuous. In Ontario all construction workers are under the stamp system, whether continuously employed or not, and stamps are used as vacation pay for employees in other industries whose services are terminated during the working year.

### Enforcement

As in the provincial Acts, penalties are provided for violations of the federal Act or regulations. Any person who, on summary conviction, is found guilty of an offence may be fined up to \$500. An employer may also be ordered to pay an employee the vacation wages to which he is entitled. Similar penalties are provided in the Nova Scotia Act.

---

### Report of Board *(Continued from page 1158)*

the Canadian railways it does not justify any immediate increase in unit labour costs.

In deciding what wage rate should apply on January 1, 1958, we must recognize that more than one-half of the current year has already elapsed. Retroactivity, while justified in many cases, and a reasonable necessity in others, does not commend itself in the present instance. The financial

returns of the railways have been such that imposition of an additional burden for the past period is doubly unwarranted.

For these reasons I would recommend maintenance of the current wage level for the 1958 year.

Montreal, July 28, 1958.

(Sgd.) PHILIP F. VINEBERG,  
Member.

# Legal Decision Affecting Labour

Saskatchewan Court of Appeal upholds labour Relations Board's order to company found guilty of unfair labour practice to reinstate worker

The Saskatchewan Court of Appeal, in a majority judgment rendered on June 16, 1958, dismissed a company's appeal against the decision of the Labour Relations Board ordering reinstatement of a worker by the company, which was found to have engaged in an unfair labour practice, and fixing the compensation for the worker's monetary loss. (See preliminary judgment in the same case, L.G., Aug. 30, 1958, p. 897).

The circumstances of the dispute were as follows. Frank Girling started his employment with MacCosham Storage and Distributing Company (Saskatchewan) Limited on May 10, 1948. He had been president of his local union for approximately two and one-half years. He was re-elected to the position of president of the local union on November 18, 1957. On November 22, 1957, he was summarily dismissed by his employer, allegedly for having made errors in the checking of pool car shipments on the previous day.

Following this discharge the Canadian Brotherhood of Railway Employees and Other Transport Workers, Division No. 189, applied to the Saskatchewan Labour Relations Board for an order declaring that in discharging the said employee the company had engaged in an unfair labour practice within the meaning of Section 8 (1) (e) of the Trade Union Act, and requiring the company to reinstate the employee.

Following this application the Labour Relations Board in virtue of the authority vested in it by Section 5 (d) and (f) of the Trade Union Act, and after hearings, issued an order on February 11, 1958, in which the Board stated that the company in discharging the employee Girling on November 22, 1957 engaged in an unfair labour practice within the meaning of Section 8 (1) (e) of the Trade Union Act, and ordered the company to reinstate the employee in his employment within 24 hours from the time of service of the order upon the president or other officials of the company.

The second order of the Board, issued the same day, stated the compensation for monetary loss suffered by Girling by reason of his discharge.

The company challenged the Board's decision by applying to the Court to quash both orders of the Board; attacking the validity of the Board's decision mainly on the grounds that the order finding an unfair

labour practice and directing reinstatement of Girling showed an error on its face in failing to specify or disclose the facts or ingredients which constituted the discharging of Girling an unfair labour practice within Section 8 (1) (e) of the Trade Union Act, and in requiring the company to reinstate the employee within 24 hours from service of the order instead of forthwith, and further that the delay in effectiveness of the order contradicted the finding of an unfair labour practice.

It was conceded that the Board had jurisdiction to hear the complaint as filed by the trade union. It was not suggested that the Board, in the conduct of the hearing, exceeded its jurisdiction or declined jurisdiction. Neither was it alleged that there was a denial of natural justice.

The majority decision upholding the Board's orders and dismissing the company's appeal was delivered by Mr. Justice McNiven, with whom Chief Justice Martin and Mr. Justice Culliton concurred.

Mr. Justice McNiven first reaffirmed the stand taken by the courts previously that in spite of the privative clause contained in Section 17 of the Act an error on the face of an order is a ground for quashing an order in *certiorari* proceedings.

Afterwards he analyzed the provisions of Section 8 (1) (e) of the Trade Union Act, which essentially provides:

It shall be an unfair labour practice for any employer

(1) to discriminate in regard to hiring or tenure of employment or any term or condition of employment;

or

(2) to use coercion or intimidation of any kind including *discharge* or threat of discharge of an employee with a view to encouraging or *discouraging*

(a) membership in, or

(b) activity in or for a labour organization, or

(c) participation of any kind in any proceeding under this Act

and

if an employer...discharges an employee from his employment

and

it is alleged by a trade union that such employer...has thereby committed an unfair labour practice within the meaning of this clause, it shall be presumed unless the contrary is proved that such employer has discriminated against such employee in regard to tenure of employment with a view to discouraging

(a) membership in, or

- (b) activity in or for a labour organization or
- (c) participation in any proceeding under this Act.

Counsel for the company took the position that it is not an unfair labour practice to discharge an employee under the Trade Union Act and only becomes so under Section 8 (1) (e) when such employee is discharged with a view to encouraging or discouraging, (a) membership in, or (b) activity in or for any labour organization, or (c) participation of any kind in any proceeding under this Act; that each of the foregoing "a", "b" and "c" expressed in the alternative is an ingredient of an unfair labour practice and a positive finding by the Board with respect thereto is essential to the validity of its order; that the expression as used in the Board's order, "within the meaning of Section 8 (1) (e)" is not a sufficient substitute for a positive finding by the Board; that the employer should not be left in uncertainty and doubt as to the precise unfair labour practice in which it has engaged; that the Court should not be asked to speculate as to what was included in the order of the Board.

In the opinion of Mr. Justice McNiven, Section 8 (1) (e), stripped of non-pertinent phraseology, may be read as follows:

It shall be an unfair labour practice for an employer or employer's agent to discharge an employee with a view to discouraging membership in or activity in or for a labour organization or participation of any kind in a proceeding under this Act.

The presumptive clause in Section 8 (1) (e) that the employer discriminated against the employee (thus committing an unfair labour practice) goes into effect (unless the contrary is proved) when it is alleged by a trade union that the employer has discharged an employee from his employment and by doing so "has thereby committed an unfair labour practice within the meaning of this clause".

Mr. Justice McNiven was of the opinion that the complaint made by the trade union contains the allegations which meet the requirements of the section to give rise to the presumption, and thus clearly identifies the unfair labour practice with which the employee is charged.

Further he added that the Trade Union Act is a code with the object as defined in the preamble to the Act:

An Act respecting trade unions and the right of employees to organize in trade unions of their own choosing for the purpose of bargaining collectively with their employers, and confers a jurisdiction upon the Labour Relations Board which is exercised as defined therein.

The essence of the complaint is the dismissal of an employee with a view, that is the intent, design, aim or purpose, of *discouraging* membership in or activity in or for a labour organization as defined in the Act or participation of any kind in a proceeding under this Act. The employee is the immediate victim of the employer's motive in discouraging in him and/or in others the activities expressed disjunctively but there is nothing in the Act which precludes their cumulative effect as an unfair labour practice. It may well be that an employee as a member is also active in a labour organization and in a proceeding under this Act may appear as a witness. In case of dismissal under such circumstances, if uncontroverted, the presumption would arise and the Board would not be required to distinguish and declare which was the dominant view or intent in order to find that the employer engaged in an unfair labour practice. "View" connotes a state of mind which may be established by proof of an overt act or admission but more frequently is established by inference from an accepted fact or facts.

In support of his stand Mr. Justice McNiven referred to and quoted from *Taylor v. Clemson*, 8 E.R., p. 1233; *Dempster v. Purnell*, 133 E.R. p. 1189; and quoted Section 11 of The Interpretation Act, R.S.S. 1953, c. 1, which reads:

Every Act and every regulation and every provision thereof shall be deemed remedial, and shall receive such fair, large and liberal construction and interpretation as best insures the attainment of the object of the Act, regulation or provision.

He concluded that in his opinion the finding of an unfair labour practice was sufficiently expressed in the Board's order.

Afterwards Mr. Justice McNiven dealt with and rejected the company's second objection that the Board's order requiring the employer to reinstate the employee within 24 hours after service of a copy of the order upon the employer or its agent instead of "forthwith" shows an error on its face and that such delay in effectiveness of the order contradicts the finding of an unfair labour practice.

He accepted the meaning of "reinstatement" as defined in *Re: Trade Union Act: re Blackwoods Beverages Limited and Dairy Employees, Truck Drivers and Warehousemen Local 834*, (L.G. 1956, p. 1032) to the effect that reinstatement means replacing the employee in the position from which he was dismissed, and continued:

Reinstatement as to time is not possible, but the time element is provided for by compensation for monetary loss suffered by his discharge. Fixing the monetary loss is within the jurisdiction of the Board. At common law the employee is required to minimize his loss by seeking other employment may well preclude immediate reinstatement. In any event, by Section 5 (g) the Board has power to make an order, and the terms of such other employment

"requiring the employer to reinstate any employee discharged under circumstances determined by the Board to constitute an unfair labour practice."

That power is not limited as to time and the Board would be expected to exercise its discretion having regard to the circumstances then before it.

For these reasons Mr. Justice McNiven would dismiss the company's appeal with costs.

Mr. Justice Gordon, dissenting, was of the opinion that the ontested order was bad in that it did not indicate the unfair labour practice of which the company had been found guilty. The order for reinstatement being quashed the order fixing the monetary loss would fall with it. He would quash both orders and direct that the Labour Relations Board should pay the costs.

Mr. Justice Procter, dissenting, concurred with the judgment of Mr. Justice Gordon and made further observations, particularly regarding the part of the order requiring the company to reinstate the employee in his employment "within 24 hours from the time of service of a duplicate original copy of the order."

Section 5 (f) gives the Board power to reinstate the employee discharged under circumstances which constitute an unfair labour practice. One of the objects sought to be obtained by the Trade Union Act is to insure to an employee continuity of his employment by "reinstatement" if wrongly discharged.

Section 5 (g) provides for compensation for his monetary loss of wages during the entire period he has been idle through discharge by an employer under circumstances determined by the Board to constitute an unfair labour practice. The provision for "reinstatement" contemplates not only the feature of continuity of the employment but also compensation for a monetary loss, which in most cases would not be recovered in a civil court.

It is for this reason that the date of the fixing of the employee's reinstatement under the Trade Union Act becomes so material in an order of the Board. The date of reinstatement is the date from which compensation and monetary loss for the wrongful dismissal must be calculated. The employee being reinstated as of the date of his dismissal, is entitled to his wages from his date of discharge. Otherwise the Board must apply the ordinary principle of civil law that the employee's monetary loss depends on his right to notice of dismissal, having regard to whether his employment is on an hourly, daily, or fortnightly basis.

I can find nothing in the Act which authorizes the Board to base their assessment for compensation or monetary loss on any principle other than the civil law principle set forth above, except their authority to order "reinstatement" which of necessity carries with it the employee's right to wages up to the date of the Board's order. Otherwise, the employee's monetary loss or compensation is that provided for in the civil court.

Employees have certain rights under The Unemployment Insurance Act entitling them to benefits dependent on the continuity of their employment. There are other benefits such as pension schemes, rules of seniority, sick leave, holidays and other benefits, all dependent on continuity of employment. These rights are incapable of assessment on a monetary basis. The Board making a proper order for reinstatement under the Act protects such rights since "reinstatement" as applied to an employee has definite legal consequences. It restores the parties to the *status quo ante*.

In the case at bar the Board neither made a proper order for the employee's reinstatement nor properly fixed and determined his monetary loss. One of the consequences of reinstatement is to restore the "*status quo ante* the dismissal". Another consequence, as pointed out in the English decisions relied on, is to entitle the employee to have his monetary loss determined on the basis that he is entitled to his wages from the date of dismissal. From the monetary loss determined on this basis is deducted whatever he may have earned.

It was suggested that the order for reinstatement may fix a date later than that of the dismissal since the employee at the time of the hearing by the Board may be unable to resume his employment immediately through sickness, temporary employment requiring notice of termination, or other cause. In Mr. Justice Procter's opinion these are matters for the Board to take into consideration in fixing the monetary loss but they do not operate to postpone the date of reinstatement.

These considerations and others led Mr. Justice Procter to the conclusion that the orders of the Board were wrong in law, and both orders being interdependent should be quashed, *MacCosham Storage and Distributing Company (Saskatchewan) Limited v. Canadian Brotherhood of Railway Employees and Other Transport Workers Division No. 139*, The Saskatchewan Court of Appeal, June 16, 1958, unreported.

The Kennedy-Ives labour reform bill, aimed at cleaning up corruption in United States trade unions and in union-management relations, was defeated in the House of Representatives by a vote of 198-190. It has previously been passed by the Senate by a vote of 88 to 1.

# Recent Regulations under Provincial Legislation

**Nova Scotia amends two female minimum wage orders to provide for learners' rates. New Brunswick issues rules for welding of boilers**

In Nova Scotia, the general female minimum wage order and the special order for women in the fishing industry were amended to provide for learners' rates.

New provisions setting out requirements for welders' certificates and qualification tests were added to the New Brunswick Code for Boilers and Pressure Vessels.

In Alberta, the apprenticeship regulations for the trades of bricklayer, mason, tile setter, terrazzo worker, plumber, steamfitter and gasfitter were re-issued.

## **Alberta Apprenticeship Act**

Revised apprenticeship regulations for the trades of bricklayer, mason, tile setter, terrazzo worker, plumber, steamfitter and gasfitter were gazetted on July 31, the principal change being that special regulations are now laid down for the trade of gasfitter. Previously, gasfitters were subject to the same rules as plumbers and steamfitters.

Except for the provisions dealing with the term of apprenticeship and minimum wages, the special regulations for the trade of a gasfitter (188/58) are the same as the revised regulations for the trade of plumber and steamfitter (187/58). These in turn are similar to regulations issued last December for the trade of a plumber, steamfitter, and gasfitter (L.G., Feb., p. 190), the only difference being that the provision stating that increases were automatic on the respective due dates has been deleted so as to make it clear that wage increases are contingent upon passing the technical training courses.

To be eligible for apprenticeship in the trade of gasfitting, an applicant must be at least 16 years of age and preferably not over 25 years of age and must have completed Grade IX or its equivalent. These are the same requirements as are laid down for the trade of a plumber and steamfitter.

The term of apprenticeship is shorter, however: three years instead of four. As is customary, time credits will be given for vocational or technical training or previous experience in the gasfitting trade.

The ratio of apprentices to journeymen remains one to two, with the usual exceptions.

The rules with respect to educational classes, courses of instruction, trade training and annual certificates of progress are the same as those laid down for other apprenticeable trades.

During the early part of his apprenticeship, a gasfitter, as before, is entitled to the same minimum wage as an apprentice in the plumbing and steamfitting trade, that is, 40 per cent of the prevailing journeyman's wage for registered employment prior to first year technical training and 50 per cent after successful completion of first year technical training. In line with the shorter term of apprenticeship, however, the minimum rate payable after a second successful year has been increased from 60 to 70 per cent. From the time he passes his third year of technical training until completion of his contract, the minimum for an apprentice gasfitter is now 90 per cent of the journeyman's rate. The minimum for apprentices in the plumbing and steamfitting trade continues to be 60 per cent of the journeyman's rate after successful completion of second year technical training, increasing to 75 and 90 per cent after he passes his second and third year courses.

The new regulations for the trade of bricklayer, mason, tile setter and terrazzo worker (186/58) are the same as those issued in November 1956 (L.G., March 1957, p. 346), the only change being that here, also, the provision respecting automatic wage increases has been deleted.

## **Alberta Electrical Protection Act**

Amendments to the regulations under the Alberta Electrical Protection Act governing the manufacture, installation and inspection of electrical equipment (Alta. Reg. 428/57) were gazetted on June 30 as Alta. Reg. 163/58.

Among other new rules is a provision which states that all electrical equipment and apparatus used in oilfields must be of an approved type, by which is meant equipment or apparatus carrying an approval marking of either the Canadian Standards Association or the Alberta Electrical Inspection Branch.

Equipment or apparatus for use in non-hazardous locations which has not been approved by the CSA may be submitted to the Electrical Inspection Branch for test and inspection. If found to comply favourably with CSA specifications, it may be given temporary local approval on the understanding that the manufacturer will apply to the CSA for certification and listing.

Equipment or apparatus for use in hazardous locations will be considered acceptable for inspection and possible temporary approval only if it has passed the tests of a recognized testing laboratory such as the Underwriters' Laboratories Incorporated of Chicago or the CSA. If the size or capacity is such that testing facilities are not available, it will be necessary to show that similar equipment or apparatus, produced by the same manufacturer in sizes or capacities for which tests are available, has passed the prescribed tests. In such cases, temporary local approval may be granted, provided the manufacturer applies to the CSA for a formal listing.

Additional rules for electrical installations and equipment used in the search for and production of oil, natural gas or related hydro-carbons are also set out; supplementing the other regulations under the Act and the rules of the Canadian Electrical Code. Among other rules are provisions respecting wiring methods in seismic shot hole drilling rigs, standards for lighting installations on gas and oil drilling and servicing rigs, guards on lighting fixtures and portable lamps, pump installations for wells and requirements for battery installations and sources of ignitable vapours.

One of the special provisions states that all installations covered by these regulations must be properly maintained and operated in accordance with the Canadian Electrical Code.

### **New Brunswick Stationary Engineers Act**

The New Brunswick Boiler and Pressure Vessel Code issued in 1956 (L.G. 1956, p. 1042) has been amended by the addition of a new section setting out supplementary requirements for welders.

The new provisions, which were approved by O.C. 58-553 and gazetted on August 20, lay down the responsibilities of manufacturers and welders, provide for welders' qualification tests, set out the classification of certificates, and prescribe the qualifications of applicants.

#### **Responsibilities of Manufacturers, Welders**

Every manufacturer, contractor, welding shop operator or other person who welds or engages an employee to do any welding upon any boiler, pressure vessel or pressure piping will be held responsible for the quality of the work done.

Before such work commences, approved welding procedure tests are to be conducted in accordance with ASME and ASA code

requirements, proof of which must be submitted to the Boiler Inspection Branch of the Department of Labour for registration.

Any person who welds or employs welders is also required to make arrangements with the Department for a welder's qualification test or obtain approval for an equivalent test meeting the requirements of the ASME and ASA codes, and witnessed by an authorized inspector or a person approved by the Chief Inspector.

Before work on any new construction begins, the design of the vessel must have been approved and registered by the Department. In the case of repair work, the employer or welder must make sure that all rules set out in Part 2 of the New Brunswick Code with respect to repairs by fusion welding are being complied with.

#### **Welders' Qualification Tests**

Welders' qualification tests will be prescribed by the Chief Inspector and witnessed by an authorized boiler inspector, who will stamp each coupon in the manner prescribed. As far as is practicable, tests must be in accordance with the welding test requirements of the ASME and ASA codes.

Applications are to be sent to the Chief Inspector, who will determine whether candidates have sufficient experience and knowledge to warrant a qualification test.

A welder must be tested in all methods and types of welding and for every position in which he will be required to weld, but if he passes a butt weld test, the inspector may waive the requirement for a fillet weld test for the same position. Before being granted a certificate authorizing him to weld pressure piping in a fixed position, however, a welder must qualify for all positions. Specific rules are also laid down with respect to thickness of material, spacing and defects.

A welder who fails a qualification test in one position only may undergo an immediate retest consisting of two separate welds, both of which must meet code requirements. If he fails, he may apply for a further retest after having had additional training or experience satisfactory to the Chief Inspector.

If a welder fails in more than one position, he will be required to have additional training or experience before being eligible for another qualification test.

A welder's qualification test will be effective for a period of 12 months or for a longer period if approved by the Chief Inspector. However, a retest may be ordered at any time if a welder is suspected of losing his proficiency.

### **Classification of Certificates**

Two types of certificates are provided for, a qualified welder's certificate and an approved welder's certificate.

The holder of a qualified welder's certificate may fabricate boilers, pressure vessels and pressure piping under the rules of the ASME and ASA codes. He is also authorized to repair boilers in accordance with provisions 2003 and 2004 of the New Brunswick Code.

An approved welder's certificate permits the holder to fabricate boilers with a working pressure not exceeding 15 p.s.i. steam or 30 p.s.i. hot water and pressure piping with a working pressure of 100 p.s.i. or less. It also entitles him to make repairs in the locations specified in provision 2004 of the provincial code.

### **Qualifications of Candidates for Examination**

To be eligible for examination for a qualified welder's certificate, an applicant must be at least 18 years of age and must satisfy the Chief Inspector that he has had at least three years experience in the welding trade or holds a journeyman welder's certificate under the New Brunswick Apprenticeship Act and, in addition, has had at least 12 months experience welding on boilers or other pressure vessels or pressure piping.

No person may apply for an approved welder's certificate unless he is 18 years of age or over and has had two years' experience in the trade or is the holder of a journeyman welder's certificate and, as well, has had a minimum of six months' welding experience on general steel construction, structural steel, plates, channels, angles, pipes, tanks, etc.

### **Renewal, Suspension and Cancellation**

A certificate of qualification will be valid for one year from date of issue but may be renewed if the holder successfully completes a test in a position decided by the inspector or has passed an interim test during the year.

A certificate of qualification not only expires after one year unless renewed but also becomes invalid if the welder has not used the specific process stated on the certificate for a period of three months or more.

A certificate may be suspended or cancelled by the Chief Inspector if he thinks that the holder has obtained it through misrepresentation or fraud, is addicted to intoxicating liquor or narcotic drugs, has become physically or mentally incapacitated, is incompetent or grossly negligent

in the discharge of his duties, has failed to comply with the welding provisions of the New Brunswick Code or the ASME Code requirements, has been guilty of an act of impropriety in connection with his duties, or has allowed an unauthorized person to stamp his allotted symbol upon work not performed by him.

The regulations further provide that if a certificate is cancelled a welder may no longer use his assigned symbol or his authorization, both of which must be forwarded to the Department immediately.

### **Other Rules**

One of the general rules prescribes the manner in which a welder is required to stamp his work.

Another provides that, except with the permission of an inspector, no welded repair upon any high or low pressure boiler, pressure vessel or piping may be covered by insulation or other material until authorized by a boiler inspector.

### **Nova Scotia Female Minimum Wage Act**

Amendments to the general female minimum wage order and the special order for women in the fishing industry restoring learners' rates that were dropped last June when the orders were revised (L.G. July, p. 778) were gazetted on August 27. Also gazetted that day were amendments to the provisions in the general order and the special order for beauty parlours respecting statutory holidays.

Instead of \$21.60 a week in Zone 1 (Halifax and nine other cities and large towns) and \$19.20 in Zone 2 (the 33 other incorporated towns), female employees in factories, shops and offices may now be paid a minimum of \$18 a week for work performed within a probationary period of 90 days immediately following the date of employment. Since June 1, when the revised rates went into effect, beginners in Zones 1 and 2 have been entitled to the same minimum as experienced workers. Prior to that, however, lower rates were set for learners, the minimum being \$2 less than full rate during the first three months and \$1 less during the next three months.

In Zone 3, which covers the rest of the province, the minimum for learners remains \$14.40 a week, the same as for experienced workers. Before June 1, however, no minimum wage was fixed for the small centres.

In the fishing industry, women may now be paid 37½ cents, instead of 45 cents an hour, during a 90-day probationary period. When learners' rates were previously in effect they were 2, 4 and 6 cents lower than the full-time rate of 35 cents an hour.

The provisions in the general order and the special order for beauty parlours protecting employees against deductions from minimum wages for time not worked on a statutory holiday now provide that employees must have worked all scheduled

working days in the week during which a holiday occurs. If a holiday falls on a Monday, employees must have worked the last scheduled working day immediately prior to the holiday.

## 17th Annual Conference, Canadian Association of Administrators of Labour Legislation

Problems of administration and enforcement of labour standards, and labour relations legislation were discussed at the 17th Annual Conference of the Canadian Association of Administrators of Labour Legislation in Winnipeg, August 12-15. W. H. Sands, Deputy Minister of Labour of British Columbia, and President of the organization, was chairman.

Fifty-three delegates, representing the federal and provincial departments of labour, the Unemployment Insurance Commission and the Yukon and Northwest Territories Administration, attended the four-day conference.

In his remarks of welcome, Premier Dufferin Roblin of Manitoba spoke of the challenging responsibility of labour departments in that they were concerned with the happy relations between men and their work and between men and society as a whole. "What you do," he said, "affects more people than almost any other branch of government."

Hon. J. W. M. Thompson, Manitoba Minister of Labour, congratulated the Association on its work and achievements and emphasized the value of such an organization to administrators in keeping abreast of developments in their field.

Following a day's session on recent legislative and administrative changes in Canada the conference discussed various aspects of labour standards and labour relations legislation. Special sessions for the senior officers concerned with the administration of these two subjects were held concurrently with the general sessions.

Laws relating to minimum wages, hours of work, vacations with pay, and so on, were dealt with at the sessions on labour standards. As an introduction to the discussion of current trends in this type of legislation in Canada, Dr. John T. Dunlop, Professor of Economics at Harvard University, reviewed the political, social and economic factors that have influenced the setting of labour standards in advanced countries, and spoke of the trends that

were emerging in a number of these countries. (The text of Dr. Dunlop's address will be published in a later issue.)

The conference discussed also problems arising in connection with the collection, presentation and co-ordination of statistics in the labour standards field.

At the labour relations sessions, particular attention was given to problems confronting Labour Relations Boards, and to the recruitment and training of conciliation officers.

The federal and provincial representatives attending the conference included: *British Columbia*—Hon. Lyle Wicks, Minister of Labour and Railways; W. H. Sands, Deputy Minister of Labour and Railways; B. W. Dysart, Chief Administrative Officer; R. G. Clements, Conciliation Officer. *Alberta*—Hon. Raymond Reiersen, Minister of Industries and Labour; K. A. Pugh, Chairman, Board of Industrial Relations; H. E. Bendickson, Vice Chairman, and Wm. Maday, Chief Inspector, Board of Industrial Relations. *Saskatchewan*—H. S. Elkin, Deputy Minister of Labour; P. G. Makaroff, QC, Chairman, Labour Relations Board; C. K. Murchison, Director of Labour Standards; George Sotiroff, Director of Research and Planning. *Manitoba*—Hon. J. W. M. Thompson, Minister of Labour; W. Elliott Wilson, QC, Deputy Minister of Labour; E. G. Weeks, Administrative Officer; M. T. McKelvey, Registrar, Manitoba Labour Board; O. D. Hamilton, Chief Inspector, and W. G. Shepherd, Senior Staff Inspector, Employment Standards Division; M. Del Begio, Chief Inspector, Mechanical and Engineering Division; James Aiken, Director, Apprenticeship Division; W. Hurd, Apprentice Supervisor; B. Lepkin, J. G. White and A. E. Keppel, Conciliation Officers.

*Ontario*—J. B. Metzler, Deputy Minister of Labour; Jacob Finkelman, QC, Chairman, Labour Relations Board, G. W. T. Reed, Vice Chairman, Labour Relations Board; F. F. Gallant, Solicitor, Labour

Relations Board; Mrs. Josephine Grimshaw, Economist. *Quebec*—Charles Bélanger, Secretary, Minimum Wage Commission (Quebec District); Noël Bérubé, Chief Conciliation Officer (Quebec District); Evariste Bernier, Senior Officer; Maxime Ducrest, Economist. *New Brunswick*—N. D. Cochrane, Deputy Minister of Labour; H. F. White, Director, Labour Relations and Minimum Wages Branch; Horace A. Hanson, QC, Chairman, Labour Relations Board. *Nova Scotia*—Hon. Stephen T. Pyke, Minister of Labour; R. E. Anderson, Deputy Minister of Labour; J. P. Bell, Executive Director of Industrial Relations; F. F. Crooks, Director of Labour Practices; Miss June Taylor, Supervisor of Statistical Analysis. *Prince Edward Island*—W. W. Reid, Deputy Minister of Welfare and Labour.

*Federal*—A. H. Brown, Deputy Minister of Labour; C. Rhodes Smith, QC, Chairman, Canada Labour Relations Board;

Bernard Wilson, Director of Industrial Relations; W. R. Dymond, Economics and Research Branch; Miss Edith Lorentsen, Director, Legislation Branch; J. T. Montague, Economics and Research Branch; J. S. Gunn and W. E. Sproule, Industrial Relations Officers, Winnipeg; Miss Evelyn Best, Legislation Branch; M. R. Morgan, Regional Enforcement Officer, Prairie Region, Unemployment Insurance Commission; L. A. C. O. Hunt, Assistant Director, Northern Administration and Lands Branch, Department of Northern Affairs and National Resources.

The officers of the Association for 1958-59 are: N. D. Cochrane, New Brunswick, President; J. B. Metzler, Ontario, 1st Vice President; W. Elliott Wilson, QC, Manitoba, 2nd Vice President; Miss Evelyn Best, Department of Labour, Ottawa, Secretary-Treasurer. W. H. Sands, British Columbia, retains a place on the executive committee as Past President.

## British Columbia Coast Steamship Service Act

An Act of Parliament given Royal Assent on July 25 provided for the resumption of the British Columbia Coast Steamship Service between Vancouver Island and the mainland of British Columbia, operated by the Canadian Pacific Railway Company, which had been closed by a strike since May 16.

The Act gave the Governor in Council authority to appoint an administrator to carry on all or any part of the business of the company and made him the agent of the company for the purpose of carrying on its business subject to the directions of the Governor in Council. R. K. Smith was appointed administrator on July 25 (L.G. Aug., p. 838).

The administrator was required by the Act to resume forthwith the carrying on of the business of the company suspended by the strike. Every employee then on strike was required to return to work on the terms and conditions set forth in designated collective agreements (the agreements in effect before the strike) amended by the Act to increase rates of wages by 8 per cent. As amended, each agreement was extended until a new collective agreement comes into effect.

The company and persons acting on its behalf were prohibited from refusing to allow any employee to return to work or discharging any employee by reason of his having gone on strike.

The officers authorized to bargain on behalf of each union were directed to give notice to the members of the union that any strike authorization given them before the commencement of the Act was made invalid by the Act.

The company and each of the three unions involved (The National Association of Marine Engineers of Canada, Inc.; The Canadian Merchant Service Guild, Inc.; and the Seafarers International Union of North America) were required to enter into negotiations forthwith with a view to settlement of the matters in dispute and to bargain in good faith with one another and make every reasonable effort to conclude an agreement.

The Act further gives the Governor in Council authority to make regulations for ensuring the continued operation of the business of the company, for directing the administrator, and for establishing procedures for effecting a settlement.

The Governor in Council is also given the authority to refer to a board of three arbitrators, on the request of the parties, any matters relating to the revision or amendment of the existing collective agreements. It may also refer to a board of arbitration such matters "as the Governor in Council may deem expedient," and may make regulations for giving effect to the

(Continued on page 1180)

# UNEMPLOYMENT INSURANCE

## Monthly Report on Operation of the Unemployment Insurance Act

Initial claims for benefits in July up 7 per cent over June total and 53,000 higher than year-earlier figure, statistics\* show. Claimants on live file down 4 per cent from June but up 46 per cent from year ago

The number of initial and renewal claims for unemployment insurance benefit in July was 167,402, about 7 per cent more than the June total of 155,754. During July 1957 initial and renewal claims filed numbered 114,107.

The larger number of claims in July is associated mainly with curtailed production in certain branches of manufacturing, particularly transportation equipment.

A total of 300,826 persons had a claim for unemployment insurance benefit (regular) in the "live" file on July 31, some 46 per cent above the total of 205,779 for July 31, 1957. On June 30 the count of claims in the live file was 445,487 (this figure includes a residual of 131,878 claims on behalf of seasonal benefit claimants). The number of claimants for regular benefit at July 31 compared with the previous month declined by some 12,000 or 4 per cent.

Males comprised 68.3 per cent of the total claimants on July 31, compared with 70.7 on June 30 and 67.5 on July 31, 1957.

Postal claimants comprised 29.5 per cent of the July 31 claimant group, down approximately 5 percentage points from the June ratio of 34.4 per cent. On July 31, 1957, 29.1 per cent were classed as postal.

On July 31, 42 per cent of the claimants had relatively short duration on claim, i.e., 4 weeks or less, while 20 per cent had a continuous record of at least 21 weeks. This represents a substantial change from the end of June, when these proportions were 27 and 35 per cent, respectively. This rather sharp change in the composition of the claimant group is due to the fact that the June 30 data included seasonal benefit claimants, of whom a large portion had a relatively long period on claim. At

the end of July 1957, fewer than 15 per cent of claimants had been on claim 21 weeks.

Twenty-two out of every 100 initial claims adjudicated during July did not show sufficient contributions to qualify for benefit. During June, only 7 per cent of initial claims fell into this category. The substantially higher qualifying ratio for June was due mainly to the operation during June of the seasonal benefit terms enabling claimants to qualify with a shorter period of attachment to insurable employment.

The July benefit payments at \$27 million were 28 per cent below the June total of \$37 million, but were almost double the amount paid out during July last year (\$14 million). Payment data for the month included final payments outstanding to seasonal benefit claimants at the end of the seasonal benefit period.

The average weekly payment was \$20.67 for July, \$20.72 for June and \$20.12 for July 1957.

### Insurance Registrations

Reports received from local offices of the Unemployment Insurance Commission for July show that insurance books or contribution cards have been issued to 4,181,084 employees who have made contributions to the Unemployment Insurance Fund since April 1, 1958.

At July 31 employers registered numbered 305,683, an increase of 535 since June 30.

In a comparison of current employment statistics with those for a previous period, consideration should be given to relevant factors other than numbers such as the opening and closing of seasonal industries, increase in area population, influence of weather conditions, and the general employment situation.

\*See Tables E-1 to E-4 at back of book.

## Enforcement Statistics

During July, 5,708 investigations were conducted by enforcement officers across Canada. Of these, 3,906 were spot checks of postal and counter claims to verify the fulfilment of statutory conditions, and 122 were miscellaneous investigations. The remaining 1,680 were investigations in connection with claimants suspected of making false statements to obtain benefit.

Prosecutions were begun in 195 cases, 68 against employers and 127 against claimants.\* Punitive disqualifications as a result

of claimants' making false statements or misrepresentations numbered 972.\*

## Unemployment Insurance Fund

Revenue received in July totalled \$22,552,462.00 compared with \$19,427,334.68 in June and \$23,070,810.31 in July 1957. Benefits paid in July totalled \$26,782,089.93 compared with \$36,962,854.91 in June and \$13,776,646.25 in July 1957. The balance in the fund on July 31 was \$640,291,006.61; on June 30 it was \$644,520,634.54 and on July 31, 1957, \$862,023,425.84.

# Decisions of Umpire under the Unemployment Insurance Act

## Decision CUB-1545, August 11, 1958

**Summary of the Main Facts:** The claimant, widowed, 41 years of age, was temporarily employed by the Town of Z....., N.S., as a typist at a reported wage of \$48.56 a week from December 1, 1957 to December 21, 1957. On December 23, 1957, she filed an initial application for benefit and registered for employment as a telegraphic typewriter operator. Previous to the aforementioned employment she worked as a typist for the Canadian National Railways.

On January 15, 1958, the claimant was notified of temporary employment of about three months duration as a clerk and typist with the National Employment Office, Z....., N.S., at a wage of \$1.00 an hour. The hours of work were seven and a half a day and 37½ a week. She refused to accept the offer of employment for the reasons that, as she was receiving treatments from her doctor, she had to be ready to take them at any time, that her doctor had requested her to rest until May so that she would be in good health if she obtained steady work then and that the wages were lower than those which she had received while working for the CNR.

On January 20, 1958, the insurance officer disqualified the claimant from receipt of benefit from December 22, 1957, because, in his opinion, she was not available for work in that she was ordered by her doctor to take a rest and was under his care. He disqualified her also from January 12, 1958

to February 22, 1958, on the ground that she had, without good cause, refused to accept a situation in suitable employment (sections 54 (2) (a) and 59 (1) (a) of the Act).

The claimant submitted a medical certificate dated January 20, 1958, to the effect that she was suffering from an illness whereby she would not be capable of resuming employment for approximately two months, that its onset had been gradual over two to three months, and that she had first been examined by her physician on December 30 and subsequently on January 6, 1958. There is a note in the margin of the certificate to the effect that it is not "accepted" by the insurance officer as it does not state the date of commencement of the illness.

On January 22, 1958, the claimant appealed to a board of referees, stating that when she was offered the position with the National Employment Office over the telephone, she inquired if her refusal to accept the job would jeopardize her chances of receiving benefit and was told that such was not necessarily so; that at the same time she informed the officer over the telephone that she was under the care of her doctor but could, nevertheless, accept employment, that she informed him also that she would forego the medical treatments rather than suffer the loss of payment of benefit, that she was advised that if her separation from her previous employment was not on account of ill health and that once her claim had been approved and benefit had been paid, she would continue to receive such (which she did for

\*These do not necessarily relate to the investigations conducted during this period.

the first two weeks after her waiting period) unless she refused an offer of suitable employment. She stated also that she was registered for employment as a telegraphic typewriter operator but no position of a similar classification had been offered to her.

The board of referees, after having heard a representative of the claimant's Brotherhood on March 13, 1958, by a unanimous decision upheld both disqualifications. In arriving at its decision, the board felt that the employment was suitable and should have been acceptable in view of the nature of the work and the rate of pay involved; that it seemed that the claimant refused to accept the employment because of her health, yet she contended all the while to be available, holding herself in readiness and in anticipation of obtaining her previous employment with the CNR; and that, in other words, she was so restricting the sphere of her employment as to be considered not available for work.

The claimant's Brotherhood appealed to me mainly on the grounds that the wages and working conditions were not as good as the claimant previously had with the CNR, the wages for the job offered being \$11.06 a week less and the position was below that of typist, which was her occupation at the time of being laid off; that receiving medical treatment only after being in receipt of benefit should not disqualify her from payment thereof; that she was prepared to forego treatment if such affected her eligibility for benefit and that there was no evidence of her refusal to accept employment nor that she mentioned to the employment officer that she had to take a rest.

The Brotherhood also requested an oral hearing before me, which was held on July 15, 1958. Both the claimant and the Unemployment Insurance Commission were represented.

Among the records are two letters dated June 23 and 28, 1958 respectively, which the claimant wrote to an official of the Brotherhood and wherein she stated that the operation she underwent was an hysterectomy, that her physician could not state exactly when her trouble first occurred as nobody can tell when "growths" begin, that she called him when she first started to haemorrhage, on December 30, 1957, that she entered the hospital on January 28, 1958, and was operated on the next day, that she was under the care of her doctor when the employment was offered to her, that it was only the day before her

admittance to the hospital that it was decided she would have to enter the hospital and that it would be noted from the report of the employment officer that she did not refuse to accept work.

**Considerations and Conclusions:** The record shows that for several months, prior to December 21, 1957, when her temporary employment with the Town of Z..... terminated, the claimant had been in the employ of the Canadian National Railways as telegraphic typewriter operator. During all this time no question of the claimant's health arose, and although subsequent events proved that for a month or two, unknown to herself, she had been affected by a gradual internal growth, this did not in any way interfere with the carrying out of her duties.

The first occasion on which the claimant consulted a doctor was on December 30, 1957, when she began to haemorrhage, and I consider that on the evidence, until this occurred, she was quite capable of working.

No offer of employment was made to the claimant until January 15, 1958, and even then when her malady was obvious she showed her readiness to forego rest and medical treatment and accept the offer, in the event that a refusal to do so would have adversely affected her rights to unemployment insurance benefits. This does not prove that she was capable of work on the date of the offer but it is an indication of the claimant's honesty of purpose. To have attempted to work in mid-January would have been foolhardy, especially as two weeks later she had to undergo an operation.

I consider that, as from December 30, 1957, the claimant for all practical purposes was no longer capable of work, within the meaning of the Act. As a consequence I find that she had good cause for not taking up the employment which was offered to her on January 15, 1958, and that, if she had previously become entitled to receive benefit and otherwise continued to be so entitled, she would by virtue of the provisions of section 66 of the Act be relieved from disqualification under section 54 (2) (a), and for so long as she remained totally incapacitated by reason only of her illness.

Subject to verification by the Insurance Officer of the fact that by December 30, 1957, the claimant had served her waiting period and otherwise continued to be entitled to receive benefit, which information does not appear to be contained in the file, the union's appeal is allowed.

(Translation)

**Summary of the Main Facts:** The claimant, a 43-year-old married woman, worked as an office clerk for a federal Department at M....., from February 18, 1957 to June 30, 1957, at a salary of \$185 a month. She had worked in this capacity as a temporary employee for the same employer approximately 4½ months each year for four years.

She filed an initial claim for benefit during the week of June 30, 1957, and drew benefit until the expiration of the entitlement established in her behalf, that is, until the end of October.

On December 17, 1957, she filed a new initial claim for benefit and registered for employment as an office clerk and a seasonal benefit period was established in her behalf in accordance with the provisions of section 50 (b) of the Act. The same day, the local office notified her of a position in her usual occupation in the same federal Department at B....., located 45 minutes by train from her home (transportation costs: 50¢ a day). This was temporary employment at the rate of \$1.00 per hour, which was to last about six months and which carried with it the obligation of doing overtime work at the employer's request. The claimant refused the proffered employment because she wanted to be back home not later than 6 o'clock every night to take care of her children, which task the need to do some overtime work would not permit.

In his comments, the placement officer pointed out that the claimant would have been expected to work two nights a week, two hours per night, on request, and that he had considered the employment suitable for the claimant on account of her long period of unemployment and because she had been engaged for some years now in temporary work only.

On December 30, 1957, the insurance officer disqualified the claimant from receipt of benefit for the period starting December 16, 1957, to January 25, 1958, being of the opinion that she had refused without good cause to apply for the proffered employment (section 59 of the Act). At the same time, the insurance officer also disqualified the claimant from receipt of benefit as of December 15, 1957, being of the opinion that she had not proved herself available for work (section 54 (2) (a) of the Act).

On January 2, 1958, the claimant appealed to a board of referees. She explained that the position offered, in addition to "necessitating" transportation by train and street-car at a cost of 75¢ a day, required

overtime work-sessions at night, a condition she was absolutely unable to accept on account of her domestic responsibilities which required her to be at home from 6 o'clock at night. On January 21, 1958, she added that in the employment offered her, the overtime work was not restricted to two hours per night, two nights a week, but was rather a daily practice. This, moreover, was confirmed by the employer, who specified that all his employees had to do overtime work on request, as the work might require, even on Saturday.

On January 23, 1958, the board of referees by majority finding upheld the two decisions of the insurance officer, being of the view that the domestic responsibilities of the claimant were not a sufficient reason for refusing the suitable employment which had been offered her, even if she had to do some overtime. The dissident member of the board expressed the opinion that the claimant should be maintained in her right to benefit, as the overtime work was an obligatory condition which was not being left to the claimant's discretion.

On January 29, 1958, the claimant appealed before me, alleging that she had never refused to work and that she should not be forced to accept a position requiring as a regular practice hours of overtime at night, which were not compatible with her domestic responsibilities. On March 24, 1958, the claimant in addition submitted a brief in which she added that the employment offered should not be considered suitable simply because she had been unemployed for a long period and had worked only in a temporary capacity.

The hearing of the case was held in M....., on May 6, 1958. The claimant and the Unemployment Insurance Commission were both represented.

**Considerations and Conclusions:** I do not think that it would be equitable to give paragraph (b) of section 59 (2) of the Act an interpretation that would make an employment of six months in the usual occupation of the claimant be suitable, when it necessitates, as in the present case, the obligation to do overtime work otherwise than occasionally or exceptionally.

With respect to the availability of the claimant, I confess that it leaves much to be desired and I would not hesitate to confirm the disqualification imposed under section 54 (2) (a) if the claimant's comments concerning the need for her to travel to get to work clearly indicated that she refused to do so. Such is not the case, however, and I do not feel justified in finding the claimant not available on the

(Continued on page 1180)

# LABOUR CONDITIONS IN FEDERAL GOVERNMENT CONTRACTS

## Wage Schedules Prepared and Contracts Awarded during August

### Works of Construction, Remodelling, Repair or Demolition

During August the Department of Labour prepared 257 wage schedules for inclusion in contracts proposed to be undertaken by departments of the federal Government and its Crown corporations in various areas of Canada, for works of construction, remodelling, repair or demolition. In the same period, a total of 228 contracts in these categories was awarded. Particulars of these contracts appear below.

A copy of the wage schedule issued for each contract is available on request to trade unions concerned or to others who have a *bona fide* interest in the execution of the contract.

(The labour conditions included in each of the contracts listed under this heading provide that:

(a) the wage rate for each classification of labour shown in the wage schedule included in the contract is a minimum rate only and contractors and subcontractors are not exempted from the payment of higher wages in any instance where, during the continuation of the work, wage rates in excess of those shown in the wage schedule have been fixed by provincial legislation, by collective agreements in the district, or by current practice;

(b) hours of work shall not exceed eight in the day and 44 in the week, except in emergency conditions approved by the Minister of Labour;

(c) overtime rates of pay may be established by the Minister of Labour for all hours worked in excess of eight per day and 44 per week;

(d) no person shall be discriminated against in regard to employment because of his race, national origin, colour or religion, nor because he has made a complaint with respect to alleged discrimination.)

### Contracts for the Manufacture of Supplies and Equipment

Contracts awarded in August for the manufacture of supplies and equipment were as follows:

| Department                                | No. of Contracts | Aggregate Amount |
|-------------------------------------------|------------------|------------------|
| Defence Construction (1951) Limited ..... | 1                | \$ 47,730.00     |
| Post Office .....                         | 15               | 109,706.30       |
| R.C.M.P. ....                             | 21               | 122,863.77       |

The Fair Wages and Hours of Labour legislation of the federal Government has the purpose of insuring that all Government contracts for works of construction and for the manufacture of supplies and equipment contain provisions to secure the payment of wages generally accepted as fair and reasonable in each trade or classification employed in the district where the work is being performed.

The practice of Government departments and those Crown corporations to which the legislation applies, before entering into contracts for any work of construction, remodelling, repair or demolition, is to obtain wage schedules from the Department of Labour, showing the applicable wage rate for each classification of workmen deemed to be required in the execution of the work. These

wage schedules are thereupon included with other relevant labour conditions as terms of such contracts to be observed by the contractors.

Wage schedules are not included in contracts for the manufacture of supplies and equipment because it is not possible to determine in advance the classifications to be employed in the execution of a contract. A statement of the labour conditions which must be observed in every such contract is however, included therein and is of the same nature and effect as those which apply in works of construction.

Copies of the federal Government's Fair Wages and Hours of Labour legislation may be held upon request to the Industrial Relations Branch of the Department of Labour, Ottawa.

(The labour conditions included in contracts for the manufacture of supplies and equipment provide that:

(a) all persons who perform labour on such contracts shall be paid such wages as are currently paid in the district to competent workmen; and if there is no current rate, then a fair and reasonable rate; but in no event shall the wages paid be less than those established by the laws of the province in which the work is being performed;

(b) the working hours shall be those fixed by the custom of the trade in the district or if there be no such custom, then fair and reasonable hours;

(c) overtime rates of pay may be established by the Minister of Labour for all hours worked in excess of those fixed by custom of the trade in the district, or in excess of fair and reasonable hours;

(d) no person shall be discriminated against in regard to employment because of his race, national origin, colour or religion, nor because he has made a complaint with respect to alleged discrimination.)

## Wage Claims Received and Payments Made during August

During August the sum of \$3,688.96 was collected from five contractors for wage arrears due their employees arising out of the failure of the contractors or their sub-contractors, to apply the wage rates and other conditions of employment required by the schedule of labour conditions forming part of their contracts. This amount has been or will be distributed to the 148 workers concerned.

## Contracts Containing Fair Wage Schedules Awarded during August

(The labour conditions of the contracts marked (\*) contain the General Fair Wages Clause providing for the observance of current or fair and reasonable rates of wages and hours of labour not in excess of eight per day and 44 per week, and also empower the Minister of Labour to deal with any question which may arise with regard thereto.)

### Contracts Containing the General Fair Wages Clause

### B. C. Coast Steamship Service Act

(Continued from page 1170)

decision of the board of arbitration. However, no regulation made under this authority limits the rights of the parties to agree to vary or amend the terms of an existing agreement.

The authority of the administrator is to continue until new collective agreements are concluded with each union or until his appointment is terminated by the Governor in Council. The Act will expire no later than the thirtieth sitting day of the next session of Parliament.

### Decisions of Umpire

(Continued from page 1174)

sole basis of her statement that she was not available after 6 o'clock at night. This is particularly true in the absence of any reasonable proof, firstly that there was not any proximate opportunity of employment during the hours she wished in her usual occupation and, secondly, that she would not have been ready to accept any other kind of employment if it did not require work after six o'clock at night.

For all these reasons, I must accord the claimant's appeal.

# PRICES AND THE COST OF LIVING

## Consumer Price Index, September 1958

The consumer price index (1949=100) increased 0.3 per cent between August and September, moving from 125.2 to 125.6, a new high\*. In September 1957 the index stood at 123.3.

A 0.7-per-cent advance in the other commodities and services group accounted for half of the increase in the total index, and upward movements of 0.2 per cent registered by food, shelter and household operation groups contributed the remainder. The clothing index was down fractionally.

Largely as a result of increases in street car and bus fares, the other commodities and services index moved from 130.6 to 131.5. A 2-per-cent rise in hospital rates resulted from increases in cities of Ontario and Quebec; somewhat higher prices were reported for gasoline, automobile repairs and magazine subscription rates. Some further price decreases took place on 1958 models of new passenger cars, and battery prices were also lower.

The food index increased slightly from 122.6 to 122.9. A substantial increase occurred in egg prices, and lesser increases for bread, citrus fruits, canned juices and some canned fruits and vegetables. Apples and fresh vegetables, particularly tomatoes, experienced sharp seasonal declines. Beef prices eased slightly and pork prices were off quite sharply.

The shelter index rose from 139.1 to 139.4 with home-ownership up more than the rent component.

An increase in the household operation index, from 120.5 to 120.8, resulted from higher prices for a wide variety of items: soap flakes and detergents, telephone and laundry rates, shoe repairs, coal and utensils. Some items of furniture, floor coverings and textiles were up from August sale prices.

The clothing index was down slightly from 109.6 to 109.5, almost entirely as a result of sale prices for such items as men's topcoats, women's spring coats, boy's sport and T-shirts. Most clothing items showed no price movement.

Group indexes one year earlier (September 1957) were: food 121.9, shelter 135.6, clothing 108.3, household operation 119.8, and other commodities and services 127.1.

\*See Table F-1 at back of book.

## City Consumer Price Indexes, August 1958

Consumer price indexes (1949=100) were higher in eight of the ten regional cities between July and August, with increases ranging from 0.1 per cent in Winnipeg to 0.8 per cent in Saint John. The Edmonton-Calgary index was unchanged while a fractional decrease of 0.1 per cent occurred in the Montreal index\*.

Food indexes rose in seven regional cities but were somewhat lower in Montreal, Winnipeg and Edmonton-Calgary. The shelter index rose in eight regional cities but remained unchanged in Halifax and Montreal. Clothing indexes were lower in most cities, reflecting summer sale prices, particularly in women's wear. Household operation indexes showed mixed results with three up slightly, four unchanged and the other three down. Other commodities and services indexes were unchanged or up only fractionally in all cities but Winnipeg, where a sharp increase in gasoline prices took place.

Regional consumer price index changes between July and August were as follows: Saint John +0.5 to 125.7; Ottawa +0.6 to 126.0; Toronto +0.5 to 128.9; Vancouver +0.5 to 125.1; St. John's +0.4 to 113.1†; Halifax +0.4 to 123.2; Saskatoon-Regina +0.3 to 122.2; Winnipeg +0.1 to 122.7; Montreal -0.1 to 124.9. Edmonton-Calgary remained unchanged at 121.3.

## Wholesale Prices, August 1958

Canada's general wholesale price index (1935-39=100) declined slightly (0.1 per cent) between July and August to 226.8 from 227.0. Indexes for four of the eight major groups were lower, three were higher and one was unchanged. The general index was down 0.4 per cent from last year's 227.6.

Lower prices for furs, poultry, fresh meats and livestock offset higher prices for eggs, hides and skins and leather to move the animal products index down 1.1 per cent to 249.4 from 252.3 in July. This was the third successive monthly decline in this index. Lower prices for raw cotton and both domestic and imported raw wool were the main causes for a drop of 0.3 per cent in the textile products index to 227.8 from 228.4.

\*See Table F-2 at back of book.

†On base June 1951=100.

# CONSUMER PRICE INDEX

Index 1949=100

Index 1949=100

Higher prices for copper were mainly responsible for the first increase in the non-ferrous metals group since December last, as the index rose 0.9 per cent to 164.2 from 162.8 in July. An advance in prices for cedar and fir contributed most to an 0.7 per cent gain in the wood products index to 297.9 from 295.8.

**Canadian farm products** at terminal markets rose 1.2 per cent from 210.0 to 212.5 in the four weeks August 29 to September 26. Strength in animal products, for which the index advanced 2.3 per cent from 264.0 to 270.1, reflected higher prices for steers and calves, and on western markets eggs, milk and lambs. Declines were registered by hogs and wool on both markets and for poultry, lambs and eggs in the East. The field products index declined slightly from 156.0 to 154.8. Re-

gional indexes were both higher, the eastern rising from 226.6 to 229.5 and the western from 193.5 to 195.4.

## U.S. Consumer Price Index, August 1958

The United States consumer price index (1947-49=100) declined 0.2 per cent between mid-July and mid-August, moving from 123.9 to 123.7. It was the first decrease in two years. In August 1957 the index was 121.0.

Lower food costs, many of them the result of seasonal reductions in fresh fruits and vegetables, were largely responsible for the downturn.

## U.K. Index of Retail Prices, July 1958

The United Kingdom index of retail prices (Jan. 17, 1956=100) declined from 110.2 to 108.5 between mid-June and mid-July. In July 1957 the index was 106.6.

## Nova Scotia Federation of Labour

(Continued from page 1188)

The convention also passed resolutions advocating establishment of a higher minimum wage and Government assistance in

creating tourist accommodation in Nova Scotia for the "common man" at prices he can afford.

# STRIKES AND LOCKOUTS

## August 1958

In August, more than 18,000 workers in Canada were involved in a total of 54 work stoppages amounting to approximately 255,000 man-days. The number of man-days lost in work stoppages in August was three times as high as in July, and also much higher than the totals recorded in any other month since the beginning of the year\*. The number of workers involved in work stoppages during August was also substantially above earlier levels in 1958.

Nearly half of the time loss for the month resulted from a strike of 8,000 workers employed by the Steel Company of Canada in Hamilton, which began on August 11 and was still in progress at the end of the month.

Of the 54 work stoppages reported during August, 19 involved 100 or more workers. Seven of these larger work stoppages had started prior to August, and four of the seven were still in progress at the end of the month. All but two of the twelve larger work stoppages that had started during August were still in progress at the end of the month.

Among Canada's provinces, Ontario had the largest number of work stoppages and

TABLE 1—NUMBER OF STRIKES AND LOCKOUTS, WORKERS AND TIME LOSS INVOLVED, BY INDUSTRY, AUGUST 1958.

| Industry           | No. of<br>Strikes and<br>Lockouts | No. of<br>Workers | Time<br>Loss |
|--------------------|-----------------------------------|-------------------|--------------|
| Mining .....       | 1                                 | 176               | 4,400        |
| Manufacturing ...  | 25                                | 13,487            | 189,770      |
| Construction ..... | 12                                | 2,089             | 31,235       |
| Transportation ... | 8                                 | 2,514             | 25,765       |
| Trade .....        | 5                                 | 150               | 2,370        |
| Service .....      | 3                                 | 79                | 1,820        |

\*Table G-1 at the back of this issue compares, on a monthly basis, the number of strikes and lockouts in existence during 1958 and 1957. The approximate number of workers involved and the time loss resulting are also compared on a monthly basis and the number of strikes and lockouts beginning during each month is indicated.

Table G-2 deals more specifically with the stoppages involving 100 or more workers in existence during August 1958. The approximate time loss, together with the number of workers involved, is indicated for each stoppage. The major issues and the major terms of settlement, if the stoppage has ended, are also mentioned. Other details include such information as the dates on which the stoppages began and ended and the industries in which they occurred.

also the highest time loss; in fact, almost two thirds of the total time loss during August was recorded in that province. Much of the time loss recorded in Ontario was caused by two stoppages—the steel strike in Hamilton and a dispute involving 1,200 workers employed by the breweries' distributing organization in the province.

In British Columbia, where a time loss of approximately 41,000 man-days was recorded for August, a strike of 1,300 long-shoremen employed by the B.C. Shipping Federation started during the second half of the month. Work stoppages, mostly small, were also reported from nearly all other provinces.

One of the few larger disputes outside Ontario and British Columbia was the strike of 2,100 shipbuilding workers in Lauzon, Que. This stoppage, which started in mid-August, caused approximately two thirds of the total time loss recorded in Quebec for the month.

TABLE 2—NUMBER OF STRIKES AND LOCKOUTS, WORKERS AND TIME LOSS INVOLVED, BY PROVINCE, AUGUST 1958.

| Province           | No. of<br>Strikes and<br>Lockouts | No. of<br>Workers | Time<br>Loss |
|--------------------|-----------------------------------|-------------------|--------------|
| Newfoundland ...   | 2                                 | 1,020             | 10,200       |
| Nova Scotia .....  | 4                                 | 385               | 5,600        |
| New Brunswick ..   | 1                                 | 15                | 315          |
| Quebec .....       | 8                                 | 2,682             | 31,715       |
| Ontario .....      | 28                                | 11,245            | 163,865      |
| Saskatchewan ....  | 3                                 | 104               | 940          |
| Alberta .....      | 1                                 | 78                | 1,560        |
| British Columbia.. | 7                                 | 2,966             | 41,165       |

## United Kingdom

During the first six months of 1958, work stoppages in the United Kingdom due to disputes led to the loss of 3,244,000 working days.

The loss of working days was about three times the normal rate of recent years (the average since 1932 being about 2,000,000 days a year) but was less than half the loss in 1957, amounting to 6,956,000.

The total number of workers involved in these stoppages was approximately 283,000, though more than 40,000 of these persons were involved in more than one stoppage.

The total number of stoppages beginning in the period was 1,442.

# Publications Recently Received in Department of Labour Library

The publications listed below are not for sale by the Department of Labour. Persons wishing to purchase them should communicate with the publishers. Publications listed may be borrowed by making application to the Librarian, Department of Labour, Ottawa. Students must apply through the library of their institution. Applications for loans should give the number (numeral) of the publication desired and the month in which it was listed in the *LABOUR GAZETTE*. List No. 122

## Annual Reports

1. ALBERTA. WORKMEN'S COMPENSATION BOARD. *Fortieth Annual Report for the Year ended December 31, 1957*. Edmonton, 1958. Pp. 36.

2. GREAT BRITAIN. MINISTRY OF LABOUR AND NATIONAL SERVICE. *Report for the Year 1957*. London, H.M.S.O., 1958. Pp. 149.

3. ONTARIO. DEPARTMENT OF LABOUR. *Thirty-Eighth Report for the Fiscal Year ending March 31, 1957*. Toronto, Queen's Printer, 1958. Pp. 123.

4. UNITED NATIONS. DEPARTMENT OF SOCIAL AFFAIRS. *Yearbook on Human Rights for 1955*. New York, 1957. Pp. 431.

## Apprenticeship

5. KURSH, HARRY. *Apprenticeships in America: a Guide to Golden Opportunities in Industry for Students, Parents, Teachers, Guidance Counselors, and Leaders in Education, Labor and Industry*. 1st ed. New York, Norton, 1958. Pp. 176.

Explains what apprenticeship is, what apprenticeship opportunities are available, necessary requirements to be an apprentice, and how the American system of apprenticeship works. There is a list of apprenticeable occupations with cross-index.

6. U.S. BUREAU OF APPRENTICESHIP AND TRAINING. *National Bricklaying Apprenticeship Program and Standards, prepared and approved by the National Joint Bricklaying Apprenticeship Committee, representing the Associated General Contractors of America, inc., the Mason Contractors' Association of America and the Bricklayers, Masons and Plasterers International Union of America, in Accordance with the Recommended Fundamentals of the Federal Committee on Apprenticeship*. Rev. ed. Washington, G.P.O., 1958. Pp. 22.

7. U.S. BUREAU OF APPRENTICESHIP AND TRAINING. *National Apprenticeship Training Standards for the Electrical Contracting*

*Industry, Formulated by the National Electrical Contractors' Association and the International Brotherhood of Electrical Workers in cooperation with U.S. Department of Labor, Bureau of Apprenticeship and Training*. Rev. ed. Washington, G.P.O., 1958. Pp. 39.

## Automation

8. BRIGHT, JAMES RIESER. *Automation and Management*. Boston, Division of Research, Graduate School of Business Administration, Harvard University, 1958. Pp. 270.

This book is divided into three parts. Part 1 examines the nature of automatic manufacturing. Part 2 discusses the experience of management in thirteen selected plants which have automation. Part 3 deals with four important aspects of automatic manufacturing: maintenance, labor, sales and management itself.

9. GREAT BRITAIN. DEPARTMENT OF SCIENTIFIC AND INDUSTRIAL RESEARCH. *Automation in North America; a Report on Visits to Industrial, Commercial and Research Establishments in the U.S.A. and Canada*, by S. B. Bailey. London, H.M.S.O., 1958. Pp. 66.

The author reports on visits to 38 factories and laboratories in the aircraft, automobile, distribution, domestic appliances, electronics, engineering, instruments and control equipment, machine-tools, meat packing, pipe fittings, plywood, and steel industries. Includes a general survey of automation.

10. ROGERS, JACK. *Automation; Technology's New Face*. Berkeley, Institute of Industrial Relations, University of California, 1958. Pp. 94.

A brief discussion of the technological aspects of automation and the implications for management, labor, and the economy. The author points out that there is no need to fear that machines will take over from human beings. "Without men, machinery is so much inanimate junk and that is the way it is going to continue to be."

## Business

11. CANADA. DEPARTMENT OF TRADE AND COMMERCE. INDUSTRIAL DEVELOPMENT BRANCH. *Small Business Manual*. Rev. ed. Ottawa, Queen's Printer, 1958. Pp. 145.

Contents: The Personal Aspect. Forms of Organization. Location of Factories. Location of Retail Stores. Retail Store Policies. Records and Accounts. Uses and Sources of Credit. Buying and Selling on Credit. Insurance in Business. Government Law and Regulations. Bankruptcy and Insolvency. Dominion Bureau of Statistics.

12. FOX, EDWARD JACKSON, ed. *Marketing in Canada*, edited by Edward J. Fox and

David S. R. Leighton. Publication sponsored by the American Marketing Association. Homewood, Ill., R. D. Irwin, 1957. Pp. 437.

Contains 34 articles. The five parts of the book are: The Canadian Market in Perspective; The Regional Markets of Canada; Distribution Channels in Canada; Auxiliary Marketing Services; Government Regulation of Marketing in Canada; Managing the Salesforce in Canada; and, Selected Case Studies (five case studies).

### Collective Bargaining

13. AMERICAN MANAGEMENT ASSOCIATION. *Understanding Collective Bargaining; the Executive's Guide*. Elizabeth Marting, editor. New York, 1958. Pp. 415.

Forty-six authorities on industrial relations discuss how to prepare for contract talks; how to conduct the bargaining sessions; how to check the contract for clarity and precision; how to handle special situations; how to deal with topics like seniority, fringe benefits, grievance procedures, union security, the guaranteed annual wage and its modifications; what to do if a strike occurs; and how to keep employees and supervisory staff informed of the progress of the talks.

14. NATIONAL INDUSTRIAL CONFERENCE BOARD. *White Collar Union Contracts*, by James J. Bambrick. New York, c1958. Pp. 188.

A very brief analysis of the present situation in white collar unionization with the complete texts of nine contracts.

15. WITNEY, FRED. *The Collective Bargaining Agreement: its Negotiation and Administration*. Bloomington, Indiana University, School of Business Research, 1957. Pp. 137.

Some of the topics discussed are wage differentials, overtime rates of pay, fringe benefits, checkoff system, seniority, discharge and discipline, grievance procedure and arbitration.

### Congresses and Conventions

16. AMERICAN FEDERATION OF LABOR AND CONGRESS OF INDUSTRIAL ORGANIZATIONS. BUILDING AND CONSTRUCTION TRADES DEPARTMENT. *Report of Proceedings of the Special Convention held at Atlantic City, N.J., August 5, 1957*. Washington, 1957. Pp. 62.

17. CONFERENCE ON LABOR, NEW YORK UNIVERSITY. 10th, 1957. Proceedings. Albany, Matthew Bender & Co., 1957. Pp. 380.

Conference held June 12, 13, and 14, 1957. These proceedings are concerned entirely with pensions. "...The program laid stress upon actuarial aspects of pension plans, upon the various methods of funding the plans, upon problems of administration, and upon the difficult matter of investment of pension funds."

18. GOVERNOR'S WORKER SAFETY CONFERENCE, ALBANY. 1956. *Papers and Proceedings*. Edited by St. Clair T. Bourne. Albany? 1956? Pp. 129.

The Conference looked into the problem of industrial accidents in New York State that

averaged around 821,000 a year during the five years prior to the conference, and cost three-quarters of a billion dollars every year.

19. NATIONAL CONFERENCE OF LABOUR WOMEN. *Report of the Thirty-fourth National Conference of Labour Women held at...Torquay on April 2, 3, and 4, 1957*. London, Labour Party, 1957. Pp. 55.

20. NATIONAL INDUSTRIAL CONFERENCE BOARD. *Economic Comparisons, U.S.A., U.S.S.R.: Population and Area, Basic Production, Exports, Levels of Living, Military; 42nd Annual Meeting, May 15 and 16, 1958*. New York, 1958. Pp. 23.

21. TRANSPORT WORKERS UNION OF AMERICA. *Report of Proceedings, 10th Biennial Convention, Oct. 21-25, 1957, New York City*. New York, 1957. Pp. 299.

### Industrial Relations

22. INTERNATIONAL LABOUR ORGANIZATION. *Two Examples of Practical Action to improve Labour-Management Relations. 1. Peru, July-August 1957; 2. Bolivia, October 1957*. Geneva, International Labour Office, 1958. Pp. 20.

The first part concerns the successful mission of Dr. P. Fano, Chief of the International Organizations Division of the I.L.O., to Peru to aid a mediation committee set up to settle a dispute of railroad workers. The second part concerns the visit of an I.L.O. mission to Bolivia to report on economic and labour conditions. The mission consisted of Mr. Louis Major, secretary-general of the Belgian General Federation of Labour, and Jacques De Stærcke, secretary-general of the Belgian Association of Catholic Employers.

23. QUEBEC (CITY). UNIVERSITE LAVAL. DEPARTEMENT DES RELATIONS INDUSTRIELLES. *Changements économiques et transformations syndicales*, par Gerard Dion [et al.] Quebec, Les Presses universitaires Laval, 1957. Pp. 182.

Report of the Twelfth Congress des relations industrielles, held in Quebec City, May 6 and 7, 1957.

### Industry - Location

24. ALBERTA. INDUSTRIAL DEVELOPMENT BRANCH. *Survey of Fort Saskatchewan*. Rev. ed. Edmonton, 1958. Pp. 14.

25. ALBERTA. INDUSTRIAL DEVELOPMENT BRANCH. *Survey of Westlock*. Rev. ed. Edmonton, 1958. Pp. 12.

### International Labour Conference

26. INTERNATIONAL LABOUR OFFICE. *Hours of Work*. Eighth item on the agenda. Geneva, 1958. Pp. 151.

At head of title: Report 8. International Labour Conference. 42nd session, Geneva, 1958.

Contains four parts. Part 1 gives a general survey of national and international experience with hours of work. Part 2 gives a comparative analysis of hours of work in industry, in commerce and in offices. Part 3 gives a general analysis of the effects of

reducing hours of work. Part 4 sums up some of the possibilities for future I.L.O. action in the light of past experience with the question of hours of work.

27. INTERNATIONAL LABOUR OFFICE. *Information and Reports on the Application of Conventions and Recommendations*. Third item on the agenda. Geneva, 1957-1958. 4 Volumes.

At head of title: Report 3. Part 1-4. International Labour Conference. 42nd Session, Geneva, 1958.

Contents: Pt. 1. Summary of Reports on Ratified Conventions (Articles 22 and 35 of the Constitution). Pt. 2. Summary of Reports on Unratified Conventions and on Recommendations (Article 19 of the Constitution). Pt. 3. Summary of Information relating to the Submission to the Competent Authorities of Conventions and Recommendations adopted by the International Labour Conference (Article 19 of the Constitution). Pt. 4. Report of the Committee of Experts on the Application of Conventions and Recommendations (Article 19, 22 and 35 of the Constitution).

### Labour Organization

28. PERLMAN, MARK. *Labor Union Theories in America: Background and Development*. Evanston, Ill., Row, Peterson, 1958. Pp. 313.

An examination of what has been written about the American trade union movement by about twenty writers. The author says there are five basic interpretations of the labor movement, each of which he examines and attempts to evaluate from the present-day point of view.

29. SEIDMAN, JOEL ISAAC. *The Worker views His Union*, by Joel Seidman [and others]. Chicago, University of Chicago Press, 1958. Pp. 299.

A study of six midwestern locals of coal miners, plumbers, steel workers, metal works, knitting mill employees, and telephone workers.

Workers were asked about their jobs, their company, their union, their opinion about unions and union shops, what they thought about the local union officials, whether they attended union meetings, how local union elections were held, whether the worker voted in the election, what he thought of strikes, etc.

30. U.S. OFFICE OF INTERNATIONAL LABOR AFFAIRS. *The International Landworkers' Federation*, by Leon A. Dale. Washington, 1957. Pp. 69.

The International Landworkers' Federation has jurisdiction over workers in agriculture, horticulture and forestry. It has about 1,264,000 members in 18 countries.

### Older Workers

31. MICHIGAN. UNIVERSITY. CONFERENCE ON AGING, 1957. *Free Time; Challenge to Later Maturity*, edited by Wilma Donahue [and others]. Ann Arbor, University of Michigan Press, 1958. Pp. 172.

Discusses ways which middle-aged and older men and women can enjoy their leisure time.

32. NATIONAL COMMITTEE ON THE AGING. *Older People and the Industrial Community; a Report of the 1957 Spring Meeting*. Elma Phillipson, editor. New York, 1957. Pp. 45.

The topics discussed included the following: 1. ageing and productivity; 2. pre-payment of insurance effective after retirement; 3. Federal legislation and state programs; 4. activities for retired workers; 5. recent studies of experience with older workers; and 6. union concern with employment and retirement of older workers.

### Professional Workers

33. MICHIGAN. STATE UNIVERSITY OF AGRICULTURE AND APPLIED SCIENCE, EAST LANSING. LABOR AND INDUSTRIAL RELATIONS CENTER. *Effective Utilization of Engineering Personnel; Proceedings of a Conference at Michigan State University, March 29 and 30, 1957*. Sponsored by the Michigan State University Labor and Industrial Relations Center, College of Engineering and the Michigan Society of Professional Engineers. East Lansing, 1957. Pp. 53.

Some of the speakers thought that trained engineers should be relieved of non-engineering duties; that technicians should relieve engineers of routine work; that there should be more training schools for technicians; that competent engineers should not be compulsorily retired at age 65; that staff at engineering colleges should be better paid, etc.

34. ORGANIZATION FOR EUROPEAN ECONOMIC CO-OPERATION. MANPOWER COMMITTEE. *The Problem of Scientific and Technical Manpower in Western Europe, Canada and the United States*. Paris, Organization for European Economic Co-operation, 1957. Pp. 221.

This report provides information about Austria, Belgium, Germany, Denmark, France, Great Britain, Greece, Ireland, Italy, Luxembourg, Norway, Netherlands, Portugal, Sweden, Switzerland, Canada and the U.S.A.

### Vocational Guidance

35. HOPPOCK, ROBERT. *Occupational Information: Where to get it and How to use it in Counselling, including a revised and enlarged edition of the Author's Group Guidance*. New York, McGraw-Gill, 1957. Pp. 534.

36. SUPER, DONALD EDWIN. *Scientific Careers and Vocational Development Theory; a Review, a Critique, and Some Recommendations*, by Donald E. Super and Paul B. Bachrach. New York, Teachers College, Columbia University, 1957. Pp. 135.

"This monograph attempts to summarize what research has shown to be the characteristics of natural scientists, mathematicians, and engineers."

## Women - Employment

37. CANADA. DEPARTMENT OF LABOUR. *Survey of Married Women working for Pay in Eight Canadian Cities*. Ottawa, Queen's Printer, 1957. Pp. 80.

Prepared for the Women's Bureau by the Economics and Research Branch.

Partial Contents: Who are the Married Working Women? What are they doing? Are they Regular Members of the Labour Force? What do they and their Husbands earn? Why are they working? How do Things work out at Home? How do the Immigrants fare? Summary and Conclusions.

38. U.S. WOMEN'S BUREAU. *Spotlight on Women in the United States. 1956-57*. Washington, G.P.O., 1957. Pp. 46.

Examines various fields in which women are employed in the U.S.

## Miscellaneous

39. AMERICAN MANAGEMENT ASSOCIATION. *Men, Machines, and Methods in the Modern Office*. New York, c1958. Pp. 148.

Some of the topics discussions are electronic data processing in the office, punch card systems, quality control in the office, and a description of a functional office building belonging to Standard-Vacuum Oil Company in White Plains, New York.

40. BONNETT, CLARENCE ELMORE. *History of Employers' Associations in the United States*. 1st ed. New York, Vantage Press, 1957, c1956. Pp. 573.

Traces history of employers' associations in the U.S. from the first recorded association in the 17th century up to 1900, with a summary of events since then.

41. CALLARD, KEITH B. *Advanced Administrative Training in the Public Service*. Toronto, Institute of Public Administration of Canada, 1958. Pp. 32.

This study suggests further methods of developing senior officials in the Canadian Public Service.

42. CANADA. NATIONAL EMPLOYMENT SERVICE. *Full-time Undergraduate Enrolment at Canadian Universities and Colleges*, by

*Graduating Year, as reported at November 1, 1957*. Ottawa, 1957. Pp. 13.

43. CANADA. ROYAL COMMISSION ON COASTAL TRADE. *Report*. Ottawa, Queen's Printer, 1958. Pp. 356.

Contents: 1. Introduction. 2. Present Legislation affecting Coast-Trade and Shipbuilding. 3. The Canadian Coasting Trade. 4. Waterways of the Great Lakes and St. Lawrence River. 5. The Canadian Merchant Fleet. 6. Prospects for Canadian Registered Shipping in the Coasting Trade. 7. Proposed Restriction of Coasting Trade to Vessels registered in Canada. 8. The Shipbuilding and Repairing Industry in Canada. 9. Proposed Restriction of Coasting Trade to Vessels Built and Registered in Canada. 10. Regulation of Canadian Coasting Trade. 11. Other Submissions.

44. COPEMAN, GEORGE. *The Challenge of Employee Shareholding; How to close the Gap between Capital and Labour*. London, Business Publications Ltd. in association with B. T. Batsford Ltd., 1958. Pp. 200.

After outlining reasons for employee shareholding plans, the author classifies fifty existing schemes into ten types and describes and analyzes each type. Then, he sums up and evaluates the types of plan to help companies which are thinking of adopting such a plan.

45. DAVIS, JOHN. *Mining and Mineral Processing in Canada*. Hull, Queen's Printer, 1957. Pp. 400.

Study prepared for the Royal Commission on Canada's Economic Prospects.

A survey of individual minerals and their production, and possible future trends.

46. HENDERSHOT, RALPH. *The Grim Truth about Life Insurance*. New York, Putnam, 1957. Pp. 118.

Explains how the life insurance policyholder can get the most value out of his investment.

47. KENNEDY, WILLIAM F. *Humanist versus Economist; the Economic Thought of Samuel Taylor Coleridge*. Berkeley, University of California Press, 1958. Pp. 96.

A study of the writings of Coleridge on economic and social questions.

---

## Digest of U.S. State and Federal Labour Legislation in 1957

Labour legislation was enacted in the United States in all but one of the 45 states and three territories that met in regular session in 1957. This legislation is summarized in the U.S. Department of Labor's Annual Digest of State and Federal Labor Legislation, 1957.

Maximum weekly benefits for unemployment insurance were raised in 21 states; for workmen's compensation in 29 states, Alaska and Hawaii. Minimum wage laws were strengthened in eight jurisdictions, and

Vermont enacted a minimum wage law for the first time.

Other legislation provided for mediation and conciliation service in Florida, and for registration of certain welfare funds in California, Connecticut, Massachusetts and Wisconsin. Child labour laws were improved in Florida and Missouri.

Copies of the digest are available from Bureau of Labor Standards, U.S. Department of Labor, Washington 25, D.C. Single copies are free while supply lasts.

Tables C-4 and C-5 are based on reports from a somewhat smaller number of firms than Tables C-1 to C-3. They relate only to wage-earners for whom statistics of hours of work are also available whereas Tables C-1 to C-3 relate to salaried employees as well as to all wage-earners of the co-operative firms.

## D—National Employment Service Statistics

Tables D-1 to D-5 are based on regular statistical reports from local offices of the National Employment Service. These statistics are compiled from two different reporting forms, UIC 751: statistical report on employment operations by industry, and UIC 757: inventory of registrations and vacancies by occupation. The data on applicants and vacancies in these two reporting forms are not identical.

(a) The record of the Department includes lockouts as well as strikes but a lockout or an industrial condition which is undoubtedly a lockout, is not often encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused but a separate record of such strikes is maintained in the Department. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees for a short period of time is frequently not received until some time after its commencement.

(b) Strikes unconcluded at the end of the previous year are included in these totals.

TABLE G-2.—STRIKES AND LOCKOUTS AUGUST 1958, INVOLVING 100 OR MORE WORKERS

(Preliminary, subject to revision)

| Employer(s)                                                                                                      | Union(s)                                                                                                                                                 | On Strike or Locked Out       |                                               | Date Began(a) | Date Terminated or Lapsed | Major Issue(s)                                               | Result                                                                     |

# A Message from the Minister of Labour

The struggle for human rights is as old as mankind itself. In the long development of democracy, beginning with the Magna Charta of 1215, through the Bill of Rights of 1679, the American Declaration of Independence, France's Declaration of the Rights of Man, etc., those rights have come to gain protection through the law and practice of individual states. The international minimum social and labour standards drafted by the tripartite International Labour Organization have, since the ILO's creation in 1919, pioneered in providing protection of a special kind of human rights.

But the protection gained from all those documents has depended on individual states, and was enjoyed only by the peoples of those states that enacted such measures or ratified such standards.

Then, on December 10, 1948, the United Nations General Assembly adopted and proclaimed a Universal Declaration of Human Rights. For the first time, the rights and freedoms defined in the Declaration—economic and social rights as well as political rights—were set out in an international, universal declaration, and were specifically applied to the individual as a human being “without distinction based on the political status of countries or territories”. That is the real significance of this Declaration.

As its contribution to the Canadian celebration of the tenth anniversary of the Universal Declaration of Human Rights, the *Labour Gazette* is publishing in this issue a special section on Human Rights. It is most appropriate, in my opinion, for the *Labour Gazette* to mark this anniversary in this way. I say this because the publicizing of such documents and of action taken towards the achieving of human rights and fundamental freedoms is in no way foreign to one of the purposes served by the *Labour Gazette*. As set forth on the first page of its first issue in September 1900, the *Labour Gazette* aims to contain in its columns topics that “have a bearing on the status and well-being of the industrial classes of Canada”. And I say it because Canadian governments have long believed in the concepts crystallized in the Declaration's thirty articles and have already given legislative force to many of them; the Government of which I am a member introduced during the most recent session of Parliament a “Bill of Rights” aimed at providing statutory protection of some of the other rights enumerated in the Declaration.

I further believe it appropriate for a Department of Labour publication to call attention to this anniversary because Articles 23 and 24 of the Declaration come close to spelling out the reasons for the establishment and existence of a Department of Labour.

The Declaration's tenth anniversary will be celebrated throughout almost the entire world. In Canada a country-wide celebration has been organized by a group of organizations who have formed the Human Rights Anniversary Committee for Canada. I note that this Committee includes among its sponsoring organizations several groups within the Canadian labour movement.

I invite, and urge, all readers of the *Labour Gazette* to read the Universal Declaration of Human Rights reprinted on the following pages, and all the articles that make up this special Human Rights section of this issue.

Michael Starr,  
Minister of Labour.

601-1111

# Universal Declaration of Human Rights

## PREAMBLE

**Whereas** recognition of the inherent dignity and of the equal and inalienable rights of all members of the human family is the foundation of freedom, justice and peace in the world,

**Whereas** disregard and contempt for human rights have resulted in barbarous acts which have outraged the conscience of mankind, and the advent of a world in which human beings shall enjoy freedom of speech and belief and freedom from fear and want has been proclaimed as the highest aspiration of the common people,

**Whereas** it is essential, if man is not to be compelled to have recourse, as a last resort, to rebelling against tyranny and oppression, that human rights should be protected by the rule of law,

**Whereas** it is essential to promote the development of friendly relations between nations,

**Whereas** the peoples of the United Nations have in the Charter reaffirmed their faith in fundamental human rights, in the dignity and worth of the human person and in the equal rights of men and women and have determined to promote social progress and better standards of life in larger freedom,

**Whereas** Member States have pledged themselves to achieve, in co-operation with the United Nations, the promotion of universal respect for and observance of human rights and fundamental freedoms,

**Whereas** a common understanding of these rights and freedoms is of the greatest importance for the full realization of this pledge,

**Now, Therefore,**

### THE GENERAL ASSEMBLY

**proclaims**

**THIS UNIVERSAL DECLARATION OF HUMAN RIGHTS** as a common standard of achievement for all peoples and all nations, to the end that every individual and every organ of society, keeping this Declaration constantly in mind, shall strive by teaching and education to promote respect for these rights and freedoms and by progressive measures, national and international, to secure their universal and effective recognition and observance, both among the peoples of Member States themselves and among the peoples of territories under their jurisdiction.

**Article 1.** All human beings are born free and equal in dignity and rights. They are endowed with reason and conscience and should act towards one another in a spirit of brotherhood.

**Article 2.** Everyone is entitled to all the rights and freedoms set forth in this Declaration, without distinction of any kind, such as race, colour, sex, language, religion, political or other opinion, national or social origin, property, birth or other status.

Furthermore, no distinction shall be made on the basis of the political, jurisdictional or international status of the country or territory to which a person belongs, whether it be independent, trust, non-self-governing or under any other limitation of sovereignty.

**Article 3.** Everyone has the right to life, liberty and security of person.

**Article 4.** No one shall be held in slavery or servitude; slavery and the slave trade shall be prohibited in all their forms.

**Article 5.** No one shall be subjected to torture or to cruel, inhuman or degrading treatment or punishment.

**Article 6.** Everyone has the right to recognition everywhere as a person before the law.

**Article 7.** All are equal before the law and are entitled without any discrimination to equal protection of the law. All are entitled to equal protection against any discrimination in violation of this Declaration and against any incitement to such discrimination.

**Article 8.** Everyone has the right to an effective remedy by the competent national tribunals for acts violating the fundamental rights granted him by the constitution or by law.

**Article 9.** No one shall be subjected to arbitrary arrest, detention or exile.

**Article 10.** Everyone is entitled in full equality to a fair and public hearing by an independent and impartial tribunal, in the determination of his rights and obligations and of any criminal charge against him.

**Article 11.** (1) Everyone charged with a penal offence has the right to be presumed innocent until proved guilty according to law in a public trial at which he has had all the guarantees necessary for his defence.

(2) No one shall be held guilty of any penal offence on account of any act or omission which did not constitute a penal offence, under national or international law, at the time when it was committed. Nor shall a heavier penalty be imposed than

the one that was applicable at the time the penal offence was committed.

**Article 12.** No one shall be subjected to arbitrary interference with his privacy, family, home or correspondence, nor to attacks upon his honour and reputation. Everyone has the right to the protection of the law against such interference or attacks.

**Article 13.** (1) Everyone has the right to freedom of movement and residence within the borders of each state.

(2) Everyone has the right to leave any country, including his own, and to return to his country.

**Article 14.** (1) Everyone has the right to seek and to enjoy in other countries asylum from persecution.

(2) This right may not be invoked in the case of prosecutions genuinely arising from non-political crimes or from acts contrary to the purposes and principles of the United Nations.

**Article 15.** (1) Everyone has the right to a nationality.

(2) No one shall be arbitrarily deprived of his nationality nor denied the right to change his nationality.

**Article 16.** (1) Men and women of full age, without any limitation due to race, nationality or religion, have the right to marry and to found a family. They are entitled to equal rights as to marriage, during marriage and at its dissolution.

(2) Marriage shall be entered into only with the free and full consent of the intending spouses.

(3) The family is the natural and fundamental group unit of society and is entitled to protection by society and the State.

**Article 17.** (1) Everyone has the right to to protection by society and the State. own property alone as well as in association with others.

(2) No one shall be arbitrarily deprived of his property.

**Article 18.** Everyone has the right to freedom of thought, conscience and religion; this right includes freedom to change his religion or belief, and freedom, either alone or in community with others and in public or private, to manifest his religion or belief in teaching, practice, worship and observance.

**Article 19.** Everyone has the right to freedom of opinion and expression; this right includes freedom to hold opinions without interference and to seek, receive and impart information and ideas through any media and regardless of frontiers.

**Article 20.** (1) Everyone has the right to freedom of peaceful assembly and association.

(2) No one may be compelled to belong to an association.

**Article 21.** (1) Everyone has the right to take part in the government of his country, directly or through freely chosen representatives.

(2) Everyone has the right of equal access to public service in his country.

(3) The will of the people shall be the basis of the authority of government; this will shall be expressed in periodic and genuine elections which shall be by universal and equal suffrage and shall be held by secret vote or by equivalent free voting procedures.

**Article 22.** Everyone, as a member of society, has the right to social security and is entitled to realization, through national effort and international co-operation and in accordance with the organization and resources of each State, of the economic, social and cultural rights indispensable for his dignity and the free development of his personality.

**Article 23.** (1) Everyone has the right to work, to free choice of employment, to just and favourable conditions of work and to protection against unemployment.

(2) Everyone, without any discrimination, has the right to equal pay for equal work.

(3) Everyone who works has the right to just and favourable remuneration ensuring for himself and his family an existence worthy of human dignity, and supplemented, if necessary, by other means of social protection.

(4) Everyone has the right to form and to join trade unions for the protection of his interests.

**Article 24.** Everyone has the right to rest and leisure, including reasonable limitation of working hours and periodic holidays with pay.

**Article 25.** (1) Everyone has the right to a standard of living adequate for the health and well-being of himself and of his family, including food, clothing, housing and medical care and necessary social services, and the right to security in the event of unemployment, sickness, disability, widowhood, old age or other lack of livelihood in circumstances beyond his control.

(2) Motherhood and childhood are entitled to special care and assistance. All children, whether born in or out of wedlock, shall enjoy the same social protection.

**Article 26.** (1) Everyone has the right to education. Education shall be free, at least in the elementary and fundamental stages. Elementary education shall be compulsory. Technical and professional education shall be made generally available and higher education shall be equally accessible to all on the basis of merit.

(2) Education shall be directed to the full development of the human personality

and to the strengthening of respect for human rights and fundamental freedoms. It shall promote understanding, tolerance and friendship among all nations, racial or religious groups, and shall further the activities of the United Nations for the maintenance of peace.

(3) Parents have a prior right to choose the kind of education that shall be given to their children.

**Article 27.** (1) Everyone has the right freely to participate in the cultural life of the community, to enjoy the arts and to share in scientific advancement and its benefits.

(2) Everyone has the right to the protection of the moral and material interests resulting from any scientific, literary or artistic production of which he is the author.

**Article 28.** Everyone is entitled to a social and international order in which the rights

and freedoms set forth in this Declaration can be fully realized.

**Article 29.** (1) Everyone has duties to the community in which alone the free and full development of his personality is possible.

(2) In the exercise of his rights and freedoms, everyone shall be subject only to such limitations as are determined by law solely for the purpose of securing due recognition and respect for the rights and freedoms of others and of meeting the just requirements of morality, public order and the general welfare in a democratic society.

(3) These rights and freedoms may in no case be exercised contrary to the purposes and principles of the United Nations.

**Article 30.** Nothing in this Declaration may be interpreted as implying for any State, group or person any right to engage in any activity or to perform any act aimed at the destruction of any of the rights and freedoms set forth herein.

## Protection of Human Rights within the Canadian Constitutional System

On September 5, 1958, the Prime Minister introduced in the House of Commons Bill C-60 entitled "An Act for the Recognition and Protection of Human Rights and Fundamental Freedoms," the short title of which is the Canadian Bill of Rights. He explained that after the Leader of the Opposition and a representative of the CCF Party had expressed their views, the measure would be held over until the next session to be introduced at the earliest possible date after full representations have been received from those organizations and individuals in our country whose interest over the years has been directed to the necessity for a Bill of Human Rights and Fundamental Freedoms". This proposal for the further protection of human rights and fundamental freedoms is now before the people of Canada in this tenth anniversary year of the adoption of the Universal Declaration of Human Rights.

The Bill contains two parts. In Part I, Section 2 contains the recognition and declaration of rights and freedoms and reads as follows:

It is hereby recognized and declared that in Canada there have always existed and shall continue to exist the following human rights and fundamental freedoms, namely,

- (a) the right of the individual to life, liberty, security of the person and enjoyment of property and the right not to be deprived thereof except by due process of law;

- (b) the right of the individual to protection of the law without discrimination by reason of race, national origin, colour, religion or sex;  
(c) freedom of religion;  
(d) freedom of speech;  
(e) freedom of assembly and association; and  
(f) freedom of the press;

Section 3 provides that all the Acts of the Parliament of Canada enacted before or after the commencement of the Act, and all orders, rules, regulations thereunder and laws in force in Canada which are subject to the authority of the Parliament of Canada, shall be so construed and applied as not to infringe or abrogate any of the rights or freedoms recognized by this Act. In particular they will not:

- (a) impose or authorize the imposition of torture, or cruel, inhuman or degrading treatment or punishment;  
(b) deprive a person who has been arrested or detained  
(i) of the right to be informed promptly of the reason for his arrest or detention;  
(ii) of the right to retain and instruct counsel without delay, or  
(iii) of the remedy by way of habeas corpus for the determination of the validity of his detention and for his release if the detention is not lawful;  
(c) authorize a court, tribunal, commission, board or other authority to compel a person to give evidence if he is denied counsel or other constitutional safeguards;

(d) deprive a person of the right to a fair hearing in accordance with the principles of fundamental justice for the determination of his rights and obligations; or

(e) deprive a person of the right to a fair and public hearing by an independent and impartial tribunal for the determination of any criminal charge against him.

Section 4 imposes on the Minister of Justice the duty to examine every proposed regulation submitted in draft form to the Clerk of the Privy Council, and every Bill introduced in the House of Commons to ensure that the proposed measure conforms to the provisions of this Act.

In Part II, Section 5 contains a saving clause to the effect that nothing in Part I of the Bill could be construed as abrogating or abridging any human right or fundamental freedom not mentioned in that Part that may have existed in Canada at the commencement of the Act.

Section 6 provides that security measures provided in Sections 3, 4, and 5 of the War Measures Act shall come into force only following proclamation of the Governor in Council declaring that war, invasion or insurrection, real or apprehended, exists. Such a proclamation shall be laid before Parliament forthwith after its issue or, if Parliament is not sitting, within the first 15 days thereafter.

In explaining in the House of Commons the provisions of Section 6 the Prime Minister said that in time of war rights on occasion have to be placed in pawn as security for victory, but such decision should be made not by the Governor in Council but by Parliament, "thereby restoring to the representatives of the people the right to declare whether or not, for a period to be designated during the progress of war or an international catastrophe similar thereto, any rights shall be deprived except in consequence of the act of Parliament."

As pointed out above, Section 2 of the Bill states that in Canada there have always existed and shall continue to exist certain human rights and fundamental freedoms. They have existed in the main because the British heritage of political customs, usages, conventions and traditions have been carried over into the Canadian way of life. This British heritage of individual and political freedom received formal recognition as being part of the Canadian constitution by a declaration inserted in the preamble to the British North America Act proclaiming that the Dominion of Canada is to have "a constitution similar in principle to that of the United Kingdom".

Language and education were practical issues at the time when the provinces were united, and accordingly both subjects are dealt with in the B.N.A. Act. Section 93 of the Act preserves the rights and privileges of "denominational schools"; extends to the separate schools of "the Queen's Protestant and Roman Catholic Subjects" in Quebec the same powers, privileges and duties then conferred and imposed on the separate schools of "the Queen's Roman Catholic subjects" in Ontario; provides for an appeal to the Governor-General in Council from any act or decision of a provincial authority "affecting any Right or Privilege of the Protestant or Roman Catholic Minority of the Queen's subjects in relation to Education"; declares that in the event of any failure on the part of the provincial authority to observe or enforce the provincial laws contemplated by the section, the Parliament of Canada may provide for the execution of the provisions of the section or of any decision of the Governor-General in Council under this section.

Section 133 specifies that either the English or the French language may be used in debates in the federal Parliament and in the Quebec Legislature; that both these languages shall be used in the respective records and journals of those Houses; that either of those languages may be used by any person in the courts established under the Act, and in any of the courts in Quebec.

The Prime Minister's Bill seems to imply on the part of the Parliament of Canada the renunciation of the principle of the sovereignty of the Parliament of Canada insofar as the curtailing of human rights is concerned except regarding the security measures enacted under the War Measures Act.

The proposed Bill is not conceived as an amendment to the B.N.A. Act but as a statute of the Parliament of Canada. It is limited in scope, being restricted to the rights strictly within the jurisdiction of Parliament whatever that jurisdiction may be. It does not infringe on the jurisdiction granted by the B.N.A. Act to the provincial legislatures.

Although the limits of the jurisdiction of Parliament in the field of human rights may not as yet have been clearly defined by court decisions, the field is at any rate fairly wide, since Section 91 of the B.N.A. Act granted to the Parliament of Canada the power "to make laws for the Peace, Order and Good Government of Canada in relation to all matters not coming within the classes of subjects by this Act assigned

exclusively to the legislatures of the province" and in particular, *inter alia*, "The Criminal Law except the constitution of courts of criminal jurisdiction, but including the procedure in criminal matters."

It is also clear, however, that because Section 92 of the B.N.A. Act grants exclusive powers to provincial legislatures in relation to "Property and Civil Rights in the Province," provincial legislatures may make laws in respect to some aspects of civil rights.

The question of what is involved in the term "property and civil rights" as being within provincial jurisdiction has been dealt with in a number of cases in the Supreme Court of Canada. Views have been expressed that this term does not include freedom of worship and freedom of speech and therefore these freedoms are within the jurisdictional powers of the Parliament of Canada. In this respect it is of interest to note the opinions regarding the matter expressed by judges of the Supreme Court of Canada in *Saumur v. City of Quebec and Attorney General of Quebec* (1953) 4 D.L.R. p. 641, the case involving the constitutionality of a by-law of the City of Quebec which prohibited distribution of printed matter on the streets of the City of Quebec without the written permission of the Chief of Police. The issues raised in the case were whether the disputed by-law was directed at regulation of streets or at interference with freedom of religion and freedom of speech; was the by-law administered as involving censorship; are the provinces competent to legislate in respect to freedom of religion and speech. The Court held by a majority that the by-law in question does not extend so as to prohibit the members of Jehovah's Witnesses from distributing in the streets of Quebec any of their religious literature without permission, but the by-law itself was held by a majority as *intra vires* of provincial jurisdiction.

On that occasion some judges expressed the views that freedom of worship and freedom of expression are within provincial authority, within "property and civil rights," under Section 92 (13) of the B.N.A. Act. This view was shared by Chief Justice Rinfret, Mr. Justice Taschereau and Mr. Justice Kerwin.

Chief Justice Rinfret (with Mr. Justice Taschereau concurring) held that freedom of worship is a civil right within the terms of Section 92 (13) of the B.N.A. Act and consequently a provincial domain. As to the question whether there are any limitations on the provincial powers to legislate on freedom of worship and expression, he was of the opinion that in the absence of a

Bill of Rights, the supreme authority of the provinces to legislate and if necessary to restrict these freedoms could not be questioned. Mr. Justice Kerwin expressed the opinion that the right to practice one's religion, as well as the freedom of the press, are civil rights within provincial jurisdiction.

An opposite stand was taken by Mr. Justice Rand, Mr. Justice Kellock, Mr. Justice Estey and Mr. Justice Locke, who were of the opinion that freedom of worship and freedom of expression are within federal jurisdiction.

In this respect Mr. Justice Rand was of the opinion that from 1760 onwards, religious freedom has been recognized as a fundamental principle in the Canadian legal system, and the statutory history of the expression "property and civil rights" exhibited in enactments which also made special provisions relative to religion shows that matters of religious belief were never intended to be within Section 92 (13) of the B.N.A. Act; nor can legislation in relation to religious profession be considered a matter of a local or private nature within Section 92 (16) since its dimensions are nation-wide. His conviction that freedom of religion is outside provincial legislative power (although it may be affected by competent provincial legislation) was fortified by Section 93 of the B.N.A. Act, which deals with the rights and privileges of denominational schools and apparently contains the only reference in the Act to religion. If freedom of religion was a provincial concern, then, Mr. Justice Rand added, "these vital constitutional provisions could be written off by the simple expedient of abolishing, as a civil right, and by provincial legislation, the religious freedoms of minorities, and so, in legal contemplation, the minorities themselves".

Also he was of the opinion that freedom of speech, as a basic condition of parliamentary government, is beyond provincial powers of regulation.

In Mr. Justice Kellock's opinion, the legislative history from 1774 on indicates that the phrase "property and civil rights" did not encompass religious profession and exercise, which were dealt with in the pre-Confederation statute of 1851, An Act respecting Rectories. He asserted that the right to the exercise of religion is not a "civil right" and even if it is, it is not a civil right "within the province"; and this conclusion is fortified by Section 93 of the B.N.A. Act.

Mr. Justice Estey stated that free exercise and enjoyment of religious profession and worship is a matter within the legislative

power of the Dominion for "the Peace, Order and good Government of Canada" (Section 91) and does not come within Section 92 (13).

In Mr. Justice Locke's opinion the protection of the right of religious worship as of the right to free public discussion is within federal legislative power and such matters are not civil rights within provincial competence.

Mr. Justice Cartwright and Mr. Justice Fauteux differed somewhat from either of the opinions expressed above. They held that there are no rights of a citizen of Canada which are beyond the reach of either Parliament or a provincial legislature. Freedom of the press is not a separate matter committed exclusively to either Parliament or to provincial legislatures. It may in some aspects fall within federal authority (as, for example, in relation to criminal law) and in others within provincial authority. While it may well be that religion as such is a matter within exclusive federal competence (although it was unnecessary to decide this in the case before them), nonetheless a province, legislating within its appointed sphere, may affect religious practices.

The provinces have availed themselves of the legislative powers granted under the property and civil rights clause to enact legislation aimed at the protection of some of the basic rights and providing remedies for an individual whose rights are infringed. The Saskatchewan Bill of Rights asserts the right to freedom of conscience (including freedom of worship); the right to free expression through all means of communications; the right of association; freedom from arbitrary imprisonment; and the right to free exercise of the franchise. It also asserts certain rights which are to be enjoyed without discrimination because of race, creed, religion, colour, or ethnic or national origin, namely, the right to own and occupy property, the right to membership in professional associations and occupational organizations, and the right to education. It is an offence punishable by a fine to deprive anyone of these rights or abridge or otherwise restrict them. Any person may lay an information alleging on behalf of himself or a class of persons that any of these rights has been infringed. The Court of Queen's

Bench may also issue an injunction restraining the person responsible for such infringement.

The provinces of Ontario and Quebec both have on their statute books laws expressing the right to freedom of worship in terms which originated in An Act respecting Rectories, the legislation referred to above, which was enacted in the period before Confederation when the two provinces were united. They are the Freedom of Worship Act in Quebec, (R.S.Q., 1941, c. 307) and An Act respecting Rectories in Ontario (R.S.O. 1897, c. 306, which does not appear in the more recent revised statutes but has not been repealed).

Some other statutes dealing with basic rights have been enacted in a number of provinces. There are statutes in all provinces protecting an employee's right to freedom of association in respect to membership in a trade union (Labour Relations Acts). Equal opportunity in respect to employment without discrimination based on race, religion, colour or national origin has been the subject of legislation in six provinces (Fair Employment Practices Acts); and the right of accommodation without discrimination in places to which the public has access has been set out in legislation in Ontario and Saskatchewan (Fair Accommodation Practices Acts).

It is clear from what the provinces have already undertaken in the way of positive legislation to ensure respect for basic rights and redress for persons whose rights are infringed that they have a broad field of responsibility. It may be that the proposed federal Bill may commend itself to provincial governments as a practical kind of measure which each province might also adopt. Such a Bill of Rights would ensure that the legislative body, in carrying out its task of legislating in the broad interests of the electorate, will at the same time scrutinize each legislative proposal from the standpoint of respect for basic human rights and fundamental freedoms; and that in interpreting the laws by the legislative body, the courts would examine them in the light of the statement that they "shall be so construed and applied as not to abrogate, abridge or infringe" the rights and freedoms set out in the Bill of Rights.

## ILO Survey Seen Promoting Respect for Human Rights

The ILO's world-wide freedom-of-association survey "may open a new stage in international efforts to promote respect for human rights and fundamental freedoms," ILO Director-General David A. Morse told the United Nations Economic and Social Council at its 26th session.

The factual survey, which is to include on-the-spot studies in ILO member countries, will get underway next year, he said, recalling that the governments of the United States and USSR have asked that survey missions be sent to their countries (L.G., Aug., p. 869).

# Canadian Legislation and Measures Prohibiting Discrimination in Employment\*

The Canada Fair Employment Practices Act, which came into effect on July 1, 1953, is designed to prevent and eliminate practices of discrimination against persons in regard to employment and in regard to membership in a trade union because of race, national origin, colour or religion.

Parliament, in passing the Act, was translating into law a basic principle of human rights.

As a member of various international organizations, Canada in recent years has subscribed to general declarations of the basic rights and liberties of the individual. For instance, this country accepted the United Nations Charter and declaration of human rights, and the declaration of aims of the International Labour Organization.

Among these declarations of rights was one which this legislation is designed to protect—the right of equality of opportunity in employment. It is recognized that legislation, by itself, cannot entirely change the attitudes of mind which are at the root of discrimination. The discussions that took place while the Act was before Parliament emphasized the need for continued public and private educational efforts to do away with prejudice and ignorance.

Like other federal legislation in the labour field, the Act applies only to works and businesses within federal jurisdiction, but the hope was expressed in Parliament that the legislation would have a far-reaching and healthy influence all across the country.

While the Act lays down penalties for positive acts of discrimination, it is expected that most of the cases that arise will be settled by conciliation, without any need for recourse to the courts. Experience with similar legislation in other places has shown that the existence of the legislation alone is sufficient in many cases to prevent discrimination. Then, too, it is likely that many cases of discrimination will be found to have been caused by misunderstanding or thoughtlessness on the part of one or both

of the parties, and that in such cases complaints will be ironed out without difficulty.

None of the provisions of the Act are to be interpreted as requiring anyone to employ a person, or to take any other action, contrary to government security regulations.

The Act states that no employer shall refuse to employ, or continue to employ or otherwise discriminate against, any person in regard to employment, or any term or condition of employment, because of his race, national origin, colour or religion. Further, an employer is not to use any employment agency which practices discrimination against persons seeking employment.

Employers are not to make written or oral inquiries or to use application forms relating to employment that express directly or indirectly any limitation, specification or preference based on race, national origin, colour or religion, except where based on a *bona fide* occupational qualification. There are similar provisions against discriminatory advertising.

The Act also forbids discriminatory actions by labour unions. No labour union may exclude anyone from full membership, or expel, suspend or otherwise discriminate against, any of its members, or discriminate against any one in regard to his employment, because of race, colour, national origin or religion.

The Act applies to employers in essentially the same industries and undertakings as does the Industrial Relations and Disputes Investigation Act. These are the undertakings which are within the legislative jurisdiction of the Parliament of Canada. It applies also to trade unions, to the extent that their operations fall within federal jurisdiction. The Act does not apply to employers of fewer than five employees, and it excludes non-profit educational, fraternal, charitable, religious and social organizations.

The works and undertakings to which the Act applies include those in navigation and shipping, railways, canals, telegraphs, aerodromes, airlines, radio and television broadcasting, banks and federal crown corporations, as well as to works or undertakings that have been declared to be for the general advantage of Canada, or are outside the exclusive jurisdiction of the provincial legislatures.

A person who feels that he has been discriminated against may make a complaint,

\* Article 2 of the Universal Declaration of Human Rights states, "Everyone is entitled to all the rights and freedoms set forth in this Declaration, without distinction of any kind, such as race, colour, sex, language, religion, political or other opinion, national or social origin, property, birth or other status"; and Article 23 (1) states, "Everyone has the right to work, to free choice of employment, to just and favourable conditions of work and to protection against unemployment".

## Case No. 1

On September 16, 1953, two months after the Act came into force, the first complaint was made under the legislation. The case concerned a Negro stenographer who complained against a firm within the scope of the Act. The person in question charged that she was refused employment on racial grounds. She stated that she had answered an advertisement by telephone and was asked to come to the office of the firm for an interview. When she did, she was informed that the position was filled. No further explanation was given.

Within a short period of time the complainant telephoned the company and spoke with the person who had informed her that the vacancy had been filled. He indicated that the job was still open.

A Department of Labour Conciliator was appointed to investigate the case and he interviewed both the complainant and the officers of the company concerned. It was noted that the complainant was very fair in the discussion of her complaint before the Conciliator and devoid of any bitterness. When the company officials were interviewed they promptly admitted that an error had been made, they fully realized their liability in the situation and were most anxious to make an adjustment. The company to show its good faith, sent an application form to the complainant who, in reply, stated that she had since taken another position. However, the Department was informed by both the complainant and the organization which supported her complaint that they were satisfied that the filing of her complaint here had brought discrimination to light, that suitable amends had been offered and that the practical worth and workability of the legislation had been demonstrated. No further complaints have been received involving this particular company and it is known that the company has in its employment many persons of different colours, races and creeds.

in writing, to the Director of Industrial Relations, Department of Labour, Ottawa. An officer of the Department may then be directed to make an immediate inquiry into the complaint and try to bring about a satisfactory settlement by conciliation. It is hoped that most complaints will be settled at this stage.

If the officer is not able to bring about a settlement, the Minister of Labour is empowered by the Act to set up an Industrial Inquiry Commission to investigate the complaint and to make recommendations to the Minister as to how it can best be settled. When he receives the final report of the Commission, he will furnish a copy to each of the persons affected, and he may make the report public if he thinks it advisable.

The Minister is empowered to issue any order he considers necessary to carry a recommendation of the Commission into effect and such orders are final and binding on the parties. The Act provides penalties for any person or organization convicted of refusing or neglecting to do anything required by the Act.

The Act provides for recovery of loss of wages suffered by a person who has been discriminated against. When an employer has been convicted of discrimination—that is, when he has discharged an employee contrary to the Act, or has transferred him or laid him off—the court may order the employer to pay the employee compensation for his loss of wages up to the time of the employer's conviction. The court is also empowered to order the reinstatement of the employee in the position he would have held if the act of discrimination had not taken place.

Persons who lay complaints under the Act are protected against retaliatory action. The Act states that no employer or trade union shall discharge or expel any person, or discriminate against him in any way, because he has made a complaint under the Act. There is a similar protection for persons who give evidence or assist in any way in the initiation or prosecution of a complaint.

Before the Act came into force, it was believed that in industry within federal jurisdiction there was a large number of application for employment forms in use which contained questions contrary to the provisions of the Act. It was realized that the existence of these application forms would constitute a major source of complaints. An examination was made by Department of Labour officials of application forms in use in federal jurisdiction and a memorandum was prepared for the guidance of employers, advising them of questions in application forms that would likely be considered discriminatory. The memorandum was forwarded to all employers in the federal field and the Department was most encouraged by the fact that a large number of employers expressed appreciation of the memorandum

and stated that they had amended their application forms accordingly. It was obvious from their reaction that at least one problem of discrimination in employment had been lessened.

The Department of Labour decided as a matter of policy from the very beginning of the Act that its conciliation and enforcement provisions must be supplemented by a program of educational publicity. It was felt that such a program would have a beneficial effect on the attitudes of mind that give rise to acts of discrimination, and that education would also tend to reduce the number of complaints and the problem of enforcement.

In the first year of the operation of the Act the Department sponsored a series of radio talks by prominent Canadians on the subject of discrimination (L.G., Sept. 1954, p. 1265; Oct. 1954, p. 1427; March 1955, p. 285). The response to these broadcasts, which were carried over 107 radio stations, was so favourable that the talks were published in pamphlet form and were later published together in a booklet entitled *Do unto Others...*; about 30,000 of the individual talks and booklets have been distributed.

In the first year of the Act the Department also printed a pamphlet entitled *No Discrimination in Employment*, the purpose of which was to explain the main provisions of the Act. Again in the first year of the Act, the Department printed posters that explained briefly the purposes of the Act. These posters were given wide distribution.

The Department has also had a policy of broadcasting radio plays on the subject of anti-discrimination in employment. Several of these radio plays have been broadcast every year and the Department will continue to present each year at least two radio plays of this nature. The Department also sponsored a series of radio talks by prominent Canadians representative of Government, church, employers, trade unions, and other groups interested in human rights. These talks are to be published shortly in booklet form. Tape recordings of all the radio plays are available on loan as well as the scripts of the plays.

Each year the Department has placed advertisements outlining the provisions of the Act in 63 foreign language newspapers as well as in several trade union journals. The Department has also published a pamphlet entitled *Legislation for Fair Employment Practices in Action*, which presented summaries of five sample cases processed under the Act. (These summaries are reprinted in the boxes on these pages.)

## Case No. 2

This case history involved a person born in Denmark but living in Canada. He had had nine years' experience in his trade in Denmark and had served five years' apprenticeship in Canada. He applied to his trade union for a union card as a qualified mechanic. Although the local union had been instructed by the national officers of the union, because of representations made to them by the complainant, to issue the complainant a union card or to show valid reason for not doing so, no action was taken by the local. The person aggrieved submitted an official complaint to the Department that he had been discriminated against because of his national origin.

The complaint was processed by correspondence, and the national union officials, when they were notified of the complaint by the Department, immediately commenced a thorough investigation. The officials of the local union took the position that there was a question of the validity of the complainant's apprenticeship papers and also a question of his seniority. The accusation of discrimination was denied.

In this particular case, discrimination was not proved, although there was an indication that because the complainant was a new Canadian, a permanent union card was denied him. Proved or not proved, the result was that the complainant was issued a union card and became a full member of the union concerned.

About 30, 000 of these pamphlets in English and French have been distributed and there is still a constant demand for them.

Another pamphlet entitled *Job Justice in Canada* concerns itself mainly with companies' personnel programs from the point of view of equal job opportunity regardless of race, religion, colour or national origin. The text of this pamphlet is reprinted on page 1226 of this issue.

The Department has purchased several prints of a film entitled "Commencement" which was produced for the President's Committee on Government Contracts in the United States. The Department also sponsors a film produced by the National Film Board entitled "Going to a Fire". This latter film concerns itself with racial tension in a farming community in Western Canada. A film entitled "High Wall," which is the story of the harmful effects of

### Case No. 3

This case started when a woman filed a complaint under the Act. She claimed that she had applied for employment in a certain company and that she was discriminated against because of her race.

The case was settled satisfactorily when the company agreed to issue instructions to its personnel stating that no discrimination would be allowed against its present employees on the grounds of race, religion, colour or national origin. The company also agreed to advertise job vacancies in newspapers published in Canada in the language of the country of origin of the complainant. The complainant indicated she was no longer interested in taking a position with the company.

This was considered to be a most satisfactory settlement because the company concerned, which is an important one, has made a radical change in its personnel policy as a result.

racial and religious prejudices, is also being sponsored. From time to time the Department advertises in newspapers and journals the availability of these films. The Department at the present time is studying scripts of a film which it hopes to produce in conjunction with the National Film Board and which will concern itself with discrimination in employment in Canada.

The Minister of Labour has on two occasions concened meetings of persons interested in fair employment practices legislation who are representative of employers, churches, trade unions, and voluntary agencies in the anti-discrimination field. As a result of these meetings a permanent consultative committee is being established.

Formal complaints under the Act since it went into effect in 1953 have been relatively few. The majority of the complaints allege discrimination in employment because of colour; there were several complaints alleging discrimination because of race or national origin and several complaints alleging that there were discriminatory questions in applications for employment forms. To date 29 formal complaints have been made under the Act; all have been settled except one still being investigated. All of the settlements were made at the conciliation stage and there has been no necessity to establish a special Commission. Although the number of cases has not been large, the long-term effects of some of them

are quite significant. In some areas, where discrimination in employment had given rise to difficult problems, precedents have been established and new employment patterns have been started. There are still difficult areas but in most of them important advances have been made to combat discrimination.

There are two other federal anti-discrimination measures. One of these, a provision in the Unemployment Insurance Act, provides that it is the duty of the Unemployment Insurance Commission to ensure that there is no discrimination by the National Employment Service in referring workers to jobs. The prohibition of discrimination by Unemployment Insurance Commission officers in the referral of workers to employment has always been a matter of instruction to local officers and this policy was given statutory authority under Section 22 (2) (b) of the Unemployment Insurance Act.

The other measure is an Order in Council which requires that a provision be inserted in all federal government construction and supplies contracts, prohibiting discrimination in employment by the contractor.

The passing of legislation by the federal Government and several of the provincial Governments has strengthened the Commission's efforts to combat discrimination. Local National Employment Service officers are required to draw to the attention of the employer any condition or specification in application for employment forms that appear discriminatory. Placement officers may not take any action on the order or application form until the specification in

### Case No. 4

The complaint which started this case was made by a man who claimed that the company had refused to hire him as a cook because of his race. The complainant also stated that the application form which was being used by the company contained a question on nationality which was contrary to the provisions of the Canada Fair Employment Practices Act. After the Department of Labour had investigated the case the company agreed to employ the complainant in another position and said that they would employ him as a cook if he still wanted that job during the next season. The complainant consented to a settlement of the case on this basis.

question has been removed or until a decision concerning it has been given by competent authorities. In the case of employment covered by provincial legislation, cases requiring decision are submitted to the proper provincial authority. Cases subject to federal legislation are submitted to the federal Department of Labour. Where employment is not covered by any existing legislation, decision is given by the head office of the Unemployment Insurance Commission.

In the last two years, three complaints were investigated and in no cases were Commission officers found to be at fault. This is particularly significant inasmuch as the Commission offices made almost three million referrals to employment in this period.

The Staff Training Division of the Unemployment Insurance Commission has a training program in the anti-discrimination field. The training program, which is applicable to all National Employment Service officers and staff, includes a study of the discrimination clause in the Unemployment Insurance Act and a study of the UIC manual. Part of the program includes a study of limitations and specifications in employment application forms and what constitutes a *bona fide* occupational qualification. The program also includes a study of Order in Council P.C. 4138, which prohibits discrimination in the hiring and employment of labour for Government contracts. The Canada Fair Employment Practices Act is also studied and is discussed paragraph by paragraph on a question and answer basis. A study of provincial legislation concerning discrimination, as it applies to a particular region, is part of the program. The federal Department of Labour's Memorandum for the Guidance of Employers on the status of certain employment inquiries under the Canada Fair Employment Practices Act is a subject of study by the officers and staff of the National Employment Service and there are also round-table discussions concerning anti-discrimination in general.

In the City of Montreal there is established machinery for the National Employment Service officers to meet with employers and trade union groups, when, among other things, the question of discrimination is discussed.

## Case No. 5

This case began when a Negro, already employed by his company, claimed that he was denied a promotion to a higher position because of his colour. The Department of Labour investigated and the case was settled when the company agreed in writing that the complainant would receive the next promotion to the same class of position as the one involved in the original complaint. Later on, the complainant was promoted, thus becoming the first Negro to be employed by the company in that position. The settlement of this case was considered a most important one because it is believed to have broken down an employment barrier about which the Negroes of Canada were much concerned.

Since the inception of the Canada Fair Employment Practices Act and other federal anti-discrimination legislation, the Minister of Labour has been given every co-operation by the various employers, trade union and voluntary agencies interested in the prohibition of discrimination.

In the last ten years, six provinces, Ontario, Manitoba, Saskatchewan, British Columbia, Nova Scotia and New Brunswick) have enacted laws outlawing discrimination in employment. Two provinces (Ontario and Saskatchewan) have laws outlawing discrimination in public accommodation and two provinces (Ontario and Manitoba) have laws making restrictive real estate covenants illegal.

The question of methods to combat anti-discrimination in employment has also been dealt with at the international level and Canada has played a very significant role in the development of an international Convention and Recommendation on the subject. (The text of the ILO Convention concerning discrimination in respect of employment and occupation may be found at page 874 of the August *Labour Gazette* and the text of the Recommendation at page 876.) The Convention is confined to basic principles which command a wide measure of public support and legal sanction. The Recommendation suggests methods of translating and implementing these basic principles into public policy.

## Job Justice in Canada

(Text of a Department of Labour folder for distribution to Management)

Some business organizations have an employment policy that is formulated only along very general lines by top management and which does not deal specifically with the subject of discrimination in employment. A failure to include a clear-cut and positive statement and direction on the subject of discrimination in employment on account of creed, colour, race or national origin may have unfortunate and unforeseen consequences.

It may result in a mistaken or lukewarm application of the principle of non-discrimination into the hiring practices of the company by those responsible for the application of the policy.

It leaves the way open for any personnel supervisor who may have prejudices in this field of discrimination to translate his prejudices either consciously or otherwise into his interpretation and application of company policy. In these circumstances, the higher company officers may be unaware that their employment policy, as applied, discriminates against Canadians and persons born outside of Canada because of their creed, colour, race or national origin. Some personnel supervisors, if prejudiced themselves, translate their prejudices into company policy, and believe that because the statement of employment policy does not cover discrimination, they have a free hand.

Whether employment policy deals with fair employment or not makes no difference to the person on the receiving end of discrimination—he is denied employment. He, and others of his race, creed or colour, soon learn that so far as they are concerned the employment door is closed. Discrimination brings moral and economic loss, not only to them but to the employers refusing them employment.

Apart from a consideration of moral principles, a fair employment policy is also good business all round. The best man for the job means better service or more production and their resulting benefits. Employment of a person in a minority group very frequently means income where it is most needed and will be most used—meaning more sales. It should not be forgotten also that persons of all races, creeds and colours are consumers of the services and products of industry and will be inclined to buy where fair employment practices prevail.

Management should have a positive employment policy against employment discrimination, one that provides that merit should be the governing principle in employee selection. Such a policy to be successful must be initiated and supported by top management.

Now, the establishment of a policy in positive terms stating that merit will be the governing factor, regardless of race, religion, colour or national origin, has caused some employers to worry over the reaction which might be expected from employees, from trade unions, from customers, and from the public generally. These fears are usually unfounded. Customers appreciate good service no matter what the source, trade unions have been

leaders in the movement towards equality of opportunity in employment, and employees rarely refuse to work with members of minority groups. As a matter of fact, one of the strongest arguments for the merit policy in employment is that it establishes management as fair-minded in the eyes of the employees. It serves as a guarantee that promotions and other benefits will flow from merit alone.

Any public reaction against the employment of persons belonging to minority groups need not be feared when it is realized that the noisy and bigoted are themselves in the vast minority—nearly everyone wants to be fair. Certainly, no employer, trade union official or community leader should hesitate in choosing between trying to please a bigoted minority or a fair-minded majority of Canadians. Employers who have converted to fair employment testify that the policy does work to advantage. Where the employment door has opened, it has stayed open to the benefit of all concerned.

The federal Government and several of the provinces have legislation governing fair employment practices. The Canada Fair Employment Practices Act, which is the federal Act, applies to employers in works or undertakings under Federal jurisdiction and to trade unions representing persons employed in those undertakings.

The Act has been in effect since 1953 and prohibits discrimination in employment based on race, colour, religion or national origin.

The following questions may help to assess your employment policy. To the extent that the answers are "No", the employment policy is in need of review.

- |                                                                                                                                                            | Yes   | No    |

## Equal Pay Legislation in Canada

Equal pay laws are of comparatively recent date in Canada, as in other countries. Their existence, however, is a significant indication that the economic as well as the political rights of women are being accepted by society. At present slightly more than 67 per cent of the women in the Canadian labour force are covered by equal pay laws.

In the early days of the century, woman's struggle for her identity as an individual was concentrated on obtaining political rights equal to those of men. The right to vote and the right to hold public office—these were the objectives of the women's movements and organizations, and the fight to achieve these goals left few persons unmoved.

The Universal Declaration of Human Rights, proclaimed in December 1948 goes further and recognizes the economic and social, as well as the political, rights of all

"persons". "Everyone has the right," it affirms in Article 6, "to recognition everywhere as a person before the law". In Canada, the recognition of women as "persons" was first made explicit in 1929 when, during a controversy regarding the appointment of women to the Senate, the Privy Council ruled that under the British North America Act, women have the status of "persons" and are therefore eligible to sit in the Senate.

The value of women's contribution to the labour force was recognized more slowly, to a large extent because women's work outside the home has traditionally been considered of less worth than men's. At the beginning of the Industrial Revolution women were drawn into the labour force in large numbers because of economic necessity and their work was largely unskilled. Not only the employers but the women

themselves took it for granted that they were worth less than men, and accepted without serious complaint lower wages than those paid to men doing the same work. A few sporadic attempts to rectify this injustice were made from time to time but no serious thought was given to the matter until almost the middle of this century.

### Change after Second World War

The fundamental change in attitude came during the Second World War. As manpower shortages became acute women began to replace men in jobs that had been considered exclusively men's. In performing these jobs, women proved that they could work as competently and conscientiously as men and it soon became evident that in most jobs, the sex of the worker did not affect the performance of the work. Nevertheless, in most instances, women continued to be paid lower wages than men doing the same jobs. This practice, quite apart from the moral and social injustice it entailed, was soon acknowledged as a threat to the economic status of men. For as long as women could be hired at lower rates than men for the same work, the tendency would be for the whole wage structure to be depressed, and for employers to replace men by women.

After the war, pressure for the adoption of equal pay legislation began to gather strength. Women's organizations and organized labour drew public attention to the economic as well as the moral injustice of current practice. A number of women's organizations, notably the National Council of Women and the Federation of Business and Professional Women's Clubs, pressed for the enactment of equal pay legislation.

In 1950 campaigns for equal pay gained renewed impetus with the adoption by the International Labour Organization of a Convention on Equal Remuneration for Work of Equal Value (No. 100). International recognition of the principle had also been proclaimed with the adoption of the Universal Declaration of Human Rights, which included among economic rights, "the right of everyone without any discrimination to equal pay for equal work" (Art. 23).

### Equal Pay Laws in Canada

Ontario was the first province to enact equal pay legislation when it passed the Female Employees Fair Remuneration Act in 1951 (effective January 1, 1952). Saskatchewan and British Columbia followed with the enactment of equal pay acts effective January 1, 1953 and December 31, 1953 respectively. In 1956, the federal government passed the Female Employees Equal

Pay Act, effective October 1 of that year, and Manitoba also enacted an equal pay act, effective July 1, 1956. Equal pay acts were adopted by Nova Scotia, effective January 1, 1957 and by Alberta, effective July 1, 1957.

Although there is some variation in the seven acts now in force, the purpose of the legislation is the same—to ensure that a woman who is doing the same job as a man is paid at the same wage rate.

Coverage is very wide. Except in Alberta, where employers of domestic servants and of farm labourers are excluded, the provincial acts cover all employers. In Manitoba and Saskatchewan the provincial governments are also considered as employers under the acts. The federal Act covers only workers in the employ of the federal Government and those who work in a number of specific industries and enterprises whose activities are for the most part interprovincial or nation-wide in scope. The women affected are largely in banks, telephone operations, telegraphy, broadcasting, air and water transport, the railroads or in federal Crown Companies. Classified civil servants are excluded, since they already fall under the jurisdiction of the Civil Service Commission, which sets rates of pay according to classifications based on job content, irrespective of whether the work is to be done by men or by women.

Both the federal Act and the Alberta Act prohibit an employer from paying a female employee at a rate of pay less than the rate paid to the male employee "for identical or substantially identical work". The Ontario, British Columbia and Nova Scotia Acts contain a similar prohibition but refer to "the same work done in the same establishment"; the Saskatchewan Act refers to "work of comparable character done in the same establishment". The Manitoba Act differs from the others in that it forbids discrimination against either sex in the payment of wage rates. Under that Act, an employer is forbidden to pay to the employees of one sex wages on a scale different from that on which wages are paid to employees of the other sex in the same establishment, "if the work required of, and done by, employees of each sex is identical or substantially identical".

Under all the Acts, the woman discriminated against must herself register a complaint in writing with the Minister of Labour or an official designated to receive complaints. The method of securing compliance is also similar in all the legislation and involves investigation and conciliation procedures. Upon receipt of a complaint, an officer (conciliation officer, fair wages officer

or inspector) is appointed to investigate the complaint and to try to effect a settlement. If this is unsuccessful, the matter is referred to a referee (federal Act, Manitoba), a Board (Saskatchewan, Alberta, British Columbia) or a Commission (Ontario, Nova Scotia). These persons or bodies have full powers to make an enquiry, including the holding of hearings, examination of witnesses, etc., and to recommend to the Minister of Labour the course that ought to be taken. The recommendations of the Board, Commission or referee, as the case may be, may be put into effect by an order of the Minister of Labour, except under the federal Act and the Alberta Act, where the referee or investigating board may take action directly. Non-compliance with the orders is considered a contravention of the legislation.

Penalties for non-compliance are in the form of fines, which vary slightly from one province to another. The maximum fine for an individual is \$100 and for a corporation \$500. Under the federal, Manitoba and Alberta Acts, the employer may also be required to make up back pay.

Under the federal, Nova Scotia, Manitoba and Alberta Acts, employers are prohibited from dismissing, or otherwise discriminating against, employees registering a complaint or giving evidence.

Court action may be brought against an employer under the federal Act and in Nova Scotia, Manitoba and Alberta, but he may not be penalized twice for the same offence.

## Implementation

Complete implementation of the equal pay principle cannot, of course, depend solely on the enactment of laws. The interpretation of the laws is also of great importance and here many factors enter the picture. The traditional attitudes towards women's work are slow in changing and the close interdependence between women's social, political and economic roles is just beginning to be appreciated.

Nevertheless, the enactment of equal pay legislation in Canada has served a number of useful purposes. It has publicly condemned the practice of paying a woman a smaller wage than a man doing the same work and set a standard that employers are required to meet. What is perhaps even more important, it has acknowledged women's contribution to the economic life of the country. In practical terms it has brought about equitable adjustment of women's wages and salaries in a number of situations. Moreover, in the long run it may be anticipated that such laws wisely administered will make a substantial contribution to the raising of women's wages in general.

# Freedom of Association and Right to Organize in Canada\*

*In accordance with the constitution of the International Labour Organization, the Government of Canada submits to the ILO periodic reports on the position of national law and practice in regard to matters dealt with in certain ILO Conventions.*

*Convention No. 87, adopted by the 31st session of the International Labour Conference in 1948, is titled, Freedom of Association and Protection of the Right to Organize Convention, 1948. The following are extracts from the most recent report on this Convention, which was prepared by the Department of Labour.*

With regard to the federal field of jurisdiction, the Government of Canada states that the provisions of the Articles of Part I and Part II of the Convention, with the

exception of Article 1 which relates to ratification, are implemented by common law and by legislation. At common law there is no legal restriction on the individual's right to associate with others for any lawful object.

Workers and employers in Canada, without distinction whatsoever, are entitled, in so far as federal legislation and practice are concerned, to establish and, subject only to the rules of the organization concerned, to join organizations of their own choosing without previous authorization.

The Industrial Relations and Disputes Investigation Act provides in Section 3: (1) that every employee has the right to be a member of a trade union and to participate in the activities thereof, and (2) every employer has the right to be a member of an employers' organization and to participate in the activities thereof.

\* Article 23 (4) of the Universal Declaration of Human Rights states: "Everyone has the right to form and to join trade unions for the protection of his interests."

Persons who do not come within the scope of the definition of an employee in the Industrial Relations and Disputes Investigation Act (i.e., managers, superintendents or any other person who in the opinion of the Canada Labour Relations Board exercises management functions or is employed in a confidential capacity in matters relating to labour relations; and members of the medical, dental, architectural, engineering or legal professions who are qualified to practice under the laws of a province and are employed in that capacity) are not restricted in their freedom to establish and to join organizations of their own choosing, and, in fact, do exercise that freedom.

There are no substantive or formal conditions that must be fulfilled by workers' and employers' organizations when they are being established. The federal Trade Unions Act, which makes provision for the *voluntary* registration of trade unions, sets out that certain matters must be covered in the rules of trade unions registered under the Act. These matters include provisions relating to the investment funds; an annual or periodic audit of accounts, the appointment and removal of a general committee of management, and of a trustee or trustees, and a treasurer; and other provisions for the protection of union members from the misuse of funds or other harm. As indicated above, registration under this Act is permissive, and its provisions do not infringe upon those of the Convention.

Workers' and employers' organizations are entitled to draw up their constitutions and rules, to elect their representatives in full freedom, to organize their administration and activities, and to formulate their programs free from any restrictions. The public authorities do not interfere with this right or impede the lawful exercise thereof.

Employers' and workers' organizations are not liable to dissolution or suspension by administrative authority in so far as legislation and practice are concerned in the federal field of jurisdiction.

Workers' and employers' organizations have the right to establish federations and confederations and to join international workers' and employers' organizations. With regard to workers' organizations, this right is generally enjoyed by virtue of the existing system of international trade unions which are a feature of industrial organization in Canada. There are also numerous instances of Canadian workers' and employers' organizations' belonging to international federations and confederations.

With such practical effect being given by the organizations themselves to the provisions of the Convention (in this regard), no special legislative measures are considered necessary.

Federations and confederations of workers' and employers' organizations are entitled, in so far as federal law and practice are concerned, to the same rights as the trade unions and employers' associations of which they are composed with regard to their establishment, their operations and their dissolution. The provisions of (the Convention) in regard thereto are complied with fully.

The acquisition of legal personality is wholly optional for workers' and employers' organizations, and such acquisition, where sought, is not made subject to conditions that restrict the rights described in..... the Convention.

There are statutory provisions to ensure public order and safety but these do not impair the guarantees provided for in the Convention. In the Criminal Code an unlawful assembly is defined as an assembly of three or more persons who, with intent to carry out any common purpose, assemble in such a manner or so conduct themselves when they are assembled as to cause persons in the neighbourhood of the assembly to fear, on reasonable grounds, that they (a) will disturb the peace tumultuously, or (b) will by that assembly needlessly and without reasonable cause provoke other persons to disturb the peace tumultuously. The said Code also defines a riot as an unlawful assembly that has begun to disturb the peace tumultuously. Being a member of an unlawful assembly and taking part in a riot are punishable offences.....

Federal civil servants have freedom to organize, but do not have compulsory collective bargaining rights as provided by the Industrial Relations and Disputes Investigation Act.

All necessary and appropriate measures are considered to have been taken to ensure that workers and employers may freely exercise the right to organize. Employers are prohibited from interfering or participating in the formation or administration of trade unions, from contributing to their support, and from discrimination in regard to employment against any person on account of union membership and activities. Employers and all other persons are prohibited from using coercion or intimidation to compel any person to become or refrain from becoming or to cause to be a member of a trade union (although collective agreements providing for the closed or union

shop or preferential hiring are valid). Protective provisions have been inserted in the Criminal Code to ensure that trade unions are not conspiracies in restraint of trade, and that no person shall be convicted of the offence of conspiracy by reason only that he refuses to work with a workman or for an employer, or does any act for the purpose of a trade combination unless such act is an offence expressly punishable by law. In the latter connection, a trade combination is defined as any combination between masters or workmen or other persons for the purpose of regulating or altering the relations between masters and workmen, or the conduct of a master or workman in or in respect of his business, employment or contract of employment or service.

There is also a "saving clause" in the Criminal Code protecting "combinations of workmen or employees" acting for their own reasonable protection as workmen or employees from being charged with conspiracy to limit commercial facilities, to restrain commerce, to lessen production and to prevent or lessen competition.

Similar "saving clauses" have been inserted in the Criminal Code to protect trade unions in respect of criminal breach of contract (such as preventing the running of trains and depriving cities of light, power, gas or water), and committing mischief (such as obstruction or interference with the lawful use and operation of property).

It is lawful in all the provinces of Canada for workers and employers to establish and to join organizations of their own choosing without previous authorization.

In four of the ten provinces, namely, Manitoba, New Brunswick, Newfoundland and Nova Scotia, the labour relations legislation contains a clause identical with the one in the federal statute which states that every employee has the right to be a member of a trade union and to participate in the activities thereof. Three other provinces, British Columbia, Ontario and Quebec, have similar clauses, differing only in that they refer to participation in the lawful activities of trade unions. The Alberta statute states that it shall be lawful for employees to bargain collectively and to conduct such bargaining through a bargaining agent; elsewhere in the Alberta statute bargaining agent is defined as meaning a trade union. In Saskatchewan, The Trade Union Act states that employees shall have the right to organize in and to form, join or assist trade unions and to bargain collectively through representatives of their own choosing. The Trade Union Act of Prince Edward Island states that it shall be lawful for employees to form themselves into a

trade union, and to join the same when formed, a trade union being defined as "any lawful association, union or organization of employees ..... which is formed for the purpose of advancing in a lawful manner the interest of such employees in respect of their employment".

All the provinces except Alberta, Prince Edward Island and Saskatchewan provide in their legislation that every employer has the right to be a member of an employers' organization and to participate in the activities thereof. The Trade Union Act of Prince Edward Island does not mention employers' organizations. The Alberta Act defines an employers' organization as meaning an organization of employers formed for the purpose of regulating relations between employers and employees, but does not refer specifically to employers' freedom of association. The Trade Union Act of Saskatchewan presupposes the existence of employers' organizations by defining an employer's agent as including any person or association acting on behalf of an employer.

The coverage of the various provincial labour relations laws does not include managerial personnel or persons employed in a confidential capacity in matters relating to labour relations (the wording varies in certain provincial statutes; for example, the Saskatchewan Act excludes persons "regularly acting on behalf of management in a confidential capacity"). Such exclusion does not restrict the freedom of the persons involved to join organizations of their own choosing.

Professional persons are also excluded from the coverage of the labour relations laws of the various provinces except in Saskatchewan and Prince Edward Island. The laws of seven provinces make the same exclusions as the federal statute, namely, members of the medical, dental, architectural, engineering or legal professions qualified to practice under the laws of a province and employed in that capacity. In Quebec, the Labour Relations Act excludes any person covered by the Bar Act, Notarial Code, Medical Act, Study of Anatomy Act, Homeopaths' Act, Pharmacy Act, Dental Act, Veterinary Surgeons' Act, Civil Engineers' Act, Land Surveyors' Act, Architects' Act, Forest Engineers' Act, Optometrists' and Opticians' Act, and Dispensing Opticians' Act. In addition five provinces exclude domestic servants and farm labourers, and three provinces also exclude persons engaged in horticulture, hunting or trapping. With regard to all such excluded persons, the denial of the privilege of compulsory collective bargaining and the other rights established by the provincial labour relations acts

does not carry with it a denial of the right to join organizations of their own choosing. An example of this is that not a few persons of high managerial capacity retain union cards and maintain themselves nominally in good standing with trade unions long after they have attained a status that excludes them from the coverage of the labour relations legislation.

Association on the part of the classes of persons excluded from the various labour relations statutes is not infrequent in groups such as personnel managers' organizations, but is rather rare in the ordinary trade or industrial sense. However it might be noted, to cite one example, that organizations of professional engineers have been formed in Canada for the purpose of collective bargaining. Public service employees, while not denied freedom of association, are not covered by the provisions of the labour relations legislation of any of the provinces except Quebec and Saskatchewan.\* Civil servants and municipal employees, with certain exceptions such as police, do generally enjoy the right to establish and to join organizations of their own choosing without previous authorization, except in the province of Quebec. In practice, employees of provincial governments and of boards, commissions and crown agencies do exercise the right to establish and to join organizations of their own choosing. Although such organizations are not, except in Saskatchewan, recognized formally by the signing of collective agreements, the organizations do further and defend the interests of the workers. Moreover, a considerable number of such workers belong to craft unions with national or international affiliations.

In the province of Quebec, employees of "public services" are expressly stated to come within the application of the Labour Relations Act, subject to certain modifications. Public services are defined as "municipal and school corporations; public charitable institutions within the meaning of the Quebec Public Charities Act (Chap. 187); insane asylums; the following businesses: the transmission of messages by telephone or telegraph, transportation, railways, tramways or navigation, the production, transmission, distribution or sale of gas, water or electricity—excepting railways under the jurisdiction of the Parliament of Canada; and the services of the Government of the province, but only as regards the functionaries and workmen contemplated by the

Civil Service Act (Chap. 11) and subject to the provisions of the said Act." The modification of the Labour Relations Act having relevance to the provisions of Convention No. 87, as affecting public service employees, is that no person who is a constable employed by a municipal corporation of the province, or a member of the Quebec Provincial Police Force or of the Quebec Liquor Police, or other functionaries within the meaning of the Civil Service Act (Chap. 11), shall remain or become a member of an association which does not consist solely of persons in the same category or which is affiliated with another association or organization. This curtailment of the right of workers to join organizations of their own choosing is reinforced and supplemented in an "Act respecting Public Order", 1950, c. 37, which states in Section 2:

An association which admits to its ranks members of a municipal police force, or persons who are at the same time members of such police force and of a municipal department of firemen and which is not exclusively composed of employees of the same category and in the service of the same municipal corporation, or which is affiliated with another association, shall not be qualified to negotiate a collective agreement, nor to be a party thereto, nor to be recognized by the Labour Relations Board of the Province of Quebec as representing a group of employees.

A fairly consistent pattern seems to be in process of developing in Canada in relation to municipal employees and, in particular, police and firemen; but at the moment, there is a lack of uniformity in the application of the labour relations legislation of the various provinces to such employees and to school teachers. There is, of course, no problem concerning police in connection with Convention No. 87, in view of the provisions in Article 9 that the extent to which the guarantees of the Convention are applied to the armed forces and police shall be determined by national laws or regulations. However, the law and practice respecting police are summarized here as a matter of information, along with the law and practice respecting other municipal employees.

As indicated above, in the province of Quebec, municipal employees generally, including policemen, firemen and school teachers, come under the Labour Relations Act as modified by the Public Services Employees Disputes Act, R.S.Q. 1941, c. 169.

In Ontario, the Labour Relations Act specifically excludes from its application members of police forces, full-time fire-fighters, and teachers as defined in the Teaching Profession Act, R.S.O., 1950, c. 194. Any Ontario municipality may declare

\* The Interpretation Acts of Ontario, Prince Edward Island, Alberta and British Columbia contain provisions which have the effect of excluding public service employees from the application of labour relations legislation.

that the Labour Relations Act shall not apply to it in its relations with its employees or any of them. The Police Act of Ontario states that a member of a police force shall not remain or become a member of any trade union or of any organization that is affiliated directly or indirectly with a trade union (R.S.O., 1950, c. 279, s. 526). The same Act provides for collective bargaining and compulsory arbitration between police associations and the boards or councils of municipalities. The Fire Departments Act of Ontario also contains a procedure for collective bargaining and for final and binding arbitration, but does not prohibit membership in trade unions. It provides that where not less than 50 per cent of the full-time fire fighters belong to a trade union, any request for bargaining concerning remuneration, pensions or working conditions shall be made by the union (and otherwise, by a bargaining committee of employees upon the written request of a majority).

The Teaching Profession Act, 1944 of the province of Ontario applies to persons who are legally qualified to teach in certain schools and are under contract to teach in such schools. The Act declares that every teacher shall belong to the Ontario Teachers' Federation, among the objects of which is to promote and advance the interests of teachers and to secure conditions which will make possible the best professional service. Conceivably a teacher of, say, manual training might be a member of a carpenters' union by his own choice, but for purposes of representation in respect of his professional employment, he could be represented only by the Ontario Teachers' Federation.

In Alberta municipal employees come within the scope of the labour relations legislation, and the same situation exists as in Ontario with regard to the exclusion of police and full-time fire fighters, who are given the right of collective bargaining and compulsory arbitration by virtue of special Acts. Alberta policemen are forbidden to be members of trade unions, as in Ontario. However, Alberta teachers are covered by the labour relations code.

In New Brunswick the Labour Relations Act provides in Section 1 (4) that the council of any municipality may by resolution declare the municipal corporation or any Board or Commission appointed by the Council to be an employer within the meaning of the Act with respect to any group of its employees designated in the resolution. Pursuant to this clause, the City of Fredericton, N.B., on January 13, 1953, passed a resolution declaring the

municipal corporation to be an employer within the meaning of the Act in respect of one group of its employees, viz., the permanent policemen. Subsequently, the New Brunswick Labour Relations Board certified the Fredericton Policemen's Federal Protective Association, Local 502 (an affiliate of the Trades and Labour Congress of Canada) as bargaining agent for members of the Fredericton police force. On June 23, 1955, the Supreme Court of New Brunswick quashed the order of certification and a further order of the Board requiring the City of Fredericton to bargain with the union. In its judgment the Court held that police officers were public servants charged with the administration of the law, and not employees of those who select them and even pay them (L.G., 1956, p. 86). As a result of this court decision, the New Brunswick Legislature adopted, and Royal Assent was given on March 7, 1956, to an amendment to Section 1 (4) of the Labour Relations Act providing that if the municipal council or Board or Commission is empowered to prescribe conditions of employment for police officers, the police officers will be deemed to be employees within the meaning of the Act. As regards firemen, the New Brunswick Labour Relations Board has held them to be employees within the meaning of the Act. No statutory provision relates expressly to school teachers, and no precedents or practice have developed in regard to them so far as is known. They would be covered if a municipality by resolution declared the school board to be an employer under the Act.

The Nova Scotia Labour Relations Board denied an application for certification made in 1950 by the Canadian Association of Policemen (Dartmouth Branch) for the reason that policemen were not employees within the meaning of the Trade Union Act. The Board's decision was upheld on July 13, 1951, by the Supreme Court of Nova Scotia in a judgment which dismissed an application to have the Court quash the Board's rejection of certification (L.G., 1951, p. 1697). The Nova Scotia Act does not refer specifically to fire fighters but they are deemed to be included along with other municipal employees. The Nova Scotia Teachers' Union Act was amended in 1953 to provide that where a majority of the teachers employed by a school board are members of the Union, i.e., The Nova Scotia Teachers' Union, the Union may negotiate with the school board on behalf of all teachers employed by that board in respect of salaries and conditions of employment.

The labour relations law of Prince Edward Island does not make reference to the inclusion of municipal employees, policemen, fire fighters or teachers. However, the provincial Supreme Court in November 1955 held that the Trade Union Act does not and cannot apply to the electric light and power department employees of the Town of Summerside.

In Newfoundland, municipal employees come within the scope of the Labour Relations Act. Policemen, fire fighters and teachers are not expressly mentioned. They appear to be covered.

In British Columbia, municipal employees, including teachers, come within the scope of the labour relations law. Policemen and fire fighters also come within the scope of the Labour Relations Act (formerly the Industrial Conciliation and Arbitration Act) but its application to them is modified by the following amendment to the Municipal Act (1949, c. 41, s. 528B):

528B. Where a Conciliation Board has been appointed under the Industrial Conciliation and Arbitration Act to deal with a dispute between a municipality or Board of Police Commissioners and the firemen or policemen employed by the municipality or Board of Police Commissioners, a recommendation of the Conciliation Board shall be binding in every respect upon the municipality or Board of Police Commissioners and upon the firemen or policemen employed by the municipality or Board of Police Commissioners.

The applicability of the Industrial Conciliation and Arbitration Act to police and the effect of Section 528B of the Municipal Act of British Columbia were tested in the courts..... The Supreme Court of British Columbia..... upheld the binding effect of Section 528B of the Municipal Act. The Court's view was that the section of the Municipal Act used the word "employed" and, whether or not it was an accurate description of the relationship, it was the intention of the Legislature to deal with the relationship that existed and to employ certain machinery provided by the I.C.A. Act. This decision was appealed to the Court of Appeal of British Columbia and the appeal was dismissed.....

No trade union comprising or representing the members of a municipal police force may be certified by the Manitoba Labour Board if the union is, or is a branch or local of, or is affiliated with, any provincial, national, or international trade union or association of trade unions. Other municipal employees, including fire fighters, come within the scope of the Act without qualification. A 1956 amendment removed school teachers from the coverage of the Labour Relations Act.

Municipal employees come within the scope of the Saskatchewan law concerning labour relations. The City Act (R.S.S. 1953, c. 137), supplements this with the following provisions in Section 51:

For the purposes of every act or regulation concerning wages, hours and conditions of work, trade unions, labour relations or any matters governing employment, and subject to the provisions thereof, every officer, servant and employee of the city, including every member of the police force, shall be deemed to be an employee, and the city and any board, commission and agency appointed by the council or established by or under this Act and responsible for the payment of wages to any officer, servant or employee or to any member of the police force shall be deemed to be an employer.

The City Act provides further that councils may agree to refer any matter governing employment to a board of arbitration whose decision may be final and binding; and disputes affecting policemen and fire fighters must be submitted to binding arbitration by virtue of provisions in the City Act and the Fire Departments Platoon Act. The Saskatchewan Teachers' Salary Negotiation Act provides that a group of teachers shall have the right to organize and to bargain collectively on their own behalf or through a committee selected for the purpose by the majority of the group.

A limitation on the right of workers to join organizations of their own choosing exists in the Ontario Labour Relations Act in a provision stipulating that the Labour Relations Board shall not include in a bargaining unit *with other employees* any person employed as a guard to protect the property of his employer, and no trade union shall be certified as bargaining agent for a bargaining unit of such guards if it admits to membership or is chartered by, or is affiliated, directly or indirectly, with an organization that admits to membership persons other than such guards.

A provision of the Professional Syndicates Act of Quebec (R.S.Q. 1941, c. 162, as amended, s. 4) states that married women may be members of a professional syndicate (i.e., a trade union incorporated under the provisions of the said Act) "except when the husbands object". This limitation does not apply to unions that do not seek incorporation under the Professional Syndicates Act.

At its 1953-54 session the Quebec Legislature amended the section of its Labour Relations Act relating to the filing of petitions for certification by adding the following paragraph:

As from the 3rd of February 1944, on which date the Act to constitute a Labour Relations Board was assented to, an association which tolerates, among its organizers or officers, one

or more persons adhering to a communist party or movement cannot, for the purposes of this Act, be regarded as bona fide association and its recognition, as contemplated by this section, as the representative of a group of employees or of employers, shall be refused or revoked, as the case may be.

Subject to the limitations enumerated above, most of which are of a minor nature, workers and employers in Canada are entitled under provincial law and practice to join organizations of their own choosing.

Generally, workers' and employers' organizations are, insofar as provincial legislation is concerned, entitled to draw up their constitutions and rules, to elect their representatives in full freedom, to organize their administration and activities, and to formulate their programs. However, certain substantive or formal conditions must be fulfilled by workers' organizations in certain provincial jurisdictions.

The Quebec Professional Syndicates Act provides for the incorporation of a trade union provided that 20 persons or more, "Canadian citizens", engaged in the same professions, the same employment or any similar trades, or doing correlated work..... make a petition to the Provincial Secretary and provided that only Canadian citizens may be members of the administrative council of the syndicate (union) or form part of its personnel.....

The Trade Union Act of Prince Edward Island states in Section 27 that the Lieutenant-Governor in Council may make regulations prescribing the manner in which a trade union may be formed; but no such regulations are known to have been made.

The Trade Union Act of the province of Newfoundland prescribes that the rules of every trade union are binding upon its members, and that they shall state or contain certain enumerated types of provisions, such as a provision for the appointment and removal of a treasurer and other officers, and prescribing also that a change of name or amalgamation may be made only in a certain manner.

The Nova Scotia Teachers' Union Act (1951, c. 100) prescribes in precise detail the objects, powers, and other constitutional details of the Teachers' Union, with minor omissions such as the amount of fees payable. As indicated earlier in this report, by an amendment to the Act made in 1953 (c. 97), the said Teachers' Union was endowed with the right to represent teachers for the purpose of collective bargaining where the majority of the teachers employed by a school board are members of the Union.

Teachers are required as a condition of their employment to be members of the appropriate teachers' federation or society by the Teaching Profession Acts (the name varies) of Alberta, Saskatchewan, Manitoba, Ontario, and British Columbia, as well as Nova Scotia. These statutes usually prescribe the framework of a constitution, giving the teachers' associations powers to set up a code of ethics for the profession and to make their own special rules and by-laws.

Employers' and workers' organizations in Canada are not under provincial laws and practice liable to dissolution or suspension by administrative authority, except for two minor legal provisions in the province of Quebec relating to "dominated" organizations which have, in effect, ceased to function or have lost their original character.

Section 50 of the Quebec Labour Relations Act provides that if it be proved to the Labour Relations Board that an association has participated in an offence against Section 20 (which relates to employers or their agents seeking to dominate or hinder the formation or activities of an association of employees, or vice versa) the Board may, without prejudice to any other penalty, decree the dissolution of such an association after giving it an opportunity to be heard and to produce any evidence tending to exculpate it.

The Professional Syndicates Act of the province of Quebec provides that the corporate existence of any syndicate, union, federation or confederation shall terminate whenever the Provincial Secretary so enacts after having ascertained that they have ceased to exercise their corporate powers; or that the number of their members who are Canadian citizens and in good standing is reduced to fewer than 20, in the case of a syndicate, and to fewer than three in the case of a union, federation or confederation; or in the case of a syndicate when more than one third of its members are not Canadian citizens.....

In the limited field of jurisdiction where the Parliament of Canada is the competent authority with regard to the provisions of Convention No. 87, it is considered that adequate effect is given to all the provisions of the Convention. In the field of jurisdiction where the provincial legislatures are the competent authorities, it is considered that there is very substantial compliance with the provisions of the Convention, but that certain guarantees set out in the Convention are subject to limitations which fall short of giving full effect to the said provisions.

# The Evolution and Application in Canada of Rights Relating to Motherhood and Childhood<sup>1</sup>

## I—Entitlement to Special Care and Assistance

Recognition that motherhood and childhood are entitled to special care and assistance is of long standing in Canada. Over the years much legislation<sup>2</sup> has been passed and many programs have been established with the common aim of providing to mothers and children the special protection, care and assistance they require.

At no time in Canadian history have women and children as a whole occupied a seriously disadvantaged position. The Canadian population has been drawn largely from countries in Western Europe which for several generations have led in the improving of social provisions for these two groups. Persons emigrating to Canada have tended, moreover, to create new social patterns suited to the conditions of their adopted country.

The social patterns that emerged during Canada's formative years were strongly influenced by pioneer conditions and by the existence of an expanding frontier. The circumstances of pioneer life tended to promote the raising of large families in which children were regarded as assets. The wife and mother in performing the manifold duties that fell to her in respect to the home, the farm economy and the raising of children achieved a role of great importance that implied an equal or near equal status to that of the husband.

The emphasis on self-reliance and individualism which was also characteristic of the frontier society has continued to be a pervasive influence in Canadian life. While the area of public responsibility and of other kinds of collective endeavour have progressively expanded, providing numerous types of support and assistance to the individual and the family, the concepts of personal and family responsibility are still highly honoured both in precept and practice. Thus the primary responsibility for

providing care and assistance to the Canadian mother and child is to be found centered in the family, which under normal circumstances is regarded as capable of safeguarding and preserving the essential interests of motherhood and childhood.

However, even in the early stages of Canadian development, when the farm family and the close-knit rural community offered a large measure of security to its members, there were many unmet needs, especially among arriving immigrants and the survivors of the periodic epidemics which frequently left widows and orphans without protection or means of support. Where the need in such situations was acute, voluntary organizations were formed and programs of assistance established, usually based on an institution providing shelter and custodial care.

While the nineteenth century's answer to the needs of motherhood and more particularly of children was mainly expressed by the establishment of institutions, the limitations of this approach became recognized and the last quarter of the century saw the beginning of other and ultimately more fruitful solutions. What was begun in the nineteenth century was carried forward at an accelerated pace in the twentieth, when the combined effect of a growing population, especially in the cities, participation in two world wars, and the experience of a prolonged depression served to focus attention upon the needs of mothers and children and to bring into being a broad array of special protective measures and services in the fields of welfare, education, corrections and health.

Although many of the measures that have been of great benefit to mothers and children were specifically aimed at meeting their special needs, others have been of more general application or have combined provisions for mothers and children with provisions for other groups. As Canada extends its social provisions, the emphasis is, in fact, increasingly upon programs of broad coverage. In these, mothers and children benefit in like measure with other components of the total population, though there is differential treatment in some instances where this is feasible and appropriate.

<sup>1</sup> A statement relating to article 25, paragraph 2 of the Universal Declaration of Human Rights: "Motherhood and childhood are entitled to special care and assistance. All children whether born in or out of wedlock shall enjoy the same social protection."

<sup>2</sup> Towards the end of the 1958 Session of Parliament the Prime Minister introduced Bill C-60, entitled *An Act for the Recognition and Protection of Human Rights and Fundamental Freedoms*, legislation which would, of course, affect not only mothers and children but all Canadians.

## Organization of Social Welfare Services

The organization of social welfare services is, by the terms of the British North America Act, and by tradition, largely centered in the provinces. The federal Government, however, administers certain broad social security measures, some independently and others in partnership with the provinces. It also has certain powers in the field of corrections as well as responsibilities for veterans' programs and programs for Indians and Eskimos. Provincial legislation governs welfare services generally within the provinces and includes, among others, public assistance and the complex field of child protection. The provinces have delegated considerable responsibility to local governments, and, in the field of child welfare, to private or quasi-private social agencies.

## Welfare Services for Children

An aspect of changing conditions in Canada that came forcefully to public attention in the 1880's was the increasing numbers of children in the larger centres who were found to be growing up without proper care or supervision. To meet the problem the children's aid society movement came into being, becoming, as it remains today, a major factor in child welfare in Canada. Children's aid societies, which developed first in Ontario and later in most of the other provinces, express the interest of private citizens who form their membership, make up the majority of their boards of directors and contribute financially to their programs. In carrying out provincial legislation under provincial supervision and with financial aid from the municipalities and the provinces, the societies also express public responsibility for child welfare.

By the 1920's the societies moved beyond their initial concern for child protection to the areas of adoption and work with unmarried parents. They thus pioneered in the establishment of the comprehensive child welfare programs which are now in being across Canada. Many such programs continue to be administered by children's aid societies, but wholly public programs predominate in Western Canada, Newfoundland and Prince Edward Island. Quebec has a distinctive pattern in which child welfare agencies and institutions operate largely under religious auspices with substantial financial assistance from the provincial government.

Within programs organized in these various ways service is given to many thousands of children annually. Every effort is made to strengthen the capacity

of the children's own families to give children acceptable care. Where this is not possible and where wardship is transferred either temporarily or permanently by the court from the parents to a child welfare agency, substitute care is provided by the agency. Where the agencies' wardship is temporary the children are normally placed in foster homes where they are supervised by the agency. Institutional placements are also used but the limitations of long-term custodial care for children are generally recognized and the trend away from such placements continues. There is, on the other hand, an increased use of institutions able to provide specialized programs for children presenting problems such as severe emotional disturbances which cannot be successfully dealt with in normal foster homes. Where children are removed permanently from their parents, agencies attempt to find adoption homes where the child will once again have a family of his own and enjoy a measure of security and sense of belonging not normally provided by other forms of substitute care. Where children are born out of wedlock adoption is the normal plan made for them. More than 10,000 adoptions are completed annually in Canada.

Child welfare agencies in Canada, both public and private, though handicapped in varying degrees by the lack of qualified social work staff and by limited financial resources, have developed and are continuing to develop programs which are making a highly important contribution to the provision of the "special care and assistance" to which children are entitled.

## Educational Provisions for Children

The right of children to an education that will fit them for economic, cultural and political participation in contemporary society has long been recognized in Canadian life. The provision of elementary education to the great majority of children was achieved well before Confederation in 1867. In the decades that followed, education became free and compulsory, with the effective enforcement of attendance beginning in the 1890's. By the turn of the century illiteracy had dropped in some provinces to less than 10 per cent of the adult population and progressive reductions of this figure have been characteristic of succeeding decades. Secondary education, which was widely available before the beginning of the century, has also become increasingly accepted as a necessary preparation for modern living. Technical and commercial courses have been added to the original academic sequence required for university

entrance. More than 95 per cent of Canadian children attend primary and secondary schools in which all costs are borne by public funds.

The rapid increase in the number of children of school age in the country in the postwar period has involved heavy requirements for additional teachers, classrooms and other facilities. The strong emphasis placed on education in Canada as an inherent right of the child and as an essential in the national interest, however, has resulted in an encouraging degree of progress in solving the problem of shortages.

The right to higher education of children with the necessary capacity is gaining increasing recognition. A broad program of university expansion is proceeding, which involves extensive public and private financing both for new facilities and for enlarged bursary and scholarship funds. The establishment of the Canada Council, with a program of assistance to both the arts and sciences through grants to individuals and to universities, has been a significant development in the provision of assistance to learning in Canada.

### Protection of Women and Children in Industry

Factory Acts began to appear on the provincial statute books from the 1880's onward. From the beginning they emphasized the protection of women and children through specifying the hours, conditions and types of work that should apply to them. Subsequently there has been progressive improvement in the standards required and in the quality of the inspection by which they have been enforced.

In 1954 the federal Government established a Women's Bureau within the Department of Labour to promote a wider understanding of the role and contribution of women in the labour force and to advance their opportunities in employment.

### Income Protection of Mothers and Children

The realization that the needs of many mothers and children spring from a lack of financial support because of the illness, death or desertion of the husband and father has led to the development in Canada of many income support measures.

At the beginning of the century there was little support for a family that had lost its breadwinner. In provinces which had adopted the English Poor Law the support provided was normally limited to indoor care in public almshouses. In the province of Quebec, institutional care under voluntary auspices was also all that was generally

available. Where, in certain other provinces, assistance was given to families in their own homes it was seldom adequate and was usually temporary.

Of the specialized programs established to remedy the defects in general assistance, workmen's compensation programs were the first to be organized. While they were designed primarily to achieve the objectives of industrial safety and the support and rehabilitation of injured workmen, they also provided pensions for the widow and children of the workman who was killed in an industrial accident.

The precedent set in providing pensions to persons bereaved by industrial accidents and, with the First World War, to those whose husbands and fathers were lost in action, served to strengthen the case for pensions to all mothers who were deprived of the financial means of caring for their children. In 1916 the first provincial mothers' allowances program was established and by 1949 all provinces had programs providing aid to widows with dependent children and to mothers with husbands in mental hospital. In some provinces eligibility is now extended to divorced, separated, deserted and unmarried mothers and to mothers whose husbands are disabled or are in penal institutions. The allowances, which vary from province to province, are payable while the mother is caring for one or more children.

While certain mothers who have been deserted by their husbands may, as noted, receive support under the mothers' allowances programs, other basic measures for their protection are found in legislation designed to enforce their maintenance by legal action against the deserting father. Such legislation exists in the Criminal Code of Canada and in provincial statutes, the latter providing that orders for maintenance may be made against a deserting parent on presentation of evidence of desertion. The desertion legislation also makes possible the enforcement of the court orders of other jurisdictions on a reciprocal basis.

Two federal income security measures of broad coverage, Unemployment Insurance and Family Allowances, were adopted in the 1940's. The former, which offers protection in cases where the breadwinner is unable to find work, provides coverage for the large majority of wage earners, while the latter extends to virtually all families with children.

Family allowances, which are paid in respect to children up to age 16, are designed primarily to lessen the economic handicap of families with children. The allowance,

which is paid to the mother, is \$6.00 a month for children under 10 years of age and \$8.00 a month for children aged 10 to 16. Allowances must be used for the child's maintenance, care, training, education and advancement and the child is required to comply with the school attendance regulations of the province in which he lives. Immigrant families with children and settlers returning to Canada do not qualify for family allowances during the first year but under a family assistance program they can, on application, receive a sum of \$60 annually for each child under the age of 16, on a basis similar to that for family allowances.

Mothers may also benefit, when eligible, from such services as the federal-provincial blindness and disability programs. The federal war veterans' allowances program, which is designed to aid veterans and their families not eligible for veterans' pensions, may apply to both mothers and children.

Programs designed to assist particular categories of persons, such as mothers and children, have achieved a substantial measure of success in reaching their objectives. They have a number of limitations, however, and a trend away from them and towards adequate and flexible general assistance is discernible in a number of provinces. In recent years the federal Government under the unemployment assistance program has made contributions to participating provinces in respect to assistance costs which are, in the main, those involved in the provincial general assistance programs. It appears that the general assistance programs will be broadened and that they will succeed in attaining broader coverage without endangering the interests of groups such as mothers and children whose rights and benefits have been specified in the categorical programs.

### Correctional Programs for Women and Children

Up to the middle of the nineteenth century women and children charged with criminal offences were confined, along with adult male offenders, in the common gaols. The serious social damage resulting from this lack of segregation led to a movement for the establishment of institutions more likely to promote the reformation of the inmate. Accordingly the first juvenile reformatory for boys was established in 1857, the first women's prison in 1878, and the first reformatory for girls in 1880.

An important forward step was taken in 1909 with the passage of the Juvenile Delinquents Act of Canada, which made possible and encouraged the adoption, in

the provinces, of a social approach to juvenile delinquency. The federal legislation sets out a number of acts which when committed by a child constitute an offence known as a delinquency. When a child is adjudged to have committed a delinquency he is dealt with by the court not as an offender "but as one in a condition of delinquency and therefore requiring help and guidance and proper supervision". The judges of the juvenile courts established by the provinces are thus given wide discretionary powers. To assist them in treating the juvenile delinquent the Judge normally has, as an integral part of the court, a probation staff of one or more part-time or full-time officers. Special institutions generally known as "training schools" or "industrial schools" have been established in most provinces to provide correctional care for juveniles for whom probation is considered unsuitable.

### Health Programs for Mothers and Children

The Canadian family has traditionally obtained the major part of its health services on a private basis, but publicly organized programs have played an increasingly important role. Mothers and children benefited with the rest of the population from measures to combat communicable diseases, which were instituted in the 1880's, but infant and maternal death rates remained high and it became increasingly apparent by the early years of this century that special public health measures were required to meet the needs of mothers and children. During the last 50 years and especially since the end of the Second World War great strides have been made in developing pre-natal and post-natal services, providing maternity beds and bassinets, reducing the incidence of childhood diseases and developing programs of treatment and rehabilitation for crippled children.

Progress in providing better health care for mothers and children reflects a recognition by voluntary groups and all levels of government of the importance of meeting the health needs of these groups. At the local level, health departments or health units provide a wide range of direct services in association with hospitals, physicians and voluntary health agencies. All ten provinces have maternal and child health programs within their health departments, six having special divisions under full-time medical direction. The federal Department of National Health and Welfare also has a maternal and child health division offering consultative services. Mothers and children have benefited from the National Health

Grant program, which has assisted in the development and extension of maternal and child services, research and the training of personnel.

Mothers and children have also benefited from the decided trend towards public assumption of hospital and, to a lesser extent, medical costs. Free or assisted maternity services have been established in a number of provinces and one province has selected children under 16 years of age as a group to receive, free of charge, full hospital care including medical and surgical services. In four provinces public prepaid hospital insurance has been in existence since the early postwar years. The federal-provincial program of hospital and diagnostic services now being instituted under the Hospital Insurance and Diagnostic Services Act of 1957 will be functioning in a majority of the provinces by January 1959.

The great majority of Canadian mothers receive pre-natal care from their private physician, though an important role is also played by the Victorian Order of Nurses, a voluntary nursing organization, and by local public health units. The practice of confinement in hospital is well established in Canada, with about 87 per cent of all births occurring in maternity or general hospitals. In the majority of provinces almost 100 per cent of births take place in hospitals and only two provinces have a significant proportion of home confinements. Post-natal care of the mother and early care of the infant is also largely provided by private physicians but an increasingly important part is played by the public health nurse. Nursing visits are made to the home, and well-baby clinics for health supervision of infants and pre-school children are widely available wherever there are organized public health services.

Children also receive health care through school health services which have been established in every province. These services include visual and audiometric testing, general medical examinations and, in some provinces, preventive dental health services. In addition, school health services are concerned with the school environment and involved in the health teaching program.

Major emphasis in the protection of children's health has been placed on immunization programs. A notable example of the successful application of such procedures has been in the anti-poliomyelitis campaign. Through agreements with the federal Government the provincial health departments have made the Salk vaccine available

for free inoculation of children and most provinces also provide care free of charge or at nominal cost to poliomyelitis patients during the acute and post-paralytic stages of the disease. The dramatic reduction in the incidence of this disease constitutes the most recent chapter in the long story of success in attacking the principal diseases of childhood.

There are also special programs for handicapped children. Institutions for the training of blind and deaf children, hospital schools for the mentally deficient, and special classes for hard of hearing and partially sighted children provided by local school boards have been in existence for many years. More recent developments have been classes for orthopedically handicapped and cerebral palsied children as well as classes for mentally retarded children not accepted in the regular schools. Many of these, initiated by parent groups and supported by voluntary means, are increasingly receiving government assistance. Special education programs are found in all the children's hospitals rehabilitation centres, and most tuberculosis sanatoria.

Programs for emotionally disturbed children are also being developed in many parts of the country as child guidance services become available and as specialized institutions are able to obtain the qualified staff required for their successful operation.

Children needing hospital care are normally treated in general hospitals serving all groups but there are also five general hospitals for children, four children's orthopedic hospitals and a number of rehabilitation centres.

Crippled or physically handicapped children have received increased attention in recent years as the concept of what constitutes a handicapped child has been broadened and as increased diagnostic and treatment skills and facilities have become available. Programs combining public and private endeavour are now organized in all provinces. They include case finding, team diagnostic appraisal, treatment and a range of rehabilitation services, including education designed to bring the child to his full potential.

It will be evident that in the field of health, as in welfare, education and corrections, extensive provisions have been made in Canada to provide the special care and assistance to which motherhood and childhood are entitled.

## II—Equal Social Protection of Children Born out of Wedlock

Substantial progress has been made in Canada in establishing the principle that "all children whether born in or out of wedlock shall enjoy the same social protection".

The position of the child born out of wedlock reflects social attitudes towards illegitimacy. Strong moral disapproval continues in respect to extra-marital sexual relations; but the disposition to stigmatize the illegitimate child has been greatly reduced. There is now, in fact, very general recognition of the right of the child born out of wedlock to equal treatment in relation to public measures affecting children.

Most substantial progress to this end has been made since the First World War. Prior to that the very limited rights accorded to the illegitimate child under the English common law had only gradually been enlarged in the provinces in which English civil law had been adopted. In the province of Quebec, a somewhat different situation prevailed; but there too a gradual improvement in the actual condition of children born out of wedlock had occurred. Legislation for the protection of children of unmarried parents, dating mainly from the 1920's, marked a significant forward step. It provided protection of children born out of wedlock both through legal means and through bringing programs designed to assist them and their unmarried mothers within the framework of a comprehensive child welfare program.

A major aim of the legislation for children of unmarried parents is to help such children through assisting the unmarried mother. This takes the form not only of creating more effective means than were previously available for the unmarried mother to obtain financial support from the putative father but it also makes available casework services designed to assist her with a wide range of problems in respect to plans for her confinement, relations with her family and the putative father and her rehabilitation in the community following the birth of the child. Assistance is also provided to the unmarried mother in reaching a mature decision about the future of her child.

Where the unmarried mother decides to retain and raise her child, the child welfare agency may assist her in this plan, perhaps through providing a temporary placement of her child. Public financial assistance is available to her in some provinces and in four provinces she is eligible for mothers' allowances. She will also receive federal family allowances, which are paid without respect to birth status to the mother as long

as she is supporting the child. These forms of assistance notwithstanding, the unmarried mother finds that there are formidable problems in bringing up a child out of wedlock in most Canadian communities. Frequently the unmarried mother asks the assistance of a child welfare agency in placing her child or finds some private means to this end.

For many years a large proportion of children born out of wedlock were raised in foster homes or institutions. Adoption, however, is now regarded as the plan which should be considered for virtually all children born out of wedlock who are made available for adoption by the decision of the unmarried parent to surrender her guardianship of the child. The goal of adoption placement is increasingly being realized in all parts of Canada. Adoption, ensuring as it does the acceptance of the child as an integral member of the adopting family, attains to a degree perhaps not otherwise possible the objective of providing to the child born out of wedlock the same social protection as that enjoyed by other children.

In addition to forms of financial assistance available to unmarried mothers who undertake the upbringing of their children and the vigorous adoption programs that are meeting the needs of most children placed with child welfare agencies, there are other measures designed to improve the position of the child born out of wedlock. Among these are to be mentioned birth certification procedures and legitimation laws. Short form birth certificates which give information relating only to the individual concerned and thus do not disclose birth status are generally available in Canada. Children born out of wedlock to parents who subsequently marry may be legitimated under legislation in effect in all provinces.

While the objective of assuring social protection for children born out of wedlock equal to that extended to other children has not been reached and may never be fully achieved, the progress made in the past four decades suggests that continued gains will be made in the years ahead. A climate favourable to equal treatment is increasingly evident. It is being progressively translated into means of assisting the unmarried mother with the financial and other aspects of raising her child, in the removal of discriminatory social practices and in the improvement of child welfare programs, especially those relating to adoption.

# The International Protection of Trade Union Freedom

## A Book Review

The development in recent years of international action for the protection of freedom of association for trade union purposes is described, and an evaluation of the importance of existing international guarantees and standards and of the effectiveness of existing procedures is attempted, in *The International Protection of Trade Union Freedom*, a recent book by C. Wilfred Jenks, Assistant Director-General of the International Labour Office\*.

An attempt is also made in the book's final chapters to estimate the significance of contemporary developments concerning freedom of association for the future of international organization and for the general theory of international law.

The book is based on experience relating to two ILO Conventions: No. 87—Freedom of Association and Protection of the Right to Organize, 1948, and No. 98—Right to Organize and Collective Bargaining, 1949. The experience comprises 153 allegations of infringement of trade union rights referred to a Committee on Freedom of Association established by the ILO Governing Body.

Each member of the ILO that has ratified these Conventions—when the book was written, 23 had ratified No. 87 and 26 had ratified No. 98—is required to report annually to the International Labour Office the measures that it has taken to give effect to the Convention. Members that have not ratified the Conventions are required to report at appropriate intervals the position of their law and practice in regard to the matters dealt with in the Convention. (For extracts from the most recent Canadian report on Convention No. 87, see page 1229).

The Committee on Freedom of Association, made up of members of the ILO Governing Body, examines allegations of infringements of trade union rights and reports to the Governing Body whether further examinations of an allegation is necessary, and whether the allegations, if proved, would be an infringement of trade union rights, whether the allegations are so purely political in character that it is undesirable to pursue the matter further, or are too vague for consideration, or whether the evidence is insufficient. If the Committee reports that the case should be examined further, the Governing Body may

seek the consent of the government concerned for further fact-finding and conciliation procedures.

The 153 cases referred to the Committee involved 67 governments in all parts of the world. In 137 of them the Committee had, when the book was written, submitted final or interim conclusions, and its reports had been approved by the Governing Body. The development of an international procedure for examining allegations and grievances is, in the author's opinion, clearly worthy of study. It represents a significant contribution to the development of international procedures for the examination of petitions and complaints made by private persons or bodies to international organs.

Out of the wealth of material in this book on the subject indicated above, readers of the *LABOUR GAZETTE* would find of particular interest the author's analysis of what are the essential principles in the body of precedent that has been built up on the subject of trade union freedom. Some indication of the contents of these chapters is given in the paragraphs which follow.

The general standards taken into account by the Freedom of Association Committee are the standards set out in the Conventions. Whether or not members have ratified a Convention, the Committee, in examining allegations, is guided by its provisions. The author points out that these standards have been approved after the most thorough and prolonged investigation and discussion by bodies representative of governments, employers and workers alike for all parts of the world. They represent a consensus of view based on the experience of many countries. In considering whether the facts alleged in the complaint would, if proved, constitute an infringement of trade union rights, the Committee, in applying general principles to specific situations, has developed an interesting body of precedents on some of the major questions in industrial relations facing many countries at the present time.

The essence of freedom of association is the right of workers and employers to establish and join "*organizations of their own choosing*". The Committee has been critical of the absence of any freedom of choice in cases in which there is, in law or in fact, a monopoly of the right of association. It has recommended reconsideration by the government concerned of regimes characterized by the co-existence of two or more types of workers' organizations, of which one enjoys an official approval denied the others. Another situation, which

\* Jenks, C. Wilfred, *The International Protection of Trade Union Freedom*, New York, Frederick A. Praeger, Inc., 1957. Pp. 592.

they found inconsistent with the principle, was a proposed provision in connection with a law dealing with registration of trade unions whereby "the Registrar may enrol an applicant union for any particular industry in any particular area if he is satisfied that no other union is enrolled or registered for that industry in that area".

In applying the principle that workers and employers may establish and join organizations of their own choosing "without distinction whatsoever," the committee has regarded the principle of non-discrimination on political grounds as applicable irrespective of the nature or tendency of such discrimination. Most of the allegations submitted to the Committee on this issue have related to anti-Communist legislation. The Committee recognizes that conviction of a criminal offence may be a disqualification for membership of a trade union as for the exercise of other civil rights, but emphasizes the importance it attaches to due process in cases in which measures of a political character may indirectly affect the exercise of trade union rights. They urged reconsideration of a provision which, while it did not deprive persons alleged to be members of proscribed political parties of the right to belong to a union until convicted, provided that the fact of being charged entailed suspension of the right.

In cases where it found that legislation involved racial discrimination in trade union rights it recommended that the government concerned give further consideration to its policy.

Under the Conventions, the status of the armed forces and the police is left to national discretion by both Conventions; other civil servants are covered by the 1948 Convention but not by the 1949 Convention. The Committee has considered a number of cases concerning civil servants and other government employees. The general principles which emerge from these cases are summarized as follows: "that civil servants and government employees should enjoy the right to organize and be protected against anti-union discrimination, that a requirement that they be organized in unions catering for them exclusively may be reasonable in certain circumstances, that it is normal to withhold the right to strike from civil servants enjoying statutory terms and conditions of employment, and that where the right of collective bargaining or the right to strike is withheld from other government employees on the ground that they are engaged in essential services there should be adequate alternative arrangements for the protection of their occupational interests".

In considering the right to establish and join organizations of their own choosing "*without previous authorization*," the Committee has held that "while it is common practice for States to provide in their legislation such formalities as seem to them proper to ensure the normal functioning of these associations, a provision in virtue of which the right of association is subject to an authorization given by a government department in its sole discretion is incompatible with the principle of freedom of association".

The right to draw up their constitutions and rules freely is the key to the autonomy of workers' and employers' organization, but it is also clear that the International Labour Conference when it adopted the Convention contemplated that States would remain free to provide formalities to ensure the normal functioning of industrial organizations. The cases relating to the right to draw up constitutions and rules which have arisen before the Committee all involve some form of the question whether particular legal requirements that certain matters be provided for in the constitution and rules are inconsistent with the right of organizations to draw up their constitution and rules freely. The Committee had some doubt about a provision that rules of approved trade unions must contain a statement that it "will act as a body for co-operation with the public authorities and other associations for the furtherance of social solidarity and the subordination of economic and occupational interests to the national interests".

In a number of other cases where the law places on industrial associations applying for the status of recognized trade unions an obligation to deal with certain matters in their rules but does not prescribe the manner in which they shall be dealt with, the Committee has taken the view that the inclusion in legislation of provisions governing the relationship between unions and federations which in a developed trade union system would normally appear in trade union rules may be not unreasonable in the early stages of development of the trade union movement.

In connection with "*the right to elect representatives in full freedom*," the two forms of intervention actually found are supervision of elections and disqualification for eligibility as officers. The Committee has on occasion pointed out "that the right of workers to elect their representatives in full freedom is a most important aspect of trade union freedom and that this right should be subject to as few restrictions as possible".

In considering cases involving the right "*to organize their administration and activities and formulate their programs*", the Committee has emphasized that "organizations" is defined in the Convention as "any organization of workers or of employers for furthering and defending the interests of workers or employers".

Some restrictions on political activities of trade unions appear in a number of countries. In dealing with allegations that restrictions on political activities are inconsistent with the right to organize administration and activities and to formulate programs, the Committee has been guided by the resolution on the independence of the trade union movement adopted by the International Labour Conference in June 1952, which lays down the principle that "the fundamental and permanent mission of the trade union movement is the economic and social advancement of the workers," and that "when trade unions, in accordance with the national law and practice of their respective countries and at the decision of their members, decide to establish relations with a political party or to undertake constitutional political action as a means towards the advancement of their economic and social objectives such political relations or action should not be of such a nature as to compromise the continuance of the trade union movement or its social or economic functions irrespective of political changes in the country".

In commenting on one case before it, the Committee said:

In order that trade unions may be sheltered from political vicissitudes and in order that they may avoid being dependent on the public authorities, the Committee considers that it is desirable that employers' and workers' organizations, on the one hand, should limit the field of their activities, without prejudice to the freedom of opinion of their members, to the occupational and trade union fields, and that the Government, on the other hand, should refrain from interfering in the operation of trade unions.

The right of organizations to affiliate with international organizations has been at issue in a number of cases. While pointing out that the right of national workers' organizations to affiliate with international workers' organizations normally carries with it the right to maintain contact with the international organizations to which their organizations are affiliated, and to take part in their work, and that it is desirable that every latitude should be afforded to them for this purpose, the Committee has recognized that this principle may not be susceptible of unqualified application in all circumstances, particularly where a political element or criminal charges are involved.

A number of cases before the Committee bear on the application of the principle of protection against anti-union discrimination. In a case in which the law of the country in question fully recognized freedom of association so far as the State was concerned, but contained no provision declaring that employers were bound to respect freedom of association, the Committee considered that, where a government has undertaken to ensure that the right to associate should be guaranteed by appropriate measures, the guarantee, in order to be an effective guarantee, should be ensured by measures including the protection of the worker against anti-union discrimination in his employment.

The Committee has been called upon to consider the incidence on freedom of association of national security and loyalty programs in a number of countries and has had occasion to emphasize the desirability of including in procedures for the protection of public security the safeguards necessary to avoid any infringement of trade union rights.

When the 1949 Convention was adopted, the International Labour Conference approved a report by its Committee on Industrial Relations recording the view that the provisions of the Convention were not to be interpreted as authorizing or prohibiting union security arrangements, such questions being matters for regulation in accordance with national practice. In one case before it the Committee held that where management was acting in accordance with union security arrangements agreed upon by the parties, the operation of the arrangements might cause a worker to withdraw from a particular union to which he belongs but not "to relinquish trade union membership" and might cause a worker to suffer certain prejudice in his employment by reason of his membership in a particular union but not "by reason of union membership". In these circumstances there was no anti-union discrimination involving a violation of the Convention.

In another case the Committee considered that where union security arrangements operate and require membership of a given organization as a condition of employment, there might be an unfair discrimination if unreasonable conditions were to be attached to persons seeking such membership but in the particular case there were appropriate national remedies for testing whether membership had been wrongfully refused in terms of the union shop agreement and the statute under which it was made, and the Committee refused to pursue the matter further.

The 1949 Convention provides that measures appropriate to national conditions shall be taken where necessary to encourage and promote the full development and utilization of machinery for voluntary negotiation between employers' and workers' organizations, with a view to the regulation of terms and conditions of employment by means of collective agreements. The significance and importance of collective bargaining as an element in freedom of association has been recognized by the Committee in a number of cases. In cases in which the special regime applicable to public employees, or the restriction of strikes in essential services, has the effect of restricting collective bargaining, the Committee has insisted on the importance of alternative arrangements to safeguard the workers' interests. However, the Committee has held that the Convention does not place a duty on the government concerned to enforce collective bargaining by compulsory means. It has accepted fully the general principle of special restrictions on the right to strike in essential services, holding, for example, that it is not an infringement of freedom of association to make disputes in essential services subject to a special conciliation and arbitration procedure; or for a government, being responsible for the operation of public services, to apply certain limitations to the right to strike; or, where an essential public service is interrupted by an unlawful strike, to call in persons to perform the duties which have been suspended. However, the Committee has emphasized that limitation of the right to strike in essential services involves the corollary of satisfactory alternative arrangements for the redress of grievances.

A number of cases have been before the Committee posing the question whether measures for the control and supervision of union funds can be regarded as a reasonable precaution against the misuse of funds or whether they were, in fact, an unreasonable restraint upon trade union freedom. One group of cases relates to the disposal of the funds of particular trade unions chiefly in connection with the dissolution of unions. The general principle underlying conclusions in these cases appears to be that the funds of a dissolved union should be held in trust and subsequently applied for the benefit of the union which can most appropriately be regarded as its successor.

In evaluating the measures taken for the protection of trade union freedom, the author calls it "a leading example of one of the most significant tendencies in the development of international law in our time". He emphasized the mutually com-

plementary character of the ILO guarantees, standards and procedures. The constitutional provisions and the Conventions represent the substantive law, but these would have "tended to remain a body of aspirations of uncertain practical value" without the procedures, such as the procedure for examination of reports on application of Conventions, both ratified and unratified, and the procedure for the examination of allegations of infringements of trade union rights, which make possible the development and progressive acceptance of a body of widely agreed principles concerning all aspects of the problem of trade union rights.

Among the limitations of the existing guarantees he mentions the fact that the substantive law does not deal with all the important aspects of the matter, and the extent to which the effectiveness of existing guarantees of freedom of association for trade union purposes is dependent on the degree of protection accorded to civil liberties in general, such as freedom from arbitrary arrest, detention or exile, the right to fair and public hearing by an independent and impartial tribunal, and the presumption of innocence until proof of guilt. He does not appear to regard the lack of physical sanctions as a limitation, but he does point out that the procedures for checking on the manner in which Conventions are applied (which he refers to as a type of "mutual verification of the fulfilment of obligations") depends for its effectiveness on the extent to which the governments and legislatures of members are responsive to international criticism. He goes on to say:

The responsiveness of governments and legislatures to international criticism is of course a function of general political conditions. It depends upon the value attached to the pledged word and the keenness of the sense of international responsibility and interdependence in the country concerned, upon the prestige enjoyed there by the international body which has formulated the criticism, and upon the extent to which, under the conditions which prevail there, international criticism tends to reinforce or to silence national criticism of official policy. The conditions which make governments and legislatures responsive to criticism in and by international bodies cannot be created within short periods by any action which it is within the power of such bodies to take, but over longer periods the development of such conditions can be encouraged by building up a tradition of vigorous international co-operation based upon the moral and social values proclaimed by the preamble of the Constitution of the Organisation and the Declaration of Philadelphia and by promoting confidence in the fairness, understanding and sound judgment of those who serve upon and those who advise the bodies responsible for verifying whether the obligations which have been assumed are being properly discharged.

The closing chapter entitled "Freedom of Association and the Future Development of

International Law" deals with the significance of the ILO experience which the author has been analyzing on what he calls "the contemporary transformation of the scope and character of international law..... from a law demarcating the jurisdiction of States into a law governing common interests of mankind which can no longer be dealt with effectively on a national basis". The

ILO procedures have illustrated a way of developing a body of accepted international doctrine on crucial social and industrial issues which is already exercising a considerable influence on social and legal development in many countries "and may at some stage harden into customary international law".

## A Bibliography on Human Rights

### Compiled in the Library of the Department of Labour

NOTE: The items marked with an asterisk are available in the Labour Library.

#### Books and Pamphlets

1. AMERICAN CIVIL LIBERTIES UNION. *Labor union "Bill of Rights"* Feb. 13, 1958. New York, 1958. 5 p. mimeo. Free.

Proposes guarantee of free speech, fair procedures and non-discrimination with trade unions.

2.\* AMERICAN FEDERATION OF LABOR AND CONGRESS OF INDUSTRIAL ORGANIZATIONS. INDUSTRIAL UNION DEPT. *Handbook on the industrial security program of the Dept. of Defense; the security risk program: how it works; who is affected; what to do.* Washington, 1955. 46 p.

Partial contents: Who is under the programs? What the union can do. How the program works. Industrial Personnel security review regulation.

3.\* ANDERSON, HOWARD RICHMOND, AND CUMMINGS, HOWARD H. *The UN declaration of human rights; a handbook for teachers.....* Washington, U.S., G.P.O., 1952. 31 p. (U.S. Office of Education Bulletin, 1951, no. 12).

Besides the Declaration there are a few pages on the responsibilities of teachers with reference to the teaching of human rights in the schools.

4.\* BALDWIN, ROGER NASH. *Human rights—world declaration and American practice.* New York, Public Affairs Committee inc., c1950. 32 p. (Public Affairs Pamphlet, no. 167).

Contains the 30 articles of the declaration, with notes.

5. BARTON, MRS. REBECCA CHALMERS. *Our human rights; a study in the art of persuasion.....* Washington, Public Affairs Press, 1955. 102 p.

6.\* BERGER, MORROE. *Equality by statute; legal controls over group discrimination.....* New York, Columbia Univ. Press, 1952. 238 p.

Bibliographical references included in "Notes" (p. 195-210). Bibliography: p. 221-224.

Contents: Civil rights today and during the reconstruction era. The Supreme Court, 1868-1937: buttressing the caste order. The Supreme Court, 1937-1950: undermining the caste order. The New York state law against discrimination: operation and administration. Law and the control of prejudice and discrimination.

7. BLAKE, ALDRICH. *The civil rights revolution.* Waco, Tex., Freedom of Choice, inc., 1955. 112 p.

Analysis of the civil rights issue in the United States from the standpoint of one opposed to compulsory civil rights codes.

8. BROOKES, EDGAR H., AND MACAULAY, J. B. *Civil liberty in South Africa.* Cape Town, Oxford University Press, 1958. 196 p.

A study prepared on the initiative of the South African Institute of Race Relations. In chapters on freedom of movement and of opinion, on economic, educational, religious and social freedom, the authors carefully analyse all the restrictive legislation; and they consider fully other related matters such as rule of law, the police force, the franchise, and whether racial discrimination is fundamental in South African law.

9.\* CANADA. LAWS STATUTES, ETC. *An act for the recognition and protection of human rights and fundamental freedoms.* Ottawa, Queen's Printer, 1958.

Bill C-60, 1st reading, Sept. 5, 1958, H. of C. To be discussed in detail at the next session of Parliament.

10.\* CANADA. PARL. SENATE. SPECIAL COMMITTEE ON HUMAN RIGHTS AND FUNDAMENTAL FREEDOMS. *Proceedings and report.* Ottawa, King's Printer, 1950. 362 p.

Hearings held from April 25 to June 6, 1950. Hon. Arthur W. Roebuck, chairman.

11.\* CANADA. PARL. SPECIAL JOINT COMMITTEE OF THE SENATE AND THE HOUSE OF COMMONS ON HUMAN RIGHTS AND FUNDAMENTAL FREEDOMS. *Minutes of proceedings and evidence and reports.* Ottawa, King's Printer, 1948. 11 nos. in one vol. L. M. Gouin and J. L. Ilsley, joint chairmen.

12. CAUGHEY, JOHN WALTON. *In clear and present danger: the crucial state of our freedoms*. Chicago, Univ. of Chicago Press, 1958. 207 p.

How traditional liberties of individuals have been surrendered in the name of internal security.

13. CHAFEE, ZECHARIAH. *Blessings of liberty*. Toronto, Longmans, 1956. 350 p.

Partial contents: Forty years with freedom of speech and of the press. Does freedom of speech really tend to produce truth? Freedom and fear. Purges for Russian lawyers, not American lawyers. The right not to speak. The freedom to think. Strengthening liberty in all countries.

14. CHAFEE, ZECHARIAH. *Documents on fundamental human rights*. Cambridge, Harvard University Press, 1951-1952. 3 v.

A most useful and comprehensive collection of sources. It starts with Magna Carta, includes full documentation for American Bills of rights, and ends with the 1950 Constitution of India and some cases of 1951.

15. CHAFEE, ZECHARIAH. *How human rights got into the constitution*. Boston, Boston University Press, 1952.

A good brief history of civil rights.

16. COMMAGER, HENRY S. *Freedom, loyalty, dissent*. New York, Oxford University Press, 1954.

Definitely liberal point of view.

17. CUSHMAN, ROBERT EUGENE. *Civil liberties in the United States; a guide to current problems and experience*. Ithaca, Cornell University Press, 1956. 248 p. (Cornell Studies in Civil Liberty).

A summary of field of civil liberties since the end of World War II. Contents: Freedom of speech, press, assembly, and petition. Academic freedom. Freedom of religion. The right to security and freedom of the person. Military power and civil liberty. The civil liberties of persons accused of crime. Civil liberties and national security. Civil liberties of aliens. Racial discrimination. "Selected readings" at the end of each chapter.

18. DOUGLAS, WILLIAM ORVILLE. *Right of the people*. Toronto, Doubleday, 1958. 238 p. (Franklin and Marshall College. North Foundation Lectures, 12th ser., 1957).

19.\* EVJUE, WILLIAM T. *The weapon of fear*. New York, Sidney Hillman Foundation, 1952. 10 p.

An address at the Prize Award luncheon of the Sidney Hillman Foundation on Sept. 25, 1952, at the Hotel Biltmore, New York.

20.\* FERGUSON, G. V. *Freedom and the news*. Toronto, Canadian Institute of International Affairs, 1948. 17 p. (Behind the Headlines, v. 8, no. 6).

Partial contents: Ideas and facts for everyone. Communications and national power. Rise of the newspaper. Foundation of the free press. Gathering the news. Effects of competition. Facts of government control.

21.\* FLEISCHMAN, HARRY. *Security, civil liberties and unions*, by Harry Fleischman, Joyce Lewis Kornbluh and Benjamin D. Segal. Washington, American Federation of Labor and Congress of Industrial Organizations, 1956. 52 p. (American Federation of Labor and Congress of Industrial Organizations, pub. no. 31). Bibliography: p. 50-51.

Partial contents: Who is a risk? The security problem. How the industrial security program works. Union criticisms. A union program. The Bill of Rights.

22. GELLHORN, WALTER. *Individual freedom and governmental restraints*. Baton Rouge, Louisiana State University Press, 1956. 215 p. (The Edward Douglass White Lectures on Citizenship, 1956).

Contents: Changing attitudes toward the administrative process. Restraints on book reading. The right to make a living.

23.\* HALL, FRANK HAROLD. *Fair employment practices—a good beginning*. Ottawa, Dept. of Labour, 1957. 5 p. (Canada at work broadcast, no. 692).

The speaker, who is chairman of the Human Rights Committee of the Canadian Labour Congress, talks about the Canadian Fair Employment Practices Act passed in May 1953 and tells what his committee has done about the problem of discrimination in employment.

24.\* HAND, LEARNED. *The Bill of Rights*. Cambridge, Mass., Harvard Univ. Press, 1958. 87 p.

One of America's most eminent jurists argues against the Supreme Court's growing tendency towards government by judicial review. Closely reasoned and eloquently written, this little book could well become a classic in its field.

25.\* HARTMAN, PAUL. *Civil rights and minorities*. New York, Anti-Defamation League of B'nai B'rith, 1955. 8 p.

Revised from an article in the *New Republic* by Paul Hartman and Morton Puner. Includes a chart which tells the legal status of civil rights in the 48 states and the District of Columbia.

26. HEWETSON, SARA (VAUGHAN). *Essays on human rights*, by V. L. Dicant, pseud. New York, Vantage Press, 1956. 128 p.

Comments on the present status of the rights guaranteed by the United States Constitution.

27.\* HOW, W. GLEN. *The case for a Canadian Bill of Rights.....* Toronto, printed by Watch Tower Press, 1948. 40 p. Bibliographical footnotes.

Reprinted from *Canadian Bar Review*, May 1948. Partial contents: Civil liberties have a practical value to the state. The unwritten British Constitution. The myth of Magna Carta. The English Bill of Rights of 1689. The writ of Habeas Corpus. Freedom of communication: speech, press and assembly. History of English censorship. Censorship in Canada. Legislature establishes censorship. Limitations on expression under the Criminal Code. Freedom of worship.

28. KELLY, ALFRED HINSEY, ed. *Foundations of freedom in the American constitution*. New York, Harper, 1958. 299 p.

29.\* KONVITZ, MILTON RIDVAS. *The constitution and civil rights*. New York, Columbia University Press, 1947. 254 p.

Contents: Part one: Federal civil rights. Part two: State civil rights.

30. KONVITZ, MILTON RIDVAS. *Fundamental liberties of a free people: religion, speech, press, assembly*. Ithaca, Cornell Univ. Press, 1957. 420 p. (Cornell Univ. Cornell Studies in Civil Liberty).

Contents: Part I: Freedom of religion. Part II: Freedom of speech, press, and assembly. Part III: Freedom of speech, press and assembly: the clear and present danger doctrine.

31. LAMONT, CORLISS. *Freedom is as freedom does; civil liberties today*. New York, Horizon Press, 1956. 322 p. Selected bibliography: p. 303-305.

A panoramic view of the condition of civil liberties in the U.S. today. Describes the decline of civil liberties during the McCarthy regime and concludes with the expressed belief that the tide is turning towards the restoration of the Bill of Rights.

32.\* LUKAS, EDWIN J., AND LESKES, THEODORE. *Civil rights and civil liberties.....* New York, National Labor Service, 1954. 11 p. Bibliography: p. 10-11.

Reprinted from Social Work Year Book, 1954. Great progress was made in the protection and expansion of civil rights in the decade from 1940-1950. The article enumerates developments at the national, state and community levels and also considers civil liberties cases and mentions agencies concerned with both civil rights and civil liberties.

78. WHAT DO CIVIL RIGHTS MEAN IN QUEBEC? By R. B. Fraser. (In *Maclean's Magazine*, Jan. 7, 1956, p. 3, 46).

Discusses the contrast in the official conceptions, inside and outside Quebec, of a citizen's rights and privileges, in the case of the Jehovah's Witnesses.

# NOTES OF CURRENT INTEREST

## **Govt. Will Share Cost of Winter Work Projects**

The federal Government will pay 50 per cent of payroll costs of work done this winter in municipalities of any province where the provincial government approves. Prime Minister Diefenbaker made this offer in a speech in Regina on October 27.

Subject to talks with the provinces, the federal Government will pay 50 per cent of payroll costs incurred by municipalities between December and April for work that would not normally be done this winter.

Projects that will be supported include sidewalk construction, roads other than arterial ones, water and storm sewers, municipal parks and some major reconstruction jobs.

All projects undertaken must have the approval of the provincial government concerned so that provincial jurisdiction over municipalities will be maintained.

The federal Government's decision has its origin in the National Winter Employment Conference (L.G., Aug., p. 847) held in Ottawa July 14-15. At that conference, delegates proposed, among others, an incentive to municipalities to undertake works programs in order to create winter work.

The cost-sharing offer announced by the Prime Minister is designed to provide such an incentive.

## **Manitoba Plans to Spur Employment This Winter**

Moves to ease winter unemployment, establishment of an agricultural credit plan and a record highway construction program were announced in the Speech from the Throne read at the opening last month of a special session of the Manitoba Legislature.

It was also noted that discussions are under way with the federal Government aimed at putting into operation a flexible plan to promote winter employment during the 1958-59 season.

A special effort to co-ordinate the province's road-building, power transmission and telephone activities will make possible a marked increase in winter employment, the Speech announced.

The Manitoba Government also plans to establish a development fund that will supplement normal financial sources and

will provide financial assistance to manufacturing industries, and tourist and recreational facilities.

"This measure is expected to lead to an acceleration in the rate of growth of small and medium-sized enterprises in Manitoba and the general economic development of the province."

Announcement was made in the Speech of the Government's intention to increase aid to education along the lines indicated by a provincial Royal Commission on Education. In an interim report, the Commission urged much higher salaries for qualified teachers and increased financial support from the province for school boards.

## **CCA President Calls for More Winter Building**

An appeal to all sections of the nation to increase winter construction as a means of lessening unemployment this coming winter was made last month by Harold J. Ball, President of the Canadian Construction Association. He was speaking at a meeting of the Halifax Construction Association and the Nova Scotia Road Builders' Association.

"This problem deserves the continuing attention of not only government, labour and industry—who are very much aware of it—but also of every Canadian citizen," he said.

In his appeal, Mr. Ball noted that due to scientific advances in research, winter construction in Canada is practical. The quality is just as good in winter as at any other season of the year, and if proper scheduling of the construction is made the cost is no higher.

Mr. Ball suggested that the average citizen can assist in having construction done in winter by urging school boards, hospital boards and community organizations to schedule building projects so that work can be carried on to the greatest possible extent during the winter months.

About 20 fish-preparing buildings are to be built in Newfoundland this winter as part of the Government's program to reduce winter unemployment, the Department of Public Works has announced.

## **Participation Increasing In Vocational Courses**

Participation in vocational, technical and trade training courses increased by approximately 30 per cent in the four-year period from 1952-53 to 1956-57, according to a Department of Labour report entitled *Vocational Training Program in Canada*, which describes publicly operated technical and trade training courses in Canada.

The report, which is the fifth of a series issued as part of the Research Program on the Training of Skilled Manpower, is the first of several dealing with various aspects of vocational training in Canada. Prepared by the Training Branch of the Department, it is based on a survey made with the co-operation of federal and provincial government agencies.

Reports will be published later dealing with training programs in commercial and service occupations, on vocational training in government departments and on training programs in vocational agriculture.

The first three reports of the series were: No. 1, *Progress Report* (summarized in the *LABOUR GAZETTE*, Aug. 1957, p. 940), No. 2, *Technological Changes and Skilled Manpower: Electrical and Electronics Industry, Heavy Machinery Industry* (L.G., Nov. 1957, p. 1281), and No. 3, *Technological Changes and Skilled Manpower: Summary Report on the Household Appliance Industry* (L.G., Oct., p. 1110). The fourth report will be published later this year.

### **Most Striking Increase**

The increase in participation in courses during the four-year period 1952-53 to 1956-57 was most striking in the post-high school or advanced technical courses and in the annual apprenticeship classes, although an appreciable rise was also shown in high school, industrial and trade courses.

The report shows that annual public expenditures on vocational education in Canada had risen steadily from just over \$30,000,000 in 1951 to approximately \$50,000,000 in 1956. During this period the total municipal share remained fairly constant at approximately 45 per cent, the provincial share increased from approximately 41 to 47 per cent, and the federal share decreased from 12 to approximately 8 per cent.

Under the Vocational Schools' Assistance Agreement of 1945-55 made between the federal Government and the provinces, the greatest expansion took place in vocational high schools financed by municipalities with grants from the provinces.

Federal assistance to the program was limited by fixed allotments that were paid

on the basis of provincial grants or costs. As costs increased, the federal allotments were not sufficient to match the provincial expenditures on vocational programs. This situation accounted for the decrease in the percentage of the federal share of vocational costs during the five years from 1951 to 1956.

The new Vocational and Technical Training Agreement that replaced the Vocational Schools' Assistance Agreement in 1957 has provided for an increase in federal contributions to vocational and technical education.

---

## **Calls for Doubling of Building Apprentices**

"The registration of apprentices in the construction trades should be at least double the present level," said Harold J. Ball, President of the Canadian Construction Association, in an address last month at Fredericton.

To achieve this increase, employers, unions and governments must pool their efforts, he stated.

"All employers in the construction industry have a very direct interest in the industry's training program because the industry's efficiency and costs are in large measure dependent upon the training of adequate numbers of recruits in properly balanced programs which combine jobsite and school-room instruction." Employers must provide more opportunities for job-site training, he said.

Unions should administer their journeyman-apprentice ratios on a regional basis rather than on an individual contractor, job or shop basis, he suggested, and provincial governments should give serious consideration to the introduction of pre-employment training courses and of certification of tradesmen where this has not already taken place.

Prospects for apprentices in the construction industry are especially attractive, Mr. Ball pointed out. "There are few industries in Canada that offer as many opportunities to men to rise from the ranks and take on positions of prominence and responsibility."

---

## **Vocational Guidance in Belgium Provided by Law**

A vocational guidance service set up by law in Belgium is described in an article of a recent issue of the *Personnel and Guidance Journal* by Leonard A. Ostlund, Assistant Professor of Psychology at Kent State University, Ohio.

Belgium pioneered with the first guidance centre in Europe, established at Brussels in 1912. Twenty-five years later, a comprehensive guidance service was set up by law, which provided for its establishment and functioning on a nation-wide basis under the jurisdiction of the Minister of Education. There are now 88 local counselling centres and 18 regional psychological-socio-logical-medical centres.

The law stipulates that counsellors must have a certificate or degree from a recognized institution, that each guidance centre shall consist of a counsellor, nurse, doctor, social service worker, and clerical staff, and that the service must be free of charge.

No compulsion may be used either in inducing an individual to be counselled or to follow counselling recommendations.

### **Current Labour Unrest "Deplorable"—CMA Head**

Current labour unrest in Canada is especially deplorable at this time when it is imperative to keep Canadian products competitive with those produced abroad in both price and quality, said Ian F. McRae, President of the Canadian Manufacturers' Association, in a recent address.

"Management," the speaker said, "is not against high wages. At the same time, it is absolute folly for any of us to proceed on the assumption that we are 'entitled' to a substantial annual raise, irrespective of current economic conditions and individual performances. But that is precisely the stand being taken in some quarters."

Was it not strange, he asked, that at this time thousands of men in several of Canada's most important industries, who for the most part were earning between \$4,000 and \$5,000 a year, and who were not being threatened by any move to reduce their earnings, should be willing to engage in prolonged strikes and lose hundreds of dollars in wages?

Quoting a recent statement of Hon. Michael Starr, Minister of Labour, in which he said that "Labour is getting a bigger share of a bigger pie," Mr. McRae said that "still the demands keep rolling in with hardly a break, and Management is faced with the ultimatum: Pay up—or else."

The CMA President complained of the way in which union spokesmen "for the most part airily dismiss the idea that there is any connection between wage increases and price increases. They seek to persuade the public at large that their insatiable demands can be met out of profits."

Such spokesmen, he said, ignored the fact that profits have fallen sharply this year,

that the Government takes half of all profits, and that much of what it left goes into providing the new plant and equipment "which is so essential to business survival and expansion, and, let it not be forgotten, to the provision of an increasing number of jobs".

### **UK Prices Likely Stable Despite Wage Increases**

The United Kingdom's Council on Prices, Productivity and Incomes, in its second report, issued in August, has predicted that the price level of goods and services may remain almost stable, with rising labour costs being offset, or nearly offset, by lower materials costs and lower profit margins. The retail price index is even less likely to rise, and may even fall.

The Council's first report was issued last February (L.G., May, p. 481).

Fixed capital expenditure in the public sector is likely to be roughly stable; in the private sector, to decline somewhat. Investment in inventory and in work in progress is likely to be lower, and government expenditures on goods and services likely will remain about stationary.

#### **Demand for Labour Eases**

Figures available up to July 1958 indicated that unemployment, employment, vacancies, short-time and overtime showed some easing of the demand for labour, according to the report.

The report noted that the index of retail prices continued to rise up to June, and that 69 per cent of that rise since October 1957 was accounted for by increases in food prices. Other sectors of the index, apart from housing, climbed little in the October-June period. There was a definite levelling-off in export prices and in the wholesale price index of manufactured goods.

It was also noted that fewer workers had been given wage increases during the first quarter of 1958, and the average amount was smaller than in 1957. In the first seven months of 1958 the weighted average increase given in negotiated wage settlements was 3.6 per cent. The figure includes those groups of workers who have sliding-scale agreements linked to the cost of living. Little change in productivity had occurred, the report notes.

Recent figures for profit incomes and for the size of wage settlements suggested that although there is still a gap between the rise in total incomes and the rise in total output, it might have narrowed a little.

## **Headed CLC Department, Howard Conquergood Dies**

Howard Conquergood, Director of the Political Education Department of the Canadian Labour Congress, died in Ottawa on October 18.

Before the founding of the CLC he had been Director of the Education and Welfare Department of the Canadian Congress of Labour, and before that, he had held a similar position with the United Steelworkers.

His first contact with the labour movement was at the age of 17 years, when he joined the Musicians' Protective Association (AFL).

Born in Toronto, Mr. Conquergood was a graduate of Queen's University and the University of Toronto. A former staff member of the YMCA at Toronto and Hamilton, he was a member of the Board of Directors of the Canadian Association of Social Workers as well as one of the original members of the first CCYM Executive in Ontario.

In 1943, he joined the staff of the United Steelworkers of America as Canadian Education and Welfare Director. Later that year he became the union representative of the 5,000-member Steelworkers local at Research Enterprises.

When the big steel strike took place in 1946 he was placed in charge of picketing

and strike welfare administration at the Stelco plant in Hamilton. As Welfare Director of the Steelworkers, he was in charge of a number of other important strikes.

In 1947 he was successful in obtaining the co-operation of a number of unions to conduct Canada's first CIO-CCL-sponsored union summer school at Geneva Park. The next year, when an Education Committee of the CCL was established, he travelled from coast to coast conducting union institutes in co-operation with local labour councils.

In 1951, when the CCL established a Department of Education and Welfare, Mr. Conquergood became its Director and, with the TLC-CCL merger in 1956, assumed the position he held at the time of his death.

---

## **Was TLC Officer, J. W. Buckley Dies**

Secretary-Treasurer of the Trades and Labour Congress from 1947 to 1949, John W. Buckley died in Toronto October 18 at the age of 76 years.

Previously, he had been since 1928 Secretary of the Toronto and District Trades and Labour Council and was TLC Vice President from 1941 to 1947. In 1929 he was TLC fraternal delegate to the Trades Union Congress.

**Howard Conquergood**

**John. W. Buckley**

Born in Manchester, England, Mr. Buckley came to Canada in 1907 and trained and worked as a carpenter with the Canadian National Railways and Canadian Pacific Railway Company for a period of 30 years.

Following his retirement he served as a referee for unemployment insurance.

## **Death Claims Two Men Well-Known to Labour**

The deaths occurred during September of two persons well-known to Canadian trade unionists.

S. Harry McLaren, former Executive Director of the Unemployment Insurance Commission, died September 2 at the age of 65 years.

On September 15, Abraham Kirzner, former business agent in Toronto of the International Ladies' Garment Workers' Union, died at the age of 73 years.

Mr. McLaren, who had previously served as Chief Treasury Officer, Dependents' Allowance and Assigned Pay, became Chief Treasury Officer of the Unemployment Insurance Commission on its organization in 1941. Two years later he was named Assistant Director of Mobilization under National Selective Service. He became Executive Director of the UIC in 1945, retiring from that post in October 1954.

Mr. Kirzner had served on the ILGWU staff as organizer and business agent for more than 30 years until his retirement in 1953. He had been Vice President of the Jewish Labour Committee, Chairman of the Advisory Committee of the Garment Industry of Ontario, and a leading member of the Workman's Circle of Toronto.

## **Promotions, Elections Of Labour Interest**

Vancouver trade unionist Herb Fleisher has been appointed chief of the Labourers' Union for Western Canada. A former President of the Vancouver Building Trades Council, he succeeds the late Carl Berg as Manager of the Western Canada sub-regional office of the International Hod Carriers, Building and Common Labourers' Union.

William Buss of Toronto has been re-elected for a second term as President of the 36,000-member National Union of Public Employees. Thomas Lewis of Vancouver, Jack Raysbrook of Hamilton and Harley Horne of Calgary have been elected Vice Presidents of the union. Robert Rintoul of Ottawa continues as National Director.

Mort Brandenburg of Tenafly, N.J., has been elected President of the 32,000-member

Distillery Workers' Union. A former Vice President of the Union, and President of its 1,800-member Local 2 in New York, he succeeds Joseph O'Neill of Chicago.

A. L. McGregor, former assistant superintendent for the Canadian Pacific Railway Company in Ottawa, has been appointed Labour Relations Manager at the railway's Montreal headquarters.

## **U.N. Creates Special Fund For Technical Assistance**

A special fund designed to enlarge the scope of existing United Nations programs of technical assistance to underdeveloped countries was created by the U.N. General Assembly on October 15. The fund is expected to have an initial working capital of \$100,000,000.

The resolution setting up the fund said it might be used initially in carrying out surveys, research and training, demonstrations and pilot projects; but it should concentrate as far as practicable on "relatively large" projects rather than spreading its resources thinly over a large number of small ones.

Participation in the fund will be limited to member states of the United Nations, its specialized agencies and the International Atomic Energy Commission.

In 1957, under its Expanded Program of Technical Assistance, the United Nations spent \$25.79 million on operations in 132 countries and territories, it has just been reported.

Seventy-four per cent of the total expenditure was devoted to providing the services of experts, compared with 16 per cent applied to fellowships and study grants, and 10 per cent to equipment and supplies.

Of a total of 2,513 experts, Canada provided 98; it also accommodated 33 fellows.

### **Canada's Share \$2 Million**

The money for the program is contributed by member states of the United Nations. In 1957, 84 governments pledged \$30.84 million, of which more than 90 per cent was paid up. Pledges—all of which have been met—from Commonwealth countries amounted to \$5.62 million, of which Canada's share was \$2 million and Britain's \$2.24 million. The United States pledge amounted to more than \$15 million, and that of Russia to \$1 million.

The distribution of the expenditure among the regions of the world was: Asia and the Far East, 32.6 per cent; Latin America, 28 per cent; the Middle East, 19.2 per cent; Africa, 11.3 per cent; Europe, 7.2 per cent; and inter-regional projects, 1.7 per cent.

## **QFL Brief Urges Changes In Labour Relations Act**

The right of association with freedom of association as its corollary is illusory unless individuals have a right to exercise it in full liberty, the Quebec Federation of Labour said in a brief presented to the provincial Government October 23.

The brief, read by the Federation's president Roger Provost to Premier Maurice Duplessis and members of his Cabinet, said that the least mistake, the least omission, no matter how small, on an application for certification immediately and irrevocably led to the rejection of the application.

It said that the prohibited practices outlined in the Quebec Labour Relations Act had remained "a dead letter" as far as management was concerned. They did not prevent intimidation, nor management intervention, nor dismissal for union activities.

"The employers who refuse to their employees the right of union, and they are numerous, make fun of the law for the simple reason that it does not carry adequate penalties. The penalty is so light that it does not even act as a preventive," the brief declared.

"Unless the law is immediately amended, we cannot figure any other means of preventing prohibited practices in the future, but the more frequent recourse to strike, no matter by what name it may be described. In the present context, all other recourses have proved to be ineffective and futile."

The brief complained of the slowness of labour hearings and proceedings and asked that the procedure be changed to promote more speed.

The Federation suggested that the Labour Relations Board be made up of equal numbers of employers' and unions' representatives.

It repeated a request that lists of available and competent persons who have been approved in advance by employers' associations and labour organizations be used by the Minister of Labour when naming chairmen of conciliation boards.

Referring to police action during strikes, the brief said police should be a force of order, not repression; nor should they be the employers' instrument.

The Federation criticized delays within the Workmen's Compensation Board and asked that a complete investigation of the Board's operations be held.

Legislation, such as existed in six other provinces, prohibiting discrimination because of race, creed or colour was urged by the brief.

## **Premier's Reply**

Premier Duplessis said he recognized fully the workers' right to associate. In fact, he said, it was not only a right but a duty. However, holding more strikes was not the right way to solve things, he warned.

Democracy, he said, existed to serve all the people, not just one class.

The Premier declared there was not one province in Canada or one state in the United States where working conditions had improved more than in the province of Quebec.

The right to strike, he said, was an extraordinary right, not to be used lightly. "All suffer when there is a strike," he said. "It is a major operation. You do not operate on a man's heart if he has a toothache."

Premier Duplessis disagreed with many of the statements contained in the brief.

"You should not see injustices where they do not exist," he said, nor should you see them only on one side."

## **Newfoundland Federation Holds 22nd Convention**

Delegates to the 22nd annual convention of the Newfoundland Federation of Labour were warned by President Doyle Sharpe that there are "dark clouds on the horizon for Labour".

One dark cloud he mentioned was that employers are introducing "high-pressure salesmen" into Canada who are trying to establish right-to-work laws. Another was the increase in anti-labour propaganda; this must be guarded against, he warned.

Labour Minister C. H. Ballam, addressing the convention, praised the work of the apprenticeship division of his department. He noted that since 1953, some 1,000 young men have entered training, 300 have graduated, 600 are still in training, while about 100 have dropped out. He felt no division of the department was more important than apprenticeship.

CLC President Claude Jodoin and Premier J. R. Smallwood were present at the convention.

Harvey Ladd, President of District 2, International Woodworkers of America, explained why the IWA had gone into Newfoundland: primarily, to get fair treatment for loggers.

The IWA was currently seeking a proper wage scale for the logger, he explained. The mill worker gets \$1.72 an hour, he said, and there was no reason why the logger should be satisfied with the \$1.05 he is paid.

Mr. Ladd said he foresaw the day when the paper mill workers and the woodworkers would attend a convention as

members of the same union, following a merger of the two groups. He suggested the merged union might be called the United Forest Products Workers of America.

A resolution calling on the NFL to approach the provincial Government for enactment of legislation to compel industries employing more than 200 to establish pension plans was rejected when it was learned that the Canadian Labour Congress was trying to obtain similar legislation on a national level from the federal Government.

### **UMW Convention Forced To Extend over 3 Weeks**

The annual convention of the United Mine Workers, District 26, originally planned to last two weeks, was forced to extend into a third week by the large number of resolutions submitted. (An account of the first week's proceedings appeared in the October issue, page 1106.)

Among the more important subjects on which resolutions were presented were: wage increases, overtime rates and extra pay for work on Sundays and holidays, excessive overtime working, paid vacations, improved payments and extended coverage of miners under workmen's compensation legislation, provision of better first aid facilities underground, and improved pension plans.

The convention discussed recommendations of the policy committee that called for a target of a wage increase of 20 cents an hour in forthcoming negotiations, and incorporation into the basic wage of the present production bonus of \$1 a day. The demands would have the effect of increasing the basic rate to about \$14 a day from the present \$11.54.

The union's current two-year contract, which gained miners their first wage increase in six years, expires in December.

Other recommendations of the committee included proposals for: eight paid statutory holidays a year; time-and-a-half for all overtime over eight hours and double time for Sundays and holidays; and three weeks vacation with pay a year.

A strong demand for more comprehensive coverage of miners by workmen's compensation, elimination of delays in processing cases, and recognition of the hazards of mechanical mining by classification of new occupational diseases allegedly resulting from it, was made in a number of resolutions passed by the delegates.

The convention unanimously approved a recommendation calling for more and better first aid and medical equipment in mines.

The delegates approved action by union officers to secure a pension plan, if possible

non-contributory, and also voted them constitutional authority to extend existing contracts with employers pending agreement on new ones. The committee's recommendation did not rule out a suitable contributory pension plan, if one could be arranged.

There were numerous complaints about the excessive amount of overtime that was said to be required of miners, sometimes under threat of dismissal. Many miners were said to be working 11 hours a day, instead of the statutory eight hours. Some delegates said that inefficient management was the chief cause of excessive overtime working.

The convention supported a resolution that pressed for the establishment of a provincial coal marketing board; this, it was said, would enable smaller operators to get a fair share of the market and would provide year-round work for their employees.

The convention accused Canadian industry of pronouncing a sentence of "industrial death" on many workers over 40 years of age. The submission of a brief to the federal Government on the subject was approved.

Strong resentment was expressed against the Nova Scotia Power Commission for its action in closing down its Inverness thermal power plant.

### **Railroad Trainmen Mark 75th Anniversary**

The 75th anniversary of the founding of the Brotherhood of Railroad Trainmen was observed September 23 with ceremonies at Oneonta, N.Y., where the union was organized.

On hand for the occasion was 94-year-old Elmer Wessell, believed to be the only surviving charter member of the Brotherhood.

Among those sending messages of congratulation to the Brotherhood on the anniversary were Hon. Michael Starr, Canada's Minister of Labour, and CLC President Claude Jodoin.

### **Teamsters Call New Convention**

The Executive Board of the International Brotherhood of Teamsters voted last month to call a special convention and election of officers sometime after February 1, 1959.

This prompted the court-appointed Board of Monitors for the Teamsters to file suit in attempt to prevent such an election. The Board, with the Teamster representative dissenting, held that the union was not yet ready "to provide for the holding of a truly representative convention".

## **B.C. Unions Urge Publicity For Fair Practices Act**

The need for a continuing educational program to inform racial groups of their rights under the Fair Employment Practices Act was stressed by the Human Rights Committee of the B.C. Federation of Labour in a recent brief to the provincial Cabinet.

Most persons referred to the Committee were not aware of their rights under the Act and many did not know of the existence of the Act, the brief stated.

The brief suggested several methods by which the government might publicize the Act.

### **Amendment Sought**

An individual, the brief said, was hesitant about filing a complaint concerning discrimination because the onus would be on him to initiate and sign the alleged violation. It asked that the Act be amended so that interested organizations or friends could file complaints on behalf of these individuals.

It requested legislation to end restrictive covenants in real estate transactions that restrict the sale of property to persons of certain races, colour, religion or national origin.

In presenting their brief the labour delegation pointed out that a study of employment application forms, including some of the largest firms in British Columbia, had shown that the majority contained discriminatory questions, including queries on place of birth, citizenship, religion and military service.

## **NUPSE Solidly Against Compulsory Arbitration**

A resolution expressing opposition to any form of compulsory arbitration was unanimously adopted at the annual convention of the National Union of Public Service Employees (CLC), held October 1-4 at Hamilton, Ont.

"As soon as compulsory arbitration comes in, collective bargaining goes out the window," said S. A. Little, the Union's Director of Organization. He accused municipalities of failure to accept their responsibility to bargain collectively with their employees.

Another resolution adopted unanimously demanded that both the production and distribution of natural gas be made a public utility. Francis Eady, education officer, suggested an Ontario natural gas commission similar to that which had led to the creation of the Ontario Hydro Electric Power Commission.

The delegates expressed opposition to Section 78 of the Ontario Labour Relations Act, which permits municipal councils to exclude their employees from the Act.

NUPSE President James E. Clark reported that there had been no marked progress towards merger with the National Union of Public Employees.

Speakers at the convention, which was attended by 150 delegates representing 18,000 workers in civic, utility and hospital employment, included President Claude Jodoin of the Canadian Labour Congress; President W. J. Smith of the Canadian Brotherhood of Railway, Transport and General Workers; and Larry Sefton, Director of District 6, United Stelworkers of America.

James E. Clark was re-elected President of the Union. The three Vice Presidents were also re-elected: K. Cummings, F. O. Rogers and C. C. Mains.

## **ITU Convention Approves Overhaul of Constitution**

At its 100th convention, held in San Francisco August 16 to 22, the International Typographical Union almost unanimously approved an overhauling of its general laws and by-laws.

Delegates approved a transfer from the general laws to the by-laws of those rules that were considered to be related to the union's self-government only. Left in the general laws were those matters considered necessary in a collective agreement.

The ITU had traditionally attached a copy of its general laws to any contract with an employer to ensure that only ITU members would be employed in the composing rooms of printing plants. The United States National Labor Relations Board has ruled that the Taft-Hartley Act made such contracts illegal.

In a statement in the *Typographical Journal*, ITU President Elmer Brown explained that Canadian locals should not alter their previous policy of negotiating closed shop contracts, which are legal in Canada. "The ITU will not approve a contract in Canada that does not provide for a closed shop," he wrote.

### **Bar Non-Union Printing**

The convention adopted an amendment to the by-laws that will prohibit the distribution at ITU conventions of any printed matter "unless it bears either the Allied Printing Trades Council or the Typographical Union label".

The delegates voted down 37 proposed amendments that would have increased

expenditures from the union's general fund, pension and mortuary funds, and defence fund because no proposed amendment provided for additional revenue for the funds.

## **ICWU Approves Merger Talks with Oil Union**

A "Memorandum of Understanding" that contains a schedule for discussions on the proposed merger of the International Chemical Workers Union and the Oil, Chemical and Atomic Workers International Union gained overwhelming approval at the 15th annual convention of the ICWU in Washington last month.

The Union's President, Walter L. Mitchell, was re-elected by acclamation, the first time in six years that there has been no contest for the office. Secretary-Treasurer Marshall Shafer and four of the nine Vice Presidents, including Canadian Vice President Gordon McIlwain, were also returned by acclamation. In the five vice-presidential contests, three incumbents were returned, two defeated.

The question of a change from annual to biennial conventions was deferred until next year. A proposal to change the name of the ICWU to give recognition to workers in the gas, atomic and mining industries was referred to the executive board for further consideration.

A proposal to increase per capita tax to establish a full-time health and safety department was voted down.

## **IWA, Paper Mill Workers Moving towards Merger**

As the result of a pact signed at Portland, Ore., in October, the International Brotherhood of Pulp, Sulphite and Paper Mill Workers (CLC), representing 34,000 Canadian workers, and the International Woodworkers of America (CLC), representing 44,000 Canadians, will likely merge into one union.

In announcing a two-year, 10-point agreement, the unions advised that it was drawn up to determine how well the two can work together. Should they decide to merge, the question will be put to the unions' 1959 conventions.

Under the agreement for merger, the unions will participate in organizing, will exchange copies of collective bargaining contracts, co-ordinate their research, and assist each other in strike or picket action.

Total membership of the IWA is 130,000; of the Pulp and Sulphite Workers, 166,000.

## **Nova Scotia 7th Province To Enter Hospital Plan**

Seven of Canada's 10 provinces are now active participants in the federal-provincial hospital insurance scheme, following the signing last month of an agreement between the federal Government and the Government of Nova Scotia.

The Nova Scotia plan becomes effective January 1, on the same day citizens of the province will start paying a 3-per-cent retail sales tax to finance the province's share of the cost. Taxes on tobacco and liquor also will be increased.

### **Out-Patient Services**

Nova Scotia's plan provides one of the broadest ranges of out-patient services made available so far in any participating province.

It is anticipated that hospital insurance for the first year will cost \$12,756,000. The province's share is expected to amount to \$5,434,000.

The agreement was signed by Hon. J. Waldo Monteith, Minister of National Health and Welfare, and Hon. Richard A. Donahoe, Nova Scotia Minister of Public Health.

## **Housing Starts in August Advance 15 Per Cent**

Starts on the construction of new dwelling units in August advanced 15 per cent to 15,664 from the year-earlier total of 13,578, the Dominion Bureau of Statistics announced last month.

In the January-August period, starts were at an all-time high: 103,634, some 36.5 per cent greater than 1957's like total of 75,937.

Completions in August were 50 per cent higher than in August 1957, 12,707 compared with 8,488. Completions in the first eight months this year were also at a new peak, 80,675, a rise of 19 per cent over last year's comparable total of 67,633.

The previous eight-month record for starts was set in 1955, when 90,849 units were started in the January-August period. The previous record for completions in the year's first eight months was 78,407, established in 1956.

Units under construction at the end of August 1958 numbered 94,889, up 24 per cent from 76,623 under construction at August 31, 1957.

In the United States, housing starts in August rose to 119,000 compared with 111,000 in July and 100,000 in August 1957.

## **Revised Bulletin Ready on Workmen's Compensation**

A revised edition of the Department's bulletin, *Workmen's Compensation in Canada, A Comparison of Provincial Laws*, is now available from the Queen's Printer, Ottawa.

Prepared by the Legislative Branch, the bulletin has been brought up to date as of June 1958, and contains changes made at 1957 and 1958 sessions of provincial legislatures. The previous revision was issued in December 1956.

One of the important changes noted in the bulletin is that the percentage rate of average earnings on which compensation is based was raised from 70 to 75 per cent in New Brunswick, to take effect on January 1, 1959. With this change, compensation for disability will be paid in all provinces but Nova Scotia on the basis of 75 per cent of earnings. In Nova Scotia, the rate is 70 per cent.

The maximum annual earnings on which compensation may be computed were increased from \$3,000 to \$4,000 in New Brunswick in 1957, and from \$2,700 to \$3,000 in Prince Edward Island in 1958. The ceiling on earnings under the Acts is now \$3,000 in four provinces; \$3,500 in one; \$4,000 in three others; and \$5,000 in two provinces (Ontario and Saskatchewan).

In 1958 the monthly allowance to a widow was raised from \$50 to \$65 in Manitoba. In New Brunswick, all widows' pensions which were being paid according to lower scales of benefits were raised to the current level of \$50 a month. Monthly benefits to children were increased in Prince Edward Island and Saskatchewan in 1957 and in Manitoba in 1958. In New Brunswick, provision was made in 1957 for payment of all children's allowances, regardless of the date of the accident, according to the present scale of benefits. In Ontario, the lump sum payment to a widow and the allowance granted for burial expenses were both raised from \$200 to \$300.

The Newfoundland Workmen's Compensation Board was authorized to spend up to \$25,000 in a year in providing disabled workmen with necessary academic and vocational training. In New Brunswick, the Board was empowered to spend up to \$50,000 in a year, instead of \$15,000, in rehabilitation of injured workmen.

The New Brunswick Board was given authority to make safety regulations for the industries of construction, demolition and excavation.

The pamphlet describes the collective liability system of workmen's compensation in effect in each of the Canadian provinces,

and discusses in some detail the main points of the legislation, including administration, coverage, waiting period, medical aid, rehabilitation and accident prevention.

Benefits payable to injured workmen or to their dependants in fatal cases are set out in the form of tables. A table of occupational diseases indicates the provinces in which each disease is compensated.

The bulletin is available in both English and French from the Queen's Printer at 25 cents a copy.

---

## **Textile Wage Index Rose 4.7 Per Cent in Year**

The index of wages for the primary textiles industry rose 4.7 per cent between October 1956 and October 1957, according to the fifteenth of the annual series of reports on wages and hours, which has just been released. Prepared by the Economics and Research Branch of the Department, the bilingual report, entitled *Wages and Hours—Primary Textiles Industry 1957*, may be obtained free from the Queen's Printer.

The wage index numbers of each of the four divisions of the industry also rose during the period, the percentage increases being: cotton yarn and cloth, 3.2; woollen yarn and cloth, 6.4; hosiery and other knitted goods, 5.4; synthetic and silk textiles, 4.4. These increases were slightly larger than those shown in 1956, except in the cotton industry, where the rise was smaller.

The report contains tables which show average wages and numbers of workers for representative occupations in each of the four divisions of the industry for the whole country and for the main geographic regions. Average wages for Canada as a whole ranged from 76 cents an hour for female general labourers to \$2.03 for male round heel knitters, 60 gauge.

Another table shows that the standard work week was 40.7 hours in the cotton yarn and cloth division, 45.1 in woollen yard and cloth, 43.8 in hosiery and other knitted goods, and 44.3 hours in synthetic and silk textiles.

---

## **All U.S. Auto Firms Sign Similar Pacts with UAW**

Three-year agreements with the United Automobile Workers signed early in October by General Motors Corporation and Chrysler Corporation in the United States, and by American Motors about two weeks later, were the same in their main provisions as the contract signed by the Ford Motor Company and the union in the middle of September (L.G., Oct., p. 1103).

## manpower and labour relations

ECONOMICS AND RESEARCH BRANCH

## REVIEW

### Current Manpower Situation

Employment has shown little change since the notable recovery of the early spring months. After adjustment for seasonal variation, the employment estimates have fluctuated since that time within a fairly narrow range. In October it was a little over 1 per cent above the March low, and a little less than 1 per cent below the 1957 peak.

The pause in the recovery of employment is partly attributable to temporary factors, many of which have been eliminated in recent weeks. By the end of October strike settlements had been achieved in the construction, steel and shipbuilding industries; logging in British Columbia resumed after an enforced shutdown of unusual length, and automobile production was fully under way after a series of interruptions. These developments, while not in themselves a strong stimulus to a general advance in employment, have cleared away some of the obstacles to further recovery.

The maintenance of employment levels in the past month or two has depended to a considerable extent on the increasing requirements of various service activities. Education and health services in particular have absorbed a considerably greater number of workers this autumn than they did in past years. The number employed in the service industry as a whole in October was estimated to be 1,312,000, almost 7 per cent greater than a year ago. In finance, insurance, real estate and public utilities employment was moderately higher than a year ago, but in all other industries it was down.

Residential construction increased again in October, raising the annual rate to a level not far short of the record achieved at the beginning of this year. In non-residential construction, activity was still well down from a year earlier although the decline appeared to have been halted. In the third quarter, the value of contracts awarded for both business and engineering projects showed an encouraging increase over last year, more than offsetting a decline in the value of industrial work. This fall, construction employment fell off more sharply than usual, partly as a result of labour disputes in Toronto and Vancouver. Hiring of a considerable number of workers followed strike settlements in these centres.

The situation in manufacturing also showed some improvement towards the end of October. Steel and shipbuilding workers were back at work following strike settlements although the strike continued at the International Nickel plants in Sudbury and Port Colborne. The automobile industry was at full-scale production following a temporary shutdown of General Motors plants caused by a shortage of imported parts. There were some further layoffs in

# LABOUR FORCE TRENDS - CANADA

--- 1957 — 1958

railway rolling stock, aircraft and ship-building, but production in most other sectors of manufacturing appeared to be stable or rising moderately.

Unemployment and less than full-time employment were still at a considerably higher level than last year. The number working less than a full week because of short time or turnover was estimated to be 75,000 in October, compared with 65,000 a year earlier. The number on temporary layoff was 16,000 (12,000 a year earlier) and those without jobs and seeking work numbered 313,000 (211,000 last year). The estimate of job seekers was 48 per cent greater than in the same period last year. Between August and October it rose by 12 per cent; last year the increase over this period was 20 per cent. In early November registrations at offices of the National Employment Service were increasing more slowly than last year although they were still at a considerably higher level.

A comparison between current National Employment Service data and those of a year ago reveals a greater number of registrations from both male and female workers, the increase in males being somewhat more pronounced. Among males, the increase was most marked in the 24-44 age group. Registrations of female workers increased most in the "under 20" age group, suggesting that new entrants to the labour force are experiencing difficulty in finding jobs.

Duration of claims for unemployment insurance lengthened moderately over the year. At the end of August, those claiming insurance for three months or more represented 31 per cent of all claimants, compared with 27 per cent a year ago. The number claiming for one month or less was 43 per cent of

\* See inside back cover, October issue.

the total, compared with 47 per cent last year. Both male and female workers were claiming for longer periods, although here again the increase was more pronounced among male claimants.

## Recent Production and Employment Trends

The Canadian economy appears to have been marking time since mid-summer after making a fairly strong recovery earlier in the year. Industrial production, on a seasonally adjusted basis, increased from a low of 272.0 (1935-39=100) in December to 279.9 in June but edged down again in July and August. Non-farm employment (seasonally adjusted) expanded by 70,000 between February and July but by October it was only 44,000 above the February low. The recent decline in output and employment can be attributed to a large extent to industrial disputes which involved (directly or indirectly) upwards of 50,000 workers this fall.

Increases in production during the first half of the year have been fairly widely diffused. Moreover, some of the largest gains were recorded in industries which were hardest hit last year. Output of durable goods industries as a whole showed a rise of 6.2 per cent, after allowing for seasonal factors. Production of non-durables, which was less sharply curtailed during the business downturn, showed a more moderate rise. Mining production, seasonally adjusted, increased by 6.1 per cent from the November low, recovering about half of the earlier loss.

The over-all recovery was hampered by weaknesses in a number of key industries. Automobile plants have been operating at a relatively low level all year owing to reduced purchases of new motor vehicles; in the first nine months sales were 10 per cent lower than in the same period last year. Ship-building and railway rolling stock also showed production declines owing to reduced orders. Most other durable goods industries fared relatively well.

Electrical apparatus, household furnishings and building materials showed a noticeable improvement, partly because of the stimulus provided by a record rate of house-building.

Output of non-durables has increased fairly steadily since the January low, although the over-all gain was rather modest. In August, the index stood at 246.3, which was 3 per cent below the 1957 peak. The improvement extended across a broad front, with paper products, textiles, chemicals, food and beverages showing gains.

Buying power was maintained at a fairly high level throughout the recent business decline and has shown additional strength during recent months. Apart from a moderate drop in the first quarter of 1957 personal disposable income has either advanced or held steady since the beginning of the business downturn. Purchasing at the retail level has generally failed to keep pace with the expansion of income, though the current rate of spending is higher than a year ago. Retail sales (seasonally adjusted) registered marked increases between July and August after moving irregularly in the first half of the year. The largest gain occurred in the grocery and combination stores, partly a reflection of higher food prices.

Employment expansion this year (after allowing for seasonal factors) was centered mainly in the service and distributive industries. In the goods-producing industries employment has either continued to decline or has levelled off since the beginning of the year. This tendency for manufacturing employment to lag behind production is typical of the early stages of recovery. Reductions in part-time work and increased hours of work normally precede requirements for additional help. Thus, average hours worked in manufacturing (seasonally adjusted) increased from a low of 39.6 in November 1957 to 40.4 in August 1958.

Currently, most elements of demand appear to be strengthening. The major exception is investment in machinery and equipment, which has dropped very sharply from the high level of the past two years. While domestic manufacturers have borne only part of the burden of this decline (most of the impact having fallen on imports) the effect has nevertheless been considerable, particularly in the manufacture of machinery and other iron and steel products.

Other sources of demand have strengthened. A substantial reduction in inventories of manufactured goods has already taken place, so that new orders are now more likely to result in increased production. At the retail level the stock-sales ratio is lower than last year, though still somewhat higher than in 1956.

Potential buying power has expanded over the past year. From the second quarter of 1957 to the second quarter of 1958 consumer expenditures (after allowing for an increase in prices) increased by only about 1 per cent, while real disposable personal income rose by 6 per cent. This development, together with the net reduction that has taken place in consumer debt, clears the way for an increase in consumer buying.

Government action provides a third major source of strength in the current situation. In the current fiscal year, total expenditure on goods and services by all three levels of government is expected to be about 7 per cent greater than last year. The largest part of the increase is at the provincial and municipal levels. The net increase in the direct demands of the federal Government may be close to 4 per cent. To a far greater extent, the stimulus of federal government action lies in loans and other transfers of funds, such as the substantial support that has been given to housing.

(a) Distribution of these figures between male and female workers can be obtained from *Labour Force*, a monthly publication of the Dominion Bureau of Statistics. See also inside back cover, October issue.

(b) See inside back cover, October issue.

(c) These percentages compare the cumulative total to date from first of current year with total for same period previous year.

(d) Due to Thanksgiving Day being in the survey week.

# Labour-Management Relations

At mid-November collective bargaining was underway in many industries throughout the country, including pulp and paper, building construction, aircraft and public utilities. Significant settlements were reached in the steel industry in Hamilton and Sault Ste. Marie. The time loss caused by strikes and lockouts in the four-week period ending in mid-October was substantially higher than in the previous four-week period, but in recent weeks strike activity has again diminished.

Agreements in the steel industry, covering 16,000 workers, highlighted the bargaining scene. A three-year contract with the Algoma Steel Corporation was signed early in November in Sault Ste. Marie, followed by a contract of similar duration with the Steel Company of Canada in Hamilton, which terminated a strike lasting three months.

Important settlements also took place in the shipbuilding, construction and pulp and paper industries. Agreements were reached covering some 7,500 workers in the pulp and paper industry in Ontario and Quebec. The work stoppage affecting approximately 15,000 construction workers, precipitated by a dispute between the Toronto Builders' Exchange and the Plasterers and Cement Masons Union, ended on November 3 and at the same time a three-year contract was signed between the Exchange and the carpenters' union. Agreement with the plasterers was reached on November 6. After lengthy conciliation, a two-year agreement was signed between the City of Toronto and some 2,400 municipal employees. In Quebec, a strike involving 1,500 shipbuilders was ended with the signing of a 2½-year contract with Davie Shipbuilding Limited.

## General Wage Changes

No general wage increases in the period October 1, 1957 to September 30, 1958 were reported by 52 per cent of the 989 establishments that responded to the department's semi-annual wage change survey.\* This represents a considerable rise in the percentage reporting no increase during the past two years.

The table below shows that the trend this year has been towards fewer wage increases in all the ranges shown except in the "less than 5 cents" group.

The term "general increase" means those affecting more than 50 per cent of an establishment's non-office employees.

GENERAL WAGE RATE CHANGES, 1957-1958

| General Wage Rate Changes in Cents per Hour | Per Cent of Establishments           |                                      |                                      |

| 15 cents and over.....                      | 7                                    | 8                                    | 4                                    |

\*Every six months the Economics and Research Branch of the Department of Labour surveys approximately 1,000 manufacturing and non-manufacturing establishments of varying size, not all of which have collective agreements. The results of this survey should be distinguished from those of recent agreement settlements that were published last month. (L.G., Oct., p. 1090).

# Manpower Situation in Local Areas

## ATLANTIC

Total employment changed very little in the Atlantic region during October. At October 18, the number of persons with jobs was estimated at 505,000, some 3,000 fewer than in the previous month and 24,000 fewer than in the previous year. The construction industry showed further improvement, helping to offset layoffs in fishing and food processing. Bad weather was reported to have hampered the fishing industry; most canneries were operating on a reduced scale. A smaller than average potato crop was harvested during the month, providing temporary jobs for students, housewives and other seasonal workers. Forestry employment increased moderately in October but remained lower than last year. Coal mines in the Sydney area operated steadily after experiencing a series of shutdowns; but the Springhill Colliery, which was the scene of the recent mine disaster, remained closed.

Current employment trends in manufacturing show little conformity among the four provinces in the region. In New Brunswick and Prince Edward Island total manufacturing employment, on a seasonally adjusted basis, has been rising since early in the summer. Nova Scotia and Newfoundland, on the other hand, have recorded a considerable decline in employment during recent months; in September the year-to-year losses amounted to 6 per cent and 4 per cent respectively.

In New Brunswick the upturn in manufacturing employment was fairly widely diffused. Increases were registered in sawmilling, wood and paper products and foods. Weaknesses persisted in transportation equipment. Total manufacturing employment in the province showed an advance of 5.8 per cent since the low point in March, after allowing for seasonal factors, and was fractionally higher than a year ago.

In New Brunswick the upturn in manufacturing employment was fairly widely diffused. Increases were registered in sawmilling, wood and paper products and foods. Weaknesses persisted in transportation equipment. Total manufacturing employment in the province showed an advance of 5.8 per cent since the low point in March, after allowing for seasonal factors, and was fractionally higher than a year ago.

Manufacturing is of less relative importance in Prince Edward Island than in other parts of the region. Nevertheless, the expansion which has taken place in this province over the past year is significant. The number of workers employed in manufacturing in September was estimated to be about 300 higher than in the same month last year.

In Nova Scotia the declining trend of employment in manufacturing has been shared by virtually all industries. Iron and steel production showed more stability during recent months than earlier this year but was still lower than last year. Shipbuilding and railway rolling stock, which figured prominently in the decline earlier in the year, showed a slight improvement in recent months. Total manufacturing employment (seasonally adjusted) declined by about 7 per cent between January and September, and almost 10 per cent during the past year.

→The areas shown in capital letters are those that have been reclassified during the month; an arrow indicates the group from which they moved. For explanation of classification system, see inside back cover, October issue.

Employment losses in manufacturing have been relatively modest in Newfoundland since the beginning of the year. In September total manufacturing employment (seasonally adjusted) was only about 12 per cent lower than in January. Staff reductions in pulp and paper mills were mainly responsible for the initial downturn in employment in this province. This sector of manufacturing has shown more stability during recent months though at a much lower level than last year. In September employment in pulp and paper manufacturing was almost one-fifth lower than last year.

Five of the 21 areas in the region were reclassified during the month, three from balance to the moderate surplus category and two from moderate surplus to the substantial surplus category. At November 1, the area classification was as follows (last year's figures in brackets): in substantial surplus, 2 (1); in moderate surplus, 14 (15); in balance, 5 (5).

### Local Area Developments

**Halifax** (metropolitan) remained in Group 3. Construction employment showed a further increase in this area as several new projects were initiated during the month. Manufacturing employment continued to show a year-to-year decline owing to reduced activity in the heavy industries. Clothing and confectionery plants were operating at peak production. The logging industry was very quiet during the month as the summer cut was virtually completed.

**St. John's** (metropolitan) remained in Group 2. Total employment changed very little in this area as some of the major industries showed conflicting trends. Construction activity advanced sharply and for the first time this year a shortage of bricklayers was reported. The fishing industry was hampered by bad weather and a shortage of bait so that the processing plants were very slack. Total landings of fish in Newfoundland showed a 27 per cent year-to-year decline in September. A temporary shutdown occurred at the Wabana Ore Mines in Belle Island during October, resulting in the layoff for one week of 1,400 workers. This mine has been operating at reduced capacity for several months, largely because of a decline in orders from the Dominion Steel Plant at Sydney. Total employment in the St. John's area was virtually the same during October as a year ago.

**Corner Brook** (major industrial) was reclassified from Group 2 to Group 1. Forestry employment declined during the month, reaching a much lower level than last year. Pulpwood requirements at Bowaters Pulp and Paper Mills have been smaller than usual this year owing to the fact that the mills have been operating only five days a week. An increase in institutional building was reported in this area during October, which maintained construction employment at a fairly high level.

**Truro and Bathurst** (minor) were reclassified from Group 3 to Group 2.

**St. Stephen** (minor) was reclassified from Group 2 to Group 1.

### QUEBEC

In the week ended October 18, the number of persons with jobs in the Quebec region was estimated at 1,635,000, some 5,000 more than the previous month and 15,000 more than in the previous year. The labour force increased more than usual for this time of year and recorded a year-to-year gain of 2.9 per cent. The construction industry remained active, reflecting the high level of housebuilding, though road building declined in some areas. Pulpwood

logging employment continued to rise though somewhat more slowly than it did in September. Manufacturing employment declined moderately during the month owing to layoffs in shipbuilding and railway rolling stock. Food processing and meat packing plants were busy but staff reductions occurred in the paper products industry.

Apart from seasonal influences, industrial employment showed a moderate decline between June and October. Strike activity and layoffs in the transportation industry were mainly responsible for the drop. Various parts of light manufacturing such as wood and paper products recorded employment gains during recent months but these were modest compared with the losses in shipbuilding, aircraft, and railway rolling stock. Manufacturing employment (seasonally adjusted) declined by about 2 per cent between

June and September. The reduction in total industrial employment was somewhat more moderate.

At November 1, the area classification was the same as a month earlier (last year's figures in brackets): in substantial surplus, 1 (1); in moderate surplus, 19 (13); in balance, 4 (10).

### Local Area Developments

**Montreal** (metropolitan) remained in Group 2. Weaknesses persisted in several parts of manufacturing so that total industrial employment was still lower than in October last year. Aircraft and aircraft parts, railway rolling stock and iron and steel products accounted for most of the 7-per-cent drop in manufacturing employment over a year ago. Textiles, clothing, food products and the electrical goods industries showed moderate year-to-year employment decreases in output and employment. Construction employment declined moderately during September and October as some of the larger industrial projects were completed. Housebuilding and road construction showed continuing strength.

**Quebec-Levis** (metropolitan) remained in Group 2. Employment in the area was about 7 per cent lower in September than in the previous year, largely because of reduced activity in manufacturing and logging. At mid-October some 11,000 men were cutting pulpwood in the St. Maurice region compared with 12,000 at the same time last year. The shipbuilding industry had been hampered by a nine-week labour dispute which was settled in October.

## ONTARIO

Employment in Ontario declined during the month. The number of persons with jobs at October 18 was estimated at 2,166,000, a decline of 15,000 from the previous month and of 20,000 from the previous year. The month-to-month decline was entirely due to agriculture. Unemployment increased during the month.

Economic activity in the region was retarded by the effect of strikes in Hamilton, Sudbury and Toronto, which involved more than 40,000 workers, and by work stoppages in the United States, which temporarily interrupted the supply of some automotive parts to Canada. As a result, total non-farm employment remained at about the level of the previous month. However, the settlement of the labour-management disputes in Hamilton and Toronto at the beginning of November removed an obstacle to the resumption of normal activity.

Various manufacturing industries were affected by shortages of materials which resulted in extensive temporary layoffs. In addition, seasonal layoffs took place in canning and food processing. The automobile industry, which had made a promising start on the production of the new car models, received a temporary setback as a result of work stoppages in the industry in the U.S. This caused temporary plant shutdowns at Oshawa and Windsor and layoffs in the motor vehicle and parts supply industries involving about 10,000 workers. As a result, motor vehicle production in October was much below the monthly average for the year. By the end of October, supplies from the United States began to flow again, and the motor vehicle industry was expected to resume normal production in November. Some durable goods industries began to show the effect of steel shortages, although conditions in this industry varied. Activity in the agricultural implements industry remained at a high level, as it did in the radio and television industry. Layoffs and a short-week work pattern continued in the textile industry. The construction industry, which had shown signs of slowdown in September, reversed its trend during October, due particularly to residential construction. The number of housing units started in major centres during the month rose sharply, bringing total starts near the record month of this year. Employment in forestry continued to decline, in contrast to the improvement usual at this season.

Seven of the 34 areas in the region were reclassified during the month, all to categories indicating higher unemployment. At November 1, the area classification was as follows (last year's figures in brackets): in substantial surplus, 1 (1); in moderate surplus, 18 (10); in balance, 15 (23).

### Local Area Developments

**Metropolitan Areas where classification unchanged:** *Hamilton* (Group 2). Total employment showed little change during the month but was lower than a year ago. New hirings were reported in the automobile, farm implements, and rubber products industries. A large textile plant discontinued operations, laying off about 500 workers. *Ottawa-Hull* (Group 3). Most industries operated at a high level, and total employment was higher than last year. Forestry operations got underway at a reduced level. *Toronto* (Group 3). The employment situation showed little change from last month

or from last year. In manufacturing, production and sales were generally maintained at the improved level of last month. Steel shortages caused temporary layoffs in some parts of the iron and steel industry. The settlement of the dispute in the construction industry at the beginning of November resulted in a substantial amount of rehiring in the industry.

**Windsor** (metropolitan) was reclassified from Group 2 to Group 1. Employment showed a seasonal decline, the result of seasonal layoffs in agriculture and food processing, and was much lower than a year earlier. The automobile strike in the United States resulted in a temporary shutdown of the General Motors plant. The construction industry showed signs of weakening.

**Timmins-Kirkland Lake** (major industrial) was reclassified from Group 3 to Group 2. Termination of the pipeline construction in the area and a seasonal decline in activity in sawmills were mainly responsible for the reclassification.

**Major Agricultural Areas reclassified from Group 3 to Group 2:** *Barrie* and *Chatham*: Seasonal decline in agricultural activity and termination of seasonal operations in the canning and food processing industry resulted in the reclassification of both areas.

## PRAIRIE

Employment in the Prairie region declined during the month. Persons with jobs at October 18 were estimated at 1,041,000, some 6,000 fewer than the previous month but 17,000 more than a year earlier. Unemployment increased moderately during the month but was relatively lower than in any other region. Agricultural employment dropped seasonally by 19,000 from the previous month and by 11,000 from the previous year, whereas non-agricultural employment rose by 13,000 over the month and by 28,000 over the year.

The notable increase in non-agricultural employment was due in large measure to an unprecedented rise in construction, particularly home construction.

The number of houses started in larger centres during the month rose sharply from a month earlier and was almost three times as high as a year ago. Total manufacturing employment showed considerable strength during the month although some weaknesses appeared in iron and steel and transportation equipment. Small seasonal layoffs occurred in the clothing industry, which has completed the fall and winter production. Forestry operations are gradually getting underway, and employment in forestry showed seasonal increases in most areas. The transportation industry showed little change; minor layoffs of railway crews were offset by recalls from grain elevators, which showed a considerable increase in activity. Employment in trade and finance remained steady. The service industries showed the usual seasonal decline in employment.

Only two minor areas out of the 20 labour market areas in the region were reclassified, both from the balance to the moderate surplus category. At November 1, the area classification was as follows (last year's figures in brackets): in moderate surplus, 4 (0); in balance, 16 (20).

### Local Area Developments

**Calgary** (metropolitan) remained in Group 3. Employment showed little change from the high level of the previous month and remained slightly lower than a year ago. Unemployment increased slightly over the month. The high level of employment was due mainly to construction, in which employment was the highest in years. Activity in the iron and steel industry was unchanged from the previous month. There were reported shortages of skilled construction workers and of certain types of technicians and mechanics.

**Edmonton** (metropolitan) remained in Group 3. Employment changed little over the month and was only slightly below last year's level. Construction activity, aided by exceptionally mild weather, continued buoyant. In manufacturing, full production generally prevailed, with the exception of iron and steel, oil refining, sawmills and aircraft repairs, which showed a decline in activity.

**Winnipeg** (metropolitan) remained in Group 3. Unemployment increased seasonally during the month, but labour demand was higher than a year earlier. The increase in unemployment was due mainly to a seasonal decline in the clothing industry and in agriculture. Most manufacturing industries remained steady. Construction remained very active, with a resulting shortage of bricklayers and plasterers.

**Fort William-Port Arthur** (major industrial) remained in Group 2. Employment declined during the month and was lower than a year earlier. Activity in the woods was slowing down. Grain elevators have increased their activity, recalling a number of workers. Employment at the Canadian Car Company continued to decline because of lack of orders; since June, about 400 workers have been gradually laid off.

### PACIFIC

In spite of a seasonal downturn in employment, business conditions in the Pacific region in October were more buoyant than at any time this year. The improvement stems principally from the settlement of industrial disputes in September, and the resumption of logging operations after a prolonged shutdown due to fire restrictions. Seasonal layoffs in food processing and tourist establishments were offset to a considerable extent by rehiring in logging and construction.

The number of persons with jobs has been estimated to be 517,000 in mid-October, a drop of 5,000 from September. This represents a less-than-seasonal decline. The gap between this year and the year earlier narrowed to 4,000 from 20,000 this summer.

The strength of the lumber market has been one of the main factors in the improved employment picture. Shipments have increased this year to all markets, with gains of close to 20 per cent to the United States and the

United Kingdom. Steady hiring was in progress during October in virtually all logging areas.

Labour demand was also strengthened by the record level of housebuilding and the renewed upswing in commercial and industrial building activity in Vancouver following the strike settlement in September. Incomes of the region were boosted by the record sockeye salmon run, which made the value of fish landings this September \$6.5 million better than in September 1957.

Non-seasonal gains in construction and logging were offset to some extent by reduced labour requirements in shipbuilding. During recent months shipyards have been releasing staff fairly

steadily and at latest report employment in the industry was down 19 per cent from a year ago. The new navy shipbuilding program recently announced by the Government apparently will have little employment effect before next summer.

Unemployment in the region rose moderately during the month, increases in the northern and interior areas being partly offset by declines in the logging areas of Vancouver Island. The classification of the 11 labour market areas in the region on November 1 was as follows (last year's figures in brackets): in moderate surplus, 7 (5); in balance, 4 (6).

### Local Area Developments

**Vancouver-New Westminster** (metropolitan) remained in Group 2. The prolonged dispute in the construction industry left a considerable backlog of work. Rehiring of construction workers and the movement of logging crews to out-of-town points offset layoffs in other industries. Wholesale firms report heavy sales, indicating an optimistic outlook by retailers. Unemployment, which usually rises at this time of year, remained unchanged during the month.

**Victoria** (major industrial) remained in Group 2. Unemployment increased moderately, chiefly as a result of slackening production in shipyards and industrial machinery plants.

**Okanagan Valley** (minor) was reclassified from Group 3 to Group 2. Heavy seasonal layoffs followed the completion of fruit harvesting. As in most interior areas, the increase in unemployment was smaller than expected, owing to the strong demand for logging labour.

## Successful Rehabilitation—XII

Twelfth in a series of articles on success in rehabilitation achieved through the precise matching of the handicapped person to the job

*This is the twelfth in a series of articles illustrating that when a community co-operates in the treatment, training, guidance and placement of a disabled person, he can often meet all the essential requirements of a job. It was written by Leslie C. Morrison, Pacific Regional Public Relations Officer, Unemployment Insurance Commission.*

Since the Second World War, the treatment and care of persons physically handicapped through injury or disease has progressed with tremendous strides. But it is not the medical profession's responsibility to train and counsel the disabled person for suitable employment. This has to be undertaken by other agencies and services in the community, of which an important one is the Special Placements Division of the National Employment Service.

One typical example of the success of this community co-ordination on behalf of Canada's disabled is the case of young Peter Coleman of Victoria, B.C. Peter was in his last year at high school when, at the age of only 16 years, he was smitten with polio, which left him completely paralyzed from the waist down.

Peter's doctor took more than a clinical interest in his case and, through the physiotherapy department of the Jubilee hospital, arranged for him to enter the G. F. Strong Rehabilitation Centre in Vancouver for an extended course in remedial and vocational training.

At the Centre, this wheelchair patient soon learned to do a great many things for himself that previously he had never thought possible. He was also encouraged to build up confidence in his remaining abilities and to realize that, despite his physical handicap, he could still live a useful and productive life.

Evidence that this rehabilitation training was successful is shown by the fact that, shortly after "graduating" from the Centre, Peter obtained a job as despatcher with a Victoria taxi company. This was only a temporary position, however, and when it came to an end, he applied for another job at the local office of the National Employment Service.

Referred to the Special Placements Division, Peter was given expert counselling. It was pointed out to him that, while taxi despatching and similar non-productive employment offered a certain degree of finan-

cial security, he should set his sights on obtaining a position calling for a little more initiative and talent and which, in addition, would pay him a better salary.

As a result of this interview, Peter decided to return to high school and study for his junior matriculation. And, as he had shown an aptitude for office work, he was further advised to take a clerical course.

He passed both the matriculation examination and clerical course successfully, and again reported to the National Employment Service.

The Special Placements Officer personally recommended him to the personnel officer of H.M.C. Dockyard in Esquimalt, where a vacancy for a clerk existed in the audit department of the treasury branch. The personnel officer was impressed with Peter's employment potential and suggested he make application for the position through the federal Civil Service Commission. This the young man did, and there was no happier person when he was informed later that he was the successful candidate.

Peter was fortunate in that his immediate supervisor, R. M. Anderson, District Treasury Officer, had had previous experience with physically handicapped personnel on his staff when he occupied a similar position with the Department of National Defence in London, Ont., and knew, from this experience, that given the opportunity and right sort of job, a disabled employee can perform his duties just as efficiently as a non-handicapped worker. Consequently, he took a special interest in his new employee.

One of the first things Mr. Anderson did was to have a portable ramp made so that Peter could safely navigate his wheelchair over a steep step at the rear of the building. Next, he arranged with the Navy to bulldoze a special, private car parking space for him, conveniently located only a few feet from the rear entrance.

Peter has been with the treasury department for nearly 18 months and, according to his supervisor, is doing a most excellent job; his attendance record is outstanding.

"He is gradually assuming more serious responsibilities," Mr. Anderson stated in a recent interview, "and I am confident, if he continues his studies and work enthusiasm, that he will go a long way in the Civil Service."

# U.S. Group Urges Expansion of Training Programs for Disabled

National Planning Association says programs should be accompanied by job placement programs and also by adequate follow-up procedures

Enlargement of existing federal, state and local government programs to provide suitable employment opportunities for the disabled, and to aid voluntary private efforts of this kind, has been urged by the National Planning Association. This organization was established in the United States in 1934 as "a non-profit, non-political organization devoted to planning by Americans in agriculture, business, labour and the professions".

Training programs for handicapped persons should be increased, the Association asserts, and the programs should be accompanied not only by job placement programs but also by adequate follow-up procedures to see whether handicapped employees stay employed.

Employers, private organizations, universities, and government agencies are urged by the Association to undertake more research on factors involved in employing handicapped persons. In this way they will be able to learn more about training and placement procedures and how successful they are in assuring that the disabled employee can hold his job.

\* \* \*

Under the state-federal program of vocational rehabilitation in the United States, nearly 90,000 women have been rehabilitated in the past four years, more than a third of all persons rehabilitated through this program. About 70 per cent of the women rehabilitated through the program become wage-earners; most of the others are homemakers, responsible for the care of their homes and children.

These are some of the facts revealed in a new pamphlet, "Help for Handicapped Women," published by the U.S. Department of Labor's Women's Bureau, in co-ordination with the Office of Vocational Rehabilitation of the Department of Health, Education, and Welfare.

As a result of vocational rehabilitation many handicapped women are able to enter occupations where there is a serious shortage of trained workers, the pamphlet states. More than 1,000 of the 23,000 women rehabilitated in 1956 were professional or technical workers. Clerical employment attracted nearly 5,000 of the women rehabilitated that year.

The recession in the United States this year has made it difficult to find employment for all persons but the physically handicapped did not experience any more difficulty in finding employment than the non-handicapped, reports Dr. Howard A. Rusk in an article in the *New York Times*.

The decline in the job placement of physically handicapped during the first seven months of 1958—133,982 placements compared with 165,645 in the same period last year—was in about the same ratio as that of all registrations; total placements declined to 2,758,801 from 3,320,678.

## Personnel Notes

Dr. Albiny Paquette has retired after 14 consecutive years as Minister of Health for Quebec Province.

After 23 years as Managing Director of the Society for Crippled Civilians at Toronto, B. E. Parks has retired. He was succeeded by George B. Smith.

Dr. Bruce H. Young has been appointed Medical Director of the Frontenac Rehabilitation Centre at Kingston, Ont. He was formerly superintendent of the Ontario Workmen's Compensation Board Rehabilitation Centre at Malton.

The Occupational Therapy and Rehabilitation Centre in Montreal now has its own specialist in physical medicine and rehabilitation, Dr. Kenneth Sowden, who for the past five years has been consultant in physical medicine to the Southeast Metro Regional Board in Kent, England. A member of the attending staff at the Royal Victoria Hospital in charge of physical medicine and rehabilitation, his services with the Centre will be part-time.

\* \* \*

A 246-page manual, intended as a comprehensive guide for professional workers dealing with the rehabilitation of deaf-blind persons, has been produced by the U.S. Office of Vocational Rehabilitation and the Industrial Home for the Blind. The manual refers to communication as the first and greatest need of these doubly afflicted persons.

# The Future of Women in Industry

Conference sponsored by National Women's Advisory Committee of the Trades Union Congress examines and discusses four aspects of question: automation, part-time work, technical education, and on-job training

"The Future of Women in Industry" was the theme of a one-day special information conference held October 7, 1958 in London, England, under the auspices of the National Women's Advisory Committee of the British Trades Union Congress.

In his talk "on 'Automation and the Woman Worker,'" F. Chappell, management consultant, outlined the more important problems presented by the growing use of automation. He found no specific problems concerning women alone, but stated that in certain industries women would be more seriously affected than men because the type of jobs they do more readily lend themselves to automatic operating and processing.

Miss B. N. Seear of the London School of Economics, who spoke on "Part-Time Work for Women," noted the tendency to regard part-time work as a make-shift arrangement not worthy of systematic attention. Far from being a temporary expedient, however, she believes that part-time employment, particularly for married women with young children, is likely to become permanent and could with advantage be considerably expanded. Miss Seear concluded that many of the disadvantages of this type of employment could be reduced and the advantages increased so that permanently employed part-time workers could become useful members of the labour force.

Under the heading "Technical Education for Girls," Miss B. B. Briant of the British Ministry of Education discussed technical training facilities for girls in Britain today. Most technical colleges have an entry age of 16 or more and since the statutory school-leaving age is 15, many adolescents who might benefit from further training drift into employment often of a "blind-alley" nature. Efforts are being made to bridge this gap by the provision of pre-vocational courses or extended school courses. Technical training facilities have been expanded considerably since the war with a resultant acute shortage of properly qualified teachers, despite the creation of three Technical Teacher Training Colleges since 1944. Girls are being encouraged to take the full technological courses, which have always been

open to them on equal terms with boys. The number doing so is still very small; most girls entering technical schools still enroll in the "women's subjects," e.g., hair-dressing, catering, and child care.

The case for on-the-job training of semi-skilled workers was presented by Miss Winifred Raphael, of the National Institute of Industrial Psychology. The need for induction training to teach new workers about their working environment, as well as job training to give them the required skill and knowledge, was stressed. For a training scheme to succeed, the speaker concluded, it must be practical and simple and must have the backing of the unions, foremen and managers concerned.

## Mrs. Rex Eaton Receives Honorary LL.D. Degree

Mrs. Rex Eaton, OBE, President of the National Council of Women, received an honorary Doctor of Laws degree (LL.D.) at the autumn convocation of the University of British Columbia. Mrs. Eaton has been a leader in the women's movement in Canada for many years.

During the war years she was in the service of the Department of Labour at Ottawa as Director of Women's Employment in Canada and as Associate Director of National Selective Service.

Mrs. Eaton also assisted in organizing plans to recruit women for war industries during the Second World War, and was chairman of the Labour Department's Coordinating Committee on Training. She is a native of Springhill, N.S.

The Women's Bureau was established to help bring about a better understanding of the problems of women workers and their jobs and to promote good labour standards in all fields of women's employment. It studies the particular problems of women workers and publishes the results of such studies, and makes available information regarding occupational opportunities for girls and women.

## 50 Years Ago This Month

Most wage rates remain stationary but rates in lumbering industry and in agriculture decline during 1908. Two-month strike of CPR mechanical and car department employees, 5½-month strike at Saint John terminated

The most notable change in wages compared with the previous season was the lower rate prevailing in the lumbering industry, said the *LABOUR GAZETTE* for November 1908. Otherwise wages were reported to be for the most part stationary throughout Canada. Harvesters' and threshers' wages were about the same as in 1907 with a downward tendency in some districts.

The shingle mills at Saint John, which had been completely shut down since March 15 owing to a strike of sawyers and bunchers, reopened on October 1 when the strikers returned to work on the employers' terms. About five firms and 72 men were involved. The strike was over a reduction in wages of 10 per cent, from \$2.20 to \$2 a day.

Another strike settled in the early part of the month was that of employees in the mechanical and car departments of the CPR, which had begun on August 5. The cause of the strike was the serving of a notice by the company on April 1 of its intention to cancel on May 1 the agreement with its employees in the mechanical department, on western lines. In effect, the notice, the application for conciliation said, provided for a "contemplated" reduction of wages on and after May 1; for the cancellation of articles covering trade protection and the rights of committees of employees to meet company officers on behalf of the men; for the removal of restrictions on the number of apprentices and of clauses covering the advancement of apprentices; and for changes in certain shop rules.

One of the changes the company had proposed to make affected a rule which provided for a reduction in time worked by the whole staff instead of the laying-off of men during periods when there was a shortage of work. The company wanted to lay off men rather than reduce working time, and the union had opposed this. The conciliation board recommended against any change in the rule.

The board supported the company in recommending that a new Class 2 should be added to the trade of boilermaker at a rate of 40 cents an hour. This appeared to be one of the most serious causes of dispute,

and the union representative on the board in a minority report disputed the findings of the majority on this question. He asserted that the setting up of the new classification "places in the hands of foremen as powerful a weapon as the 'Sliding Scale' and may be used just as unscrupulously". He said that it would be used as a means of reducing the wages of a large number of employees.

The employees rejected the board's report and went on strike, about 5,000 being affected.

On October 4, after the strike had lasted two months, the employees decided to accept the award of the conciliation board, and they returned to work immediately in "so far as the company was able to find positions for them".

"During the autumn of 1907 an *influx of labourers* (The italics were used by the November 1908 *LABOUR GAZETTE*) occurred at Vancouver, B.C., as a result of misleading statements published in the press with respect to the supply of labour in that city. In order to relieve the situation thus created the city and provincial government were compelled, during the winter of 1907, to open relief works, and to provide cheap shelter and meal tickets.

"To safeguard against a repetition of these conditions" the mayor of Vancouver sent a notice to various newspapers published in the Prairie Provinces warning the public that "for the present winter the labour market in Vancouver is rather overdone" and that in view of what had happened the previous fall the city would "only take care of actual residents who have resided here at least six months".

It was announced by the general manager of the British Columbia Electric Railway Company that the bonus to be given to the employees in accordance with the profit-sharing scheme instituted in 1902 will be \$66.78 for each employee, the *LABOUR GAZETTE* reported. The distribution was to be made equally to "all employees of the tram company all over its system, without regard to rank".

# INTERNATIONAL LABOUR ORGANIZATION

## Meeting on Conditions of Work and Employment of Nurses

Nursing experts from 15 countries adopt series of recommendations designed to reduce shortage of nurses by improving their conditions of work and by ensuring more efficient utilization of existing personnel

The *Ad Hoc* Meeting on Conditions of Work and Employment of Nurses convened by the International Labour Organization adopted a series of recommendations designed to reduce the shortage of nurses by improving their conditions of work and by ensuring more efficient utilization of existing personnel. The meeting was held in Geneva from October 6 to 11.

The meeting elected as its chairman Miss Lillian Campion, Nurses' Service Secretary, Canadian Nurses' Association, Ottawa. Vice-chairman was Mrs. Janet Buckle, R.N., President of the Liberian National Nurses' Association, and Director of Nursing Service, Government Hospital, Monrovia.

The recommendations fall under five major headings: employment situations, conditions of work, economic and social status, recruitment and ILO action.

Under the first of these headings the meeting called for more complete, reliable and detailed statistical information as a basis for relating the supply of nurses to the demand for nursing services. The prevalent shortage of professional nurses, characteristic of most countries and acute in many, should be overcome by planned policies aimed at more effective utilization and retention of available nursing resources.

In view of the importance of joint consultation in determining conditions of work, said the meeting, machinery for negotiating terms and conditions of employment should be set up in every country where it does not now exist, and nursing personnel, through organizations of their choice, should be associated directly in its operation.

The meeting commented on a number of the specific elements of conditions of work. It recommended the 40-hour week, limits

on overtime, uninterrupted weekly rest of not less than 36 consecutive hours, and one month's annual leave with pay.

Remuneration for nursing personnel, it stated, should be raised to a level commensurate with their education, qualifications, responsibilities and duties. Salary scales should be calculated on the basis of job analysis and evaluation and the principle of equal remuneration for men and women for work of equal value should be adopted. There should be adequate financial incentive to encourage nurses to assume senior posts.

In discussing the economic and social status of nurses, the meeting came to the conclusion that the competent national authorities should take the necessary measures to establish a proper legislative basis to govern the status and practice of nursing, and to ensure full recognition and application of the requirements so established.

Adequate opportunities should be provided for professional development and advancement through such measures as specialized post-basic education, study and fellowships, security of tenure, and safeguard of privileges on transfer.

Recruitment programs, said the meeting, should be planned on a long-term basis in relation to the demand for nursing service and skills. Recruitment should be based on facts regarding the conditions and needs of all branches of the nursing service. There should be special guidance and placement facilities.

The meeting recognized the value of international consideration of nursing problems, and in particular the role which the ILO, in co-operation with the World Health Organization, could play in their solution. It specifically invited the Governing Body

of the ILO to give continuing attention to the employment and conditions of work of nurses through the ILO's normal program, and within the framework of ILO technical assistance.

Nursing experts from 15 countries participated in the meeting. Countries represented were Canada, Liberia, Austria, Brazil, Chile, France, India, Japan, Philippines, Sweden, Turkey, United Arab Republic, United Kingdom, United States, and the USSR.

The following organizations were represented by observers: World Health Organization, Council of Europe, International Committee of Catholic Nurses, International Committee of the Red Cross, International Council of Nurses, International Federation of Christian Trade Unions of Employees of Public Services and P.T.T., International Federation of Unions of Employees in Public and Civil Service, League of Red Cross Societies, World Federation of Trade Unions, and World Medical Association.

### **International Labour Office Report**

The experts were provided with a 200-page report on the problems of nurses' working conditions prepared by the International Labour Office. It was based on information available from 54 countries or territories in all parts of the world.

Nurses appear to be relatively poorly paid in comparison with industrial wage earners, the report says. In a good many countries it is clear that little recognition is given to the nurses' education, work-load, functions and responsibilities. Differences between beginning and ending salaries, says the report, provide little financial inducement to nurses to assume the onerous responsibilities connected with many senior posts.

The report says hours of work are probably the most important problem in the organization of nurses' work and the most important problem in nurses' lives. "The present situation," it says, "is far from satisfactory in many countries, particularly as regards the regulation of overtime, and is a matter of considerable discontent in nursing circles."

In more than half the countries covered by the report, normal hours of work, excluding overtime, are 48 or more a week. Nurses in hospital tend to have longer normal hours than nurses in public health service. In industry there is a move to reduce hours of work from night-shift work, but such a tendency cannot be observed in nursing. The hours of work on night duty

are about the same as those on day duty and, where this is not the case, they tend to be longer than those on day work.

"Overtime is a common practice in nursing," says the report. "In many countries overtime is a feature of nurses' hours of work throughout the year and is therefore the rule rather than the exception.

"Overtime may be demanded but the demand is primarily to induce greater efforts to recognize nursing work better and to make effective use of existing personnel. At the moment, it is probably safe to say that most nurses in most countries want overtime reduced, primarily because their normal hours of work are long and their work, by its nature, fatiguing.

"Until hospitals and health agencies are induced or obliged to keep careful records of overtime work, little can be done to obviate overtime not caused by unforeseeable emergencies."

Annual holidays with pay compare favourably with those granted workers in other occupations, but nurses come out badly in paid time-off on public holidays.

Weekly rest is granted in most countries but its stipulated duration is relatively short (24 hours in most countries) and its effectiveness (particularly for groups of nurses) limited by call duties, lack of advance information on off-duty periods and inadequate arrangements for rotating weekend leave.

Nurses have taken on new functions in connection with the growing emphasis that has been placed in recent years on rehabilitation, the report says. "The aim of hospital and other institutional service is not only to cure the patient in a narrow physical sense, but to restore him as quickly as possible to health in the full sense and to normal life and activities. Nurses have taken on new functions in this task, fostering and supervising the patient's convalescence and preparing him for readaptation to life at home. Nurses may even be called on to assist in the preliminary stages of rehabilitation for work life."

The report shows that the shortage of nursing staff appears to be almost universal. It is more pronounced for professional nursing than for auxiliary personnel. Acute shortages exist for nursing personnel in rural areas and in mental hospitals and for administrative, supervisory and teaching work.

Much needs to be done in recruitment, effective use of existing personnel and the retention of trained personnel, if nursing services are to respond "to the demands made on them now and in the years to

come, and if nurses are to be enabled to make their full contribution and to utilize their skills effectively."

Primary factors in high wastage and insufficient recruitment are unsatisfactory working and living conditions and a social status not commensurate with education functions and responsibilities.

Special preventive measures are necessary to protect the health of nurses exposed to numerous occupational risks. One of them is radiation. The increasing use of radioisotopes makes it necessary to give urgent

attention to this matter and to revise existing measures regularly to keep them up to date in terms of scientific data and experience.

A chapter in the report discusses nursing as a career. Hospital nursing, it is pointed out, appears to offer well-qualified nurses adequate opportunities for promotion comparing favourably in quantity and quality with those available in most other professions. The fact that such opportunities are not fully used suggests the presence of many problems closely linked with the remuneration and status of the nursing profession.

---

## ILO Director-General Visits Canada and U.S.

The changing nature of the International Labour Organization was outlined to federal government officials last month by David A. Morse, ILO Director-General, who was in Ottawa during a two-month official visit to the United States and Canada.

The ILO has taken on an operational aspect in addition to its traditional work of setting standards through the adoption of international instruments, he explained. It is now providing technical assistance in the implementing of social policy in underdeveloped countries.

Industrialization has created in underdeveloped countries social problems of major importance, Mr. Morse continued, and these problems must be dealt with effectively and as soon as possible.

In a press interview during his two-day visit to Ottawa, the ILO Director-General stated that the lessons learned by Canada during her industrial development would help point the way to solutions for many of these problems. Canada's experience in the field of labour-management relations would be of particular interest and value, he declared.

The ILO is now operating on a universal basis, he told the gathering of government

officials, with a membership of 79 countries. There were 80 members—the most ever—until Egypt and Syria merged to form the United Arab Republic. Only Saudi Arabia, Yemen, Laos, Cambodia and Nepal are not members of the ILO, and two countries, West Germany and Switzerland, are members of the ILO although not members of the United Nations, he said.

Turning to the future of the Organization, Mr. Morse said he had recently proposed that the ILO increase its educational work, even to the extent of courses in management.

At the beginning of his remarks, the ILO Director-General paid tribute to Canadian participation in the Organization, pointing out that not only the Canadian government but employers' and workers' organizations as well had, over the years, given complete endorsement to the work of the ILO. He particularly mentioned the transfer of ILO headquarters to Montreal during the Second World War, a move that "enabled the ILO to survive".

He also paid tribute to A. H. Brown, Deputy Minister of Labour, for his service as a member and later as Chairman of the ILO Governing Body.

---

Today's technology represents a new international force and the international social implications must constantly be kept in mind, ILO Director-General David A. Morse said during a recent visit to eastern Europe. The international social implications might be even more important than the repercussions on the domestic front, he thought.

Automation, along with the peaceful application of atomic energy, "offer us, in time, the prospect of a new world in which man need neither want nor war," he said.

The most important opportunities and problems of automation were in the social field because they were concerned with people, with men and women and with the young people now at school.

Automation offered a means of overcoming poverty everywhere more rapidly than we could have anticipated a generation ago, he said.

# TEAMWORK in INDUSTRY

Sixty thousand workers in the forest industries of British Columbia co-operated in the province's annual Forest Products Safety Week last May. Members of the International Woodworkers of America, they assisted in a campaign which saw the accident rate drop 68 per cent below the figure for the previous week.

Members of the Joint Forest Products Safety Committee represented all sections of the province's largest industry—business, unions and government. The central committee concerned itself chiefly with organizing all logging camps, trucking units and mills, while subcommittees were appointed to attend to details of programming and publicity. A series of posters was released periodically in the month preceding Safety Week; posters were distributed to all parts of British Columbia. One of these was tied in with the province's centennial theme of "A Century of Progress".

Giacomo Clozza, a union member with a record of 50 accident-free years in the industry, opened the week's ceremonies by raising the safety flag for Vancouver. A similar procedure was used in centres throughout British Columbia. Union, management, and Workmen's Compensation Board representatives all spoke of the industry's accomplishments in the field of accident prevention.

Generous assistance in spreading the safety gospel was provided by the province's daily and weekly newspapers, magazines, radio and TV stations, movie houses and retail merchants. Committee chairman Anthony F. Douglas attributed the campaign's effectiveness to the work of these groups and the members of the International Woodworkers of America.

Officers of the Joint Forest Products Safety Committee were: Anthony F. Douglas, B.C. Loggers' Association, Chairman; John T. Atkinson, International Woodworkers of America, Vice-Chairman; R. J. Doug Watts, Workmen's Compensation Board, Secretary; and Walter Cook, Forest Industrial Relations, Treasurer.

\* \* \*

Joint labour-management consultation is practised on a large scale in the Prince Albert, Sask., plant of Burns and Company. The labour-management production com-

mittee, composed of four representatives from labour and three from management, meets monthly to examine matters relating to plant production. It also informs employees of developments and changes in operations, and of company problems and accomplishments.

The office-sales management committee provides a means for office and sales employees to make suggestions for improvements in the operation of the office and the company generally. The committee also informs on changes in policy and other matters.

The safety committee, composed of labour and management representatives, makes monthly inspections of the plant and meets to discuss recommendations for safe equipment and practices. It also investigates plant accidents and suggests ways of eliminating recurrences.

The Burns savings and credit union is a voluntary organization set up for the employees. Contributions are made through payroll deductions. In 1957 the organization loaned \$44,000 to its 182 members.

The employees' social club enables members to enjoy good fellowship through bowling, curling, golf, monthly bingos and dances, children's summer picnics and other activities. Employees belong on a voluntary basis and the club is financed through weekly payroll deductions.

Employees of the Prince Albert plant are represented by Local 234 of the United Packinghouse Workers of America.

\* \* \*

Correspondence courses for employees is one of the most interesting aspects of labour-management co-operation in the St. Lawrence Corporation's plant at Red Rock, Ont.

A recent issue of the company's house organ, *The Red Rocket*, noted that 18 employees are now enrolled in these courses.

The employees in this mill are represented by the International Brotherhood of Pulp, Sulphite and Paper Mill Workers, the International Brotherhood of Paper Makers, the International Brotherhood of Electrical Workers, the International Union of Operating Engineers and the Office Employees' International Union.

Establishment of Labour-Management Committees is encouraged and assisted by the Labour-Management Co-operation Service, Industrial Relations Branch, Department of Labour. In addition to field representatives located in key industrial centres, who are available to help both managements and trade unions, the Service provides various aids in the form of booklets, posters and films.

# INDUSTRIAL RELATIONS AND CONCILIATION

## Certification and Other Proceedings before the Canada Labour Relations Board

The Canada Labour Relations Board did not meet during September. During the month, the Board received six applications for certification, four requests under Section 61(2) of the Act for review of decisions, and allowed the withdrawal of three applications for certification.

### Applications for Certification Received

1. The Transport and General Workers' Union, Local 1050, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of longshoremen employed by The Newfoundland-Great Lakes Steamships Limited at Botwood, Newfoundland (Investigating Officer: W. L. Taylor).

2. Canadian Merchant Service Guild, Inc. (Eastern Branch), on behalf of a unit of deck officers, excluding the master, employed by the Hindman Transportation Company Limited, Owen Sound, Ont., aboard the *MV George Hindman* (Investigating Officer: T. B. McRae).

3. Line Drivers, Warehousemen, Pickup Men and Dockmen's Union, Local 605, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of employees of East-West Transport Limited, comprising drivers and warehousemen employed by the company in its Vancouver Branch (Investigating Officer: D. S. Tysoe).

4. International Woodworkers of America, Local 1-71, on behalf of a unit of employees of the Vancouver Log Towing Co. Ltd., engaged in booming and rafting in the area of Twin Creeks, Howe Sound, B.C. (Investigating Officer: G. R. Currie) (The application was withdrawn later in the month—see below).

5. Transport Drivers, Warehousemen and Helpers' Union, Local 106, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of drivers and warehousemen employed by the Adley Express Co.,

Montreal (Investigating Officer: C. E. Poirier).

6. Wheeler Airlines Limited Employees' Association, on behalf of a unit of employees of Wheeler Airlines Limited, comprising maintenance employees at St. Jovite, Montreal, and Val d'Or, Quebec, Frobisher Bay, Site 41, Great Whale, and Fox, N.W.T., and Goose Bay, Labrador (Investigating Officer: C. E. Poirier).

### Requests for Review under Section 61(2)

1. International Longshoremen's Association (independent), applicant, and Caledon Terminals Limited, Toronto, respondent (L.G. 1956, p. 1543). The request seeks to extend the scope of the unit in the certificate previously issued (Investigating Officer: T. B. McRae).

2. International Longshoremen's Association (independent), applicant, and Terminal Warehouses Limited, Toronto, respondent (L.G., July 1957, p. 841). The request seeks to extend the scope of the unit in the certificate previously issued (Investigating Officer: T. B. McRae).

3. International Longshoremen's Association (independent), applicant, and Eastern Canada Stevedoring Co. Ltd., Toronto, respondent (L.G., Aug. 1957, p. 967). The request seeks to extend the scope of the unit in the certificate previously issued (Investigating Officer: T. B. McRae).

4. International Longshoremen's Association (independent), applicant, and Cullen Stevedoring Company Limited, Toronto, respondent (L.G., Aug. 1957, p. 967). The request seeks to extend the scope of the unit in the certificate previously issued (Investigating Officer: T. B. McRae).

This section covers proceedings under the Industrial Relations and Disputes Investigation Act, involving the administrative services of the Minister of Labour, the Canada Labour Relations Board, and the Industrial Relations Branch of the Department.

### Applications for Certification Withdrawn

1. The Association of Drivers of Canadian Coachways Ltd., applicant, and Canadian Coachways Ltd., Edmonton, respondent (L.G., Oct., p. 1139).

2. Western District Diamond Drillers' Union, Local 1005, of the International Union of Mine, Mill and Smelter Workers,

applicant, and T. Connors Diamond Drilling Co. Ltd., Nelson, B.C., respondent (employees in Yukon Territory) (L.G. Oct., p. 1140).

3. International Woodworkers of America, Local 1-71, applicant, and Vancouver Log Towing Co. Ltd., Vancouver, respondent (see above).

---

## Conciliation and Other Proceedings before the Minister of Labour

### Conciliation Officers Appointed

During September, the Minister of Labour appointed conciliation officers to deal with the following disputes:

1. Smith Transport Limited and Kingsway Transport Limited (Trucking Association of Quebec, Inc.) and Transport Drivers, Warehousemen and Helpers' Union, Local 106 (Conciliation Officer: R. Trépanier).

2. Western Ontario Broadcasting Company Limited, Windsor, and National Association of Broadcast Employees and Technicians (Conciliation Officer: F. J. Ainsborough).

### Settlement by Conciliation Officers

1. Canadian Broadcasting Corporation (Building and Maintenance Employees) and Association of Radio and Television Employees of Canada (Conciliation Officer: F. J. Ainsborough) (L.G., Oct., p. 1141).

2. Northland Navigation Company Limited, Vancouver, and Seafarers' International Union of North America, Canadian District (Conciliation Officer: G. R. Currie) (L.G., Aug. p. 882).

3. La Verendrye Limited, Montreal, and Seafarers' International Union of North America, Canadian District (Conciliation Officers: R. Trépanier and R. Duquette) (L.G., May, p. 494).

4. Ahern Shipping Company Limited, Montreal, and Seafarers' International Union of North America, Canadian District (Conciliation Officers: R. Trépanier and R. Duquette) (L.G., May, p. 494).

5. Canada Cement Transport Limited, Montreal, and Seafarers' International Union of North America, Canadian District (Conciliation Officers: R. Trépanier and R. Duquette) (L.G., May, p. 494).

6. Cayuga Steamship Company Limited, Toronto, and Seafarers' International Union

of North America, Canadian District (Conciliation Officer: F. J. Ainsborough) (L.G., May, p. 494).

7. Cadwell Marine Limited, Niagara Falls, and Seafarers' International Union of North America, Canadian District (Conciliation Officer, F. J. Ainsborough) (L.G., May, p. 494).

8. The Valley Camp Coal Company of Canada Limited, Toronto, and Seafarers' International Union of North America, Canadian District (Conciliation Officer: F. J. Ainsborough) (L.G., May, p. 494).

9. Bayswater Shipping Limited, Brockville, and Seafarers' International Union of North America, Canadian District (Conciliation Officer: F. J. Ainsborough) (L.G., May, p. 494).

10. Holden Sand and Gravel Limited, Toronto, and Seafarers' International Union of North America, Canadian District (Conciliation Officer: F. J. Ainsborough) (L.G., May, p. 494).

11. Pacific Western Airlines Limited, Vancouver, and Pacific Western Air Line Pilots' Association (Conciliation Officer: G. R. Currie) (L.G., Feb., p. 174).

### Conciliation Boards Fully Constituted

1. A Board of Conciliation and Investigation was established in September to deal with a dispute between Canadian National Railways, Montmorency Sub-division, and Brotherhood of Locomotive Firemen and Enginemen (no Conciliation Officer appointed previously) and was fully constituted with the appointment of Hon. Mr. Justice Andre Montpetit, Montreal, as Chairman. Mr. Justice Montpetit was appointed in the absence of a joint recommendation from the other two members, T. R. Meighen, QC, Montreal, and A. E.

Matthews, Parry Sound, who were previously appointed on the nomination of the company and union respectively.

2. The Board of Conciliation and Investigation established in August to deal with a dispute between the Canadian Broadcasting Corporation and National Association of Broadcast Employees and Technicians (L.G., Oct., p. 1141) was fully constituted in September with the appointment of His Honour Judge J. C. Anderson, Belleville, as Chairman. Judge Anderson was appointed on the joint recommendation of the other two members, H. Brooke Bell, QC, Toronto, and G. M. Desaulniers, Montreal, who were previously appointed on the nomination of the company and union respectively.

## Board Report Received

Union Steamships and Tidewater Shipping Company, Vancouver, and National Association of Marine Engineers of Canada Inc. and Canadian Merchant Service Guild Inc. (L.G., Aug., p. 883). The text of the report is reproduced below.

## Settlements Following Board Procedure

1. Association of Lake Carriers (Canada Steamship Lines Limited, N. M. Paterson and Sons Limited, Colonial Steamship Limited, Upper Lakes and St. Lawrence Transport Company Limited, Mohawk Navigation Company Limited, Hall Corporation of Canada, Beaconsfield Steamships Limited and Sincennes-McNaughton Line

## Scope and Administration of Industrial Relations and Disputes Investigation Act

Conciliation services under the Industrial Relations and Disputes Investigation Act are provided by the Minister of Labour through the Industrial Relations Branch. The branch also acts as the administrative arm of the Canada Labour Relations Board, in matters under the Act involving the board.

The Industrial Relations and Disputes Investigation Act came into force on September 1, 1948. It revoked the Wartime Labour Relations Regulations, P.C. 1003, which became effective in March, 1944, and repealed the Industrial Disputes Investigation Act, which had been in force from 1907 until superseded by the Wartime Regulations in 1944. Decisions, orders and certificates given under the Wartime Regulations by the Minister of Labour and the Wartime Labour Relations Board are continued in force and effect by the Act.

The Act applies to industries within federal jurisdiction, i.e., navigation, shipping, interprovincial railways, canals, telegraphs, interprovincial and, international steamship lines and ferries, aerodromes and air transportation, radio broadcasting stations and works declared by Parliament to be for the general advantage of Canada or two or more of its provinces. Additionally, the Act provides that provincial authorities, if they so desire, may enact similar legislation for application to industries within provincial jurisdiction and make mutually satisfactory arrangements with the federal Government for the administration of such legislation.

The Minister of Labour is charged with the administration of the Act and is directly responsible for the appointment of conciliation officers, conciliation boards, and Industrial Inquiry Commissions concerning complaints that the Act has been violated or that a party has failed to bargain collectively, and for applications for consent to prosecute.

The Canada Labour Relations Board is established under the Act as successor to

the Wartime Labour Relations Board to administer provisions concerning the certification of bargaining agents, the writing of provisions—for incorporation into collective agreements—fixing a procedure for the final settlement of disputes concerning the meaning or violation of such agreements and the investigation of complaints referred to it by the minister that a party has failed to bargain collectively and to make every reasonable effort to conclude a collective agreement.

Copies of the Industrial Relations and Disputes Investigation Act, the Regulations made under the Act, and the Rules of Procedure of the Canada Labour Relations Board are available upon request to the Department of Labour, Ottawa.

Proceedings under the Industrial Relations and Disputes Investigation Act are reported below under two headings: (1) Certification and other Proceedings before the Canada Labour Relations Board, and (2) Conciliation and other Proceedings before the Minister of Labour.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, Halifax and St. John's Newfoundland. The territory of two officers resident in Vancouver comprises British Columbia, Alberta and the Yukon and Northwest Territories; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; three officers resident in Toronto confine their activities to Ontario; three officers in Montreal are assigned to the province of Quebec, and a total of three officers resident in Fredericton, Halifax and St. John's represent the Department in the Maritime Provinces and Newfoundland. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

Limited) and Seafarers' International Union of North America, Canadian District (L.G., Aug., p. 883).

2. Association of Lake Carriers (Canada Steamship Lines Limited, N. M. Paterson and Sons Limited, Colonial Steamship Limited, Upper Lakes and St. Lawrence Transport Company Limited, Mohawk Navigation Company Limited, Hall Corporation of Canada, Beaconsfield Steamships Limited, Sincennes-McNaughton Line Limited and La Verendrye Line Limited) and National Association of Marine Engineers of Canada Inc. (L.G., Oct., p. 1142).

3. Union Steamships and Tidewater Shipping Company, Vancouver, and National Association of Marine Engineers of Canada, Inc. and Canadian Merchant Service Guild, Inc. (See above).

4. Marine Industries Limited, Montreal, The J. P. Porter Company Limited, Montreal, Canadian Dredge and Dock Co. Limited, Toronto, Russel Construction Lim-

ited, Toronto, and McNamara Construction Co. Limited, Toronto, and Seafarers' International Union of North America, Canadian District (L.G., Sept., p. 981).

#### **Settlement Effected by Industrial Inquiry Commission**

Shipping Federation of British Columbia and International Longshoremen's and Warehousemen's Union (Locals 501, 502, 503, 504, 508). Strike occurred August 21 following Board procedure (L.G., Oct., p. 1142). E. G. Taylor, Toronto, appointed Industrial Inquiry Commission September 8. Mr. Taylor effected settlement and work resumed September 24.

#### **Settlement Reached Following Lockout**

Newfoundland Employers' Association Limited, St. John's, and Longshoremen's Protective Union (St. John's). Following Board procedure employers declared suspension of general cargo shipping at St. John's (L.G., Oct., p. 1142). Settlement reached and work resumed September 19.

## **Report of Board in Dispute between**

**Union Steamship Limited and Tidewater Shipping Company  
and**

**National Association of Marine Engineers of Canada, Inc.  
and Canadian Merchant Service Guild, Inc.**

The Conciliation Board in this matter, consisting of E. Hopkins, employees' nominee, P. E. Ayrhart, employers' nominee, and Adam Bell, chairman, held its preliminary meeting on July 3, 1958 at Vancouver, B.C. Subsequently the Board met with representatives of the parties concerned on July 15, 18, 25, August 12, 13, 18 and September 5.

During September, the Minister of Labour received the unanimous report of the Board of Conciliation and Investigation established to deal with a dispute between Union Steamships Limited and Tidewater Shipping Company and National Association of Marine Engineers of Canada, Inc., and Canadian Merchant Service Guild, Inc.

The Board was under the Chairmanship of Adam Bell, Victoria, who was appointed by the Minister in the absence of a joint recommendation from the other two members, P. E. Ayrhart and Elwyn Hopkins, both of Vancouver, nominees of the companies and unions respectively.

The text of the report is reproduced here.

In the course of these meetings the following representatives appeared before the Board:

*For the National Association of Marine Engineers of Canada, Inc.:*

D. McKeown, E. G. Bjarnason, R. G. Greaves and F. E. MacLeod.

*For the Canadian Merchant Service Guild:*

Capt. E. W. Meadows and G. F. Bullock.

*For the Union Steamships Limited and Tidewater Shipping Company:*

Capt. D. Roberts, R. G. Chestnut and Capt. J. A. Macdonnell.

It was evident that, during the months of negotiation and conciliation preceding the establishment of the Board, agreement had been reached by the parties on many of the questions involved, leaving wages and salaries chief amongst the issues remaining to be settled.

The Board heard evidence, written and oral, and discussion ensued between the representatives and the Board, and between the representatives themselves, on the issues still outstanding.

# LABOUR LAW

## Changes in Mine Safety Legislation, 1958

Nova Scotia and Ontario amend legislation dealing with safety in mines

### Nova Scotia

Nova Scotia made extensive amendments to the Coal Mines Regulation Act this year. These amendments deal with a wide range of safety matters relating to appointments, qualifications and duties of mine officials and workmen, explosives, fire prevention, coal dust, ventilation, transportation in the mines, electrical equipment, repair and inspection of machinery, boreholes to detect water and gas, and rescue work.

#### Appointment, Qualifications and Duties of Mine Officials and Workmen

The manager of a coal mine is now required to report promptly to an inspector all fires, bumps, interruptions of ventilation, riding rake accidents, or other unusual accident not otherwise named in the Act. The plan of the mine, for which the manager is responsible, must now also show the location of refuge stations where they are provided; it already had to show all air courses, stoppings, doors, grades and elevations, air and water pipe lines, electric power cables, sub-stations, electric pump rooms, telephones and travelling roads.

Where an underground manager has been appointed, he may assume the responsibility for daily supervision, which the manager was formerly required to share.

Mine examiners and shot firers, before being appointed, must now be given practical instruction on the construction of the flame safety lamp and in the detection of gases. Also, every mine examiner is required to make a daily report in a book kept for that purpose on all unusual happenings in the mine.

A shot firer must now check for the presence of coal dust immediately before the charging of a shot hole. He is also required to examine shot holes for gas, take cover before firing a shot, and record in a book kept in the mine the number of shots fired by him during his shift.

Under the revised Act the minimum age of a person employed without a coal miner's certificate and working under supervision at a working face in a coal mine, is increased

from eighteen years to eighteen years and six months, and the maximum period that he may be employed without a certificate is reduced from twelve months to six months. The amendment specifically states that a miner in charge of a working place is responsible for ensuring that it is properly timbered and in a safe condition.

The amendments require that a hoist operator in charge of an engine of more than 800 horsepower, used for transporting coal, material or men, must have a second class stationary engineer's certificate or its equivalent. He must also test the over-speed, overwinding and lower limit safety equipment on hoists at intervals stated in the Act. If an accident occurs to the hoisting equipment, shaft or slope, he is required to carry out a trial wind before regular man-hoisting is begun.

The driver of a diesel or electric locomotive now must have at least one year's experience in a coal mine; formerly an age requirement of 21 years was specified for diesel locomotive drivers. The amendments further require the manager to appoint electric locomotive drivers, to give them adequate written instructions to ensure the safe running of trains, and to send copies of these appointments and instructions to the inspector.

#### Explosives, Fire Prevention

The Act now specifies that no stove, heater or light, except a permissible electric lamp, may be allowed where explosives are stored, and that all detonators have to be tested before being issued to shot firers.

A new provision requires that if barriers of coal are left by agreement with the Chief Inspector as a precaution against fire, water or other cause, they may not be removed without his approval.

This section, prepared by the Legislation Branch, reviews labour laws as they are enacted by Parliament and the provincial legislatures, regulations under these laws, and selected court decisions affecting labour.

## Coal Dust, Ventilation

A new section in the Act provides for the wetting of coal to allay the dust when continuous miner machines, coal cutting machines, and coal loading machines are operating, where coal is delivered from conveyors into mine cars, on landings before coal is placed on the rope for hoisting, and in other places required by an inspector. The amendments also raise the percentage of incombustible dust that must be put on road surfaces in a mine as the percentage of methane in the air increases, and require the storing of emergency supplies of stone-dust in working, room and pillar sections.

In regard to ventilation, new provisions have been incorporated into the Act concerning the installation and operation of auxiliary fans. They set out requirements in respect of the location of the fan, adequacy of air supply reaching the fan, maximum permissible use of air passing the fan, adequacy of air ducts, inspections, spare fans, and testing for gas before starting after an accidental stoppage of more than two hours.

## Transportation in the Mine

The revised Act provides that an inspector may not grant a permit for the use of an underground haulage road as a travelling road for persons, except temporarily under special circumstances, unless there is clearance on each side and above the locomotive or mine car as specified in the Act, and there are manholes of the dimensions, and at the intervals, stated therein. Means must be provided on main conveyor roads to give a clear and distinct signal from any point on the run to stop conveyor lines in an emergency.

The Act now specifies that hoisting engines of more than 15 horsepower must be firmly connected to a rigid foundation. All slope double drum engines must now have an indicator to show on which track the trip is being hoisted or lowered. The requirements for brakes on hoisting engines have also been revised.

An amendment provides for a shield on man trips to prevent stone and other debris from injuring men in the rakes. All tackling equipment after manufacture, and after annealing where required under the Act, must be heat-treated in a manner approved by an inspector; the Act previously set out certain temperature standards for the heating process.

With respect to diesel and electric locomotives, the revised Act forbids the operation of a locomotive in a coal mine under a lesser clearance than one foot, unless

approval has been obtained from an inspector. It also sets out the same requirements for manholes and for clearance on each side of an electric locomotive as already existed for diesel locomotives. It requires further that the driver of a diesel locomotive must immobilize it at the completion of his shift, that shunts must not exceed 1,500 feet, and that a diesel locomotive must always precede its train when men are being transported. In addition, it reduces the permissible carbon monoxide content of exhaust gas from a locomotive from five parts per thousand to two parts.

It is now specified that the load of a diesel or electric train must be such that it can be controlled by the brakes of the locomotive.

## Electrical Equipment

Several amendments have been made in connection with electrical cables. The Act now specifies that a competent person shall be made responsible for ensuring that electrical cables are effectively protected from mechanical damage, and adequately supported. It further provides that buried cables must be free from water, that special attention and protection must be given to cables where work is being done that may damage them, that armoured cables must not be moved while the cable is alive, and that insulation on all power circuits must be measured every two years.

New safety provisions have also been introduced in respect of other electrical equipment. One of them requires that means must be provided to stop all belt conveyors from any point on the line. Other safety rules are designed to avoid methane explosions caused by electrical machines, and to avoid the accidental starting of them when they are being repaired.

Changes have also been made in certain standards for electrical equipment. In this respect, permissible electrical equipment, which formerly included only apparatus certified by the British Ministry of Fuel and Power to conform to the British standard specification for flame-proof enclosure for use in coal mines, now also includes apparatus certified by other recognized authority approved by the Minister of Mines. Mine type transformers built according to British standard specification No. 355 of 1939 have been exempt from certain restrictions contained in the Act; the standard now specifies instead mine type transformers that are recommended for use underground in coal mines.

### Repair and Inspection of Machinery

The revised Act requires that jibs or bodies of mining machines must be securely supported when they are raised hydraulically in order to carry out repairs.

A further amendment now provides that where an inspector permits the use of an electric welder, acetylene torch, or heating equipment in a mine, or on the surface in close proximity to the mine shaft or slopes, the official in charge shall have coal dust cleaned up and the place heavily stonedusted, ensure that fire extinguishers and spare stonedust are available, and thoroughly examine the place after completion of the work.

### Boreholes to Detect Water or Gas

If a place is likely to contain a dangerous accumulation of water, or noxious or inflammable gas, the revised Act provides that, when advance borings indicate the presence of workings, a lighted locked flame safety lamp shall be kept in the working place in charge of a competent person while work is being done.

### Rescue Work

The maximum age of members of a mine rescue team will be lowered from 45 to 40, effective January 1, 1959. Unless a mine is naturally wet throughout and free from inflammable gas, refuge stations must be provided. The location of each station and the equipment to be kept at it are to be

agreed upon by the manager and the Chief Inspector.

### Ontario

Amendments made to the Ontario Mining Act related mainly to safety matters.

One of these amendments provides that the entrances to unworked mines must be protected by means other than fencing—a provision already in the Act—if the Engineer considers that other safety measures are necessary.

Another amendment extends certain requirements for the inspection of stationary air compressors and for the installation of temperature indicators on them to include compressors having a capacity of 300 c.f.m. or more (formerly 500 c.f.m. or more).

A new provision requires that in the installation of any newly-acquired hoist, all brake engines must be so arranged that inadvertent or accidental loss of pressure in the brake system cannot cause the release of the brake.

A further amendment provides that in shaft inspection, maintenance or sinking operations, men may be in or on a shaft hoisting conveyance attached to the fixed or clutched-in drum when changing balance. At all other times when men are in a shaft hoisting conveyance, the hoist must be equipped with more than one brake each capable of stopping and holding the drum or drums in use.

---

## Legal Decision Affecting Labour

Ontario High Court issues *mandamus* order to Labour Relations Board to consider employer's application for the decertification of a union

The Ontario High Court of Justice has upheld a company's contention that the Labour Relations Board has the jurisdiction to hear and decide a company's application for decertification of a union, and has ordered, by way of *mandamus*, the Board to hear and determine the application.

On May 16, 1958, Chief Justice McRuer, acting on an application by Genaire Limited, quashed a decision of the Board whereby the Board dismissed an application for a declaration terminating the bargaining rights of the International Association of Machinists.

The circumstances of the case, as reported in the reasons for judgment, were as follows:

International Association of Machinists, on November 9, 1955, applied for certification as bargaining agent of the employees

in the bargaining unit of Genaire Limited. The Board determined that the trade union was a unit of employees appropriate for collective bargaining and, on November 10, 1955, issued its certificate.

The union commenced to bargain; but no collective agreement was made and the Minister refused to appoint a board of conciliation, and there the matter had stood since October 12, 1956.

Later the company applied to the Board for a declaration that the trade union in question no longer represented the employees.

On August 2, 1957, the Board dismissed the company's application on the ground that the applicant, which is the employer, had no right to apply and the Board had no jurisdiction to hear the application.

The company argued that the Ontario Labour Relations Act ought not to be read in such a way as to deny the employer a right to make an application for a declaration that a trade union no longer represents the employees. Although Section 44 of the Act is in the negative it should be implied that after 30 days have elapsed after the Minister has informed the parties that he does not deem it advisable to appoint a conciliation Board, either party may apply to the Board for the declaration.

As against this contention it was argued that Section 41 gives to employees certain rights to apply to the Board on the conditions set out therein. Likewise Section 43 gives employers and employees certain rights to apply for a declaration that the trade union no longer represents the employees in the bargaining unit and that Section 44 is merely negative in that it postpones the right to apply, where the trade union has not made a collective agreement within a year, until 30 days after there has been a report of a conciliation board or the Minister refused to appoint a conciliation board. Consequently in the circumstances of the case the employer had no right to bring an application for decertification under Section 44.

In the opinion of the Court, when considering the Act as a whole it could be assumed that where the Act provides that no application shall be made until certain events have happened, it implies that after those events have happened, an application for decertification may be made, and such application might be made by anyone affected. For instance, under Section 42 there is no provision as to who may apply for a declaration but unquestionably the fact that the Board is given power to make an order implies that anyone who would be affected by the order has a right to be heard.

Chief Justice McRuer was of the opinion that Section 68 of the Act gives the Board power to hear the application in question. The relevant parts of the section read:

Sec. 68 (1)—The Board shall have exclusive jurisdiction to exercise the powers conferred upon it by or under this Act and without limiting the generality of the foregoing, if any question arises in any proceeding,...

(f) as to whether a trade union represents the employees in a bargaining unit;...

the decision of the Board thereon shall be final and conclusive for all purposes but nevertheless the Board

may at any time if it considers it advisable to do so, reconsider any decision, order, direction, declaration or ruling made by it and vary or revoke any such decision, order, direction, declaration or ruling.

The Board in declining to act under this section was of the opinion that while a portion of the subsection dealing with review empowers the Board upon request, or even on its own motion, to reconsider its decisions and orders, the remainder of Section 68 (1) does not confer any right on a person or trade union to commence a proceeding. The language of the section is quite explicit—"if any question arises in any proceeding" on certain enumerated matters the decision of the Board is to be final and conclusive. In the Board's view the vital words are "in any proceeding". There must be a proceeding before the Board. If there is, then the section comes into operation and makes the Board's decision final and conclusive. Thus the very words of the subsection are inconsistent with the argument that the present section authorizes this or any other application. Had the Legislature so intended then it would have been reasonable to expect to find language similar to that used in Section 68 (2) where the words "the question may be referred to the Board" clearly indicate the course of action to be followed. Then the Board added:

This interpretation of Section 68 (1) (f) is entirely consistent with our views on the scope to be given to the sections dealing with termination of bargaining rights. The "proceeding" referred to in Section 68 (1) is instituted under one of the appropriate provisions of those sections. Once instituted the Board has exclusive jurisdiction under Section 68 (1) (f) to determine whether a trade union represents the employees in the bargaining unit and its decision is final and conclusive for all purposes. Having regard to the foregoing we must reject the applicant's contention that Section 68 (1) (f) authorizes the bringing of the present application.

An alternative submission presented to the Board was the following. If the Board found that it did not have power under Section 68 (1) (f) to terminate bargaining rights there was nothing in the Act expressly authorizing the bringing of an application for termination. However, the argument continued, the power to certify carries with it the inherent or implied power to terminate bargaining rights, and, the Act being silent on the Board's power to terminate, recourse must be had to the concluding portion of Section 68 (1), under

which the Board is empowered to "reconsider any decision, order, direction, declaration or ruling made by it and vary or revoke any such decision, order, direction, declaration or ruling". In support of this argument counsel for the company relied on *The Labour Relations Board of the Province of Saskatchewan v. The Queen ex rel. F. W. Woolworth Company Limited and Slabick et al. and Saskatchewan Joint Board, Retail, Wholesale and Department Store Union*, (L.G. 1954, p. 1748).

The Board rejected this argument on the ground that the *Woolworth* case did not apply to the case under consideration because of the differences between the Saskatchewan Trade Union Act and the Ontario Labour Relations Act. The Ontario Board has consistently held that its power under Section 68 (1) to reconsider its decisions does not enable it to deal with applications for termination of bargaining rights, because Sections 41 to 44a provide express authority for bringing application for termination of bargaining rights. Once it is established that such an authority exists under Sections 41 to 44a, the *Woolworth* case is inapplicable.

Chief Justice McRuer did not agree with the Board's finding. In his opinion the language of the last clause of Section 68 is clear and without ambiguity. The section read as a whole down to the words "shall be final and conclusive for all purposes" renders the decisions of the Board final where any question arises in any proceedings with respect to the matters mentioned in (a) to (g) of subsection (1).

Then he added:

Notwithstanding the finality of the Board's decisions and for the very reason that they are final, the Board is given broad powers under the last clause of Section 68 to reconsider any decision, order, direction, declaration or ruling made by it and to revoke any such decision, order, direction, declaration or ruling. In my view, unless the Legislature has somewhere limited the powers of anyone affected by a decision of the Board to make application to have its decision revoked, the Board is bound to hear the application and to determine whether the decision ought to be revoked or not. Under Sections 41, 43 and 44 some limitations have been put on the matters therein dealt with but the case before me does not come within any of these sections.

In his opinion the broad powers given under Section 68 are intended to cover situations that are not specifically dealt with where in the opinion of the Board the parties should have relief. Further, he said, where civil rights are restricted by legislation the courts ought not to be reluctant to keep avenues of relief open to those who are affected by the restrictive legislation. The employer has a very definite right to know that the union that is certified under the Labour Relations Act truly represents his employees.

In conclusion the Court quashed the decision of the Board dated August 2, 1957, and issued an order for *mandamus* directing the Board to hear the company's application to determine whether its decision of November 10, 1955, certifying the union should be revoked. *Genaire Limited and International Association of Machinists and the Ontario Labour Relations Board*, Ontario High Court of Justice, May 16, 1958, unreported.

---

## Recent Regulations, Federal and Provincial

Newfoundland raises living allowances paid to apprentices while talking required technical courses. British Columbia amends boiler regulations

New apprenticeship regulations issued in Newfoundland raised the living allowances payable to apprentices undergoing technical training to \$8 and \$15 a week, depending on whether their residences are in St. John's or elsewhere, and increased the rates for apprentices with dependents to \$16 and \$23, respectively.

Amendments to the regulations under the British Columbia Boiler and Pressure Vessel Act set out new requirements for low-pressure heating boilers.

### FEDERAL

#### Financial Administration Act

The prevailing Rate Employees General Regulations (L.G., Feb., p. 187) have been amended by T. B. 528627-1 of August 28 with respect to time worked on a holiday.

A prevailing rate employee will continue to be paid two and one-half times the rates of normal pay and extra pay, if any, for time actually worked on a holiday. However, for the remainder of the normal working day, he will now receive, in

addition to his normal pay, any extra pay to which he would have been entitled had it not been a statutory holiday.

As before, with the approval of the Director, an employee who works on a holiday may be given compensatory leave equal to one and one-half times the number of hours actually worked. If he works normal hours or less on a holiday, he may now receive, in addition to his leave credits, his normal pay and extra pay for the day. An earlier amendment (T.B. 531656 of May 15) had provided that a prevailing rate employee who worked less than his regular hours on a holiday was to receive his normal pay and extra pay for the hours actually worked and his regular pay for the remainder of the normal working day.

If he works longer than normal hours on a holiday, a prevailing rate employee will continue to be paid at a rate equal to his normal rate and extra pay, if any, for every hour worked.

## PROVINCIAL

### British Columbia Boiler and Pressure-Vessel Act

Some amendments to the regulations under the British Columbia Boiler and Pressure-Vessel Act governing the design, construction and inspection of boilers and pressure vessels were gazetted on September 4 as B.C. Reg. 138/58.

Instead of the 1952 editions, the new regulations adopt as governing standards the 1956 editions of the applicable ASME Codes.

One of the new provisions with respect to low-pressure heating boilers states that before any person begins to install or alter a heating plant he must first obtain a permit from the Chief Inspector, submitting with his application a description of the work to be done and particulars as to the number and kind of boilers to be installed or altered.

Another is that plans and specifications of only heating plant installations over 50 H.P. must be sent to the Chief Inspector for approval. Previously, plans and specifications of all such installations had to be approved.

Upon completion of the work and before a low-pressure boiler is put into operation, a notice must be sent to the inspector, who, if he finds the work satisfactory and a responsible person in charge, may issue a certificate of inspection. If an inspection cannot be made at that time, however, the Chief Inspector is again authorized to issue an interim certificate upon receipt of the contractor's report form.

Another new section provides for fines of up to \$200 for failure to obtain a permit, a certification of inspection, or an interim certificate.

As well as being stamped in the prescribed manner, every low-pressure heating boiler shipped into the province must now be accompanied by a manufacturer's affidavit or report of construction or ASME data report.

### British Columbia Hours of Work Act

The occupation of bus operator, by which is meant an employee in charge of driving a motor-vehicle with seating accommodation for more than seven passengers used for the conveyance of the public, for which service a charge is made, was added to the schedule of the British Columbia Hours of Work Act by Regulation No. 1 (1958) gazetted on June 12.

A later regulation, No. 1A (1958), gazetted the same day, permits bus operators to work such extra hours over and above the 8- and 44-hour limits fixed by the Act as may be necessary to meet the requirements of public transportation. However, a minimum wage order last year, Order No. 52 (1957), requires overtime to be paid for all hours worked in excess of 8½ in a day or 47 in a week (L.G., May, 1957, p. 611).

### Newfoundland Apprenticeship Act

In Newfoundland, the living allowances payable to apprentices while taking the required technical courses were increased by new regulations gazetted on September 2, which replace the Apprenticeship (Remuneration) Regulations issued in 1955 and 1956 (L.G. 1955, p. 564; 1956, p. 1044).

The rate for single apprentices living at home in St. John's has been increased from \$6 to \$8 a week. Single apprentices whose homes are outside St. John's will now receive \$15 a week, instead of \$12 as formerly.

The weekly rate for an apprentice who is head of a family is now \$16 if his home is in St. John's and \$23 if elsewhere. Formerly, the weekly allowances for heads of families were \$15.90 and \$21, respectively.

As before, these allowances are also payable to prospective apprentices while pursuing pre-apprenticeship courses approved by the Provincial Apprenticeship Board.

Deductions will continue to be made for periods of absence from school but, as previously, where the absence is due to sickness, the remuneration may be paid for periods not exceeding three days.

(Continued on page 1298)

# UNEMPLOYMENT INSURANCE

## Monthly Report on Operation of the Unemployment Insurance Act

Initial and renewal claims in August—139,700—decline 17 per cent from July's 167,400 but climb 21 per cent over previous August's total of 115,300, statistics\* show. Small drop in claimants on "live" file

The number of initial and renewal claims for unemployment insurance benefit in August was 139,700, nearly 17 per cent less than the July total of 167,400 but 21 per cent higher than in August 1957, when 115,300 claims were filed.

There was a small decline in the total of persons having a claim for unemployment insurance benefit in the "live" file during August, the count at 294,600 on August 29 being 2 per cent below the 300,800 recorded on July 31. On August 30, 1957, claimants numbered 208,700.

Plant shutdowns for annual vacations and layoffs occasioned by industrial disputes are among the factors contributing to the continuing high level of claimants. A person unemployed during a week by reason of a general plant holiday may claim benefit for that week and any holiday pay received is considered as earnings.

The proportion of males was constant at 70 per cent at each of the dates under review. Close to 50 per cent of males had been on continuous claim a relatively short period, i.e., four weeks or less, as of August 29, while only about 30 per cent of the females were in this category. A record of over 20 weeks on continuous claim was shown for close to one quarter of the females, as against 15 per cent of males.

One quarter of the initial claims adjudicated during August showed insufficient contributions to qualify for benefit. During July, the failure rate was 22 per cent, and one year ago it was 18 per cent.

August benefit payments amounted to \$19,500,000, down 27 per cent from the July total of \$26,800,000 but 50 per cent higher than the \$13,000,000 paid out during August 1957.

\* Weekly benefit payments averaged \$20.79 during August, \$20.67 for July and \$20.01 for August 1957.

\*These do not necessarily relate to the investigations conducted during this period.

In a comparison of current employment statistics with those for a previous period, consideration should be given to relevant factors other than numbers such as the opening and closing of seasonal industries, increase in area population, influence of weather conditions, and the general employment situation.

### Insurance Registrations

Reports received from local offices of the Unemployment Insurance Commission for August show that insurance books or contribution cards have been issued to 4,315,965 employees who have made contributions to the Unemployment Insurance Fund since April 1, 1958.

At August 31 employers registered numbered 306,193, an increase of 510 since July 31.

### Enforcement Statistics

During August 1958, investigations conducted by enforcement officers across Canada numbered 4,601. Of these, 3,111 were spot checks of postal and counter claims to verify the fulfilment of statutory conditions, and 73 were miscellaneous investigations. The remaining 1,417 were investigations in connection with claimants suspected of making false statements to obtain benefit.

Prosecutions were begun in 152 cases, 79 against employers and 73 against claimants.\* Punitive disqualifications as a result of claimants making false statements or misrepresentations numbered 991.\*

### Unemployment Insurance Fund

Revenue received in August totalled \$20,078,081.64 compared with \$22,552,462.00 in July and \$21,367,129.25 in August 1957. Benefits paid in August totalled \$19,459,737.42 compared with \$26,782,089.93 in July and \$13,010,710.45 in August 1957. The balance in the fund on August 31 was \$640,909,350.83; on July 31 it was \$640,291,006.61 and on August 31, 1957, \$870,379,844.64.

# Decisions of the Umpire under the Unemployment Insurance Act

Decision CUB-1563, August 26, 1958

**Summary of the Main Facts:** The claimant, single, age 29, filed an initial claim for benefit at the local office in C....., B.C., and was registered as a general office clerk. She had last been employed as a cannery worker at a packing house in S....., B.C., her home town, from August 14, 1957, to October 5, 1957, when her employment terminated.

The claimant indicated on her weekly report for the week commencing November 24, 1957, that she had been attending the high school in C..... since November 20, 1957. Upon written query of the local office thereon as to the hours of her school attendance and the hours of her availability for work, she informed the local office that her school hours were from 9.00 a.m. to 3.20 p.m., that she could work in the evenings or early morning, and that she had one day out of seven when no classes were scheduled for the afternoon and one day out of seven when she had no classes until 11.00 a.m. The insurance officer disqualified her under section 54 (2) (a) of the Act, as from November 20, 1957, because the claimant had restricted her hours of availability for work to such an extent as to be considered unavailable for work within the meaning of that section.

In her appeal to the board of referees, the claimant stated that she was registered as a "packer" and that the hours of work for that occupation at her last place of employment had frequently been as follows:

12.00 p.m.-7.30 p.m.

6.00 p.m.-6.00 a.m. and 6.00 p.m.-4.00 a.m.

7.00 p.m.-5.00 a.m. and 7.00 p.m.-3.00 a.m.

8.00 a.m.-4.30 p.m.

9.00 a.m.-5.30 p.m.

She also declared that she had had three years experience as a nurse's aide and had, at times over the years, been registered in that occupation at the local office in V....., R..... and, she believed, C..... as well. The hours of work in that occupation apparently were:

7.00 a.m.-3.30 p.m.

3.30 p.m.-12.00 midnight

12.00 midnight-8.00 a.m.

11.00 p.m.-8.30 a.m.

She maintained that she was available for work even though attending school in the day time as the hours of work in her previous occupations had frequently been outside school hours. She stated also that although she had not been directed to attend school by the Commission, she was improving her opportunities of securing work in the future, which was in accordance with the intent of the Act. She concluded by saying that without insurance benefit, she might find it difficult if not impossible to continue in school.

The placement officer reported that she was registered at the local office in C..... as a general office clerk only. According to his information, there was only one packing house that had a night shift at present and ordinarily its employees alternated every two weeks between day and night shifts; he pointed out that, in special cases, however, an employee could be given straight night work. With regard to employment as nurse's aide the local hospital considered such work as professional and did not place employment orders through the local office.

Upon receipt of a copy of the submission to the board of referees, the claimant immediately wrote to the local office to explain the basis for her incorrect impression that her registered occupation was that of nurse's aide. She then proceeded to give in detail her employment history for the past several years. It appears that she had worked at many places and at several occupations such as nurse's aide, kitchen help, maid and factory worker and on many different shifts. At one time she had even worked for a period of four months in the dual occupations of housekeeper in a hotel, from 9.30 a.m. to 4.30 or 5.00 p.m., and taxi dispatcher, from 5.00 p.m. to 1.00 a.m.

**Conclusions and Considerations:** My decision is that this claimant is not available for work within the meaning of section 54 (2) (a) of the Act while a day-student in full-time attendance at the local high school.

It is true the Act provides, in section 57 (3), that a claimant is available for work during any period he is attending a course of instruction, but only provided the Commission has directed the claimant to attend

such course. Nothing in the evidence indicates any such direction was given in this case or, for that matter, even sought. Accordingly, the claimant's availability must be determined in the light of the principles applying to claimants generally.

The claimant's statements clearly indicate she would not be willing to accept suitable employment if such acceptance meant she would have to choose between school and any work offered. The presumption of non-availability adverted to in CUB-1249, which was cited earlier, is not rebutted therefore.

Availability "is also an objective matter that must be determined in the light of a claimant's prospects for employment in relation to a certain set of circumstances beyond his control or which he has deliberately created" (CUB-1374).

Firstly, the hours of the claimant's school attendance are officially prescribed and no attempt has been made by the claimant to establish the extent to which any adjustment of hours or curriculum could have been effected to facilitate her engaging at the same time in full-time remunerative employment. It is also clear that the prospect of suitable work that would be compatible with her school hours was most remote. The claimant's decision to nevertheless enrol as a regular day-time high school student amounts to the deliberate creation by her of circumstances which so restrict her likely prospects of employment as to constitute on her own initiative a temporary withdrawal from the labour market.

For the above reasons, I must dismiss the claimant's appeal.

The claimant has suggested that the Commission should direct claimants to high school courses in the same manner as it directs them to those of trade schools. I consider this to be an administrative matter which rests solely with the Commission.

#### **Decision CUB-1573, September 18, 1958**

**Summary of the Main Facts:** The claimant, single, 18 years of age, who resides in S....., Newfoundland, filed an initial application (postal) for benefit on December 3, 1957 and stated that he had worked as a fisherman from September 2, 1957, to October 18, 1957, when the fishing season ended. In answer to the question in the application "What have you been doing since your last job ended?" he stated, "Attending school".

The insurance officer disqualified the claimant from receipt of benefit as from December 1, 1957, because, in his opinion,

he was not available for work in that he was attending school (section 54 (2) (a) of the Act).

The claimant appealed to a board of referees on January 25, 1958, stating that as there were no employment opportunities for him in S..... and no fishing done there in the winter, he decided to attend school for a few months rather than spend his time doing nothing. He stated also that he was not forced to attend school and that if the local office could find a suitable job for him, he would accept it any time.

At the request of the board of referees, the manager of the local office wrote to the claimant on March 7, 1958, asking for information as to what efforts he had made to obtain employment and what opportunities were available to him for employment. He replied that when he filed his application for benefit (postal) in December 1957, he was also registered for employment which he considers is proof that he had made an effort to secure work; that inasmuch as there were no employment openings for him in S..... and about 70 per cent of the people there were unemployed and in addition, married men stood the best chance of obtaining any work that was available, he was, therefore, unable to find any.

The board of referees which heard the case in S....., Newfoundland, on April 17, 1958, unanimously maintained the decision of the insurance officer on the grounds that the claimant had failed to indicate he had made individual and serious efforts to procure employment or that he was willing to accept work immediately it was offered to him regardless of where it might be.

With the permission of the chairman of the board of referees, the claimant appealed to the Umpire, contending that he was ready at all times to accept any employment, even though he was attending school; that before going to school each day as well as after school, he tried to find work in S..... but without success; that he could not afford to go away without definite prospects of a job and that the National Employment Office did not at any time find employment for him notwithstanding that he had filed an application therefor with that office.

**Conclusions and Considerations:** In the present case, it is evident from the claimant's employment history that he had worked whenever he could as a fisherman, regardless how short were the periods for which work could be found. In addition, there is the claimant's reiterated declaration against which nothing contrary has

been adduced, that he was willing to abandon his attendance at school should any job prospects be offered him. Finally, it would appear that in the claimant's district there was, following the end of the fishing season, a great deal of unemployment, with the preference for whatever jobs were available being given to unemployed married men.

The earlier Umpire decision, CUB-1249, relied upon by the insurance officer in the present appeal, held that *prima facie*, full-time attendance at a school (to which not directed under section 57 (3) of the Act) is not consistent with availability for work. I would distinguish several circumstances therein which do not arise in the present

case. The claimant had voluntarily left her employment and, shortly after separation, had commenced a regular school-term at which her full-time attendance was necessary, in addition to which the claimant had also recently refused an offer of suitable employment. I might add that the circumstances of present case are also obviously different from those set forth in a very recent decision CUB-1563, which referred with approval to CUB-1249.

By reason of the exceptional circumstances in the present case, my decision therefore is to maintain the claimant's appeal and direct that the disqualification in the present case be removed.

## Report of Board

(Continued from page 1288)

The Board is pleased to report that the unions and the employers in this dispute have reached settlement in the form of signed agreements.

The agreements in both cases cover a period of two years until August 31, 1960 and provide for wage increases as follows:

June 1, 1958—Increase 8 per cent above basic rates of pay in effect May 31, 1958  
October 1, 1958—Additional increase 1 per cent above basic rates of pay in effect May 31, 1958

August 1, 1959—Additional increase 10 per cent above basic rates of pay in effect May 31, 1958,

which provides as of August 1, 1959 an ultimate wage increase of 19 per cent above the basic rates existing May 31, 1958.

The Board is gratified to record that these discussions were characterized by an attitude of reasonableness and complete absence of acrimony on the part of all concerned.

Respectfully submitted,

(Sgd.) ADAM BELL,  
Chairman.

(Sgd.) P. E. AYRHART,  
Member.

(Sgd.) E. HOPKINS,  
Member.

## Recent Regulations

(Continued from page 1294)

A new provision states that an apprentice is not eligible for an allowance while he is receiving workmen's compensation, unemployment insurance or any other benefit, other than salary, under federal or provincial legislation, if the amount received is equal to or greater than the allowance payable under these regulations. However, if the benefit payment is less than the allowance, the amount of the benefit payment will be deducted from the living allowance.

The provision authorizing the Minister of Labour to require an apprentice who failed to complete his course to pay back the whole or part of the living allowance has been modified to provide that the Minister may make such an order only on the recommendation of the Apprenticeship Board.

## Newfoundland Labour Relations Act

An amendment to the regulations under the Newfoundland Labour Relations Act gazetted on September 2 permits the Labour Relations Board, with the approval of the Minister of Labour, to delegate to any person or board any or all of its powers or duties under the Act relating to any particular matter. This was done under authority of Section 60 of the Act, which further provides that a person or board so authorized has the powers of Commissioners under the Public Inquiries Act.

The Rules of Procedure of the Board were also amended by a new provision, No. 17A, which states that every interested party must comply with every reasonable request for information made by the Board or its Chief Executive Officer when investigating an application.

# LABOUR CONDITIONS IN FEDERAL GOVERNMENT CONTRACTS

## Wage Schedules Prepared and Contracts Awarded during September

### Works of Construction, Remodelling, Repair or Demolition

During September the Department of Labour prepared 318 wage schedules for inclusion in contracts proposed to be undertaken by departments of the federal Government and its Crown corporations in various areas of Canada, for works of construction, remodelling, repair or demolition. In the same period, a total of 247 contracts in these categories was awarded. Particulars of these contracts appear below.

A copy of the wage schedule issued for each contract is available on request to trade unions concerned or to others who have a *bona fide* interest in the execution of the contract.

(The labour conditions included in each of the contracts listed under this heading provide that:

(a) the wage rate for each classification of labour shown in the wage schedule included in the contract is a minimum rate only and contractors and subcontractors are not exempted from the payment of higher wages in any instance where, during the continuation of the work, wage rates in excess of those shown in the wage schedule have been fixed by provincial legislation, by collective agreements in the district, or by current practice;

(b) hours of work shall not exceed eight in the day and 44 in the week, except in emergency conditions approved by the Minister of Labour;

(c) overtime rates of pay may be established by the Minister of Labour for all hours worked in excess of eight per day and 44 per week;

(d) no person shall be discriminated against in regard to employment because of his race, national origin, colour or religion, nor because he has made a complaint with respect to alleged discrimination.)

### Contracts for the Manufacture of Supplies and Equipment

Contracts awarded in September for the manufacture of supplies and equipment were as follows:

| Department                                | No. of Contracts | Aggregate Amount |
|-------------------------------------------|------------------|------------------|
| Defence Construction (1951) Limited ..... | 1                | \$ 372.00        |
| Defence Production .....                  | 103              | 1,686,770.00     |
| Post Office .....                         | 13               | 116,886.66       |
| R.C.M.P. ....                             | 3                | 19,480.09        |

The Fair Wages and Hours of Labour legislation of the federal Government has the purpose of insuring that all Government contracts for works of construction and for the manufacture of supplies and equipment contain provisions to secure the payment of wages generally accepted as fair and reasonable in each trade or classification employed in the district where the work is being performed.

The practice of Government departments and those Crown corporations to which the legislation applies, before entering into contracts for any work of construction, remodelling, repair or demolition, is to obtain wage schedules from the Department of Labour, showing the applicable wage rate for each classification of workmen deemed to be required in the execution of the work. These

wage schedules are thereupon included with other relevant labour conditions as terms of such contracts to be observed by the contractors.

Wage schedules are not included in contracts for the manufacture of supplies and equipment because it is not possible to determine in advance the classifications to be employed in the execution of a contract. A statement of the labour conditions which must be observed in every such contract is, however, included therein and is of the same nature and effect as those which apply in works of construction.

Copies of the federal Government's Fair Wages and Hours of Labour legislation may be had upon request to the Industrial Relations Branch of the Department of Labour, Ottawa.

(The labour conditions included in contracts for the manufacture of supplies and equipment provide that:

(a) all persons who perform labour on such contracts shall be paid such wages as are currently paid in the district to competent workmen; and if there is no current rate, then a fair and reasonable rate; but in no event shall the wages paid be less than those established by the laws of the province in which the work is being performed;

(b) the working hours shall be those fixed by the custom of the trade in the district or if there be no such custom, then fair and reasonable hours;

(c) overtime rates of pay may be established by the Minister of Labour for all hours worked in excess of those fixed by custom of the trade in the district, or in excess of fair and reasonable hours;

(d) no person shall be discriminated against in regard to employment because of his race, national origin, colour or religion, nor because he has made a complaint with respect to alleged discrimination.)

## Wage Claims Received and Payments Made during September

During September the sum of \$972.75 was collected from 5 contractors for wage arrears due their employees arising out of the failure of the contractors, or their sub-contractors, to apply the wage rates and other conditions of employment required by the schedule of labour conditions forming part of their contracts. This amount has been or will be distributed to the 22 workers concerned.

## Contracts Containing Fair Wage Schedules Awarded during September

(The labour conditions of the contracts marked (\*) contain the General Fair Wages Clause providing for the observance of current or fair and reasonable rates of wages and hours of labour not in excess of eight per day and 44 per week, and also empower the Minister of Labour to deal with any question which may arise with regard thereto.)

### Central Mortgage and Housing Corporation

*Camp Gagetown N B:* Montclair Construction Co, construction of school with gymnasium (Job 51/54); Key Land Services Ltd, site improvement & planting (Job 54/54); Borgstrom Bros Ltd, site improvement & planting (Job 56/54). *Valcartier P Q:* Tellier & Groleau, construction of housing units & ground services (DND 10/58). *Ajax Ont:* W E Scott, \*exterior painting of houses (8/49). *Barriefield Ont:* T A Andre & Sons Ltd, construction of school (DND 8/57). *Deep River Ont:* M & S Martin Reg'd, site improvement & planting (AECL 18/56); M & S Martin Reg'd, site improvement & planting (AECL 20/56). *Petawawa Ont:* Ontario Power Line Construction Co, installation of electrical system (DND 11/56); Conniston Construction Co, site improvement & planting (DND 8/55). *Toronto Ont:* Fontaine Nursery Farm, site improvement & planting (FP 1/53). *Edmonton Alta:* Precision Construction (Edmonton) Ltd, construction of housing units & ground services (DND 10/58). *Belmont Park B C:* Farmer Construction Ltd, construction of housing units & services (DND 5/58).

### Department of Citizenship and Immigration

*Seven Islands Indian Agency P Q:* Desrosiers et Freres Enrg, relocation & extension of Agency office, Seven Islands; Labrador Plumbing & Heating Inc, renovations to sewage disposal system at Seven Islands IRS. *James Bay Indian Agency Ont:* Pulsifier Construction Ltd, roof repairs at Moose Fort IRS, Moose Factory. *Clandeboyne Indian Agency Man:* Bird Construction Co Ltd, erection of prefabricated two classroom school, Bloodvein Reserve. *Dauphin Indian Agency Man:* Canadian Brown Steel Tank Co Ltd, erection of fire escapes at Pine Creek IRS. *Fisher River Indian Agency Man:* Louis Ducharme & Associates Ltd, construction of residences, Peguis Central Reserve. *Carlton Indian Agency Sask:* Botting & Dent Ltd, heating renovations at Prince Albert IRS. *Blood Indian Agency Alta:* J C Edgar & Sons Ltd, plumbing renovations, Blood IRS. *Saddle Lake Indian Agency Alta:* St. Paul Foundry Ltd, construction of water supply system at Cold Lake Indian day school & construction of pumphouse & water supply system at Saddle Lake Indian day school, Saddle Lake Indian Reserve. *Bella Coola Indian Agency B C:* Widsten Marine Services Ltd, alterations & improvements at Klemtu Indian day school (Kitasso IR No 1), Klemtu Reserve. *Stuart Lake Indian Agency B C:* T & E Construction Co, supply & installation of water tank & incidental equipment at Lejac IRS. *Williams Lake Indian Agency B C:* Prince George House Movers Ltd, moving & re-establishing Alexis Bay day school, Redstone Flats.

## Defence Construction (1951) Limited

*Gander Nfld:* Eastern Woodworkers Ltd, construction of drill & recreation hall (special type "A") & outside services, RCAF Station. *Bedford Basin N S:* Trynor Construction Co Ltd, asphalt paving at magazine area. *Greenwood N S:* Louis Donolo Inc, construction of roads, water & steam distribution systems, etc, RCAF Station; Powers Bros Ltd, installation of new boiler & auxiliary equipment, etc, central heating plant, RCAF Station. *Halifax N S:* Fundy Construction Co Ltd, construction of magazine & roads; Fundy Construction Co Ltd, construction of maintenance workshop & offices, Shannon Park. *Shearwater N S:* Trynor Construction Co Ltd, repairs to runways, etc, *HMCS Shearwater. Shelburne N S:* Standard Structural Steel Ltd, supply & erection of structural steel for terminal & generator bldgs at *HMCS Shelburne. Camp Gagetown N B:* Forbes & Sloat Ltd, construction of tank & anti-tank range. *Chatham N B:* Modern Construction Ltd, construction of addition to drill recreation hall, RCAF Station. *Valcartier P Q:* G M Gest Ltd, construction of joint fire alarm system. *Camp Borden Ont:* Disher Steel, Division of Dominion Structural Steel Ltd, supply & erection of structural steel for garage (P-156). *Cobourg Ont:* Ruliff Grass Construction Co Ltd, construction of RCE offices & stores bldg & outside services. *Gloucester Ont:* P E Brule Co Ltd, supply & installation of antenna ground radials, etc, in connection with antenna array, *HMCS Gloucester. Kingston Ont:* Runnymede Steel Construction Ltd, supply & erection of structural steel for skating rink, RMC. *Ottawa Ont:* M J Sulpher & Sons Ltd, construction of curling rink, *HMCS Carleton. Camp Shilo Man:* Maple Leaf Construction Ltd, asphalt surfacing of RCASC & RCSA Mechanical Transport Compounds. *Portage la Prairie Man:* W & G Ellwood, construction of school extension & outside services, RCAF Station. *Dundurn Sask:* Dural Ltd, installation of water treatment plant. *Various Locations across Canada:* The Tower Co Ltd, \*supply & delivery of prefabricated HF/DF Huts, RCN Supplementary Radio Command.

## Building and Maintenance

*Ancienne Lorette P Q:* LaSalle Asphalte Ltee, repairs to hangar apron & hardstand (hangar No 1), RCAF CE & PE Carde Detachment. *Senneterre P Q:* La Societe D'Entreprises Generales Ltee, construction of roads & parking areas, RCAF Station. *Belleville Ont:* Colt Contracting Co Ltd, exterior repointing & repairs of masonry & brickwork, Armoury. *Camp Borden Ont:* Cardinal Painting & Decorating Co Ltd, exterior painting of bldgs & steel arch hangars. *North Bay Ont:* Standard Paving Ltd, resurfacing of access road at RCAF Station. *Petawawa Ont:* Walker Painting & Decorating Co Ltd, exterior painting of bldgs at Camp. *Trenton Ont:* C A McDowell & Co, interior painting of PMQ's, RCAF Station. *Rivers Man:* D M Hawkins & Co, exterior painting of PMQ's, CJATC. *Winnipeg Man:* Swanson Construction Co Ltd, repairs to exterior brickwork & masonry, Fort Osborne Barracks. *Chilliwack B C:* Frogett & van der Mout, exterior painting of bldgs & PMQ's at Camp.

## Department of Defence Production

*Summerside P E I:* Curran & Briggs Ltd, resurfacing of military road entrance, RCAF Station; D E MacLean, construction of access road to LF/MF beacon site, RCAF Station. *Bedford N S:* Dean's Nursery Ltd, \*seeding & spraying of traverses, RCN, Bedford Magazine. *Cornwallis N S:* Fred Cleveland, interior painting & refinishing floors, officer's block, Bldg No 31-2, *HMCS Cornwallis. Greenwood N S:* Fred Cleveland, painting of markings on runways, RCAF station; Municipal Spraying & Contracting Ltd, \*application of asphaltic pavement on roads and paths, RCAF Station. *Halifax N S:* S W Ferguson Ltd, scraping, cleaning, etc, & painting cranes, *HMC Dockyard;* S W Ferguson Ltd, reroofing of Barrington Street Armoury; Hillis & Sons Ltd, installation of exhaust hoods & fans in Bldg 3, RCAF Station, Gorsebrook. *Sydney N S:* Maritime Builders Ltd, extension to central heating plant, RCAF Station. *Lachine P Q:* Francis Hawkin & Co Ltd, cleaning of main sewers & manholes, sewage system, RCAF Station. *Montreal P Q:* Boiler Brickwork Co Ltd, general repairs to brickwork, water tube boilers, Heating Plant Bldg, No 37, DND area. *Parent P Q:* Paquin Construction Co Ltd, landscaping various DND areas, RCAF Station. *Ste Foy P Q:* Keet Construction Co Ltd, excavation, backfilling, concrete & masonry work, Community Centre. *Valcartier P Q:* Union Quarries & Paving Ltd, paving of roads & paths at CARDE. *Val d'Or P Q:* Marcel Cotes, exterior painting of bldgs at RCAF Detachment. *Barriefield Ont:* Foley Construction Ltd, replacement of concrete curbs & sidewalks, DND area. *Kingston Ont:* T A Andre & Sons Ltd, renovation of Armoury; Eaton Construction Co, renovation of

mess bldg, Barriefield Camp. *Mount Hope Ont*: E Hatcher & Son, interior painting of bldgs, RCAF Station. *Ottawa Ont*: J R Statham Construction Ltd, installation of storm windows, RCAF Bldg No 7, Victoria Island. *Owen Sound Ont*: E C King Contracting Ltd, repairs to roads & installation of curbs, guard rails & storm drains & construction of gravelled parking lot, Armoury. *Rockcliffe Ont*: Ambassador Mfg Co, installation of garage doors, RCAF Station. *Portage la Prairie Man*: H G Hay Decorating Co, interior painting of PMQ's, RCAF Station. *Shilo Man*: Maple Leaf Construction Ltd, repairs to roads, Military Camp. *Winnipeg Man*: Twin Cities Painting & Bldg Cleaning Co, repairs & painting, Bldg No 30, Fort Osborne Barracks. *Saskatoon Sask*: Foulds Construction Ltd, installation of garage & entrance doors, PMQ garages, RCAF Station; Jack Knorr Painting & Decorating, exterior painting of PMQ's, RCAF Station. *Edmonton Alta*: Nadon Paving Ltd, repairs to roads, Griesbach Barracks; O K Construction Ltd, repairs to roads, Griesbach Barracks. *Namoo Alta*: Automatic Sprinkler Co of Canada Ltd, conversion of sprinkler system, No 7 Supply Depot, RCAF Station, Lancaster Park. *Penhold Alta*: Asphalt Services Ltd, repairs to driveway, RCAF Station. *Camp Wainwright Alta*: Baril Construction, construction of concrete roadway, entrances & hard standing, RCEME Compound. *Burnaby B C*: A I M Steel Ltd, installation of chain link fence, No 2 CMU project; Hume & Rumble Ltd, erection of steel tower, No 2 CMU project, Burnaby Mountain. *Rocky Point B C*: W H Johnston, \*interior painting in laboratory area, RCNAD. *Vernon B C*: S & S Electric Co Ltd, replacement of power line poles & installation of disconnect switches, Military Camp.

### National Harbours Board

*Saint John N B*: Ross Engineering of Canada Ltd, installation of partial dust control system in grain elevator. *Montreal P Q*: Icanda Ltd, construction of pile foundations for transit shed, sections 62-65; Chas Duranceau Ltd, construction of foundations for Administration Bldg & Toll Plaza at south shore end of Jacques Cartier Bridge; Miron Construction Ltd, placing of fill on Nun's Island, construction of Champlain Bridge.

### National Research Council

*Ottawa Ont*: Paul Daoust Construction Ltd, construction of additional foundations to extend Bldg M-6 (Phase 3); Malloff Ltd, construction of cooling tower bldg; J E Copeland Co Ltd, construction of extension to Bldg M-7.

### Department of Northern Affairs and National Resources

# PRICES AND THE COST OF LIVING

## Consumer Price Index, October 1958

The consumer price index (1949=100) reached a new high at the beginning of October, rising 0.3 per cent from 125.6 in September to 126.0. In October 1957 it stood at 123.4\*.

Upward movements occurred in all five group indexes. The food, clothing, and household operation indexes each rose 0.4 per cent; increases in shelter and other commodities and services amounted to 0.1 per cent and 0.2 per cent, respectively.

The food index rose from 122.9 to 123.4. Beef prices, after easing since June, edged upwards. Prices were higher for most imported fruits and vegetables, particularly oranges, grapefruit, tomatoes and lettuce. Pork prices continued downwards, with lower prices also reported for eggs, coffee, and most domestically grown fruits and vegetables, notably apples and potatoes.

The shelter index was up fractionally from 139.4 to 139.6 as the national index of rents was unchanged but the homeownership component increased 0.3 per cent.

The clothing index increased from 109.5 to 109.9, largely reflecting higher prices on new seasons' women's and girls' winter coats, compared with prices in effect at the close of last season.

An increase in the household operation index from 120.8 to 121.3 resulted from a combination of higher prices for coal and electricity; furniture and appliance prices up from previous month's sale prices; and increases for household supplies and services, including soaps, detergents, and some local telephone rates.

Generally higher fees for doctors, dentists and optical care were mainly responsible for carrying the other commodities and services index from 131.5 to 131.8. Somewhat higher prices were also recorded for gasoline, inter-urban bus fares, and local transportation, including taxi fares.

Group indexes in October 1957 were: food 121.7, shelter 135.9, clothing 108.7, household operation 120.1, and other commodities and services 127.4.

## City Consumer Price Indexes, September 1958

Consumer price indexes were higher in five of the ten regional cities between the beginning of August and September, with increases ranging from 0.4 per cent in

Edmonton-Calgary to 1.0 per cent in Montreal; lower in four, declines ranging from 0.1 per cent in Halifax to 0.5 per cent in St. John's; and the Saint John index was unchanged\*.

Food indexes declined in five of the six eastern regional cities, rising only in Montreal. In contrast, food indexes rose in all four western cities.

Shelter indexes rose in eight regional cities and were unchanged in Halifax and Ottawa. Clothing indexes were lower in three cities, unchanged in four and up slightly in the other three regional cities. Household operation indexes rose in seven cities, were unchanged in two and declined fractionally in Ottawa.

The other commodities and services group indexes moved up in five regional cities, were unchanged in four and eased slightly in the tenth city. Street car and bus fares increased sharply in Montreal and hospital rates were up in Montreal, Ottawa and Toronto. New passenger car prices were down somewhat in a number of cities. Magazine subscription rates increased across the country.

Regional consumer price index point changes between August and September were as follows: Montreal +1.2 to 126.1; Vancouver +0.9 to 126.0; Saskatoon-Regina +0.8 to 123.0; Winnipeg +0.6 to 123.3; Edmonton-Calgary +0.5 to 121.8; St. John's -0.6 to 112.5†; Ottawa -0.3 to 125.7; Toronto -0.2 to 128.7; Halifax -0.1 to 123.1. Saint John remained unchanged at 125.7.

## Wholesale Price Index, September 1958

Following three successive monthly decreases, Canada's general wholesale price index (1935-39=100) rose slightly from 226.8 to 227.1 between August and September. Four of the eight major group indexes were higher, two receded and the remaining two were unchanged. The general index was slightly higher than last year's September figure of 227.0.

Higher prices recorded for paper board, cedar, woodpulp and newsprint contributed most to a 1.2-per-cent increase in the wood products index from 297.9 in August to 301.5. This marks the highest point the index has reached since September 1956,

\*See Table F-2 at back of book.

†On base June 1951=100.

\*See Table F-1 at back of book.

when it stood at 302.5. Higher prices for copper (electrolytic domestic) and silver offset decreases in tin ingots and caused the non-ferrous metals group index to increase 0.8 per cent from 164.2 to 165.6. Non-metallic minerals advanced 0.4 per cent from 186.7 to 187.5; the textiles index 0.2 per cent from 227.8 to 228.2.

Animal products declined 1.3 per cent, moving from 249.4 to 246.1; the vegetable products index eased 0.1 per cent from 198.3 to 198.2.

Chemical products at 183.4 and iron products at 251.6 showed no change from August.

**The residential building materials price** index (1949=100) rose 0.5 per cent from 127.7 in August to 128.4 in September. The non-residential building materials series (1949=100) moved up 0.2 per cent from 129.4 to 129.6.

### U.S. Consumer Price Index, September 1958

The United States consumer price index (1947-49=100) remained unchanged at 123.7 between mid-August and mid-September. Food prices dropped slightly but the decrease was balanced by higher prices for clothing, medical care and transportation.

The previous month the index had registered its first decrease in two years but the September index was still 2.1 per cent higher than that in September 1957, when it stood at 121.1.

### U.K. Index of Retail Prices, August 1958

The United Kingdom index of retail prices (Jan. 17, 1956=100) declined for the second consecutive month between mid-July and mid-August, dropping from 108.5 to 108.3. It was still two tenths of a point higher than in January and almost two full points higher than the previous August's 106.4.

The share of labour costs in West German industry's sales value went up by 7 per cent and reached 19.2 per cent in the first half of 1958, compared with 18.5 per cent at the same time last year.

The total of industrial wages and salaries increased 2 per cent from January to July 1958 but the number of hours worked in industry dropped 2.4 per cent as the result of collectively agreed cuts in regular working time.

# STRIKES AND LOCKOUTS

## September 1958

In September, close to 47,000 workers in Canada were involved in a total of 56 work stoppages amounting to 496,780 man-days.

The number of man-days lost during September was nearly twice as high as in August\*, and higher than the totals recorded in any month since July 1952. The number of workers on strike or locked out during September also represented the highest monthly total in six years.

More than half of the time loss for the month resulted from the continuing strike of 8,000 steelworkers in Hamilton, and from a dispute in Toronto which eventually involved some 15,000 construction workers. Another important work stoppage in September was the strike of 13,000 workers employed by the International Nickel Company of Canada in Sudbury and Port Colborne.

Of the 56 work stoppages reported during September, 21 involved 100 or more workers. Eleven of these larger work stoppages had started prior to September, and four of the eleven were still in progress at the end of the month. All but three of the ten larger work stoppages that began during September were still in progress at the end of the month.

Among the provinces, Ontario had the largest number of work stoppages and also the highest time loss: approximately three quarters of the total time loss during Sep-

tember was recorded in Ontario. More than four fifths of the time loss in that province was caused by three stoppages: the steel strike in Hamilton, the strike of workers employed by the International Nickel Company of Canada, and the dispute involving construction workers in Toronto.

Much of the time loss recorded during the month in Quebec was the result of a strike of approximately 1,800 shipbuilding workers in Lauzon; this stoppage, which began in mid-August, was still in progress at the end of September. In British Columbia, a large proportion of the time loss recorded during September was caused by a strike involving 1,300 longshoremen employed by the B.C. Shipping Federation. This work stoppage ended on September 24.

Work stoppages, mostly small, were also reported from nearly all other provinces. The largest work stoppage outside Ontario, Quebec and British Columbia involved 900 longshoremen in Newfoundland. This work stoppage began on August 21 and ended in mid-September.

Table 1—NUMBER OF STRIKES AND LOCKOUTS, WORKERS AND TIME LOSS INVOLVED, BY INDUSTRY, SEPTEMBER 1958.

| Industry            | No. of               |                | Time Loss |
|---------------------|----------------------|----------------|-----------|
|                     | Strikes and Lockouts | No. of Workers |           |
| Mining .....        | 3                    | 13,426         | 82,650    |
| Manufacturing ....  | 29                   | 13,695         | 257,445   |

| Trade .....         | 4                    | 121            | 1,555     |
| Service .....       | 3                    | 89             | 1,650     |

Table 2—NUMBER OF STRIKES AND LOCKOUTS, WORKERS AND TIME LOSS INVOLVED, BY PROVINCE, SEPTEMBER 1958.

| Province            | No. of               |                | Time Loss |
|---------------------|----------------------|----------------|-----------|
|                     | Strikes and Lockouts | No. of Workers |           |
| Newfoundland .....  | 1                    | 900            | 13,500    |
| Nova Scotia .....   | 3                    | 589            | 8,070     |
| New Brunswick ....  | 1                    | 100            | 400       |
| Quebec .....        | 10                   | 2,664          | 44,340    |
| Ontario .....       | 34                   | 39,995         | 388,040   |
| Alberta .....       | 2                    | 262            | 5,130     |
| British Columbia .. | 5                    | 2,434          | 37,300    |

\*Table G-1 at the back of this issue compares, on a monthly basis, the number of strikes and lockouts in existence during 1958 and 1957. The approximate number of workers involved and the time loss resulting are also compared on a monthly basis and the number of strikes and lockouts beginning during each month is indicated.

Table G-2 deals more specifically with the stoppages involving 100 or more workers in existence during September 1958. The approximate time loss, together with the number of workers involved, is indicated for each stoppage. The major issues and the major terms of settlement, if the stoppage has ended, are also mentioned. Other details include such information as the dates on which the stoppages began and ended and the industries in which they occurred.

Tables C-4 and C-5 are based on reports from a somewhat smaller number of firms than Tables C-1 to C-3. They relate only to wage-earners for whom statistics of hours of work are also available whereas Tables C-1 to C-3 relate to salaried employees as well as to all wage-earners of the co-operative firms.

\* Durable manufactured goods industries.

## D—National Employment Service Statistics

Tables D-1 to D-5 are based on regular statistical reports from local offices of the National Employment Service. These statistics are compiled from two different reporting forms, UIC 751: statistical report on employment operations by industry, and UIC 757: inventory of registrations and vacancies by occupation. The data on applicants and vacancies in these two reporting forms are not identical.

(a) The record of the Department includes lockouts as well as strikes but a lockout or an industrial condition which is undoubtedly a lockout, is not often encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused but a separate record of such strikes is maintained in the Department. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees for a short period of time is frequently not received until some time after its commencement.

(b) Strikes unconcluded at the end of the previous year are included in these totals.

TABLE G-2.—STRIKES AND LOCKOUTS SEPTEMBER 1958, INVOLVING 100 OR MORE WORKERS

Preliminary, subject to revision

(a) In this table the date began is that on which time loss first occurred and the date of conclusion is the last day on which time was lost to an appreciable extent.  
(b) 43 indirectly affected; (c) 378 indirectly affected; (d) 25 indirectly affected.

## manpower and labour relations

# REVIEW

ECONOMICS AND RESEARCH BRANCH

### Current Manpower Situation

The economy appeared to show more vigour in November after a rather hesitating performance in the third quarter. The upturn in automobile and forestry production, a record rate of housebuilding and the settlement of industrial disputes were major factors in the improvement. Unemployment continued to rise more slowly than last year. The strengthening during the month was not reflected in total employment estimates owing to the continued decline in agriculture. However, the number with non-farm jobs was an estimated 34,000 higher in November than a year earlier and, after allowing for seasonal changes, was not far below the peak of 1957.

Industrial disputes, which had a significant retarding effect on economic activity in the third quarter, were largely settled by November. The return to work in the steel industry in particular forestalled further material shortages which were holding back production in several industries. Earlier, strike settlements were made in the Toronto and Vancouver construction industry, and in the shipbuilding industry at Sorel, although at Sorel the return to work was short-lived; some 335 workers were laid off in November owing to a shortage of orders.

Automobile production finally swung into high gear in November, after three months of layoffs and short time. Output in the six weeks ending mid-December was 7.5 per cent greater than in the same period last year. By the end of the month, most workers had been recalled in the main production centres and a substantial amount of rehiring was reported in other areas where automotive supplies industries are located.

The massive housebuilding program this year has resulted in a record number of units under construction, providing work for a greater number of construction workers in this segment of the industry than in past winters. New housing units started in November continued at a record level for this time of year. Because of the lower levels of activity in other forms of construction, however, employment in this industry in November was still some 6 per cent lower than a year earlier.

The labour force has moved rather erratically in the past three months. Since mid-year, however, the effects of reduced immigration and the relative scarcity of jobs have been clearly indicated. In the period August-November the labour force was, on the average, 1 per cent higher than a year earlier; this spring the year-to-year margin was well over 3 per cent.

The stability of the labour force and the increase in employment reduced the size of the seasonal upswing in unemployment this fall. Persons without jobs and seeking work increased only 80,000 between August and November

this year, compared with 120,000 last year. In November the "seeking work" figure was 361,000, or 5.9 per cent of the labour force; it was 5.1 per cent in October, and 4.9 per cent in November 1957.

## Current Outlook in the Engineering Profession

The stable level of employment in 1958 and the consequent increase in unemployment has affected the current outlook in many occupations, especially in the goods-producing industries. As might be expected, the demand for unskilled workers has weakened noticeably. The market for skilled and professional workers has been least affected, although even for them rising supplies tend to exceed requirements.

In the engineering profession, shortages have been more continuous and acute than in any other occupational group in the past decade. The extent to which shortages have been modified this year is interesting, and is perhaps indicative of developments in other professional and skilled occupations.

The present labour market situation for engineers in Canada indicates that the general demand and supply are fairly well in balance, with a moderate tendency towards a surplus of new and inexperienced engineers. This is in contrast to the severe shortage that prevailed in 1955, 1956 and early 1957. The record economic expansion of these years required increasing numbers of new engineers. At the same time, the numbers graduating from universities were relatively small and net immigration was falling off. (Net immigration represents the difference between immigration and emigration.)

University graduations and net immigration are the two major sources of supply of engineers. The yield from these two sources from 1951 to 1958 is shown in the chart below. It may be seen that the number of engineers graduating declined after 1951 following the graduation of veterans who had

been studying under the Veterans Rehabilitation Act, and reached its lowest level in 1954. Graduations increased in subsequent years, although not as rapidly as requirements. Net immigration showed a striking variation from year to year, with a high net immigration in 1957 and an extremely low net immigration expected in 1958.

On the demand side for engineers, there is no one set of figures which can be set against the available data on supply. One major source of information is the Department of Labour's biennial survey of requirements for professional personnel. The results of the most recent survey show that for the three types of employer—industry, government, and universities—employment of engineers rose by 10 per cent from 1956 to 1957. The subsequent growth rate, however, is expected to be considerably lower—6.8 per cent from 1957 to 1958, and approximately 5 per cent in each of the two following years.

Industry, which employed more than 80 per cent of engineers covered by the survey, is mainly responsible for the decline in expected requirements. Government agencies reported the smallest percentage increase in actual employment from December 1956 to the same date in 1957, namely, 7 per cent. Their expected requirements, expressed in year-to-year percentage increases, follow an irregular pattern, from 15 per cent in 1958 to 3 per cent in 1960. Universities and colleges, the smallest employers of engineers of the three, increased their engineering employment by 11 per cent between the end of 1956 and the end of 1957, and expect year-to-year increases from 1958 to 1960 not to go much below that level.

In the biennial survey, employers have been asked to indicate whether they experienced difficulties in recruiting professional personnel in the past and whether they expected such difficulties in the future. Their replies show that 61 per cent of employers in industry, 90 per cent of the colleges and universities, and 85 per cent of government agencies reported having recruit-

ment difficulties in 1954 and 1955; this compares with 22, 75 and 57 per cent, respectively, in 1956 and 1957. As far as the outlook is concerned, a further decline in recruitment difficulties is expected by all three groups of employers.

Other clues to the changing labour market situation for engineers may be found in the operations of the National Employment Service. Review of job vacancies for engineers (reported by employers) and the number of engineers applying for jobs throughout the country shows that in the period 1951 to 1958 the year 1956 had the highest ratio of vacancies to applicants (slightly more than five and one-half vacancies for every applicant). The situation has changed markedly since that time. In 1957, there were about two engineering jobs for every applicant reported, and in the first ten months in 1958 there was on the average only one vacancy reported for slightly more than two engineers registered for employment.

Since 1951, the National Employment Service has been surveying the major employers of professional personnel in Canada annually with a view to obtaining from them an estimate of the openings they expect to have the following spring for new graduates in different fields, including engineering. A review of these data shows that for each year except 1951 and 1958 Canadian employers reported having more job openings for new graduates in engineering than the number of such graduates

turned out by Canadian universities and colleges. The years 1956 and 1957 had the greatest number of job openings reported in excess of Canadian university graduations in engineering.

The relationship between industrial earnings and starting salaries for engineers within the last decade serves as another indicator of the labour market situation for engineers. Analysis of these data shows that changes in earnings of industrial workers and in the starting salaries for engineers followed each other closely up to 1955. However, in 1955, 1956 and 1957, starting salaries for engineers rose at a much faster rate than industrial earnings. In 1958, on the other hand, starting salaries for engineers rose only slightly above the 1957 level, while industrial earnings increased somewhat more.

There are a number of other factors (such as the utilization of engineers, the supply of technicians and engineers who are not university graduates) playing a role in equating the supply and demand for engineers which cannot be discussed here. The data already reviewed are sufficient to point clearly to the fact that the shortage of engineers which has prevailed since 1951 has slackened noticeably in 1958. As for the outlook, such long-run factors as technological development, industrial growth and the continuing rise in the Canadian standard of living will all play a role in maintaining the need for an increasing number of engineers in the years to come.

LABOUR MARKET CONDITIONS

(a) Distribution of these figures between male and female workers can be obtained from *Labour Force*, a monthly publication of the Dominion Bureau of Statistics. See also inside back cover, October issue.

(b) See inside back cover, October issue.

(c) These percentages compare the cumulative total to date from first of current year with total for same period previous year.

# Labour-Management Relations

## The Bargaining Scene

The year 1958, in retrospect, has been one of the most active of the last decade on the industrial relations front. By the close of the year, however, most of the year's bargaining in key industries, and particularly among the larger bargaining units, had been completed.

Some indication of the extent of negotiations in 1958 can be gained from a comparison of the past two years with regard to agreements covering 1,000 workers or more. This year, approximately 90 per cent of the workers covered by such agreements were involved in bargaining in contrast to 30 per cent in 1957. At the peak of activity in June of this year, three out of five such workers were affected by negotiations. In 1957, the peak of activity came at the end of the year, when the non-operating railway workers served their demands, and at that time one in every five workers under contracts affecting 1,000 workers or more was negotiating.

In spite of the larger load of collective bargaining in 1958, approximately the same number of workers are still in negotiations at the end of this year as in 1957. In 1958, the average length of collective bargaining negotiations was between six and seven months and, although a number of serious industrial disputes took place, 90 per cent of the workers affected by the settlements reached were not involved in work stoppages.

The carry-over in bargaining from 1957 to 1958 was, as already noted, largely accounted for by the non-operating railway workers. This year the carry-over involves a greater number of individual contract negotiations—66 this year, as compared with 33 at the end of last year. Nevertheless, many of the settlements recorded in recent months have taken place in important negotiations within industries where some of these 66 agreements are still to be concluded.

## Recent Negotiations

Significant reductions occurred within the last month in the number of negotiations being conducted and in the numbers of workers affected by them. Settlements on the railways and in the Quebec and Ontario sections of the truck transport industry have affected some 140,000 workers, or more than half of the transportation workers under agreement in Canada. In addition, settlements with a number of pulp and paper companies in Quebec and Newfoundland have rounded out settlements in the eastern section of this industry. The settlement of negotiations between the United Automobile Workers and General Motors of Canada also took place within the last month.

The settlements in the Ontario and Quebec trucking industry resulted in three-year contracts, involving a series of wage increases during the three years which total about 20 cents an hour. In the contracts with the eastern Canadian paper companies, the important new terms in the two-year agreements call for 5 cents an hour increase and four weeks vacation after 25 years. The General Motors agreement in Ontario, a three-year contract, provided 6 cents an hour annual increases. Settlement of the non-operating railway dispute was on the basis of the conciliation board report involving a wage

increase of approximately 14 cents an hour over two years, which was put into effect after a 17-per-cent increase in freight rates on the Canadian railways.

By mid-December, strike activity among larger bargaining groups had narrowed down to that of workers at the International Nickel Co. at Sudbury and Port Colborne, Ont. At time of writing, further discussions in this dispute were being carried on with the assistance of the Ontario Department of Labour.

# Manpower Situation in Local Areas

## ATLANTIC

Employment contractions in the seasonal industries were much smaller than the corresponding declines in 1956 and 1957. At mid-month the number of persons with jobs was estimated at 495,000, only 7,000 less than a year ago, the smallest difference registered this year.

The rising tempo of construction activity has tended to stabilize employment during recent months. Housing, in particular, made a strong recovery; the number of units started in the three months August to October was 60 per cent higher than in the comparable period last year. Business and engineering construction also showed substantial gains this fall. Logging employment held fairly stable during the month at a somewhat lower level than last year. The level of manufacturing employment showed little over-all change during the month, but the average of hours worked increased in many plants.

Unemployment increased moderately in most parts of the region and resulted in the reclassification of nine of the 21 areas, five from balance to the moderate surplus category and four from the moderate to the substantial surplus category. At December 1, the area classification was as follows (last year's figures in brackets): in substantial surplus, 6 (6); in moderate surplus, 15(13); in balance, 0 (2).

### Local Area Developments

**St. Johns** (metropolitan) was reclassified from Group 2 to Group 1. A temporary shutdown occurred at the Wabana Ore Mines in Bell Island, resulting in the layoff of 1,400 workers for one week. These mines have experienced periodic shutdowns since early summer owing to declining sales. Total employment in the area was higher than a year earlier despite the weaknesses in mining and some other industries. Construction was very active during the month and was the main reason for the year-to-year employment gain. Fish landings were well below normal this fall so that canning plants were unusually slack; the October catch was reported to be 50 per cent lower than in 1957. Total manufacturing employment was about 4 per cent lower than last year.

**Halifax** (metropolitan) was reclassified from Group 3 to Group 2. Unemployment showed a slight seasonal rise in this area. Total employment was slightly lower than a year ago, but the loss was well distributed: no one industry was severely affected. The demand for lumber was reported to be somewhat stronger than a year ago although inventories were still excessive. The fishing industry showed some improvement during the month, providing overtime work in some of the canneries.

## CLASSIFICATION OF LABOUR MARKET AREAS—DECEMBER 1, 1958

|                                                                                                                         | Substantial<br>Labour Surplus                                                                                | Moderate<br>Labour Surplus                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Approximate<br>Balance                                                                                                                                                                                                                      | Labour<br>Shortage |
|-------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
|                                                                                                                         | Group 1                                                                                                      | Group 2                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | Group 3                                                                                                                                                                                                                                     | Group 4            |
| <b>METROPOLITAN AREAS</b><br>(labour force 75,000 or more)                                                              | ST. → The areas shown in capital letters are those that have been reclassified during the month; an arrow indicates the group from which they moved. For an explanation of the classification system used, see inside back cover, October issue.

**New Glasgow** (major industrial) was reclassified from Group 2 to Group 1. The over-all employment situation was less favourable in New Glasgow than in other industrial areas in the region. Eastern Car Company, the largest employer in the area, has been operating well below capacity all year. Workers recalled at the shipyards earlier this fall were released during the last half of November and further layoffs were scheduled to take place in December.

**Charlottetown, Summerside, Kentville and Edmundston** (major agricultural and minor) were reclassified from Group 3 to Group 2. Agriculture was mainly responsible for the increases in unemployment in these areas. The Canadian Gypsum Quarries resumed operations after an industrial dispute lasting more than a year.

## QUEBEC

Total employment declined in the Quebec region during November but was higher than in the same month last year. At mid-month, total employment was estimated at 1,605,000, some 30,000 fewer than the previous month but 9,000 more than in the previous year. Unemployment rose during the month, but at a substantially lower rate than in the corresponding period last year.

Four fifths of the employment decline during the month occurred in agriculture. The remainder was due mainly to seasonal curtailment in road building and other outdoor activities. There was also a seasonal decline in residential construction, although house building was still well above last year's level. Employment in pulp cutting reached a peak in November having absorbed considerably fewer workers than last year. Lack of orders resulted in layoffs of iron and steel, aircraft and shipbuilding workers. Employment in pulp and paper mills showed little change, although the work week increased in several mills.

Total employment (seasonally adjusted) declined moderately from June to November. Decreases were mainly in non-residential construction, and in shipbuilding, machinery, aircraft, and railway rolling stock manufacturing. The textile industry, which reached a rather low point in August, showed some seasonal improvement in September and October; seasonal layoffs and short-time were reported in November. Employment in trade and finance showed a slow and steady increase since August of this year and has continued to remain above last year. Employment in the service industries declined seasonally in October, but in the August-October period was also higher than in the same period a year ago.

Six of the 24 labor market areas were reclassified during the month. At December 1, the area reclassification was as follows (last year's figures in brackets): in substantial surplus 5(7); in moderate surplus 17 (15); in balance 2 (2).

## Local Area Developments

**Montreal** (metropolitan) remained in Group 2. Unemployment increased in the Montreal area, mainly as a result of seasonal declines in services and outdoor activities. Employment in October was lower than a year ago. Continuing weaknesses, especially in iron and steel and transportation industries, contributed to the decline in manufacturing employment.

**Quebec-Levis** (metropolitan) remained in Group 2. Employment in October was down about 7 per cent from last year mainly because of reduced production in textiles, shipbuilding and pulp and paper industries. This area was one of the few in Quebec in which logging was higher than last year. Pulp and paper mills continued to operate on short time, although the work week was lengthening. The Montmorency cotton mill went on short time, affecting 400 workers. Following the strike settlement in the shipbuilding industry on October 22, shipbuilding employment increased; in November, however, lack of orders resulted in the layoff of some 500 workers.

**Joliette** (major industrial) was reclassified from Group 2 to Group 1. Unemployment rose in Joliette during the month, but was about the same as last year. A number of logging camps closed down as the cutting season was nearing its end. Employment in the construction, secondary textile and electrical apparatus industries underwent seasonal declines.

**Shawinigan** (major industrial) was reclassified from Group 2 to Group 1. Unemployment rose in this area, mainly as a result of seasonal layoffs in construction and other outdoor industries. There was further reduction in textile employment.

## ONTARIO

Employment in Ontario declined during the month. The number of persons with jobs at November 15 was estimated at 2,154,000, a decline of 12,000 from the previous month and of 25,000 from the previous year. Agriculture accounted for two thirds of the total month-to-month decline in employment. Unemployment continued higher than a year ago, although the increase since August was smaller.

The settlement of the strikes of construction and steel workers was reflected in increased activity in a number of allied industries. In manufacturing, employment was generally maintained at last month's level and remained about 4 per cent lower than last year. Indefinite layoffs occurred in the aircraft and shipbuilding industries, and seasonal layoffs took place in food and beverages and textiles. The automobile industry has returned to a higher level of production during the month. Output was the highest since June and only 11 per cent below last year's level, bringing total production for the first 11 months to within 18 per cent of last year's figure. High production levels in the manufacture of automobiles and farm implements resulted in a noticeable improvement in the demand for steel. However, activity in another big steel user, railway rolling stock, remained at the low level of the past several months.

Construction activity continued high, particularly in the residential sector, although increased surpluses of construction labour were reported in various localities. The number of new housing units started in major centres of the region in October was about 25 per cent higher than last year and continued to increase in November. The increase in new housing had a sustaining influence on the industries producing home furnishings and appliances. Employment in forestry showed a slight decline from the previous month, and forestry operations are expected to remain at about the low level of last year.

Five of the 34 labour market areas in the region were reclassified during the month, all of them to categories denoting higher unemployment. At December 1, the area classification was as follows (last year's figures in brackets): in substantial surplus, 3 (1); in moderate surplus, 19 (19); in balance, 12 (14).

### Local Area Developments

**Metropolitan Areas where classification unchanged:** *Hamilton* (Group 2). Employment appears to be stabilizing at a lower level than last year. Most steel workers were recalled following the termination of the strike at Stelco. The demand for steel, farm implements and heavy electrical apparatus increased noticeably. Output and employment in the railway rolling stock plant remained low. *Ottawa-Hull* (Group 3). Employment increased slightly over the month and was well above last year's level. At the same time National Employment Service registrations increased, mainly because casual and out-of-town workers were registering in greater numbers. Forestry operations have reached their peak and are expected to be completed earlier than usual. *Toronto* (Group 3). Employment was somewhat lower than a year ago, but the level of economic activity compares favourably with last year's. Manufacturing as a whole showed little change over the month. The volume of business in fabricated steel and sheet metal was about the same as last month and in some cases higher. The radio and television industry was extremely busy and some plants were operating on three shifts. *Windsor* (Group 1). Unemployment remained high, but employment showed some improvement from last month and was only slightly below last year's level. At the same time, registrations declined from last year.

**Major Industrial Areas reclassified from Group 3 to Group 2:** *Kingston*: Reclassification was due to layoffs of construction workers and small seasonal layoffs from the Aluminum Company of Canada. *London*: Activities in food and beverages declined seasonally. Small layoffs occurred in the household appliances and transportation equipment industries.

**Major Industrial Areas reclassified from Group 2 to Group 1:** *Cornwall:* Reclassification was due mainly to a decline in textiles and seasonal reduction in employment on the Seaway and Power Project. *Sudbury:* A general decline in economic activity as a result of the industrial dispute at the International Nickel Company brought the area into the substantial surplus category.

**Galt** (minor) was reclassified from Group 3 to Group 2.

## PRAIRIE

Employment in the Prairie region continued to decline seasonally. On November 20, the number of persons with jobs was estimated to be 1,001,000. This was 40,000 fewer than the previous month but 9,000 more than a year earlier. The increase in unemployment and its level during the month were virtually the same as last year. Employment in non-farm industries expanded by about 20,000 over the year, while the number of workers on farms fell by about half of this amount.

Economic activity in the area was greatly stimulated by housing construction, which is expected to reach a new record this year. Business and industrial construction remained relatively strong

so that the seasonal declines in services and transportation were offset to a considerable degree. Oil exploration and production declined in Alberta, owing to the drop in export demand. In Saskatchewan, however, expansion in the industry continued. Coal mining in Alberta was stimulated by the onset of cold weather and in Saskatchewan by the increased utilization of the lignite deposits of the southeast. Employment in forestry continued to decline, especially at the Lakehead.

In general, the additions to labour surpluses during November were of unskilled workers from the more seasonal industries such as agriculture and construction. Of the 20 labour market areas, nine were reclassified during the month to categories denoting increased unemployment. At December 1, the classification was as follows (last year's figures in brackets): in substantial surplus 1 (0); in moderate surplus 11 (12); in balance 8 (8).

## Local Area Developments

**Edmonton and Calgary** (metropolitan) were reclassified from Group 3 to Group 2. Owing to the continued strength in construction, employment in both areas was maintained at about last year's level. In Calgary, the number of men registered with the National Employment Service was about the same as last year, but the number of women registered was just over 50 per cent higher. Registrations for Edmonton were very near last year's level.

**Winnipeg** (metropolitan) was reclassified from Group 3 to Group 2. Housing was strong, with the number of units under construction at the end of October about 70 per cent higher than a year earlier, but this failed to offset seasonal declines in other areas of construction and in the needle trades. The storm in mid-November hastened the employment decline in seasonal industries.

**Fort William-Port Arthur** (major industrial) was reclassified from Group 2 to Group 1. Unemployment was increased by more layoffs in the forest industry. Although the level of employment did not decline as much during the month as it did a year earlier, it remained substantially lower.

**Saskatoon and Regina** (major agricultural) remained in Group 3. Construction, particularly residential, contributed to the strength in employment. Saskatoon had well over 200 housing starts in October compared with fewer than 150 in the same month last year. In Regina a new steel plant was under construction. Some workers were hired during November for work on the South Saskatchewan River Dam. More will be hired as the construction of a temporary bridge, the stock-piling of gravel, and the building of living quarters at the site are continued. The exploitation of Saskatchewan's potash resources also provided increased employment at sites near Esterhazy and Saskatoon.

**North Battleford, Prince Albert, Yorkton, Lethbridge and Red Deer** (major agricultural) were reclassified from Group 3 to Group 2. Because of the relative lack of industrial diversification, the seasonal decline in agricultural employment was more severe in these smaller centres.

## PACIFIC

Employment in the Pacific region, which normally declines somewhat, held at a stable level in November owing to the relatively strong demand for loggers and construction workers. Total employment was estimated to be 518,000 at mid-month, some 8,000 higher than a year earlier. Unemployment increased much more slowly than last year and by the end of the month was lower than in November 1957.

Where possible, logging camps operated at capacity in November to replenish depleted stocks. Throughout the summer, because of the extended period of fire restrictions, the number of loggers employed was, on the average, 3,000 below last year. At the same time, lumber output was up over last year by 11 per cent and towards the end of the summer shortages of sawlogs were holding up production in some areas. When it became possible, therefore, logging operations were expanded and in most areas activity has continued at a high level. In the northern interior, the Okanagan and Kootenay districts, employment was reduced during November because of strikes and unfavourable weather conditions.

The winter employment level in the region is expected to be bolstered by the current high level of construction. This is particularly true in Vancouver, where work on many projects has been speeded up to compensate for time lost through industrial disputes. This year the emphasis has been on housebuilding, although in recent months a number of large business projects were started.

The main employment weaknesses were in iron and steel products manufacturing and shipbuilding. Employment in these industries was considerably below last year. The shipyards have recently been awarded federal government contracts for several vessels but it will be some months before work begins. Mining operations are still sluggish, although there have been indications of recovery.

At the end of the month, unemployment had not developed on a substantial scale in as many areas as at this time last year. The classification of the 11 labour markets in the region at December 1 was as follows (last year's figures in brackets): in substantial surplus, 3 (5); in moderate surplus, 6 (6); in balance, 2 (0).

### Local Area Developments

**Vancouver** (metropolitan) reclassified from Group 2 to Group 1. Although employment is currently down about 5 per cent from a year earlier, the picture has brightened since the summer months. The main factors in the improvement are the resumption of work on construction projects and the steady call for logging crews from out-of-town points. Some pick-up was anticipated in the largest steel fabricating plant as a result of a contract to supply steel for the new Peace River bridge. Other metal working firms were expected to benefit from the increased construction and logging activity and the new shipbuilding contracts. Layoffs were prevalent in fish canning plants and other seasonal industries, but the resulting increase in unemployment was less than at this time last year.

**Victoria** (major industrial) remained in Group 2. As in other areas, unemployment increased much more slowly than last year. Employment is currently down 8 per cent from last year, attributable almost entirely to the shipbuilding industry. As a result of progressive layoffs during past months, surpluses of most shipyard trades have developed.

**Minor Areas.** Unemployment was lower than at the same time last year in about half of the minor areas of the region. Higher unemployment in the remaining areas was largely the result of continued slackness in base metal mining, and strikes of lumbering workers in the interior. The areas moving to categories denoting higher unemployment during the month were *Prince George*, *Prince Rupert* (from Group 2 to Group 1); *Trail-Nelson*, *Kamloops* (from Group 3 to Group 2).

# NOTES OF CURRENT INTEREST

## 8 Provinces Participate in Winter Work Program

By December 1, eight Canadian provinces had agreed to participate in the federal Government's plan to provide an incentive to municipalities through a 50-per-cent contribution to direct payroll costs of additional winter works projects, announced by the Prime Minister on October 27 (L.G., Nov., p. 1251).

Announcement of acceptance by the provinces was made by Hon. Michael Starr, Minister of Labour.

At the same time, Hon. Howard C. Green, Minister of Public Works, announced that the program of building maintenance and small interior works was being undertaken again this winter, and that its scope would be larger than the 1957-58 program.

### Added Incentives

Mr. Starr said four provinces, Ontario, Manitoba, Saskatchewan and Alberta, had added further incentive to projects undertaken by municipalities.

Manitoba has offered to pay 30 per cent of the direct payroll costs in addition to the federal Government's contribution, leaving only 20 per cent to be borne by the municipalities.

The other three provinces have offered to pay an additional 25 per cent of the direct payroll costs of approved projects.

Alberta has, additionally, offered to make arrangements for the financing of the shares of participating municipalities.

The incentive program is effective from December 1, 1958 to April 30, 1959.

Mr. Starr restated the terms under which federal funds will be made available. They will be given for the following types of projects:

Needed public projects municipalities have considered undertaking some time in the future that can be undertaken this winter;

New projects that can be carried out this winter;

Additional work on existing projects over and above the work that would have been carried out in any event this winter.

Types of work coming under the terms of this offer will be: the construction and major reconstruction of streets, sidewalks and municipal roads; the construction and major reconstruction of water, sewage and

storm facilities, not including buildings; and the construction and development of municipal parks and playgrounds.

Already some Canadian municipalities have announced plans to undertake projects this winter.

The City of Ottawa has set aside the sum of \$6,000,000 to devote to winter work, in order to take full advantage of the Government's offers.

Niagara Falls City Council has approved a \$95,000 winter work program of sewer construction and new water mains.

A program costing \$308,000 will be undertaken by Metropolitan Toronto to alleviate winter unemployment in the area.

Mr. Green pointed out that in 1957 it had been estimated that winter works projects would cost \$1,046,429.71, whereas the actual cost by March 31 had been \$2,008,448.26, and had provided 400,000 man-hours of work.

### 500,000 Man-Hours

The preliminary estimate for 1958-59 was \$1,266,074.24, but by November 15 had risen to \$2,532,063.12 with an estimated provision of 500,000 man-hours of labour.

It was also pointed out by Mr. Green that most of his Department's effort to increase winter work came under the building of new structures of various kinds, some of them valued at millions of dollars and situated in all parts of Canada. Most of the work is done by contractors, and it is standard practice of the Department to require all contractors to continue operations during winter months wherever possible.

The winter program on building maintenance and interior work is made up of a large number of small jobs. Much of this work was previously done in the summer months. Now, however, work of this nature requested by other departments of Government is put off until the winter months.

Proper timing for the beginning of a building can result in the employment of more construction workers on the project in the winter months than in the summer, A. Turner Bone, Past President, Canadian Construction Association, said in an address to the Montreal Rotary Club.

## **Says Management Acting To Increase Employment**

Although Management may seem less vocal on the subject of unemployment than leading union spokesmen, Management is working to achieve tangible results at company, community and national levels, said Ian McRae, President of the Canadian Manufacturers' Association, in a speech in Montreal.

In company affairs it was organizing things so as to increase the level of winter employment; in the community it was contributing men and money to winter employment committees and "Do It Now" drives; and on a national scale Management has for the past nine months been energetically promoting the "Buy Canadian" program of the CMA, he said.

The most effective weapon in the battle against unemployment, the speaker contended, was "increased domestic consumption of the products we make ourselves". He agreed, however, that price, quality and service were factors which strongly influenced the decision of buyers, and that the most that could be expected was that prospective purchasers would give *some* weight to "Buy Canadian" considerations.

The CMA President urged Labour, in its own interests, to join the "Buy Canadian" bandwagon".

## **Manitoba Federation Asks Action on Unemployment**

Sounder measures to alleviate unemployment, a minimum hourly wage rate of \$1.25, longer vacations with pay, and enactment of legislation respecting the Workmen's Compensation Act were requested in a brief presented last month to the Government of Manitoba by the Manitoba Federation of Labour.

The Federation in its brief asserted that the unemployment situation would be eased if the Government brought in a 40-hour maximum work week and provisions for longer vacation-with-pay periods.

The Federation also urged, "in recognition of the pressing needs of the moment concerning unemployment," a public works program and a low-cost subsidized rental housing program.

The Government was urged to pass legislation that would make mandatory a two-week vacation with pay for all employees after one year of service with an organization, and three weeks vacation after five years of continuous service with one employer.

In requesting that the Workmen's Compensation Act be amended, the Federation

particularly asked that pensions under the Act to widows, invalid widowers, dependent and dependent invalid children be increased.

On the matter of human rights and fundamental freedoms the brief said "every step should be taken to assure and give full protection to the worker demanding that his status as a citizen be fully recognized."

## **Long-Range Outlook Good For University Graduates**

Although relatively large-scale unemployment has resulted from the changed economic situation during the past year, the long range outlook for well-trained university graduates remains good, the National Employment Service states in a recently issued report entitled "A Bulletin on the Supply and Demand Situation in Regard to University Graduates".

There is a temporary surplus in many professions, but shortages exist in certain others, and these shortages will be intensified when the signs of economic recovery become clearer than they are at present, the report says.

Although the shortage of engineers, which has been the subject of so much publicity during recent years, has largely subsided, this situation is not expected to continue, and it may not be long before engineers again become scarce. The report states that the National Employment Service had notice of 2,192 vacancies for engineering graduates in 1958, while the total number of graduates was slightly more than 2,100. A few of these failed to obtain a job on graduation.

The Civil Service Commission reports greater success in filling vacancies in 1957 than in any year since the last war, the bulletin states. Notwithstanding this, certain professional classifications remain difficult to fill. These include veterinarians, meteorologists, nurses, auditors, librarians, physical therapists, occupational therapists and social workers.

Rising fees at universities and increased difficulty in getting satisfactory employment during the summer have made it harder for students to finance their way through university, the report says. However, a more encouraging circumstance is that more scholarships are being offered. These are of great value to talented students, and there is a need for a still greater increase in their number "if Canada is to ensure that no student of university calibre is denied the opportunity of going to college".

## **John Mainwaring Named Brussels Labour Attache**

The appointment of John L. Mainwaring as Labour Attache at the Canadian Embassy in Brussels, Belgium, was announced last month by Hon. Michael Starr, Minister of Labour. His appointment will bring to two the number of labour attaches at Canadian embassies abroad. At present there is a labour attache only at the Washington embassy.

Brussels was selected, said the Minister, because it is close to most of the large industrial centres of Europe and because it is the headquarters of the International Confederation of Free Trade Unions and of the International Federation of Christian Trade Unions.

As labour attache in Brussels Mr. Mainwaring's duties will include studying and reporting on industrial relations practices and trends in Western Europe, and on social legislation and trade union activities. He will continue to work with the International Labour Organization. He has attended seven sessions of the International Labour Conference and has represented Canada at other ILO meetings in North America and Europe.

**John Mainwaring**  
Posted to Brussels

Born in Montreal in 1915, Mr. Mainwaring was educated in Brockville, Ont. He was graduated from McGill University with honours in English and Economics and later obtained his M.A. degree from Columbia University. He joined the Department of Labour in 1942 as Assistant Editor of the *LABOUR GAZETTE* after teaching school for four years in Brockville and Hamilton.

Well-known for his work with the former Civil Service Association of Ottawa, he served on the executive of that organization from 1946 to 1954, and was elected President in 1951 and again in 1952. He was also a member of the national executive of the Civil Service Federation of Canada, being elected a national vice president in 1953.

---

## **"Mr. Union Label" Dies In B.C. at Age of 75**

Widely known as "Mr. Union Label" for his untiring work in promoting the purchase of products made in unionized plants, Edward David Smith died in Burnaby, B.C., during November at the age of 75 years.

When the Union Label Trades Department of the Trades and Labour Congress was formed at the Congress' convention in Winnipeg in August 1952, Mr. Smith, then Secretary-Treasurer of the Union Label Trades Council of the Vancouver, New Westminster and District Trades and Labour Council, was elected a Vice-President of the TLC Department (L.G., 1952, p. 1189).

At the 1953 and 1954 conventions of the Union Label Trades Department, Mr. Smith was re-elected a vice-president. At the 1955 convention, he did not seek re-election; an honorary vice-presidency was conferred on him. He had earlier retired, after 16 years' service, from the post of Secretary-Treasurer of the Vancouver and District Union Label Trades Council (L.G., 1955, p. 267).

Mr. Smith came to Canada from England in 1905 and held many union posts during his career, including a 13-year term as business agent for the Painters Union in Vancouver.

In 1954 he was honoured by the British Columbia Government with a scroll for his distinguished service and outstanding work in trade union affairs.

In his youth, in England, Mr. Smith played supporting roles as a singer and dancer in some London musicals, at a time when Charles Chaplin was appearing as an extra in some of the shows.

## **NES Placement Officers Given Counselling Course**

Twenty-five special placement officers of the National Employment Service in Quebec province recently received a month-long course at Montreal on employment counselling and rehabilitation. The primary purpose of the course was to further assist the counsellors, selected from the province's larger centres, to solve the employment problems of the occupationally handicapped.

### **Similar to Earlier Course**

Given in French and held at the University of Montreal, the course covered a broad range of subjects including psychiatry, interviewing techniques, interpretation of tests, counselling, physiotherapy, occupational therapy and handicap evaluation. It complemented a similar course given in English at the University of Western Ontario earlier this year.

Dr. Gustave Gingras, Director of the Institute of Rehabilitation and the University of Montreal School of Rehabilitation, co-ordinated the programming of the course.

## **Total Payments to Aged, Blind, Disabled Increase**

The number of persons receiving old age assistance in Canada increased from 94,589 at June 30, 1958, to 96,298 at September 30, 1958.

The federal Government's contributions under the federal-provincial scheme totalled \$7,590,635.96 for the quarter ended September 30, 1958, compared with \$7,516,468.41 in the preceding quarter. Since the inception of the Act, the federal Government has contributed \$143,949,133.18.

At September 30, 1958, the average monthly assistance in the provinces ranged from \$49.70 to \$53.32 except for one province where the average was \$44.55. In all provinces the maximum assistance paid was \$55 a month.

### **Blind Persons Allowances**

The number of blind persons in Canada receiving allowances under the Blind Persons Act increased from 8,545 at June 30, 1958, to 8,654 at September 30, 1958.

The federal Government's contributions under the federal-provincial scheme totalled \$1,056,625.88 for the quarter ended September 30, 1958, compared with \$1,052,408.61 in the preceding quarter. Since the inception of the Act, the federal Government has contributed \$21,069,730.86.

At September 30, 1958, the average monthly allowance in the provinces ranged

from \$53.10 to \$54.11. In all provinces the maximum allowance paid was \$55 a month.

### **Disabled Persons**

The number of persons in Canada receiving allowances under the Disabled Persons Act increased from 44,366 at June 30, 1958 to 46,307 at September 30, 1958.

The federal Government's contributions under the federal-provincial scheme totalled \$3,833,693.32 for the quarter ended September 30, 1958, compared with \$3,686,162.73 in the preceding quarter. Since the inception of the Act, the federal Government has contributed \$31,863,318.37.

At September 30, 1958, the average monthly allowance in the provinces ranged from \$51.18 to \$54.64. In all provinces the maximum allowance paid was \$55 a month.

## **Bakers' Union Not Losing Any Canadian Members**

Not a single Canadian member of the Bakery and Confectionery Workers' International Union of America has left to join the American Bakery and Confectionery Workers International Union (AFL-CIO), the *LABOUR GAZETTE* has been told. In the United States, only about 46,000 members have left to join the new union.

In the October issue (page 1105), it was reported that the new ABCWU had 177,000 members; this should have read "77,000" members, and it should have been made clear that this number was that claimed by the union.

The Bakery and Confectionery Workers, although expelled from the AFL-CIO, is still a union in good standing with the Canadian Labour Congress.

## **Two Unions Aim for Shorter Work Week**

A shorter work week was made a target of two international unions at their latest conventions.

The Brotherhood of Railway Carmen (AFL-CIO-CLC), at its 22nd convention, called for a national drive by railway unions for a six-hour, five-day week without a reduction in pay. The Canadian co-ordinating committee of the International Ladies' Garment Workers' Union (AFL-CIO-CLC) adopted a resolution calling for establishment of a 37½-hour week in the women's and children's apparel industry.

The ILGWU will also seek improvement in retirement and severance pay benefits. About 90 per cent of the Union's members are now eligible for a monthly pension of

\$50, and two thirds of the membership will soon be eligible for severance pay.

The Ladies' Garment Workers in Canada decided also to launch a nation-wide union label campaign on January 1 to coincide with a \$2,000,000 campaign by the Union in the United States.

---

### **Truro Unions Establish New Labour Council**

A new central labour council has been organized in Truro, N.S.

Seven unions of the district, with a membership of 400, met and formed the Truro and District Labour Council. Application for a CLC charter will be made.

Officers of the new council are: Guy McAloney, President; Walter Wulff, first Vice President; C. A. Marr, General Secretary; Fred Hamilton, Secretary-Treasurer; and Thomas Paris, sergeant-at-arms.

---

### **Report Fewer Accidents In U.K. Industry in 1957**

A "very satisfactory" drop in the number of industrial accidents reported in the United Kingdom in 1957 is shown in the annual report of H.M. Chief Inspector of Factories for that year. The number was the lowest for 20 years, in spite of a considerable increase in industrial activity during that period. The numbers of both total accidents reported and of fatal accidents were 5 per cent lower than in 1956.

#### **Fewer Building Fatalities**

A particularly satisfactory circumstance was a fall in the number of fatal accidents in the building industry, from 186 in 1956 to 156 in 1957, although the number of accidents in the industry remained constant at about 14,000 a year.

An "accident" is defined in the Factories Act, 1937 as one that is either fatal, or which disables any person employed in a factory or other premises under the Act for more than three days from earning full wages at the work at which he is employed. All such accidents must be reported.

The number of accidents reported under the Act in 1957 was 174,713, of which 651 were fatal. The corresponding figure for 1956 was 184,785, of which 687 were fatal.

The report points out that it is difficult to draw valid conclusions when comparing accident statistics for different years; yet since total employment figures for 1957 show little change from those for 1956, it is reasonable to assume that the continued improvement in accident figures has,

for the most part, resulted from safer working methods and better and safer machinery and equipment.

### **Industrial Comparison**

A comparison of the statistics for different industries shows that in building operations and in metal extracting and refining one accident in 90 was fatal, while in textile factories there was only one fatal accident in every 930 reported. For all industries the proportion was one in every 270.

One disappointing feature, the report says, is that 428 women and young people were injured in 1957 while cleaning machinery in motion, although the Factories Acts specifically forbid the practice.

---

### **Carpenters Authorize Secession from AFL-CIO**

The 28th general convention of the United Brotherhood of Carpenters and Joiners of America last month rejected adoption of the AFL-CIO Ethical Practices Codes and voted authority to the union's executive board to withdraw from affiliation with the federation.

Only one of the 2,000 delegates dissented in the vote on the secession resolution.

President Maurice A. Hutcheson later said the union did not want to leave the AFL-CIO and would not do so except as an absolutely last resort. He termed the resolution an expression of dissatisfaction by the membership with the way the AFL-CIO has handled jurisdictional procedures with respect to the craft.

Mr. Hutcheson was re-elected President by acclamation.

---

### **Imports in First Half Decline 12 Per Cent**

Imports into Canada in the first six months of 1958 were valued at \$2,570,000,000, about 12 per cent lower than for the same period of 1957.

Import declines for the six-month period were particularly heavy in iron and steel goods, the largest import group. Non-farm machinery, rolling-mill products, farm implements and machinery, automobile parts, pipes, tubes and fittings were all sharply reduced. Imports of crude petroleum, petroleum products, coal and cotton products also declined considerably.

There were increases in imports of automobiles, aircraft and parts, books, plastics, vegetables and paper. Imports of engines and boilers remained relatively unchanged.

## **Canal Workers Transfer To Transport Union**

The Canadian Brotherhood of Railway Transport and General Workers will represent employees on the canal system of the St. Lawrence Seaway who were formerly members of the United Steelworkers of America, the two unions agreed last month. The approximately 1,000 workers affected by the move, employed on the Lachine Canal, have approved the transfer.

The Brotherhood represents employees on the Welland Canal; after the transfer of members it will have a clear majority on the St. Lawrence and Great Lakes canal system, a joint statement by the unions pointed out.

---

## **Rate Boost Averts Strike By Non-Operating Unions**

A 14-cent-an-hour wage increase for 130,000 non-operating employees of Canada's major railways, and a 17-per-cent freight rate increase for the railways approved late last month, averted a strike that was scheduled to begin December 1.

The wage increase was less than half the 35-cent-an-hour boost the 15 unions demanded when they opened negotiations in November 1957 (L.G., Dec. 1957, p. 1277). The railways originally asked for a 19-per-cent increase in freight rates.

A conciliation board suggested the 14-cent increase (L.G., Sept., p. 996). It was accepted by the unions. The railways asserted they could not grant the boost unless the freight rate increase was approved. Subsequently, the Board of Transport Commissioners approved the 17-per-cent freight rate increase over the objections of eight of the 10 provinces, who appealed to the federal Cabinet against the award.

During hearing of the appeal, the eight provinces and the railways agreed that the wage increases were reasonable, and that a strike would be a national disaster and had to be avoided. They disagreed on the propriety of the Board of Transport Commissioners in basing an increase in freight rates on an anticipated wage increase that had not been unconditionally agreed upon by the railways and their employees.

The Cabinet disallowed the appeal of the provinces and approved the freight rate increase. The same day the union's joint negotiating committee and the railways signed new agreements; the unions withdrew the strike call.

## **Agreements in U.S. Give Longer Paid Vacations**

An increase in the length of paid vacations and a reduction in the length of service requirements during recent years is reported in a summary of a study of paid vacations in major union contracts, 1957, published in the *Monthly Labor Review* of the United States Department of Labor for July 1958.

The results of this survey roughly parallel those given in a Canadian survey, a report of which was published in the September *Labour Gazette* (page 1048) entitled "Working Conditions in Manufacturing". Direct comparison is not possible owing to a difference in the treatment of data in the two studies.

"In 1957, all but 8 per cent of 1,813 agreements covering 1,000 or more workers provided for paid vacations, and maximum vacations of three weeks or more were the rule rather than the exception," the *Monthly Labor Review* states.

In the same year, the report continues, "uniform and graduated vacation plans that provided for maximum vacations of less than two weeks were reduced to 1 per cent of the total plans. Almost two thirds of the plans allowed maximum vacations of three or three and a half weeks; an additional 20 per cent provided maximum allowances of four weeks or more."

The report shows that in 1949, of selected bargaining agreements 6 per cent granted one week's vacation or less, 61 per cent provided for a maximum of two weeks, and 33 per cent for a maximum of more than two weeks. In 1952 one week was provided in 2 per cent of the agreements used, 48 per cent provided for two weeks, 46 per cent for three weeks, and 4 per cent for four weeks. In 1957 the percentages were as follows: less than two weeks, 1 per cent; two and two and a half weeks, 15 per cent; three and three and a half weeks, 64 per cent; and four weeks or more, 20 per cent.

"Increases in maximum vacation allowances have been accompanied by a reduction in length of service requirements," the summary says. "In 1952, for example, less than 0.5 per cent of the workers under agreements providing a maximum vacation of three weeks were eligible for the maximum after service of five years or less, as compared with almost 3 per cent in 1957. Although only 4 per cent of the workers were eligible for a three-week vacation after 10 years or less in 1952, almost 15 per cent of the workers qualified with similar service requirements in 1957."

# NEW YEAR MESSAGES

HON. MICHAEL STARR

Minister of Labour

This is my second opportunity since becoming Minister of Labour to extend New Year's greetings to the people of Canada.

I do this with a feeling of good-will and, I might add, greater comfort upon entering this New Year of 1959 than was the case last year.

At this time last year our economy had entered a period of recession.

In company with the great majority of other Canadians I had confidence in the basic soundness of the Canadian economy.

In a great measure that confidence has been justified.

Although unemployment continues to be a serious problem there are indications that the economic pendulum is now swinging the other way.

Our registrations for jobs at National Employment offices have tapered down from the springtime high. While they increased from the usual yearly low point reached in the early fall they are now at approximately the same level as last year. If the trend continues—and I believe it will—the figure for this winter will fall below that of a year ago. Furthermore it is encouraging to note that the estimate of those without jobs and seeking work has increased much less rapidly from the seasonal low in August of this year than was the case in 1957.

Reports from across the country reveal that the National Winter Employment Program is providing jobs this winter. The municipal winter works incentive program recently introduced by the federal Government is meeting with co-operation from provincial and municipal authorities and even now several thousands of Canadians are hard at work who would otherwise be unemployed, were it not for this arrangement.

In the labour field, there have, of course, been difficulties and disputes. For the most part, these have been resolved with evidence of good-will and a desire to co-operate on both sides. No doubt the coming year will present other serious problems. It is my hope that through the same good-will, these too may be met in a way to minimize dislocation in our essential industrial activities.

Through the year, wages continued to rise and labour income was again higher than last year.

Amendments to the Unemployment Insurance Act are now under consideration with a view to their introduction in the new session of Parliament. Consideration is also being given to the matter of amendments to the Industrial Relations and Disputes Investigation Act in the light of suggestions which I have received from both labour and management groups.

Thus, as we move into 1959, let me say that, for my own part, my feeling is one of optimism and confidence in Canada's future.

The Government will continue to take every step possible in doing its part to enable Canadians generally to enlarge their opportunities for improving their standards and enjoyment of living.

Personally, I am convinced that with all levels of government, industry and labour aware of the problems we have to face, and willing to co-operate towards the required solutions, the next year will hold nothing but good for us all.

As Minister of Labour, I shall make every effort to bring about solutions of our problems in the labour field in the coming year. I know that many other Canadians in the ranks of both Labour and Management will be addressing themselves to the same end.

May I wish you all well for the New Year.

CLAUDE JODOIN,  
President, Canadian Labour Congress

The turn of the year comes at a time when we are inevitably in a holiday spirit, yet it cannot help but bring with it a re-assessment of the year just ending and concern for the year just ahead.

The year 1958 has been an important one for labour. Trade unions have been confronted with attacks on many fronts. From early in the year it was evident that workers seeking wage increases, no matter how thoroughly justified, were facing extremely strong opposition. It is regrettable that in a number of instances these differences resulted in work stoppages; but, by the year-end, a pattern of wage increases had been established and many of those who strongly opposed such increases were frank in their admission that higher wages were deserved by the workers concerned.

Attacks on the labour movement of a more general nature have been intensified during 1958. This is regrettable and adds nothing to the honest desire of trade unionists and many employers for a more stable relationship in our industrial affairs.

The foremost problem facing Canadian trade unionists—and indeed Canadians generally—is unemployment. This was a matter of deep concern when we celebrated New Year's a year ago and it is regrettable that so little has been done, and that what has been done has been with such hesitation. We have now entered another winter and once again hundreds of thousands of Canadians know that before Spring they will have experienced the bitterness of being deprived of the opportunity to work.

Time and again we have pleaded for action which would bring together the entire resources of government, employers and unions to meet this challenge and combat this suffering. The action which has been taken has been far too limited and much too late. Surely the Canadian people cannot be expected to go through another

year of heavy unemployment without seeing some forthright and courageous action taken.

Internationally the year ending has been a troubled one, and it is regrettable that the outlook for 1959 is the same. We in Labour have been pleased to see some indications that Canada's assistance to less fortunate countries is to be increased. We believe this is long overdue. As taxpayers Canadians have not questioned the heavy expenditures made for defence purposes. We are strongly of the opinion that diverting some of those expenditures to help peoples who are so much in need of assistance can contribute to at least an equal degree in assuring peace.

The Canadian trade union movement has long held the opinion that organized labour has an important role to play in helping these people to improve their living standards through the traditional means of free collective bargaining. We shall continue these efforts in 1959.

This will, we expect, be an important year for Canadian labour. One aspect of our activities in which there will be increased emphasis is that of public affairs. Despite some comments which have been made, there is no need for alarm in this development. We are anxious to see all Canadians as well informed as possible on the affairs of our country and our efforts will be expended in that direction.

Despite the clouds that may be on the horizon, we face 1959 and the years that will follow with confidence and assurance. We are keenly aware of the particularly fortunate position in which our country stands and we look forward to the sharing of the benefits of this position among our own people and with people in other countries, so that there may truly be "peace on earth and goodwill among men."

**ROGER MATHIEU,**  
**General President,**  
**Canadian and Catholic Confederation of Labour**

*(Translation)*

In formulating Christmas wishes this year, our first thoughts are for those working-class families affected by unemployment. We all know that there are, unfortunately, a great many such families, and that the holidays will be saddened for too many parents and children by want and often by abject poverty.

I hope that the people of Canada and all their leaders will be conscious of this scandal and will use every possible means to prevent its repetition next year.

After all, what meaning could the good news brought by the Saviour have if the Christmas of 1958 were to accept, without batting an eyelid, unjust suffering on the part of a large section of the population in such a rich country.

For the New Year, I wish all workers peace, happiness and prosperity, as well as the pursuit of the action they have undertaken for greater justice and charity.

As for the rulers, legislators, employers and others who have tried to check union activities in 1958, my fervent hope is that

they will come to realize, in 1959, the importance and the urgency of loyal co-operation with the labour movement.

To the civil and religious authorities and to all who have shown us understanding and who have supported union efforts in 1959, our best wishes for the New Year.

To those union officials and members who give so generously of themselves for the advancement of the working classes, our most sincere wishes for ever more fruitful union activities and for a greater measure of joy and security in their family life and in their work.

**A. H. BALCH**  
**Chairman, National Legislative Committee,**  
**International Railway Brotherhoods**

Fraternal Greetings from the members of the National Legislative Committee, Transportation Brotherhoods, to all officers and members of affiliated organizations of the Canadian Labour Congress.

Dieselization continued to make inroads into railway employment during the past year. Curtailment of service has assisted in this. True, air and bus service has made inroads into passenger service, but one wonders if better service would not have stemmed the tide. Has everything been done to meet competition?

Freight traffic has been lost to highway trucking, and governments must share the responsibility in this for allowing unfair competition between rail and road.

Not wishing to leave the old year and the new on a pessimistic note, I quote for you an excerpt from a letter written by Thomas Jefferson to John Adams, at that time both ex-Presidents of the United States: "You ask if I would agree to live my seventy or rather seventy-three years over again? To which I say, Yea. I think

with you, that it is a good world on the whole, that it has been framed on a principle of benevolence, and more pleasure than pain dealt out to us. There are indeed, (who may say nay) gloomy and hypochondriac minds, inhabitants of diseased bodies, disgusted with the present, and despairing of the future, always counting that the worse will happen, because it may happen. To these I say, how much pain have cost us the evils which have never happened! My temperament is sanguine. I steer my bark with Hope in the

# 27th Meeting of Vocational Training Advisory Council

**Apprenticeship only way to produce skilled tradesmen, and apprentices requiring increasingly higher educational background, Council told. Substantial expansion of federal-provincial student aid program urged**

Apprenticeship is the only guaranteed way to produce skilled tradesmen, and apprentices are requiring an increasingly higher educational background, the Vocational Training Advisory Council was advised at its 27th meeting, held in Ottawa in October, by Len Douse, Civilian Rehabilitation Branch, Department of Labour, who came to that conclusion after listening to many employers' opinions on the matter during the course of a survey he was conducting at numerous industrial establishments.

A. H. Brown, Deputy Minister of Labour, expressed regret that Labour Minister Starr was unable to be present to welcome members of Council, and advised them on his behalf that the Training Branch of the Department had been very active since the previous meeting in following up suggestions made at that time.

Mr. Brown also noted that delegates to the Winter Conference on Employment, held in July, had recommended intensified training for the unemployed. With this in mind he hoped that greater advantage would be taken of Schedule "M" than had been taken in the past by some provinces.

Student aid came in for lengthy discussion. W. F. McMullen, Toronto, reported that freshman enrolments at the University of Toronto had dropped 20 per cent from last year. Dr. J. F. K. English, Deputy Minister of Education for British Columbia, said that, except for one faculty, enrolments at the University of British Columbia were also down, while J. A. Doyle, Director of Vocational Education, Saskatchewan, reported that figures had increased at the University of Saskatchewan.

All provincial representatives reported a need for increased federal aid. There were repeated assurances that federal contributions, if they are made, will be matched by the provinces. Council also agreed that assistance for the good average student as well as for the brilliant should be made available.

Reporting on assistance being given, E. K. Ford of New Brunswick said that Dalhousie University has been able to help all students needing help but has been unable to help them enough. S. D. Rendall,

Superintendent of Secondary Education, Ontario, reported that the province spends \$400,000 annually for student aid, whereas the federal contribution is only \$100,000.

C. R. Ford, Director of Vocational Training Branch, Department of Labour, said that when he entered the Department of Labour it had been the practice to seek to match expenditures of the provinces for student aid. Subsequently, student aid allotments had been frozen at the level of allotments made for the fiscal year 1953-54.

A. H. Brown commented that since student aid allotments were frozen, the Canada Council has developed a program with first emphasis on aid to universities. He thought finance officials felt that provincial loan funds should be able to develop to adequate levels with the federal assistance already received. However, the Department of Labour was eager to have the Council review the situation and to receive its findings.

Replying to the loan fund statement, J. W. McNutt of New Brunswick pointed out that 50 per cent of loans collected is repayable to Ottawa and does not become available for relending.

At the conclusion of the discussion, Council Chairman Dr. G. Fred McNally appointed a committee to draft a resolution expressing Council's views on student aid. The resolution, declaring that it was important both in the interests of the individual and of the country as a whole to encourage more persons to complete their secondary school program and to proceed to more advanced education, strongly urged that the existing federal-provincial student aid program be continued and substantially expanded.

The expansion may be both in terms of total amount of funds available and in coverage, the resolution stated. The final year of secondary education, teacher training, training of technicians and other forms of post-secondary education could be added to the coverage.

A resolution concerning Schedule "M", submitted to the Council by N. S. Dowd, Executive Secretary of the Canadian Labour Congress, was adopted. The resolution

pointed out that only a small number of unemployed workers were taking training under Schedule "M" and that inadequate use was being made of the schedule. Because "it is highly desirable that the fullest possible use be made of the schedule, especially during the winter months, with a view to opening up opportunities of employment for unskilled or semi-skilled workers," the resolution requested the Vocational Training Branch to furnish full information regarding the provisions of Schedule "M" to the provincial authorities concerned, who were urged to make additional facilities available, where necessary, for such special training of unemployed workers. It also asked the National Employment Service to inform unemployed workers regarding the possibility of taking special training courses, and the conditions under which this may be done.

The same resolution recommended that, in order to make such facilities available, where necessary, the federal Government's contribution under Schedule "M" be based upon 75 per cent rather than the present 50 per cent of the expenditure involved.

The growing need for technicians in Canada to fill the gap between the skilled tradesman and the professional engineer was discussed. The need for more widespread and integrated investigation of the quantity, quality and kind of technicians was stressed.

In the course of discussion, it was pointed out that of those who attempt, without benefit of university training, to become engineers by writing the 14 necessary papers, only three or four per cent succeed.

Some discussion was given to the problem of vocational training for the mature married woman who either re-enters the labour force or enters it for the first time (see page 000). The need for such training was underlined by the fact that the number of women in this group was steadily increasing and was likely to continue to do so in the future.

This was illustrated by figures given to the meeting. These showed that in June 1948, there were 210,000 women aged 45 and over in the Canadian labour force. This group constituted 21.92 per cent of the female population. The same group in June 1958, 10 years later, numbered 382,000 and made up 29.41 per cent of the female population.

The Council was also advised that steady progress is being made in a project for developing country-wide examinations in designated trades. This is considered an important step in efforts to develop nation-wide standards in trade training in Canada, so that a person trained in one part of Canada would be readily accepted in other areas.

---

# Vocational Training for Older Married Women Re-entering the Labour Force

Report by Miss Marion V. Royce, Director of the Women's Bureau,  
to the 27th meeting of the Vocational Training Advisory Council

The problem of training for the older married woman returning to the labour force is a part of the larger question of education and vocational training for people who do not fit into the general educational scheme. In enterprises as large and complex as our provincial educational systems have become, it is always difficult to provide for the exceptional or "irregular" individual or group. Provision for those who are the subject of our concern in this paper requires a special degree of resourcefulness and imagination.

First, since "older" is a relative term, especially when applied to women, it is important to be clear that we have in mind the woman who, after a period in which her energies have been concentrated on family responsibilities including the bearing and

rearing of children, needs or wishes to return to the labour force. Nowadays this woman is usually in her early or mid-forties; some are not yet forty.

In considering the urgency of training for such women it should be emphasized that their numbers within the labour force are increasing and in all probability will continue to grow. In June 1958 in Canada, 337,000 women between the ages of 45 and 64, almost 24 per cent of the female population in this age group, were job holders; and including those who were seeking work 346,000 were in the labour force. At the same time 34,000 women 65 and over—5 per cent of all women in this age group—held jobs and 35,000 were in the labour force. Ten years earlier 188,000 women, or 17 per

cent of the female population between the ages of 45 and 64, had jobs and 189,000 were in the labour force. In the 65-years-and-over group, 21,000, 4.65 per cent of the female population of this age, were actually in jobs, and 22,000, 4.87 per cent of the population figure, were in the labour force.

The trend in the United States is even more marked. At the present time about half the female labour force of that country is made up of woman over 40. So convinced are the American experts of a continuing increase in this group within the labour force that after a recent conference of the National Manpower Council the following statement was released:

The Council noted that it is concerned and concentrating on the status of women whose working careers were interrupted by marriage and raising families. They are in their 30s, 40s, and 50s, and so strong is their rush back to work that the conference termed it a "womanpower revolution".

This group offers a larger potential addition to the United States labour force in the future than any other age group of men or women. The expected increase for men 35 and over in the labour force between 1955 and 1965 will be 2,892,000; for women of that age, 3,502,000.

For Canada the forecast was as follows: "Women will go their way as they always do, and it is not for us to prescribe for them. But since we have to guess, we think it likely that a higher proportion of them will choose to enter the labour force than at present, particularly in the age group over 25."\*

This statement might suggest that in the future "the marriage gap," as some British writers have described these years of a woman's life spent in the home, will be less of a factor than at present in women's relation to the labour force. Certainly if women continue to work more regularly throughout their lives, the kind of training problem that we face at present for those who are seeking jobs after 40 will diminish, even though more women of these upper age groups are in the labour force.

The problem of the moment lies in the fact that the woman who for a period of twenty years or so has concentrated on family responsibilities has lost what occupational skills she may have had and even more seriously has lost the discipline of a job. It is not that she has been idle at home. On the contrary, she has probably worked very hard and for long hours, but the whole rhythm of her life has been a different one. The training that she needs is such as will revive that job-holding disci-

pline and either restore her former skills or teach her needed new ones.

Equally she needs up-to-date information about the kind of jobs that are available and help in deciding where, in light of her background and experience, she might be likely to find suitable employment.

In this connection it may be useful to take note of the predominant occupations of the older women at present in the labour force. Most of these are closely related to the kinds of work a woman does in her own home. For example, a high proportion of housekeepers and matrons, cooks, practical nurses, hotel and cafe employees are over 45 years of age. Sixty per cent of charworkers and cleaners are in this age group, which also provides nearly half of all dressmakers and seamstresses. Interestingly enough, too, women of 45 and over make up nearly half of the female proprietors and managers in the retail trade and close to a quarter of all women teachers and instructors.

These figures are based on the occupational data of the Census of 1951, the most recent comprehensive source of this type of information. It might reasonably be contended that the picture has changed in the past seven years and may continue to do so. Even in 1951 women of this age group accounted also for 10 per cent of stenographers and typists, 13 per cent of office clerks, and 16 per cent of sales clerks, nearly 13 per cent of telephone operators and 14 per cent of hairdressers and manicurists. On the whole, however, their range of employment was and probably still is fairly limited, and their occupations for the most part require comparatively little training.

Consider also the woman with a good educational background. For her the problem of preparing to re-enter the labour force, though different, is not less than for the one who has had little schooling. In her mature years the educated woman may want to become a social worker, a teacher or a librarian or to enter some other profession. If she has had previous training and experience in the occupation of her present choice she would profit by a refresher course. Otherwise she will need to make a completely fresh start. In recent years there has been wider recognition of the value of this mature woman's potential contribution to society, but much more could and should be done to adapt training facilities to enable the most fruitful use of her abilities and experience.

Take teacher training as an example. It is generally agreed that a woman who has brought up her own family, if she has a

\*Royal Commission on Canada's Economic Prospects, November 1957, p. 110.

bent for teaching, has a great deal to give to a new generation. Yet even with a serious shortage of qualified teachers, little has been done in Canada to enlist such women for the profession. The program developed in a number of American states to recruit and train mature women university graduates to supplement the teaching force might well be given more serious consideration in this country. Similarly, greater effort should be made to recruit and train mature women for other professions, perhaps especially in the social field.

A recent study made by the Bureau of Employment Security of the United States Department of Labor showed that older unemployed women were much less likely than men to have a skill or profession. Most of the unemployed older women had come from semi-skilled, service and clerical jobs. On the other hand, the older women job seekers had more years of schooling than the men.\*

It is reasonable to assume that a similar situation exists in Canada. For instance, only 30 per cent of the women in the recent Women's Bureau survey of married women working for pay had had any vocational training and most of these were in stenography, nursing and teaching. Because of their need of morale as well as of skills, a training program for the women we have in mind would need to be designed to their particular needs. One of the problems, of course, is to discover how many require training. There is the "seeking work" figure, i.e., the difference between the total labour force and the number of job holders. In 1948 for the group from 45 to 64 this figure stood at 1,000, but in June of this year it had risen to 9,000. Of course, not all of these would be candidates for training, but it is reasonable to assume that lack of needed skills to fill available jobs was one of the reasons why these considerable numbers of women were unemployed. This is, however, by no means a satisfactory estimate of the need, either present or future, of training facilities for this group.

A sample survey of persons registered at NES offices might be a useful means of finding out what proportion would benefit from training or re-training. On the face of it this would appear to be a sensible procedure, something that might profitably be undertaken. It is doubtful, however, whether such a survey would furnish an accurate assessment of the training needs of married women who are interested in return-

ing to gainful work, because only a small proportion of these women register with the National Employment Service.

Therefore, without awaiting the results of surveys which need and indeed ought to be made, it would be fruitful to proceed in several other ways:

1. Of first importance would be the setting up of some pilot projects for the training and placement of mature women. In any such schemes there are certain principles that should be observed:

(i) These experiments should combine both counselling and training. Indeed in a very real sense counselling is, if possible, the more fundamental of the two aspects, since these women need morale and realistic information about employment opportunities.

(ii) It is essential that training be provided for occupations in which job opportunities are available. In most cases it would be practical to relate training plans to the kinds of jobs that women of this age group now fill. In determining the courses to be offered, including the content, close contact should be maintained with local employers. This liaison might be achieved through the co-operation of NES local offices and advisory committees for each type of course.

(iii) Trainees must be carefully selected; applicants who could not meet training or employment standards should be rejected. Some might be suited to other types of training.

(iv) Since people are being prepared for employment, the standards of performance required of the trainees should be adequate. Consideration of attitudes to work and general conduct on the job should be included in the content of all courses. For women of this age and background short intensive courses are usually preferable to long training.

(v) Classes should be kept small and free of rigidity so that trainees may be given sufficient individual attention to enable them to progress, each at her own pace.

(vi) Individual personality and ability should be taken into careful consideration in relation to job placement; the project supervisor or teacher will therefore be a key person in all placements.

2. An inventory should be made of existing training plans and programs to which, according to their previous skills and experience, women of this group might be directed. This information should then be kept up to date and given circulation through appropriate agencies and organizations.

\*United States Department of Labor, Bureau of Employment Security. Older Worker Adjustment to Labor Market Practices, September 1956.

3. Serious consideration should be given to the question of special training for mature women qualified to enter the teaching profession.

4. Special services of educational and vocational guidance should be made available for women with more advanced education, some of whom have not had working experience, to direct them into further education in preparation for employment.

It is worth noting that a number of women's organizations, especially Business and Professional Women's Clubs and several of the women's service clubs, have shown considerable interest in this problem. In the United States in several cases such organizations have taken the initiative in setting up courses. In Canada their co-operation could be depended upon, and with their help more could be achieved. While the initiative belongs to the Departments of Education and Labour, some original stimulus from the women, perhaps through the National Council of Women, which

brings together so many women's organizations, would help to get things moving.

The task envisaged is not a small one and it is urgent. It involves special provision for a particular group but at the same time it should be considered part of an adequate total program of vocational education. In this perspective a comment from the Second Report of the United Kingdom National Advisory Committee on the Employment of Older Men and Women, published in London in December 1955, is relevant:

We should like to suggest that some of the problems of the employment and training of men and women in later life might be more readily solved by a broader approach to the type of training to be given them at the beginning of their working life. Too narrow and specialized basic training may lead to considerable employment difficulties in later life.

We need a program to meet an urgent and growing problem of the present and at the same time the kind of total planning that will obviate that problem in the future.

## National Advisory Committee on Rehabilitation of Disabled Persons

National Co-ordinator declares Department's aim is the rehabilitation of 7,000 to 8,000 disabled persons each year. Committee recommends expansion of National Employment Service's special placement service

The Department of Labour was aiming at the rehabilitation of from 7,000 to 8,000 disabled persons in Canada each year, members of the National Advisory Committee on the Rehabilitation of Disabled Persons were told at a two-day meeting in October. Ian Campbell, National Co-ordinator of Civilian Rehabilitation, said one of the purposes of the meeting was to advise on ways of reaching this total.

The 25-man committee—made up of representatives of various groups interested in rehabilitation, including voluntary health and welfare agencies, the medical profession, employers, organized labour, universities, provincial governments, and the federal Departments of Labour, Health and Welfare, and Veterans Affairs—discussed provincial rehabilitation reports, vocational training, medical rehabilitation and grants, placement of the handicapped, co-ordination agreements, publicity and education, and resolutions.

Hon. Michael Starr, Minister of Labour, opened the meeting. "We in Canada must regard our manpower as our most precious asset," he told the committee members, "so that anything that will assist the disabled to rise above their disability and to make their full contribution to the nation receives my full support." In advancing to greater prosperity, Canada will need the contribution of the skills of all her people, he added.

Mr. Campbell in his address to the Committee quoted figures covering one group of 1,055 successfully rehabilitated persons in Canada. Before rehabilitation 831 of this group were dependent upon their families or public assistance for their support.

Their maintenance, and that of their 821 dependents, had cost about \$950,000 annually. During their first year of employment this same group earned more than \$1,800,000.

A 1951 survey by the Department of National Health and Welfare, Mr. Camp-

bell said, had shown about 200,000 seriously disabled Canadians in the working age group were unable to contribute to their support. Many of these had since been restored to usefulness through developing rehabilitation programs. But the majority were still dependent.

If modern knowledge of rehabilitation could have been applied to these people at an earlier age, many more would now be self-sufficient.

The whole process of rehabilitation was always more effective when rehabilitation services were provided to the seriously disabled individual as soon as a disability occurred. For this reason, Mr. Campbell said, the need for improved methods of finding cases in hospitals and institutions was indicated.

As their rehabilitation services developed the provinces were gradually making greater use of the federal financial assistance offered, Mr. Campbell reported.

Under the Co-ordination of Rehabilitation of Disabled Persons Agreements, he announced, the amounts spent by the provinces and shared by the federal Government had risen from \$25,720 in 1953-54 to \$149,960 in 1957-58. In the current fiscal year the provinces had estimated they might spend \$260,000.

The federal and provincial funds spent on vocational training for disabled persons had risen from \$44,000 in 1954 to \$540,000 in 1957. The provinces estimated that this year they may spend \$681,000 for vocational training in rehabilitation.

Mr. Campbell said the federal share of the money spent under the Medical Rehabilitation Grant had risen from about \$58,000 in 1953 to about \$633,000 in 1957.

At the end of the two-day meeting, the Committee adopted a resolution recommending expansion of the National Employment Service to provide a more adequate placement service for disabled persons who have benefited from a rehabilitation program. Placement in employment of such persons is a vital part of a rehabilitation program and the NES is not at present adequately staffed to provide this service, the resolution declared.

The resolution was an amended version of one presented by G. Wilfred Crandlemire, Provincial Co-ordinator of Rehabilitation for New Brunswick.

"Recognizing the basic responsibility of provincial rehabilitation authorities to follow through the rehabilitation process to a successful conclusion," the resolution also recommended that the provincial authorities and the NES work out a co-operative arrangement for this purpose.

Because an expanding and co-ordinated rehabilitation program requires larger funds, the Committee recommended in the same resolution that the existing federal grants be increased and be made sufficiently flexible to allow for the financing of the training of professional and technical personnel, and the employment of all necessary professional staff.

The next meeting of the Committee is scheduled for March 2 and 3, 1959.

## Protest "Watering Down" of Co-determination

Some trade union leaders in West Germany have recently lodged protests against an alleged "watering down" of the co-determination idea.

Public understanding of the problems involved is complicated by the fact that there are three different systems of co-determination in the Federal Republic.

Co-determination—the demand for labour representation on managing boards—was first put forward in 1948 when German unions called for the "full co-determination of the unions in all organs of the economic order" (L.G., 1952, p. 1173).

In 1951 (L.G., 1951, p. 708), co-determination was enacted for all German corporations in coal mining and steel making.

The 1951 law provides an equal representation of labour and stock-owners on the company's board of directors. The labour members of the board are mostly union officials not belonging to the firm's staff, with only the minority being selected from the firm's employees.

Another union official, the so-called "labour manager" or "labour director," is placed within the tripartite management of each company.

In 1956, a similar law covering holding companies controlling and combining various coal-mining and steel companies was enacted. In this case only a minority of the boards' labour members are to be outside union officials; the majority is to come from the firm's personnel.

The third type of co-determination was introduced in 1952, covering all firms with five or more employees and all incorporated companies outside of coal and steel. In this case, an act provides for employees' works councils. These have a voice in all decisions affecting social and employment conditions. Also, one third of each company's board of directors has to consist of labour representatives, predominantly employees of the company.

# 37th Convention of Canadian and Catholic Confederation of Labour

**CCCL decides to continue meetings with Canadian Labour Congress with view to negotiating affiliation with status of national union. Roger Mathieu elected General President to succeed retiring Gérard Picard**

The Canadian and Catholic Confederation of Labour has decided to continue its meetings with the Canadian Labour Congress with a view to negotiating affiliation with the status of a national union. This decision, reached only after two days of discussion, was the most important decision made at the 37th convention, held in Montreal from September 14 to 20.

Setting aside the question of terms, the delegates, numbering about 525, gave the bargaining committee a free hand, laying down only one condition: the safeguarding of union freedoms.

The whole convention was dominated by this problem of affiliation and by the problem of choosing a new General President. Certain subjects which had formed the subject of lengthy debate in the past, such as the question of political action and that of the structural reform of the CCCL, were scarcely mentioned.

Roger Mathieu, of the Montreal Journalists' Syndicate, who was also 2nd Vice-president of the CCCL, was chosen to succeed Gérard Picard, another newspaperman, who did not allow his name to stand. Jean Marchand was re-elected Secretary but the convention chose a new Treasurer: René Bélanger, President of the Federation of Employees of Municipal and School Corporations.

In his last report to the convention, the retiring President brought up the problem of union freedom and security in Canada. He also dealt with the question of the confessional nature of the CCCL, which led the delegates to authorize the Confederated Bureau to come to a decision after consulting the Quebec Episcopate.

The convention also took a stand against any affiliation with a political party, protested against wage rates and working conditions in Quebec hospitals, and decided to set up a fund for the purpose of establishing a permanent trade union training centre.

At a mass sung for the convention of delegates, His Eminence Cardinal Paul Emile Léger, Archbishop of Montreal, delivered a sermon denouncing the evil of unemployment.

## Opening of the Convention

More than 525 accredited delegates, the largest number ever assembled in the history of the CCCL, attended the opening of the convention on Sunday, September 14.

The General President's moral report was read (see below) and a number of guests addressed the meeting. The presence of Roger Provost, President of the Quebec Federation of Labour (CLC), attracted special notice.

The representative of the provincial Government, Donat Quimper, Assistant Deputy Minister of Labour, emphasized the imposing number of collective agreements signed this year and the proportionally small number of strikes. Of some 1,800 collective agreements signed during the year, he said, about 900 went through the conciliation stage, some 200 got as far as the arbitration stage and only about 20 ended in a strike.

Mr. Provost, having reminded his listeners that relations between the CCCL and the QFL have been closer since the strike at Murdochville, said that he hoped for labour unity without abdication. A third union philosophy should result from this unity, he said, more Canadian than the philosophy of the CLC has been in the past. This new union philosophy, he added, must go beyond purely economic bounds.

In closing, the President of the QFL urged the delegates to continue to study eventual affiliation objectively.

The President of the Montreal Central Council, Horace Laverdure, officially welcomed the delegates.

## General President's Report

In a 40-page report, the retiring General President dealt exhaustively with the subject of trade union freedom and labour unity in Canada.

"Could trade-union freedom exist within a single labour congress in Canada," Mr. Picard asked, "or must we maintain several different congresses, independent of each other, as a guarantee of such trade union freedom?"

## Tribute to Gérard Picard

A spontaneous and moving tribute was paid at the close of the convention to Gérard Picard, retiring as CCCL General President.

Before bringing the convention to a close, the new President, Roger Mathieu, stated that he would devote himself entirely to his duties but doubted that he could discharge the weighty responsibilities assumed by Mr. Picard over the years.

Philippe Girard, on behalf of the delegates and the workers of Quebec, recalled the progress made by the Confederation under Mr. Picard's direction.

The General Secretary and the General Chaplain also paid a spontaneous tribute of gratitude to the man who, for 24 years, held responsible positions within the CCCL.

At an informal party held the day before, Jacques Archambault, President of the CCCL's Organizers' Syndicate, emphasized the close relationship that had always existed between the outgoing President and the Syndicate, and presented Mr. Picard with a purse.

During the week preceding the CCCL Convention, Mr. Picard was elected President of the National Metal Trades Federation, replacing Adrien Plourde, who was named Secretary of the Federation.

In search of a reply, he recalled that trade union freedom is a particular aspect of freedom of association for legitimate purposes. It is based, he said, on "the natural right of both employers and employees to organize the union of their choice without asking any one's permission."

Mr. Picard pointed out that Canada has ratified neither the ILO Freedom of Association and Protection of the Right to Organize Convention (No. 87) nor the Right to Organize and Collective Bargaining Convention (No. 98).

The Canadian Government has periodically explained to the ILO that it could not ratify such Conventions because they deal with matters under provincial jurisdiction, by virtue of the Canadian constitution, but that, substantially, the principles and criteria included in the Conventions are well respected both in Ottawa and the provinces. Quite a dilemma! How can we get out of it?

This led him to recommend strongly that Canada send a complete delegation to the International Labour Conference, which he said had not been done since 1919, and to invite the 10 provinces each to send a technical adviser along as members of the governmental group.

**One newspaperman has succeeded another as General President of the CCCL. Here Gerard Picard (left) offers his congratulations to his successor, Roger Mathieu**

The provinces in turn could authorize the Government of Canada to sign in both its name and theirs international conventions dealing with matters under mixed or provincial jurisdiction. A federal country such as Canada must find a way out of its incapacity in relation to international organizations like the ILO, where we should be in a position to face our responsibilities in the best interest of both our people and of world peace.

Mr. Picard then went on to give an historical review of the Canadian trade union system, an analysis of anti-discrimination legislation and a description of the simultaneous existence of majority and minority certificates in certain industries. He ended with a study of labour unity in Canada.

Mr. Picard summed up as follows the advances made by the CCCL in the field of labour unity:

It appears clearly from the decisions of its last conventions, that the CCCL gave up the idea of maintaining the *status quo*, put aside the hope of protecting its integrity on a permanent basis by way of cartels, because the CCCL would be the only party to profit from such agreements and the other groups knew it, realized since 1955-56 that it would not be realistic to proceed with establishment of another genuinely Canadian congress with the help of other national unions, chose to examine the possibility of affiliation with the CLC, and did not advance any further.

The retiring President concluded with a quotation from John Price, once an officer of the TUC and now Secretary of the Industries' Commission of the ILO: "Trade unions are not only asserting that Labour has a right to its wages but they insist that workers should become the respected members of a great community. This belief is based on the value of the person and their aim is to make it possible for the individual to enjoy his rights and freedom and to fulfill his obligations towards his fellow men in a democratic society."

### Cardinal Léger

"The struggle against unemployment must be carried on energetically, and must constitute one of the principal objectives of economic policy," said His Eminence Cardinal Paul Emile Léger, Archbishop of Montreal, in his charge to the delegates. The cardinal specified that solutions for unemployment remain incomplete so long as a fair concept of the economy, aimed at satisfying human needs, has not been reached.

Cardinal Leger addressed the delegates at a mass celebrated for them in Montreal's cathedral.

His Eminence reminded them that a guided economy is not only possible but necessary. Constant co-operation is needed, he pointed out, on the part of all the agents of economic life, but in order to make this co-operation possible, the workers must assume their share of responsibility, through their associations, in controlling the national economy.

The prelate also stressed the rôle of the Government.

"It is up to individuals and intermediate groups in the first place," he said, "to accept all their responsibilities. However, since it is evident that in this matter, in spite of all their ingenuity, they cannot solve the problem of unemployment by themselves, the public authorities must intervene to stimulate their efforts and complete their activities."

### Report of Confederated Bureau

General Secretary Jean Marchand, presenting a detailed report on the activities of the CCCL during the past year, emphasized in particular the effects of unemployment in the province of Quebec, which, he said, has had "its worst year since the depression in the thirties".

According to the General Secretary, the main cause of this situation is "an economic system which ignores the human being and considers only private interests".

Mr. Marchand also gave a summary of the briefs submitted by the CCCL to the provincial and federal Governments.

### Education Service

The CCCL decided to set up a special fund to be placed at the disposal of the Education Service for the purpose of establishing a permanent union training centre.

Over a period of five years starting this year, an annual subscription of \$5,000 will be paid into this fund.

### Membership

According to statistics reported by the General Secretary, the CCCL membership dropped to 98,038 on May 31, 1958, a decrease of 1,919 since June 1, 1957. Mr. Marchand blamed unemployment

for this decrease, which was particularly felt among metal and textile workers.

On the other hand, the number of syndicates affiliated to the CCCL is on the increase, having risen to 451 from 442.

| Federations                            | Number of Syndicates | Change | Membership | Change |
|----------------------------------------|----------------------|--------|------------|--------|
| Barbers & Hairdressers .....           | 14                   | —      | 590        | —      |
| Building Workers .....                 | 68                   | —      | 21,362     | + 876  |
| Woodworkers .....                      | 22                   | +1     | 3,317      | + 22   |
| Commerce Employees .....               | 20                   | -1     | 3,362      | - 208  |
| Municipal & School Corp. Workers ..... | 57                   | +2     | 6,219      | + 216  |
| Leather & Shoe Workers .....           | 13                   | -2     | 4,216      | - 145  |
| Printing Trades .....                  | 25                   | -1     | 4,585      | - 5    |
| Mining Industry Employees .....        | 11                   | +1     | 4,696      | - 150  |
| Metal Workers .....                    | 37                   | -2     | 14,113     | -1,748 |
| Pulp and Paper Workers .....           | 37                   | -1     | 7,770      | - 24   |
| Services .....                         | 34                   | +5     | 6,943      | + 182  |
| Textile Workers .....                  | 24                   | —      | 7,528      | -1,107 |
| Clothing Workers .....                 | 29                   | +3     | 5,459      | - 147  |
| Chemical Workers .....                 | 9                    | -1     | 3,058      | - 130  |
| Directly affiliated .....              | 51                   | +5     | 4,920      | + 449  |
| Totals .....                           | 451                  | +9     | 98,039     | -1,919 |

The plan to set up a permanent union training centre was put forward by Fernand Jolicœur, Director of the Education Service, and his assistant, Jean Paul Lefebvre.

Such a centre, it was pointed out, has proved necessary for the carrying on of union education. Thanks to the participation of affiliated organizations, the construction of a \$100,000 building is foreseen.

The convention also decided to set up a Political Education Committee whose task it will be to offer guidance to the Education Service and the regional educational committees with regard to the contents and techniques of the movement's political education programs.

This committee will consist of two members chosen by the CCCL Executive Committee from its own membership, three members appointed by the Confederal Bureau and two CCCL organizers.

The convention also authorized the Confederal Bureau to support any political action decided upon on the regional level, with the exception of partisan political action.

Finally, in the realm of education, a committee is to be set up which will inquire into the requirements of industry with regard to education and prepare a brief for presentation to the proper authorities.

### Organization Service

According to Amédée Daigle, Director of the Organization Service, the organizing of non-union workers is becoming more and more difficult.

"As far as the workers are concerned," he explained, "unemployment is making them more and more careful, and they are not prepared to run the risk of losing their jobs. Furthermore, the employers are still hostile and the Board (Quebec Labour Relations Board) is showing more and more ill will in its attitude towards us."

### White-Collar Workers

As an appendix to the Organization Service report, Jean Robert Gauthier, technical adviser specializing in the "white-collar workers" division, presented a report on organizing in this field.

Mr. Gauthier submitted the following findings:

(a) From 10 to 15 per cent of those white-collar workers who can be organized in Canada and the United States have been reached by union organization;

(b) Civil service groups show great psychological permeability to union activity, but there are legal obstacles to unionization on the provincial and federal levels: union action must respect the values of the class

### Workers' Song

At the convention, the CCCL's Education Service announced the names of the winners in its first competition for a workers' song.

This competition, open to all Canadian citizens, was divided into two classes—Class A for words and music and Class B for words only.

René Tournier of Montreal won the first prize in Class A (\$200) for his work entitled "March of the Canadian Workers". The second prize in this class (\$100) went to Lucien Hétu, also of Montreal, for his song entitled "March of the Workers".

Four prizes of \$50 each were awarded in Class B; these went to Miss Irma Allard of Montreal, Paul M. Gauthier of Montreal, Mrs. Aimé Nadeau of Thetford Mines, and Jean Paul Robillard of Ville St. Laurent. Only the last-named is a member of the CCCL.

concerned: respect for the hierarchical set-up of public office, loyalty to the public service, prestige of professional positions, etc.

(c) White-collar workers in economic concerns are less permeable to union activity than civil servants, but their sociological conditions favour such action, which must, however, spring from the deep-seated aspirations of their class; economic promotion through advancement in the hierarchy of the concern, maintenance of the dignity of office work;

(d) Organization among salespeople is centred in an individualistic psychological tendency, created by the personal success of the salesman himself, which may be an impediment to union activity, although salespeople do not show any deep-seated opposition to such activity;

(e) The type of concern involved conditions the success of union activity in both cases; if the size of the concern is such that it favours the identification of employers and employees, union organization has less chance of success; if the concern grows, and work is parcelled out, the chances of unionization increase;

(f) Professional and technical groups show a dynamic tendency to become unionized, even within their existing framework;

(g) All union activity in middle class circles must be clearly identified with the underlying interests of the group, must espouse its cause and must enlarge and improve on that which forms the essence of labour, in its actual provisions.

## General Chaplain's Message

Rev. Canon Henri Pichette, General Chaplain of the CCCL, called on the delegates to consider the problem of affiliation "in an atmosphere of understanding, tolerance and charity".

He also took advantage of his traditional message to justify present union security clauses.

Reminding his listeners that the question of affiliation of the CCCL with the CLC has been under consideration for a number of years now, Canon Pichette attempted to "dissipate a current misunderstanding with regard to discretion". He specified:

It is a fatal mistake to think that discretion invariably counsels opposition to progress or marking time, inaction or entrenchment in comfortable positions... Discretion commits a man of action to seek and to choose the best means, under the circumstances, for attaining his objectives... Discretion commits you first of all to take all possible steps to have consideration and discussion of this problem carried on in an atmosphere favouring objectivity.

Pointing out that the convention considered chiefly the terms of a possible future agreement with the CLC, Canon Pichette called to mind that it is important to know "on what conditions you agree to make your contribution to the Canadian labour movement and what guarantees are offered you for respect of your integrity and of your own characteristics".

He added that it is not always sufficient to evoke the general advantages of the unity of organized workers.

"Those bodies affiliated with the CCCL which feel the need to form alliances less than the others do are justified in demanding more complete explanations concerning the 'wherefores' of affiliation," he said.

The General Chaplain also dealt at length with freedom and its application to trade-unionism. "The external freedoms claimed, such as the freedom of association, the right to vote, freedom of speech, etc., are nothing but conditions which enable us to act as free men," he explained.

He stressed the fact that "our labour movement grew up under the capitalist system, and its characteristics and arrangements cannot be understood unless we know what abuses it was meant to correct".

The Canon stated that the workers, in attempting to guarantee and protect their freedom of association before their employers, have also tried, through contractual clauses, to ensure the participation and cohesion of the workers.

This meant, he said, the appearance and development of union security clauses, which have given rise to a great many

protests. Strangely enough, it was often the employers who made themselves the grand champions of the freedom of their employees with regard to their union. The arguments put forward are generally based on an individualistic concept of freedom, which recognizes no responsibility on the part of the worker towards the organized group and no obligation for solidarity towards the community of labour. No relationship has been established between the right to work and union duty and the fact has been overlooked that Christian ethics not only demanded freedom of association but recalled the workers' obligation to participate in union life.

Canon Pichette continued as follows:

Theologians who have had to examine present union security clauses have taken their stand on this duty in order to justify such clauses. So these clauses have nothing in themselves which is contrary to ethics or violates the freedom of the workers. May I emphasize the fact, however, that they should not be intended to replace efforts made to convince the workers, by persuasion, of their duties and obligations. Compulsion can never be justified unless an attempt is made beforehand or at the same time to have the workers join their union of their free will, once they have understood the situation.

Canon Pichette acknowledged that these clauses may have given rise to certain abuses, but he specified that it is not admissible to contest them "in the name of ethics and of freedom".

## Affiliation with the CLC

The convention instructed the CCCL's labour unity committee to meet the representatives of the Canadian Labour Congress for the purpose of negotiating affiliation with the status of a national union.

The delegates gave the 15-member bargaining committee a free hand. The only condition laid down had to do with the "safeguarding of union freedoms".

This resolution, which was carried unanimously, was moved by André Roy, President of the Quebec Central Council, and seconded by the retiring General President.

It read as follows:

That the CCCL Convention instruct its Labour Unity Committee to meet the representatives of the CLC in order to negotiate the affiliation of the CCCL with the CLC, with the status of a national union;

That the Committee have all the latitude to carry on the said negotiations, subject to the safeguarding of trade union freedoms;

That the Committee submit at the next CCCL Convention a report of its discussions.

Coming after a long and acrimonious commission debate, the unanimous adoption of this resolution was a surprise. It was due to the fact that the resolution made a clean sweep of the conditions to be laid down

Roger Provost, President of the Quebec Federation of Labour (CLC), was a guest at the CCCL convention. In his remarks to the delegates he urged the CCCL to continue discussions towards affiliation. Pictured (left to right) are: Jean Marchand, CCCL General Secretary; Gerard Picard, retiring President; Mr. Provost; and Donat Quimper, Assistant Deputy Minister of Labour of the Province of Quebec

for eventual affiliation, simply concurring in the principle of affiliation and thus giving a free hand to the bargaining committee.

Terms and conditions will come to the fore again at the 1959 convention, when the labour unity committee will present its report.

The commission discussion was brought about by the affiliation plan submitted by Mr. Picard in his moral report as a possible basis for discussion. Dealing with the question of terms, the discussion was not only lengthy but sometimes acrid.

The moment the general assembly which was to study the question of affiliation opened, the General Chaplain and the General President made a point of appealing for calm, serious consideration and a spirit of charity. But when Mr. Roy submitted his draft resolution, amending the recommendation of the commission's report, there was immediate unanimity and Mr. Picard lost no time in seconding the motion.

Roger Mathieu, taking part in the discussion for the first time, made it clear that he was not in favour of affiliation "on any condition" but pleaded in favour of continuing negotiations with the CLC. Philippe Girard also stressed the need of "attaining unity within the CCCL". He

laid emphasis on the education of the members in this respect, stating that it is impossible "to change a person's mentality by means of a convention resolution".

The convention then appointed the following 15 members to make up the labour unity committee: René Gosselin, Jean Marchand, Armand Morin, André Roy, Camille Larocque, Roger Mathieu, Gérard Picard, S. Ted Payne, Angelo Forte, René Bélanger, Jean Noël Godin, Adalbert April, James McCulloch, Adrien Plourde and Donat Gauthier.

### Confessional Nature of the CCCL

The Confederal Bureau was authorized to come to a decision, after consulting the Episcopate of the province of Quebec, concerning the confessional nature of the CCCL.

The retiring President pointed out in his report that the use of the word "Catholic" in the title of the CCCL lends itself to misunderstanding and is not expressive of reality.

He also emphasized the fact that, even if no reference is made to the social doctrine of the Church, this does not in any way, within the framework of the present set-up,

## Roger Mathieu

The new General President of the CCCL was born in Montmorency, near Quebec City, on July 8, 1921. The following year his family moved to the provincial capital, where he received his elementary education.

Born of a working-class family (his father, Donat Mathieu, now retired, worked for the Quebec Power Co.), Mr. Mathieu made his entry into the labour world as a store clerk. And it was through the *Jeunesse Ouvrière Catholique* (Young Catholic Workers) that he was initiated into social work. Mr. Mathieu became a member of the *J.O.C.* in 1936 and successively held the posts of local President and Federal Secretary for the Diocese of Quebec.

In 1941 he moved from Quebec to Montreal, where he became Secretary and then National President of the *J.O.C.* In 1944 Mr. Mathieu went to work at the Ford and Godfredson plants in Windsor, Ont.

Returning to Montreal in 1946, he entered the service of the French daily newspaper *La Presse* as a labour reporter, a post he held for six years until he was named assistant news editor.

Mr. Mathieu became a member of the Montreal Journalists' Syndicate in 1946, and was President from 1951 to 1958.

In 1955 he was elected President of the Montreal Central Council of the National Syndicates, a post he held for one year, and 2nd Vice President of the CCCL, which he remained until he was elected President.

Elected by the Montreal Central Council of the National Syndicates, Mr. Mathieu has sat on the Montreal Municipal Council (Class C) since the fall of 1957.

Mr. Mathieu travelled in most of the Western European countries in 1945 as a delegate of the *J.O.C.* In 1946 he visited the United States and Mexico. He spent the early summer of 1958 in Europe as adviser to the Canadian worker delegate at the International Labour Conference and CCCL delegate to the International Confederation of Free Trade Unions convention.

prevent "adherence, in the CCCL's statement of principles, to the supremacy of spiritual values and the supernatural purpose of man".

During the discussion, conducted largely by S. Ted Payne, Vice-president of the National Metal Trades Federation, it was

pointed out that the question of confessionalism had come up in connection with the Quebec co-operatives, and that they had decided against it, after consulting the Episcopate.

A brief is being prepared on the subject and should be submitted shortly.

Those in favour of giving up the CCCL's religious connection referred, among other things, to the necessity of having a constitution applicable on the national level, to changes in the legal, demographic and democratic context, and, finally, to the need to be in order with anti-discriminatory legislation.

Mr. Payne urged that a report be made at the next convention.

## Political Action

The question of political action, discussed at length at recent conventions, was not taken up this year.

Two resolutions, one of which suggested considering the advisability of adhering or not to the setting up of a Canadian political party, and the second recommending "acceptance of the invitation of the Social Democratic party to participate in studying the possibility of setting up a new and really democratic Canadian political party," were rejected by the Resolutions Committee.

The Committee recommended that the delegates abide by the present provisions of the CCCL constitution providing for the setting up of a political guidance committee (see "Education Service" above) but expressly forbidding any group to affiliate itself with a political party or the CCCL to support such a party.

## Unemployment Insurance

The convention came out in favour of higher unemployment insurance benefits, ensuring weekly payments of at least \$30 to unemployed persons with dependents and \$20 to the unmarried worker, but took a strong stand against any attempt to make a strike fund out of the unemployment insurance fund.

Objecting to a resolution which called for the payment of benefits to workers taking part in an industrial dispute, Jean Marchand denounced the tendency to extend benefits to "non-insurable classes".

Recalling the purpose of the Act, the General Secretary stressed the fact that the unemployment insurance fund should not be used as a strike fund.

"If the Government wants to hand out subsidies," he said, "it should not take them from a fund made up of contributions from insured persons."

The convention also requested:

—That every unemployed worker who decides to specialize in a trade should be able to draw benefits as long as his courses last;

—That disqualification of a claimant who has left his job voluntarily be limited to two weeks;

—That the annual waiting period be abolished;

—That benefits be paid throughout the unemployment period;

—That Unemployment Insurance Commission offices be opened on the North Shore and at Donnacona, and that the Montreal offices be enlarged.

In calling for increased benefits, Michel Chartrand stated that the average amount of benefits collected by unemployed fathers of families last winter in Montreal was \$20.

## Hospitals

The convention asked for a public inquiry into Quebec hospitals with a view to putting an end to what it termed "a good many anomalies". It specifically requested:

1. A breakdown of the costs of hospitalization and of medical and surgical treatment;

2. Study of the spread between the cost of hospitalization "per day" and the wages paid the employees;

3. Study and analysis of the nature and quality of the care given hospital patients;

4. Study and analysis of the stability of employment and of the output of the employees.

Jacques Archambault, technical adviser to the Services Federation, stated that the average weekly wage of all employees of the hospitals is \$34.25 and that of male workers \$40.

He also protested against the constant turnover of staff, which, in certain hospitals, may reach 400 per cent.

Mr. Archambault also criticized the fact that hospital workers are not protected by the Workmen's Compensation Act or the Unemployment Insurance Act.

## Resolutions

### Unemployment

Although it did not give rise to a full debate, the question of unemployment was brought up a number of times at the convention.

The delegates passed a resolution urging the federal Government to adopt a full employment policy. In addition, the delegates requested the Executive to bring pressure upon the federal Government to do something about the depression in Sorel. It was pointed out that more than 2,500

**Roger Mathieu**  
New President of CCCL

workers were drawing unemployment benefits and that some 2,000 others had already exhausted theirs. This situation results mostly from a reduction in shipbuilding.

### Natural Resources

The CCCL urgently requested the setting up of a Provincial Board of Economic Planning for the development of Quebec's natural resources.

A committee under the chairmanship of Jean Paul Robillard of the Montreal Journalists' Syndicate submitted a special resolution requesting a Board that would:

1. Look after the conservation of the province's natural resources and their rational development in the interests of the population;

2. Counsel the Government on the replacement of monopolies by State undertakings, under independent, socialized, co-operative or joint management control.

3. Promote the creation of industries for the processing of mining products.

### Recognition of Communist China

An amendment to a resolution to promote world peace, calling on the Canadian Government to back the admission of Communist China to the United Nations, was voted down after a rather lively debate.

The original resolution which was adopted, urges the Canadian Government to participate in every peace-making activity

### **Strike at La Presse**

The choice of Roger Mathieu of the Montreal Journalists' Syndicate as President of the CCCL caused a strike at his employer's establishment, the daily newspaper *La Presse*, when he was refused leave without pay for the duration of his term of office. Mr. Mathieu was assistant news editor.

*La Presse*, the largest French-language daily newspaper in America, with a daily circulation of more than 200,000, was not published for 12 days when members of other unions at the paper refused to cross the picket lines set up by the 78 journalists. Union members also published more than 100,000 copies of their own smaller daily newspaper.

The Journalists' Syndicate stated "that leave without pay for elected officers is a principle to which all unions adhere because it is related to the right of organization and to the free choice of officers."

The strike ended on the twelfth day, when management recognized the merits of the journalists' contention and granted Mr. Mathieu leave without pay.

throughout the world "without being influenced by those powers which think more of their prestige than of establishing and upholding peace".

Jean Paul Robillard of the Montreal Journalists' Syndicate sought to have this resolution amended so as to ask the Government to recognize Communist China and not pursue "the United States' policy of force to prevent the islands of Matsu and Quemoy from passing into Communist Chinese hands".

### **Nuclear Weapons**

A resolution recommending the ending of nuclear tests was turned down when several delegates, including the General Secretary, emphasized the complexity of the problem and the need "to defend ourselves".

The original resolution expressed the wish that Canada should not participate in nuclear tests. Instead of this, the delegates favoured an end to the use of nuclear weapons for military purposes.

Michel Chartrand, however, objected to any kind of nuclear tests. "I should prefer being under a Communist regime than winning because we used arms like that," he said.

### **Shipping**

The convention expressed opposition to upholding the shipping agreement which enables Commonwealth countries to carry

on, without restriction, coastal shipping in territorial waters of other member countries.

This resolution was immediately sent to the Canadian delegation to the Commonwealth Economic Conference being held in Montreal at the same time.

The resolution, moved by the shipyard workers' section of the National Metal Trades Federation, set forth the following reasons: the agreement is prejudicial to the economic and social well-being of Canadian workers in the merchant navy; the devaluation of foreign currencies increases the advantages of vessels registered in other parts of the Commonwealth; and the opening of the St. Lawrence Seaway will only add to an already serious situation.

### **Natural Gas**

The convention also requested a public inquiry into the sale of the natural gas distribution system to the Quebec Natural Gas Corporation.

The delegates adopted an amendment put forward by the General Secretary to:

1. Censure the provincial Government for making the sale;
2. Call for a Royal Commission inquiry into the negotiations and transactions that led to this sale;
3. Demand the resignation of the Ministers named in the scandal;
4. Insist on repurchase of the gas system by Quebec Hydro.

### **Biennial Convention**

The delegates rejected a recommendation by the National Federation of Employees of Municipal and School Corporations that called for the holding of conventions every two years only.

There was no debate from the floor but the delegates agreed to the Constitution Committee's recommendation, which termed the resolution "unpractical".

### **Other Resolutions**

The convention also studied a number of problems with a view to making recommendations either to the federal or the provincial Government. Thus the CCCL requested:

—That all employees of a firm be made to pay union dues when they enjoy the benefits of a collective agreement, since the certificate of recognition obliges the union to represent all the employees;

—That the Unemployment Insurance Act be amended so that days when an employee is absent from work due to an industrial accident may be considered as working days under the Act;

—That family allowances be paid to all children attending school irrespective of age,

The CCCL Executive for the coming year (left to right): 5th Vice-president Angelo Forte, 7th Vice-president Miss Jeanne Duval, 4th Vice-president Adrien Plourde, General Secretary Jean Marchand, 3rd Vice-president Rosario Gosselin, General President Roger Mathieu, 2nd Vice-president Horace Laverdure, Treasurer René Bélanger, 6th Vice-president Daniel Lessard, 1st Vice-president René Gosselin, and Canon Henri Pichette, General Chaplain of the Confederation

and that the income tax deduction for the upkeep of a child be \$400 after age 16;

—That in the case of workers in industries considered seasonal the income tax deduction at the source be made on 80 per cent of income only;

—That the necessary steps be continued concerning the immediate participation of the province of Quebec in the national health insurance program.

—That the Dominion Bureau of Statistics publish detailed data for all cities and towns in the province;

—That protests be made against any increase in rates by the Bell Telephone Company;

—That water and electricity services be maintained in cases of non-payment due to unemployment or illness;

—That the maximum penalty payable under the Combines Investigation Act be raised from \$10,000 to \$1,000,000;

—That the minimum wage rate in the province of Quebec be increased to \$1.25 an hour for all classes of workers.

## Elections

Roger Mathieu, Montreal Journalists' Syndicate and second Vice-president of the CCCL, was elected General President, succeeding Gérard Picard, who resigned. He

defeated his sole opponent, René Gosselin, President of the National Textile Federation and first Vice-president of the CCCL, who was re-elected to this same position.

Mr. Picard, General Secretary of the CCCL from 1934 to 1946 and General President since 1946, announced a year ago that he would not seek re-election. A week before the CCCL convention, he accepted the presidency of the 14,000-member National Metal Trades Federation. He will also act as technical adviser to this Federation.

Jean Marchand, General Secretary, was re-elected for an eleventh term.

The CCCL also elected a new Treasurer in the person of René Bélanger of Quebec, President of the National Federation of Employees of Municipal and School Corporations. Mr. Bélanger ran against J. Emile Hébert, who had held the post for three years.

Vice-presidents elected were: 1st Vice-president, René Gosselin, Granby, President of the National Textile Federation; 2nd Vice-president, Horace Laverdure, President of the Montreal Central Council of the National Syndicates; 3rd Vice-president, Rosario Gosselin, Quebec, President of the Federation of Building Workers; 4th Vice-president, Adrien Plourde, Arvida, Secre-

tary of the National Metal Trades Federation; 5th Vice-president, Angelo Forte, Montreal, Vice-president of the National Federation of Clothing Industry Workers; 6th Vice-president, Daniel Lessard, Thetford Mines, Secretary-Treasurer of the National Federation of Mining Industry Employees; and 7th Vice-president, Miss Jeanne Duval, President of the Montreal Hospital Service Employees' Syndicate.

Only Horace Laverdure and Rosario Gosselin are new vice-presidents; they replace Roger Mathieu and Joseph Parent, respectively, who resigned.

The convention also chose the three members of the Professional Defence Fund Committee. They are: Armand Larivée, Asbestos, President; Philippe Boily, Jonquière, Vice-president; and Guy Thibodeau, Shawinigan Falls, Secretary-Treasurer.

## Second Annual Convention of Ontario Federation of Labour

**Statement on unemployment demands emergency program to provide jobs this winter, urges "more generous" unemployment insurance benefit and extension of benefit period. David Archer is elected President**

Consideration of ways to offset expected excessive unemployment this winter; discussion of "insidious attacks" on organized labour in Canada; organization of the unorganized; and political action to give Labour a louder voice in the affairs of the country were among major items handled at the second annual convention of the Ontario Federation of Labour at Toronto, October 6, 7 and 8.

Labour's concern over unemployment was voiced in a special two-hour night session of the convention. More than a score of delegates from all parts of Ontario took the floor calling for action in the face of unemployment that threatens to exceed the March 1958 peak, "when 260,000—or 12 per cent—of Ontario workers were registered with the National Employment Service".

There were 694 delegates at the convention, representing 23 labour councils and 342 labour unions. By acclamation, they elected David Archer President of the Federation to succeed Cleve Kidd and returned Douglas Hamilton to the post of Secretary-Treasurer.

In unanimously approving a policy statement on unemployment, the delegates urged the federal Government to provide "more generous benefits under the Unemployment Insurance Act, easier provision for qualifying for benefits and extended periods during which benefits can be paid".

It was suggested the Ontario Government boost the scale of assistance payable under the Unemployment Relief Act, and introduce legislation that would prevent the eviction of jobless householders for non-payment of rent or mortgage payments.

As a long-term cure for the "boom and bust" pattern, organized labour will continue to press for a "nation-wide policy of planned public and private investment," the statement declared.

UAW delegates at the convention took the floor many times to urge that the labour movement itself make more active protests in the form of treks to Queen's Park and Ottawa. The trek to Ottawa by UAW workers in the spring was cited as an example.

### Statement on Unemployment

A statement on unemployment that calls for an emergency program to provide jobs this winter was adopted after a debate lasting more than two hours. The statement declares that, in the longer term, all levels of government must adopt a full employment policy.

The Government is criticized for the "bankruptcy" of its policies "that can neither prevent a recession nor control it," for its urgings for restraint unaccompanied by efforts to control prices, and for its maintenance of a high interest policy.

"The Ontario Federation of Labour continues to be gravely concerned over the impact of unemployment on wage-earners and their families," the statement begins. Business conditions are improving but technological improvements have eliminated a great many jobs in industry, with the result that, except for seasonal changes, the employment situation has not yet shown any significant improvement, it continues.

"When seasonal layoffs are added to the already substantial level of unemployment, we may well find that the jobless totals will exceed those of last winter."

Although organized labour has repeatedly demanded swift and bold action of the senior government, now, as the economy begins to recover from the recession, "we find not only that unemployment is still a major problem but that our governments have made no serious effort to remedy it." The only government intervention has been modest increases in works programs and more liberal provisions for housing loans. Moreover, the federal Government's insistence on maintaining a high interest rate policy has discouraged new investment and has contributed to higher consumer prices.

Then the statement accuses some large employers of choosing this time to launch an anti-labour campaign and, in some cases, to force strikes or lockouts "in order to make Labour the scapegoat for high living costs and unemployment".

Government spokesmen have been urging restraint on the part of Labour and Management but have failed to point out that a rising wage level and increased consumer buying can make a dynamic contribution to economic recovery, the statement says. It is also significant that business or government have made no effort to reduce prices and so eliminate consumer demand.

The Government's concern not to interfere with private business is the cause of great individual hardship among working people, it adds.

Labour will continue to urge a nationwide policy of planned public and private investment, in order to ensure the orderly development of resources and to eliminate the "boom and bust" pattern, and will continue to demand fiscal and monetary policies whose main purpose will be the attainment of full employment.

"The immediate need, however, is for a stop-gap or 'crash' program to provide jobs for the thousands now out of work and for the thousands more who may be thrown out of work in the coming winter."

Unemployment of the same severity as last winter's would create even greater hardship this year because many workers now have little or no entitlement to unemployment insurance benefits, the statement points out.

To avert hardship, there must be an "unprecedented" flow of federal, provincial and municipal funds into projects that can be started without delay and carried on throughout the winter.

Such a program, which would stimulate activity in many industries, should be

**David Archer**  
New OFL President

backed by direct aid to all other public enterprises that are in a position to provide additional employment, and should be accompanied by a reduction in interest rates on housing loans.

The statement also urged the Ontario Government to increase the scale of assistance under the Unemployment Relief Act, and to introduce legislation to prevent eviction of jobless householders for non-payment of rent or mortgage instalments. The federal Government was urged to raise unemployment insurance benefits, liberalize qualifying provisions, and extend the period during which benefits can be paid.

### Political Action

Delegates unanimously adopted a resolution endorsing the political resolution adopted at the second annual convention of the Canadian Labour Congress (L.G., June, p. 589).

The OFL resolution urged all Ontario labour councils and affiliated unions to give renewed emphasis to political action and education programs so that the membership "will have a thorough understanding of our political as well as our economic objectives, and will play their part in the democratic development of the new political as well as our economic objectives, and will play their part in the democratic development of the new political movement to which the Canadian Labour Congress and its affiliates are now committed."

The closing portion of the resolution instructed the OFL executive to "meet with the CCF, interested farm organizations and other like-minded individuals or groups" with the intent of carrying out CLC political policy; and reaffirmed its support for the CCF, and particularly its candidates in the forthcoming provincial election.

### Sweepstakes

After unemployment, the resolution that provoked most comment on the convention floor was the one recommending sweepstakes to pay for hospitals. It was defeated.

The words used by William Benson, Machinists, and Murray Cotterill, Steelworkers, were typical of those from the majority of the delegates in the discussion of the motion. Mr. Benson said most of the revenue from the Irish sweepstakes is eaten up in administrative costs "and yet, the Irish hospitals are far below standards of hospitals in other countries. If you want to gamble, go ahead," he said, "but if you want a good hospital plan you'll have to put the pressure on the Government."

Mr. Cotterill pointed out that there is unquestionably a large number in Canada who buy sweepstakes tickets. But, he thought, they were not purchased for the express purpose of helping hospitals.

To legalize sweepstakes in the name of the hospitals would only be giving a blessing to the numbers racket, he said, and that form of gambling has "done more to hurt the labour movement in the United States than anything else. In too many cases shop stewards were more concerned with making a fast buck than in serving the interests of the workers.

"Most of us gamble at one time or another, but we are not going to suggest that a perfectly proper hospital plan be turned over to a gang of fast-money artists," he concluded.

### President's Address

Retiring President Cleve Kidd outlined the things that the trade union movement should support, and guard against.

The trade union movement is "being faced at this time with the additional responsibilities of fighting off sinister and insidious attacks being made against the trade union movement from many sides," he said, and suggested that the best way to combat such attacks was "with the weapons that the organized labour movement has used so successfully in the past—more organization, more information services, more education..."

He criticized the recent bond conversion as not being in keeping with the Prime Minister's suggestion to the Canadian

Labour Congress that all Canadians should practice restraint at this time. Three months after telling the CLC not to feed inflation he endorsed "a six-billion-dollar bond issue that boosted interest rates 50 per cent to \$100 million a year in interest costs alone—50 per cent higher interest to the coupon clippers. Is this not inflationary?"

Mr. Kidd regretted that the Arrow aircraft was in danger of being "scuttled" without a single constructive alternative being offered to Canadian industry and to Canadian workmen. He protested "this threatened loss of our skilled manpower and the increasing dependence of this country on the United States both for defence and industrial development..."

The time when it was thought that all major issues could be solved across the bargaining table is dead. There is a material third party at every bargaining table—and that party is government. Not a shadow of a third party—but a solid body of a third party that not only dictates the labour laws and how they shall be interpreted, but that also in large measure determines the economic and psychological climate in which the bargaining process operates. It sets the terms of industrial peace or war as surely as it contends with peace or war between nations...

### Speakers

CLC President Claude Jodoin advised the convention to concentrate on organizing the unorganized. "If ever unity was needed in the labour movement, not only to keep what we have, but to continue to go forward, it is now," he said. "There are still far too many unorganized workers in Canada."

Rabbi Abraham L. Feinberg warned delegates that Canadian Labour must ban the import of "the big-shot union racketeer" from the United States if it expects to fend off anti-labour legislation, and reminded them that the future of union labour depends on public opinion. He added:

"If unions accept control by men who exploit their office for personal enrichment, they will forfeit the sympathy of their friends." Canada, he noted, is relatively free of union corruption; but, he warned, "the Becks and Hoffas of U.S. Labour will try to float into Canada on the St. Lawrence Seaway as Cleopatra of old floated down the Nile on a barge to beguile Marc Antony."

There was a clear sign that the worst of the recession was over and "clear signs of a turn upwards," Premier Leslie Frost told the delegates.

Another Vice-president, Mike Fenwick, was absent when the picture was taken

### Other Resolutions

More than 100 resolutions in all were submitted to the convention. Principal matters dealt with, apart from unemployment, criticism being levelled at trade unions, and the sweepstakes question, were:

—Establishment of a salary of \$8,000 per year and expenses for the President. (Formerly the presidency was an unpaid position.)

—Boosting of the per capita tax from 2 cents to 3 cents.

—Recommendations that workmen's compensation and pensions be increased, that the clause in the Ontario Labour Relations Act respecting municipal employees be changed, and that the time limits in the conciliation process be shortened.

Resolutions were adopted calling for the 30-hour work week, better vacations-with-pay legislation, and legislation that would eliminate discrimination in the rental and sale of homes.

Lengthy debate developed over a resolution submitted by Local 299, Hotel and Club Employees' Union, Toronto, urging that the Ontario Government be requested to pass legislation that would permit estab-

lishments selling liquor to stay open until 3 a.m., and allow sale of liquor in hotel rooms. The present closing time of 1 a.m., and the law prohibiting the sale of spirits in hotel rooms, was drastically curtailing employment of its members, the local asserted.

After hearing the various opinions of the delegates, the convention adopted a resolution asking the Ontario Government to institute a closing time of 2 a.m., and to permit the sale of liquor in hotel rooms.

The convention also urged the Ontario Government to enact legislation to establish a minimum wage of \$1.25 an hour; demanded that its own membership spend more on public relations work and publicity with a view to putting Labour's case before the public more frequently and in a better light than heretofore.

Accident prevention legislation of the province was described as ineffective and hobbled by political considerations. The convention urged the establishment of an Ontario Safety Authority with representation from Labour, Management and Government to correct the situation.

Delegates also indicated that they felt a "grave injustice" is being done to those

receiving pensions under Ontario's Workmen's Compensation Act. Unanimous approval was given a resolution asking that the "injustice" be corrected.

Legislation to prevent employers from discriminating against job seekers because of age was urged, after one delegate pointed out that hiring age limits of 35 and under are being imposed by many employers. The convention went on record in favour of amending the Ontario Fair Employment Practices Act to prohibit an employer from dismissing employees because of age unless termination of employment conforms to "an agreed upon" pension plan.

The convention called on the federal Government to amend the National Housing Act to prohibit the use of public money by builders or real estate agents who practice racial or religious discrimination in the sale of NHA-financed homes. It was also proposed that the Ontario Government bring apartment houses and multiple dwelling units of three or more within the scope of the Fair Accommodation Practices Act.

As the convention drew to a close, delegates passed a resolution calling for the Ontario Government to take over the sale and distribution of natural gas in the province.

Following lengthy debate, the delegates agreed that the next convention would be of three days duration, and would be held during the last three months of the year 1959. Subsequent to that the convention will be of one week's duration and will be held every second year, the first one in 1961.

### Elections

David Archer, last year's Executive Secretary of the Federation, was unopposed for election to the presidency to succeed Cleve Kidd, who did not stand for re-election. Douglas Hamilton was returned by acclamation as Secretary-Treasurer.

The convention raised from eight to ten the number of vice presidents. Elected to fill the posts were: Richard Courtney, Auto Workers, 493 votes; Mike Fenwick, Steelworkers, 487; William Boothroyd, Machinists, 463; William Punnett, Rubber Workers, 432; George Barlow, Retail and Wholesale Workers, 430; Wilf Ostling, Pulp and Sulphite, 426; Purdy Churchill, Printing Pressmen, 418; George Watson, Textile Workers, 416; I. M. Dodds, Teamsters, 412; Sam Hughes, Packinghouse Workers, 377. Five others contested the election: A. G. Hearn, William Kitching, C. Kamarousky, Scotty Liness, M. Porcheski.

---

## Provincial Labour Federations Hold Annual Conventions

Unemployment, the crisis now facing Labour because of management's stiffened attitude, and the proposed new political party are topics given most attention by delegates to meetings of provincial bodies

### British Columbia Federation of Labour

Unemployment, the employers' alleged attack on Labour, and political action were main topics of discussion at the convention of the British Columbia Federation of Labour (CLC), held October 21 to 25 in Vancouver.

Between 350 and 400 delegates representing 189 unions and nine local labour councils attended.

Other subjects which provoked lively debate were the workings of the provincial Workmen's Compensation Act, government automobile insurance, and the re-admission to the Canadian Labour Congress of unions which have been expelled for being under Communist domination.

The convention approved an eight-point program on unemployment that had been drawn up at a closed all-day session held before the convention started. The program called for:

—Rigid control of immigration unless the demand for labour can absorb new arrivals.

—Provision of low-interest loans by the federal Government for municipal housing, slum-clearance, and other construction projects.

—Starting of a federal public works program in B.C. immediately.

—Early development of Columbia River power by the B.C. Power Commission in co-operation with the federal Government,

and distribution of the power by the Commission so as to attract secondary industry.

—Immediate application by the Province for the unemployment assistance grants now available from Ottawa.

—Establishment of unemployment committees in all unions, and meetings of all unemployed to work through labour councils.

The two other measures designed to increase employment approved by the delegates were two amendments to the Hours of Work Act that will be sought from the provincial Government. One of these changes would establish a maximum 40-hour week instead of the present 44-hour week. The other would forbid "moonlighting" by prohibiting anyone, after working eight hours in any one day or 40 hours in any one week, from working for any other employer.

It was also decided to ask for union control over overtime permits, with such permits to be granted "only in times of utmost emergency".

### **Unemployment Insurance**

Against the advice of their special unemployment insurance committee, the convention voted in favour of asking the federal Government to reinstate all unemployed workers who have been cut off unemployment insurance benefit, and to pay them benefits regardless of eligibility.

This proposal aroused bitter controversy. Harry Anderson, CBRE delegate and chairman of the special committee, termed the resolution "nothing less than sabotage of Labour's hard-won insurance scheme". Another committee member, Vic Forster, IWA, supported him, saying that the removal of all qualifications would turn the plan into "nothing more than a dole". Nevertheless the motion passed by a large majority.

In reply to the question of where the money to support such a system was to come from, Bill Stewart of the Marine Workers and Boilermakers' Union Local 1 said: "From what they're spending on missiles".

Among other recommendations on unemployment insurance suggested by the committee and approved by the delegates was a change in the Act which would authorize payment of benefits to workers who refuse to cross picket lines, provided that the strike was authorized by a legitimate trade union.

### **Anti-union Campaign**

The Federation adopted a seven-point program to counteract what it regards as a nation-wide anti-union campaign being waged by organized employers. The particular object of the program is to forestall

any attempt to introduce restrictive labour legislation at the next session of the B.C. Legislature.

The program included the establishment of a \$26,000 "war chest" to be raised by doubling the present 2-cent per capita tax levied on affiliated unions. The fund was to be used to finance the "counter attack".

The counter attack will include: the co-ordination of union strategy, especially with a view to more effective co-operation in strikes; plans to put Labour's case before the public and to strengthen trade union democracy; organization of labour lobbies, mail campaigns and petitions to fight restrictive legislation; and the canvass of elected representatives to find out their views on restrictive labour legislation.

The publication of a weekly labour newspaper was to be discussed later by the executive, according to an announcement made at the close of the convention by Secretary-Treasurer George Home.

A full-scale investigation of the B.C. Workmen's Compensation Act was urged by J. Edwin Eades, Chairman of the Board, in an address to the delegates. Saying that he considered the present Act outmoded, he stated that the Board "would welcome a proper inquiry, and that is what should be done".

E. E. Boulton, President of the British Columbia Farmers Union, told the convention that Management is trying to drive a "psychological wedge" between farmers and Labour. He said that an attempt is being made to prevent the two "wealth-producing groups" from joining in political action that might result in the election of a worker-farmer government.

He urged the delegates to continue their campaign for a new worker-farmer political arm.

### **Expelled Unions**

The convention refused to support the efforts of some of the delegates to get it to champion the cause of the Communist-dominated unions that have been expelled from the CLC. It did, however, approve a resolution declaring "solidarity with and support of" the members of the Mine-Mill Union who are on strike against International Nickel Co. The resolution also expressed the hope that these workers would accept the CLC's invitation "to again become associated with the legitimate trade union movement in this country".

Demands for reinstatement of the expelled unions came from delegates from the Street Railwaymen's Union, the Marine Workers and Boilermakers, the Pulp and Sulphite Workers, the International Woodworkers, and the Vancouver Firefighters.

—Chas. S. Jones, *Vancouver Daily Province*.

**Delegates to the annual convention of the B.C. Federation of Labour re-elected all their officers. Pictured here, from the left, they are: Secretary George Home, fourth Vice President Pat O'Neal, third Vice President Bob Smeal, second Vice President Victor Midgley, first Vice President Joe Morris, and President Bill Black**

The convention adopted a report of a special committee that declared in favour of the establishment of a plan for automobile insurance by a crown corporation "on the Saskatchewan principle".

By unanimous vote the Federation decided to sue the British Columbia Government over its use of the Civil Defence Act in the Black Ball Ferry dispute. It was reported that in this the Federation will have the full support of the CLC, and that if the case goes to the Supreme Court of Canada the CLC will pay the cost of the action.

If the Government's action went unchallenged the Civil Defence Act could be applied to any labour dispute at any time, Secretary-Treasurer George Home told the delegates. "It is much too dangerous an act for Labour to leave unchallenged," he said.

Member unions of the Federation pledged themselves to raise the \$5,000 estimated to be required for the legal action.

It was decided to intensify the "union buying" campaign and to get the B.C. unions to redouble their efforts in the coming year to make their members more "union label conscious".

Other resolutions approved called for the purchase of the B.C. Electric Company by the Province, pressure to be exerted on the federal Government to get the Canadian National Steamship service restored to the Pacific coast, amendment of the provincial Power Act and Labour Relations Act to guarantee collective bargaining rights to B.C. Power Commission employees, pressure for the recognition of Red China and its admission into the United Nations, and for the CLC to urge Ottawa to work through the United Nations for an end to all atomic and other nuclear tests.

In the election of officers President Bill Black and Secretary-Treasurer George Home won election for a third term by acclamation. Joe Morris, IWA District President, was re-elected first vice president in opposition to W. E. Stewart of the Electrical Workers. Victor Midgley, Victoria Carpenters union, was chosen second vice president without opposition; and Bob Smeal, Canadian Brotherhood of Railway Employees, defeating William Stewart, Marine Workers and Boilermakers, remained third vice president. Pat O'Neal, Pulp, Sulphite and Paper Mill Workers, was re-elected fourth vice president without opposition.

## Manitoba Federation of Labour

A four-point resolution aimed at reducing "the present crisis in unemployment" was adopted by the Manitoba Federation of Labour at its annual convention held in Winnipeg October 17 to 19. The gathering was attended by more than 300 persons.

The resolution called upon the federal and provincial Governments to start a public works program and subsidized low-rental housing projects, to increase trade with all countries and to explore trade possibilities with Communist China, and to enact forthwith a 40-hour work week and press for a 36-hour week.

The resolution said that unemployment is being taken advantage of by "big business" to force unions to reduce their demands, and that "the 'hold the line' policy of the Diefenbaker Government is tantamount to surrender and abdication of responsibility".

Harold Bastable, Railway and Steamship Clerks, opposed the 36-hour week. He said that as a result of short hours union men are holding two jobs. "Some of my own union members work 16 hours a day, eight hours on regular jobs and eight hours in the post office".

A number of delegates objected that the union could not tell a man how many jobs he might hold.

In another resolution the convention wholeheartedly supported "the current strike struggle from coast to coast" and urged organized workers to aid the strikers.

The resolution said that the Canadian Chamber of Commerce, the Canadian Manufacturers' Association and the federal Government had put forward "the false theory" of hold-the-line-on-wages as their answer to the depression. On the contrary the convention asserted that increased purchasing power was one of the most effective weapons against the recession. It also said that wage gains in the last 10 years have lagged far behind the increase in productivity.

In another resolution the Federation was directed to demand a minimum wage of \$1.25 an hour for all sections of Manitoba.

A resolution that urged an amendment to the Workmen's Compensation Act to require an employer held responsible for the original injury of an employee to provide for his maintenance until he was re-employed was sent back to the executive for further study. An amendment to the

Act to include heart and back ailments among the industrial diseases was urged by the convention.

The federation approved a resolution designed to further political action and education. The resolution supported the decision of the Canadian Labour Congress to form a new political party composed of organized labour, the CCF party, and other interested groups.

Secretary-Treasurer Peter McSheffrey, however, said that he was afraid the new national party was heading for a big disappointment, and he urged delegates to get their locals to take part in the movement.

Stanley Knowles, CLC Executive Vice President, said that the national congress hoped to be able to present a full report on the new movement at the 1961 convention.

The rejection of a resolution proposed by Local 254 of the Plumbers and Steamfitters union caused Clint Hornby, business agent of the local, to walk out of the convention. He had told the delegates that the union would withdraw affiliation with the Federation if they voted against the resolution, and after the convention he said that the question of withdrawal would be voted on by the members of the local at their next general meeting. Other locals would probably withdraw from the Federation also, he said.

The resolution read: "That the United Association of Journeymen Plumbers and Steamfitters is recognized as the only organization having complete control of the pipe fitting trade and industry."

Joseph James, Federation President, who described Mr. Hornby's words as "a puny threat," suggested that the matter should be referred to the CLC.

The labour movement "has never been so low in public esteem as it now is," Donald MacDonald, Secretary-Treasurer of the CLC, told the convention in his address at the banquet. "Obviously the corruption in unions publicized in the past year has contributed in large measure to the position we now find ourselves in," he said.

This corruption was being used in propaganda against Labour to discredit the huge majority of honest labour unions. But, he said, the "goons, gangsters and racketeers attaching themselves to Labour number only a few hundred persons in a total of about 17,000,000 labour union members across North America."

## Saskatchewan Federation of Labour

Unemployment and labour legislation were among the most important items on the agenda of the three-day annual convention of the Saskatchewan Federation of Labour, held in Moose Jaw October 23-25.

About 200 delegates, and fraternal delegates from Manitoba, Alberta, and Ontario labour organizations attended. Representatives of the Co-Operative Union of Saskatchewan, the Saskatchewan Farmers' Union, and the Saskatchewan Teachers Federation were also present.

Speakers included Donald MacDonald, Secretary-Treasurer of the Canadian Labour Congress, and Hon. Woodrow S. Lloyd, provincial Minister of Education. The latter was guest speaker at a special United Nations Day banquet.

Labour is being attacked by groups of employers across the country, F. McClelland, President of the Federation, told the delegates at the opening session. He cited the Canadian Manufacturers' Association and the Chamber of Commerce as two groups which were engaged in the attack.

Mr. McClelland said that the "new industrial revolution" brought about by automation has failed to solve economic and social problems in the way that large corporations had predicted it would.

"Where are the great number of highly skilled jobs, where are the lower prices, where are the jobs for everybody?" he asked. He asserted that "the true purpose of this technology in the hands of the large corporations is for nothing less than to cut labour costs, increase profits and beat down trade unions by eliminating jobs."

## Alberta Federation of Labour

The passing of a resolution approving the action of the Canadian Labour Congress in its move to establish a new political movement threatened to split the ranks of the

Alberta Federation of Labour at its annual convention held in Lethbridge October 29 to November 1.

The resolution also urged all AFL affiliates to take an active part in the formation of the proposed new party.

During the two-hour discussion on the resolution, representatives of the Civil Service Association of Alberta, who maintained that they were "working for a government and not a political party," threatened to break away from the Federation if the motion passed. When it did pass they talked of taking legal action against the AFL. "Under the AFL constitution they can't do this," said James Gee, an executive member of the CSAA.

The constitutionality of the resolution was debated at the convention, but objections were overruled.

The delegates passed a resolution to provide for the establishment by the Federation of bursaries for essays on the labour movement and called for efforts by the AFL to have labour education classes established at the University of Alberta.

The convention requested the Alberta Government immediately to set up an unemployment committee, and to include on it a representative of Labour.

Gordon Cushing, Assistant Deputy Minister of the federal Department of Labour, addressed the 252 delegates.

In the election of officers, David L. Erickson, Edmonton, was re-elected President, and Jack Hampson, Edmonton, was re-elected Secretary-Treasurer, both without opposition. Frank C. Bodie, Calgary, was re-elected First Vice-President; William Gray, Edmonton, Second Vice-President. Roy Jamha, Edmonton, was chosen Third Vice-President. Regional vice-presidents elected were: Lindsey King, Henry Tomaschuk, Pat Lenihan, John Hannigan, Leo Lancaster and L. M. Messmer.

---

## Unemployment in U.K. Highest Since May 1952

The number of unemployed in the United Kingdom had risen to 514,000 by mid-October, the British Ministry of Labour reported last month.

The unemployment figure, 38,000 higher than at mid-September, was the highest since May 1952. It represented 2.3 per cent of the working population. This percentage has been exceeded only once, in May 1952, since before the war.

Of the total unemployed, 212,000 had been unemployed for more than eight weeks. This compares with 193,000 in September and 111,000 in October 1957.

---

Unemployment in West Germany reached a new postwar low in September. There were 327,560 jobless persons, 37,500 fewer than at the same time the previous year.

# 29th Annual Meeting of the Canadian Chamber of Commerce

Amended policy declaration on employer-employee relations urges the prohibition of closed or union shop agreements, provision for holding of secret strike votes, banning of picketing during unlawful strikes

The 29th annual meeting of the Canadian Chamber of Commerce, held in Montreal October 6, 7 and 8, adopted recommendations urging prohibition of closed or union shop agreements, provision for secret strike votes, and banning of picketing during unlawful strikes. Close to 700 delegates attended.

At the employer-employee relations session of the meeting, delegates heard three speakers describe industrial relations in the United Kingdom, United States and Australia.

A. C. Ashforth, President of the Toronto-Dominion Bank, was elected President of the Chamber for 1958-59.

## Employer-Employee Relations

The employer-employee relations session presented three speakers and three panelists.

Opening the session, Leonard Hynes of Montreal, Chairman of the Labour Relations Committee of the Canadian Chamber of Commerce, pointed out that committees of several provincial Legislatures were studying their provinces' labour laws, and that the federal Minister of Labour had asked for suggestions for amendment of the Industrial Relations and Disputes Investigation Act. It was in order to learn what other countries were doing about this problem that the Chamber invited speakers from the United Kingdom, and United States and Australia. They were: R. A. Banks, Personnel Director, Imperial Chemical Industries Limited, England; Virgil B. Day, Manager of Union Relations, General Electric Company, New York; and Frank S. Collins, senior consultant, P. A. Management Consultants Ltd., Montreal, a recent arrival from Australia.

The three members of the panel were: R. V. Hicks, QC, of Toronto; Edward Benson, Consolidated Mining and Smelting Co. of Canada Limited, Trail, B.C.; and D. M. Camp, Assistant Vice President, The Bell Telephone Company of Canada, Montreal.

### United Kingdom Experience

R. A. Banks of London, England, Personnel Director, Imperial Chemical Industries Limited, spoke on employer-employee relations in the United Kingdom. He emphasized that his remarks were concerned mostly with employers, because that was what he knew most about.

The essential element of the British system of employer-employee relations, he said, was that it was now based on voluntary agreements with practically no support from the law. In the early days of industry it was assumed that "the scales of justice would be evenly weighted between employers and employees, who were both bound by the ordinary laws of contract conspiracy and restraint of trade". Later, when it was agreed that these laws operated unduly harshly on employees, unions and their action were deliberately freed from certain legal restrictions. This freedom still exists, although the strength of organized labour has greatly increased "and the condition of full employment for which all parties and sections of the community now strive has given them added power".

There are those who believe that in these circumstances certain legal restraints should be put upon the unions in order to keep a proper balance of power. This is a reasonable and logical view to take, and conditions might indeed warrant such action.

On the other hand, I believe that it will be very much better if such action can be avoided... Many of the trade union leaders in our country have shown restraint, wisdom and judgment in the use of their undoubted power, and I am not one of those who would introduce legislation to prevent the possible abuse of power until other methods have failed so badly as to show unmistakable evidence of impending disaster.

Mr. Banks said it had been suggested that prolonged and widespread strikes might wreck his country but records showed that in any of the past five years the maximum time lost through strikes was 3.2 million man-hours and the average time loss was less than 2.5 million man-hours. "About

eight times as many man-hours are lost in Britain as a result of industrial injuries and well over a hundred times as many are lost by sickness," he pointed out.

The time loss is not the only damage from strikes—confidence and co-operation go, too—but the record of the past and the forecast for the future did not seem to him to spell impending doom.

Much more debatable is the argument that though strikes may not ruin the country, inflation arising from excessive wage demands will, he said. No one can agree as to the extent to which wage claims are the main cause of inflation; but it can be agreed that rapid inflation is a bad thing and that excessive wage demands can play a part in speeding it.

If this is so, the next question is: Can legislation effectively curb excessive wage demands? "No doubt a national wage policy with means of enforcing it could be drafted but I am pretty sure that it would not be widely acceptable in the present state of affairs... A great deal must lie in the Government's management of the country's economic system, by adroitly using the powers available to them, however difficult it may be, to steer the ship between recession and inflation."

The Government must also determine the basic facts of the situation and explain and demonstrate them to the country's citizens, he went on. The British Government tried to do this by setting up the Council on Prices, Productivity and Incomes, but "unfortunately there was no co-operation between the Government and the trade unions".

Employers have an equally important job to do in the field of elucidation and education. "It is sometimes forgotten that the unions and their officials at all levels ultimately receive their power and authority from their individual members, so that they are the people whose understanding is needed at least as much as that of the union officials, who in any case often understand these matters well enough."

Mr. Banks pointed out that it was of no use to teach the ordinary man or woman abstract economics, or even national economics, because to capture the student's interest in learning the subject must concern him personally. He suggested that elucidation and education should begin with the company in which the man himself works; but even this subject may not interest him much unless he has a closer link with its prosperity than his basic hourly wage gives him.

A wage system with a financial reward closely related to his personal effort goes some way to stimulate his interest in the

economics of the business. But a further step relating his personal reward directly to the prosperity of his employer and, if possible, giving him a financial stake in the business is one that can create active interest in the company's finances, which can then be developed, by careful and persistent work, into an understanding of what makes the company prosper and how Capital and Labour are intimately connected.

Efforts are being made in Britain to educate all ranks of management and workers in the economic problems facing the employers and the country as a whole. "I hope that these efforts, coupled with wise and skilful management of our affairs by the Government, and restraint on the part of trade union leaders, will work towards a sufficient control of inflation to avoid the need for legislation to control the power of the trade unions," he declared.

Mr. Banks distributed to the audience a paper describing the organization and structure of British unions and industry, and the law and practice relating to industrial disputes.

### United States Experience

"The United States and its various political subdivisions have experimented with almost every form of governmental intervention in industrial disputes. We have tried compulsory arbitration, fact finding, seizure of industrial plants, strike vote provisions, as well as mediation and conciliation. We have also had a taste of *ad hoc* presidential intervention at the federal level and gubernatorial and mayoral intervention at the state and local levels.

"The net effect of all this experimentation leads one to conclude that the less intervention there is, of whatever form, the more satisfactory will be the results to employers, employees and to the community at large," said Virgil B. Day, Manager of Union Relations, General Electric Company, in a paper prepared for the employer-employee relations session. The paper, "Governmental Intervention in Labour Dispute Settlement: the United States Experience," was read by Dr. Herbert Northrup of Mr. Day's staff because Mr. Day, involved in negotiations at the time, was unable to be present.

Turning first to mediation and conciliation, Mr. Day said that the main problem with mediation and conciliation is that "there is too much of it".

There is no question but that a mediator can perform a real task in bringing parties seemingly far apart together, or in putting the settlement process back on the track where it has been apparently derailed. Premature intervention in labour disputes on the part of mediators, however, tends to make some union officials more intransigent.

Too often the mediator arrives just as soon as the initial union demands have been rejected. Then extreme political pressure is placed upon the mediator to transform himself into a vehicle for realization of unrealistic union demands.

It is difficult for the mediator to resist such pressure, Mr. Day pointed out, because his job is to obtain a peaceful settlement; he does not have to live with the settlement, nor to be concerned with the character of the settlement.

"Actually, in many cases peaceful settlement with more realistic terms could be achieved more rapidly if the parties did not know that a governmental mediation agency was available for another phase of the bargaining process." Mr. Day thought mediators would be far more useful, and perform a far greater service, if management refused to permit premature mediation, as is the right of both Management or Labour in the United States.

Turning to strike notices and strike votes, Mr. Day said such notices have been "extremely ineffective" as strike preventives because no actual cooling-off period occurs. Under strike vote legislation, the results have been the same: the union asks for, and receives a bargaining club. "An overwhelming percentage of the employees in an overwhelming percentage of cases invariably vote to strike," he emphasized. The percentage of strikes that actually occur after being authorized is, however, relatively small, he said.

The strike vote becomes a bargaining tactic; but the existence of the vote itself can permit a strike to be called without the employees' having an actual opportunity to vote on the issues themselves. Put another way, the vote is usually taken before bargaining starts, but the authorization permits a strike call even if the results of the bargaining are actually satisfactory to the employees affected.

Here he explained an apparent contradiction between this statement and the experience of his company—on several occasions a significant number of exhortations of their leaders to the contrary—by telling how the company is willing to spend time, energy and talent in communicating with the employees so that they understand the real issues involved. "Strike vote legislation may actually provide a mechanism to increase union bargaining power so long as employers generally shy away from effective presentation of their case to the union electorate."

The U.S. Railway Labor Act is an excellent illustration of how complete governmental intervention severely inhibits collective bargaining without providing

## Officers, 1958-59

A. C. Ashforth, President of the Toronto-Dominion Bank, was elected President of the Canadian Chamber of Commerce at the 1958 annual meeting. He is the first banker to be chosen as the Chamber's chief officer.

Others elected were: W. A. Scammell Case, Executive Vice-President and Secretary-Treasurer, T. McAvity and Sons, Limited, Saint John, N.B., elected First Vice-President; H. G. Love, President of The Voice of the Prairies Limited (Radio Station CFCN), Calgary, named Second Vice-President; and Morgan Reid, Manager of Planning and Public Relations, Simpsons-Sears Ltd., Toronto, chosen Chairman of the Executive Council.

either satisfactory or necessarily effective settlements, Mr. Day then said. He outlined the history of the Act.

The effect of the elaborate procedure of the Railway Labor Act is to make collective bargaining completely perfunctory prior to the emergency board stage, which is probably an "inevitable" development because "it is an easy way out to let someone else make the decision for them". In addition the parties still remain free to act if the Board's recommendation is unsatisfactory.

Because the appointment of fact-finding or emergency boards has not been confined to genuine emergencies, it has become difficult, if not impossible, to rally public opinion behind the settlement, he said.

The attempt to deal with the emergency strike situation through the Taft-Hartley law's provision requiring a 60-day notice for changes in labour-management contracts has resulted in automatic and perfunctory notices, and has probably contributed to the trend towards too early and too much mediation, since the notices are sent to federal and state mediation services. Experience under the Taft-Hartley Act, he added, emphasized what experience under the Railway Labor Act had already demonstrated: fact-finding reports have relatively little effect in mobilizing public sentiment so as to compel settlement of labour disputes unless there is really a grave national emergency affecting the entire country or most of it.

The procedure of the Act calling for a final vote by employees on the employer's last offer is naive, for it is unrealistic to suppose that employees will desert their leaders while bargaining is still going on. Moreover, employees have everything to gain and nothing to lose by rejecting the last offer. They may still accept the last offer later; but they might secure better terms, since the "last offer" may not be the final one.

Turning to *ad hoc* intervention, Mr. Day said such intervention—by the President, governors or mayors—often pressures the

parties into settlements that may be unsatisfactory, uneconomic and difficult to live with. The time to protest, he said, is when such intervention occurs, not when the consequences appear; then it is too late.

Mr. Day concluded by giving some of his company's comments on the permanent panel set up by the U.S. Government, with legislative basis, to handle disputes affecting the American atomic energy program. General Electric was protesting because they were "alarmed" by the fact-finding and recommending powers asserted by the panel, which had no legal basis, and because they feared a spread of this type of interference in day-to-day labour relations. But the comments "pretty well sum up our attitude on government interference in labour disputes," he said.

One of the nine points he quoted was: "We believe that primary reliance in all labour disputes should be placed on genuine collective bargaining in an atmosphere which will encourage and assist the parties to reach their own agreement unimpeded by any extraordinary outside influence, pressures or expectation."

Another expressed favour of a policy of non-intervention by the Government in labour-management disputes, and a belief that such a policy is essential to preserving free and effective collective bargaining.

A third expressed the belief that the preservation of genuine collective bargaining... requires the elimination of any element of compulsory arbitration. "The existence of any high agency with decision-making powers will strongly tend to quickly weaken and eventually destroy genuine collective bargaining."

### Australian Experience

Frank S. Collins of Montreal, an Australian now employed as senior consultant with A. P. Management Consultants Ltd., described industrial relations in Australia.

Most Australian workers, more than 60 per cent of all wage and salary earners, belong to a union, he reported, and "will almost invariably carry out the dictates of the union regardless of how this may hurt their families or themselves". The Australian worker's greatest fear is to be called a "scab".

The high development of trade unionism in Australia is one of the basic facts to be kept in mind, Mr. Collins said. Others are that Australia has a federal government and six state governments, and that the trade union movement has strong political influence.

The speaker then traced the evolution of the Australian system of arbitration and

conciliation, from the enactment of the Commonwealth Conciliation and Arbitration Act in 1904 to the major amendments made to the Act in 1956.

The judicial function concerned with the functioning of the arbitration system are vested in a Commonwealth Industrial Court comprising three judges. The arbitral functions of settling disputes and making awards are vested in a Conciliation Arbitration Commission consisting of presidential members and lay commissioners. The presidential members have equivalent qualifications to judges.

The Commission, which usually comprises two presidential members and one lay commissioner, determines: (a) basic wages (legal minimums), (b) standard hours of work, and (c) long service leave.

Individual commissioners continue to practise conciliation and, if necessary by the failure of the parties to agree, to make awards which are binding on the parties.

A new departure in 1956 was the appointment of conciliators, who have no power to arbitrate unless asked to do so by the parties. If agreement is not reached, the conciliator reports to the commissioner within whose field the matter lies, who then handles the matter as he sees fit. (Commissioners are assigned to a particular industry or group of industries.)

A commissioner is obliged to take the necessary steps to prevent or settle disputes in the industry to which he has been assigned. An employer or union official who foresees a dispute is obliged to notify the commissioner. If the parties reach agreement in negotiations, the commissioner can certify the agreement, which then becomes an award binding on the parties. If they fail to reach agreement, the commissioner has the power to make awards.

"The system appears to be producing good results," Mr. Collins said, "although it must be remembered that the industrial climate has been relatively peaceful over the past two years."

He emphasized that the purpose of the Australian legislation was to provide a means of conciliation to parties locked in dispute, and, if conciliation fails, to provide for arbitration with binding awards.

He also pointed out that acceptance of the benefits and obligations of the arbitration system is not compulsory; the awards are binding only on organizations registered under the appropriate acts. Organizations are free to decide whether to register or not.

Another common misapprehension is that collective bargaining is not possible in Australia. Unregistered organizations can only proceed by bargaining, while many registered bodies proceed by direct negotiation as far as possible but use the courts to deal with unsettled matters and give legality to agreements by incorporating them in awards.

There appears to be a tendency, Mr. Collins said, for the more powerful unions to favour direct negotiations but the weaker unions rely exclusively on arbitration.

The fact that the great majority of organizations favour the use of arbitration is probably the best answer that can be given to critics of the system, he said. In spite of many criticisms, the system is more firmly entrenched than ever before.

"Compulsory arbitration is a plank in the platform of all the major political parties in Australia."

Mr. Collins spoke briefly about strikes in Australia, remarking that their incidence is falling despite a great increase in the labour force.

The Industrial Court frequently withholds its power to impose penalties against unions

for strike action in defiance of the Court's orders; thus strikes occur that, technically, are not possible. But lockouts are regarded by the community at large as being "most anti-social" and managements are not prepared to resort to this method of settling disputes, Mr. Collins said.

Although organized labour seems to have the best of two worlds, this is not so because the unions have been disciplined into realizing that it is not enough to demand more money every year and to strike if they do not get it; "they must build up a case acceptable to the learned gentlemen, proving not only that they need more money but also that industry can afford to pay."

"I think that I would be sorry to see the system go," he concluded.

## Other Speakers

### President's Address

"When management and union leaders cannot reach an agreement, and disregard their community responsibilities, it is right and just that our governments provide adequate legal machinery to protect the rights of the employee, the employer and the public," said Ralph C. Pybus, outgoing President of the Chamber, in his address to the annual meeting.

This was his personal belief, he stressed, pointing out that there was yet no general agreement in the Chamber of Commerce as to the need and value of binding arbitration.

He explained that in saying this he was thinking in terms of "permanent, specialized industrial boards with qualified advisors to assist the presiding judge".

Later he agreed that good industrial relations cannot be created by legislation but, he said, it is recognized that some legislation is needed in this field to meet changing conditions.

Earlier in his address he denied that business leaders were planning to break unions. In his travels across the country, he said, he had found "a genuine desire and a belief that our labour unions will remain with us and, accepting a fair share of the responsibilities, still become a strong bulwark of our democracy".

He did find, however, "growing, deep apprehension as to where a small but dominant and strong union leadership" may lead the country.

So long as business leaders and the leaders of organized labour fail to come to agreement on basic economic principles and on our common need, then the strike and the discord which plagues the relations between manage-

ment and union leaders at the expense of the economic welfare of the whole country will continue.

After a reference to Canada's trading position, during which he said the country's wealth depends on our capacity to produce and our ability to sell, he urged restraint of "unrealistic" wage demands.

The desire for more is a worthy incentive; but it must be in keeping with the size of the pie, our economic well-being. When wages increase at a faster rate than the increase of productivity, the result is increasing costs and higher consumer prices, showing a loss in the purchasing value of our dollar.

He acknowledged that excessive profits are just as damaging as unrealistic wages and high taxes, but quoted Dominion Bureau of Statistics reports that during the past 10 years average profits had dropped from 3.7 to 3.1 per cent of sales and were still decreasing.

"Efficient production is the key to our continuing prosperity, and our defence against the cost-price squeeze," he went on. This will require, he declared, co-operation between labour leaders and management.

Commenting favourably on the introduction of a Canadian Bill of Rights, Mr. Pybus pointed out, however, that the draft bill did not mention freedom to work, and economic freedom. "I believe there is a widespread and growing demand for freedom to work or, as one may choose, not to work, and that it must not be subject to the dictates of big government, big business or big unions," he declared.

### A. E. Grauer

Speaking during a symposium on freedom, A. E. Grauer, President and Chairman of the British Columbia Power Corporation

Limited, suggested that the duties and responsibilities of unions should be clearly laid down by the law.

"The development of freedom is directly associated with the ability of scientific, professional, business and occupational groups to rise above their limitations, selfish and otherwise," he said, "and to try to understand and do something about the broad problems that threaten both our freedom and our civilization."

This dilemma was pointed up clearly today in the field of trade unionism, he went on. "Unions historically have done great things; but they have now become powerful organizations capable also of great harm, not only to citizens generally but also to their own members."

"One would expect appropriate duties and responsibilities for such organizations

to be clearly laid down by the law—which they are not—as well as their rights and privileges—which are."

Mr. Grauer said he hoped action by trade unions themselves would be such as to keep legislation by governments to a minimum. "In view of the complexity and importance of the trade union situation, however, it is probable that some basic definition of the responsibilities of trade unions will be necessary by statute, as well as some protection for the individual liberties of rank and file members."

Because no type of organization in our society would suffer more from an eclipse of freedom than trade unions, it was very much in their interest to take immediate action to protect and further the cause of freedom, "including the preservation of individual rights within the functional field of organized labour," he declared.

## Policy Declarations

### Employer-Employee Relations

Prohibition of closed and union shop agreements, compulsory registration of unions, provision for requesting secret strike authorization ballots and for ordering strike settlement ballots, and prohibition of picketing when a strike is illegal were urged by the Chamber in its policy declaration on employer-employee relations adopted at the 1958 annual meeting.

The Chamber urged:

—That there should be a prohibition of agreements that deny or terminate employment because of an individual not being or remaining a member of a specified trade union or because of an individual not paying dues to a specified trade union.

—That the Industrial Relations and Disputes Investigation Act be amended to make it mandatory, as a condition of certification, that unions register with the Department of Labour and comply with similar conditions, insofar as reporting is concerned, as companies incorporated under the Companies Act.

—That before a strike takes place the parties have had an opportunity to request a secret strike ballot supervised by an independent party, and in such a case the strike has been authorized by a majority of those employees then actively employed in the bargaining unit.

—That when a strike has been in effect for some specified time, the appropriate Minister of the Crown have discretionary authority to order strike settlement votes by secret ballot on his own initiative or following application by employees, the employer or the bargaining agent concerned to ensure that an employer's offer is impartially placed before the employees, such vote to be conducted by an independent party.

—That there be a prohibition of any picketing when strike action is unlawful.

The Chamber added two new paragraphs to its policy declaration on employer-employee relations. One expressed the belief that judges should continue to be appointed as chairmen of conciliation boards.

The other declared that recourse to the courts should be available for testing the decision of labour relations boards. Judicial review of awards of arbitrators of disputes under collective agreements is also urgently needed, it added.

Furthermore, there should be a procedure for appeal to the courts on matters of law and jurisdiction arising from decisions of labour relations boards and from awards of arbitrators of disputes under collective agreements, the declaration said.

### Other Declarations

The Chamber left unchanged its policy declarations on automation, employment of the older worker, employment of the physically handicapped, and seasonal unemployment.

The declaration on automation states that failure to harness its advantages to improve productivity would prove fatal to the competitive position of many Canadian industries, urges that immediate attention be given to the training of engineers and technicians, and expresses the belief that the utilization of automation will be gradual, so that adequate arrangements can be made for the retraining or redeployment of the work force.

On the employment of the older worker, the Chamber continues to urge employers to recognize the skill and experience of older workers and to consider the suitable employment of this group.

The Chamber declares its belief that the employment of the physically handicapped to the greatest extent possible is socially and economically desirable. "Many jobs do not require the full capacities of an able-bodied person," it says. "If a handicapped person still has the required capabilities, he is not handicapped in that particular job." Employers are urged to continue to co-operate in the placing of the handicapped in suitable jobs; those

employers who have not already done so are urged to investigate the possibilities of employing physically handicapped persons.

The declaration on seasonal employment contains the Chamber's pledge of co-operation in efforts to solve "this national problem". It urges its members to plan their work as far as practicable to give employment during any seasonal unemployment period, and to co-operate with local agencies in the development of plans to combat seasonal unemployment.

## 90th Annual Conference of British Trades Union Congress

**Almost 1,000 delegates representing more than eight million members reaffirm opposition to wage restraint and Government's economic policy, confirm belief in nationalization, and call for meeting on disarmament**

The 90th annual Trades Union Congress was held at Bournemouth September 1 to 5. The presiding officer was Tom Yates, CBE, Chairman of the General Council.

Delegates numbered 993, representing 185 unions with a total membership of 8,337,325, of which about 1,387,200 are female members. TUC membership in 1958 was about 32,600 greater than a year earlier.

Robert Willis, General Secretary of the London Typographical Society, was elected Chairman of the General Council for the coming year.

In a convention that made few momentous decisions, the delegates unanimously reaffirmed opposition to wage restraint and to the Government's economic policy, and again confirmed their belief in nationalization.

The Congress called for efforts to bring heads of governments together to secure agreement on stopping the testing and manufacture of nuclear weapons and on disarmament. But it rejected a resolution urging that Britain halt the development of such weapons and their stockpiling for use from British bases.

A resolution adopted without dissent supported a policy of trade with all nations and a removal of embargoes against the Soviet Union and Red China.

### Chairman's Address

Communists, unofficial strikers, employers who do not understand what consultation means, unsympathetic critics of unions, and the British Government were censured by Tom Yates, TUC Chairman, in his presi-

dential address to the congress. Mr. Yates, who is General Secretary of the National Union of Seamen, also criticized operators of ships flying "flags of convenience".

Mr. Yates, who was TUC fraternal delegate to the 1955 convention of the Trades and Labour Congress of Canada, was the first seaman to preside at a Trades Union Congress in its 90-year history.

Communists and unofficial strikers were condemned in the same breath by Mr. Yates.

There are those among us who like to make up their own rules as they go along. When it suits them they ignore the leadership which they have helped to elect and they thrust aside constitutional procedures on which the whole membership has agreed. Through promoting unofficial action they bring the movement into disrepute and sap the strength of the organization to which they give nominal allegiance. All of us condemn breakaway bodies but I can see no moral or practical difference between those who run away from their own trade unions to set up a splinter body and those who strike against the advice of their own organizations.

No one but the Trade Union Movement itself can tackle the question of unofficial stoppages. Only those of us who have faith in democratic procedure with its obligations of solidarity and its respect for elected and responsible leadership can tackle these bad shipmates and discipline them, as they should be disciplined, in accordance with union rules. We know who they are. Some are Communists dedicated to disruption; others are self-styled militants whose minds are so closed that the whole development of collective bargaining has passed them by.

Big unofficial disputes damage more than the good name of trade unionism and the union which they directly affect. They frequently have a material impact far wider than the industry in which they take place.

**Tom Yates**

Often, as my union (Seamen) knows to its cost, they bring hardship to many who want no part in a false quarrel.

After all these years it is a sad commentary on the state of our movement that we should still have to suffer for the activities of those whose fitness to be trade unionists is clearly open to doubt every time they take and prolong unofficial action.

It was only a little less disturbing that unions should still have to turn to the strike weapon at all, he continued. There should never be a situation where a deadlock has to turn into a lockout or a withdrawal of labour.

He made it clear, however, that it was unthinkable that unions should ever give up the right to strike.

Just before this Mr. Yates warned against the use of trade union strength for the purpose of political coercion. "As trade unionists we may always have special interest to advance; but in doing so we have no special rights that exceed those we all have as citizens."

The TUC Chairman then criticized recent actions of employers and the Government. "If unions are expected to negotiate," he said, "then it must be made possible for them to do so. Collective bargaining will never function effectively without the sincere concern of employers that it shall, and the determination of government to provide the climate in which it may.

"It is no way to negotiate to say in advance that there will be no wage increase."

As self-governing voluntary bodies it was natural for unions to resent inference by "those who know little of our affairs, who

share no common purpose, and may well want to restrict our activities," he said. "All too often, criticism of trade unionism is neither objective nor informed nor inspired by a wish to help.

"It nonetheless remains an obligation on us all never to do anything that is unworthy of the fine traditions of trade unionism," he pointed out.

It was while referring to technological change that Mr. Yates criticized employers' failure to make use of conciliation. "We have called and called again for early consultation (on the introduction of a new technique); we still have not dented the consciousness of some employers."

The TUC Chairman said it was easy to pass resolutions about peace and to call for campaigns to denounce nuclear weapons; they may help to call attention to the dangers we face. "But when it comes to negotiating, slogans and catch-phrases must never blind us to the stark fact that it is no good throwing away all our nuclear weapons or abandoning essential alliances if we are to leave in the hands of any single power or group of powers a tremendous preponderance of offensive weapons of any kind," he warned.

"Disarmament can only be achieved if it starts with an objective appraisal of the relative strengths of the armed forces in the world today and continues with a measured and comparable reduction of weapons by everyone.

"The relaxation of tension, if it is to mean anything permanent, can only come about by a sustained and painstaking determination on the part of all nations and within the framework of the United Nations."

Mr. Yates began his address by referring to the growth of "flags of convenience". Ships under "bogus flags" had increased by 15 million tons in the last 10 years, he said.

"This is a development that cannot just be shrugged off as a postwar phenomenon which will sort itself out in the long run. It threatens the livelihood of all those who sail in British ships and in the ships of other traditional maritime countries. It threatens also the economic well being of these countries..."

### **General Council's Report**

Opposition to the Government's economic policy is the central theme of the annual report of the TUC General Council.

As a means of regulating the economy, the Council prefers fiscal and direct controls—including control of credit—to monetary controls. On the working of monetary controls, the report expresses the view that, both in Britain and in other industrial

countries, "the emphasis that is being laid upon the desirability of stabilizing prices is endangering the maintenance of high levels of employment and output".

The TUC's economic objectives are listed as: full employment, a rapid rate of economic progress, reasonable stability of prices, and a balance of payments sufficient to meet overseas commitments and provide adequate reserves.

The report also notes that the TUC, in talks with the Government on draft regulations governing protection against radiation risks, has emphasized the need for safety instructors to be fully qualified in the problems raised by radiation, and for the most careful recording of all exposure to radiation.

The TUC has also supported the Government's campaign to improve first aid in factories, urging more medical and nursing supervision in industrial plants and pressing for more operational research and health surveys of dust and fume risks in foundries, the Council reports.

### Economic Policy

Delegates unanimously reaffirmed their opposition to wage restraint and the Government's economic policy.

Alan Birch, chairman of the General Council's economic committee, opened the debate with the charge that the Government had abandoned the principle of full employment, with the result that since the 1957 congress unemployment had grown and industrial relations had worsened.

One resolution, unanimously adopted, condemned the Government for failing to maintain full employment, and insisted on government measures to reverse current trends and to provide alternative employment for those out of work. It also called for an expansionist economic policy and a high level of investment.

Another resolution, also unanimously approved, expressed the TUC's lack of confidence in the approach to national economic problems made by the Council on Prices, Productivity and Incomes (L.G., May, p. 481; Nov., p. 1253) and instructed the General Council to prepare a report on the economic condition of the nation recognizing the need for maintaining full employment and for improving living standards.

Also adopted was a resolution supporting a policy of trade with all nations and the removal of embargoes on trade with the Soviet Union, China and other such countries.

### Robert Willis

The new Chairman of the TUC General Council, and thus leader of Britain's eight and a half million trade unionists, is Robert Willis, General Secretary of the London Typographical Society, one of the smaller unions in the TUC. He has been a member of the Council for 10 years.

He has the reputation of being a vigorous and aggressive trade unionist and in the past has been regarded as something of a rebel. He is considered one of the ablest speakers on the Council.

Born 54 years ago, he joined the London Society of Compositors in 1930 and became General Secretary in 1945. He took a leading part in the Society's amalgamation with the Printing Machine Managers' Trade Society in 1955 that formed the organization of which he is now General Secretary. From 1938 to 1945 he was Secretary of the London Trades Council, and since 1952 its Chairman.

On several occasions he has been an adviser to the British Worker Delegates to International Labour Conferences.

### Nationalization

The TUC has re-affirmed its belief in nationalization. But it failed to adopt three resolutions urging the next Labour government to nationalize specific industries.

The convention adopted a resolution declaring "the urgent necessity for the nationalization of Britain's basic industries with priority for the key sections of the engineering industry and the renationalization of the iron and steel industry and that part of the road transport industry returned to private ownership".

Another resolution adopted expressed concern at the nature of many of the appointments to the boards of nationalized industries. It declared that only those with a belief in the "necessity and value" of nationalized industry should be appointed to boards of nationalized industries.

A resolution calling on the next Labour government to nationalize the whole of the port transport and shipping industry was withdrawn. Another demanding state ownership of the tobacco industry was heavily defeated. And a third calling for the nationalization of the building industry was remitted to the General Council.

Unanimously adopted was a resolution declaring that wages and salaries in nationalized industries and public services must compare favourably with those in industry generally.

Two composite resolutions on nuclear weapons and disarmament were discussed in the same debate.

The first called on the trade union movement, in co-operation with the Labour Party, to press the Government to take the

lead in bringing about the meeting of heads of main governments to secure agreement on stopping the testing and manufacture of nuclear weapons and on disarmament and the maintenance of peace.

The second viewed with concern the danger of continued development of instruments of mass destruction, the stockpiling of nuclear weapons and their constant immediate availability for use by patrolling aircraft. The existence of bases in Britain from which these weapons might be launched, it went on, represents a serious threat to the security of the British people and an obstacle to world peace. The motion called for the redirection of the world's resources towards social and economic betterment, and urged opposition to British manufacture of nuclear weapons and their use from British territory by any other power.

The first resolution was adopted, the second heavily defeated.

Sir Alfred Roberts, chairman of the TUC international committee, speaking for the General Council, recommended support of the first motion, because it was in line with the policy statement, but rejection of the second, because it did not support the policy statement. The motions, far from being complementary, were completely incompatible with each other, he said.

Both the TUC and the Labour Party were agreed on the horrors of nuclear war. "But how is unilateral disarmament going to prevent the dangers falling on us?" he asked.

A resolution that called for drastic curtailment of military expenditure was defeated. It held that such expenditure was largely responsible for inflation, for the curtailment of social services, and postponement of construction of roads, hospitals and schools.

In the debate, Sir Alfred Roberts said that any drastic reduction in the defence program would have a considerable impact on unemployment.

### Meeting with WFTU

By a huge majority, a resolution proposing that the International Confederation of Free Trade Unions and the World Federation of Trade Unions "should meet to consider the possibility of common action" was defeated.

Sir Vincent Tewson, TUC General Secretary, opposed the motion because affiliates of the WFTU were not free to formulate their own decisions. "They are slaves of their own governments," he said, pointing out that the free labour movement formulated its own policies and could "play old Harry" with their governments.

He remarked that such a resolution had been submitted at many past congresses except last year's, presumably because of the events in Hungary. Apparently this year the resolution's sponsors had overlooked "the revulsion of feeling in the movement over the execution of Imre Nagy," he said.

The reactions of the WFTU and the ICFTU to the Hungarian revolution provided an example of their differences in policy.

### Racial Clashes

During the week the TUC was meeting, racial clashes occurred in London and Nottingham. The General Council prepared a statement on the outbreaks, which the delegates approved unanimously.

The statement emphasized that it was the duty of all trade unionists and other responsible citizens to help in preventing recurrences of "such disorderly and dangerous demonstrations". It accused elements that had propagated racial hatred in Britain before the war of "once more fanning the flames of violence".

The statement then called on the authorities to deal with the rioters in an exemplary way and to seek out those inciting the disturbances and act against them "with the full severity of the law".

Trade unionists were urged to strive to ensure that all who live and work in Britain understand the rights and observe the obligations of citizenship. "Here is a field in which joint efforts in local communities can do so much to further tolerance and an appreciation of the difficult problems which are involved," the Council said.

"The trade union movement has been forthright in its condemnation of every manifestation of racial prejudice and discrimination in any part of the world," the statement pointed out.

### Radiation Risks

In any establishment in which radiation hazards exist, the employer should be obliged by law to conform to an effective safety code, declared a resolution that was adopted unanimously. It also requested the TUC General Council to continue its efforts to obtain maximum protection for workers in such plants.

At present an employer using radioactive materials cannot be prosecuted for disregarding safety regulations because there are none, said the mover of the resolution. He suggested that one department of the Government, preferably the Ministry of Labour, should be responsible for all forms of radiation protection, and that a central

records office be established to which "exposure" details of workers changing jobs could be sent.

John Boyd of the Amalgamated Engineering Union, who is Chairman of the National Joint Council of the atomic energy industry, said that although the industry did not operate under regulations, there was a code whose standards were so high that visitors from other countries had expressed surprise at the high safety standards established.

### **Welfare**

The Congress adopted resolutions calling for:

—An increase in retirement and widows' pensions.

—Negotiation by affiliated unions of adequate pensions. Unions should examine critically the existing pension arrangements of their members, with special reference to the need for transferability of pensions, this resolution urged.

—Withdrawal of all charges on doctors' prescriptions and an increase in the government grant to the National Health Service.

—Provisions of sufficient funds for building new hospitals and improving and enlarging existing ones.

### **Joint Strike Fund**

Urging the TUC General Council to consider the possibility of a policy to protect unions from "the offensives of the present Government," a resolution, which was defeated, proposed a levy on union members to establish a "fighting fund" under the Council's control from which strikes "deliberately provoked by governmental policy" could be financed.

Defeat for the motion came after an 82-year-old delegate, J. H. Wigglesworth of the Iron, Steel and Metal Dressers' Trade Society, asked who was to judge whether the Government was the deciding factor in a strike, and reminded the delegates of the existence for the past 59 years of a strike fund to which 40 TUC affiliates still belonged.

### **Co-ordination of Policies**

Without debate, a resolution was adopted asking the General Council to consider how to bring about greater co-ordination of the policies and activities of affiliated unions, and to report to next year's congress.

The resolution expressed grave concern at the failure of the movement fully to apply to recommendations of previous congresses designed to promote closer unity, federation and amalgamation between unions, and pointed to recent examples of action by unions in isolation from other unions directly concerned. (The 1957 congress defeated a resolution aimed at amalgamating the 184 TUC affiliates into 30 large unions (L.G., Oct. 1957, p. 1197).)

The method of co-ordination suggested was to resuscitate and revise the committees of representatives of related industries, which are provided for in the rules and which are set up every year but which never meet.

The mover of the resolution, John Horner, General Secretary of the Fire Brigades Union, pointed out that in recent years wage negotiations have become more and more inter-related, and that decisions in one industry had a close and direct bearing on other industries.

---

## **Compulsory Arbitration Ends in UK**

**Government revokes Industrial Disputes Order that created independent tribunal before which either party could take disputes for arbitration and whose awards were legally binding on both parties. TUC protests**

Compulsory arbitration in industrial disputes in Britain is to end on March 1, 1959.

The Minister of Labour and National Service has announced that the Government will revoke the Industrial Disputes Order under which more than 1,000 legally-binding awards on pay and working conditions have been made in the past seven years affecting some 12,000,000 workers.

The Order will not apply in respect of any dispute not reported to the Minister of Labour and National Service before December 10, 1958.

This step does not alter such arrangements for voluntary arbitration as exist in a number of industries like coal mining and the railways. In all, some 10,000,000 workers not covered by the Order remain unaffected. They include employees in the various Government services, with their own highly-developed negotiating machinery, and in industries covered by Wages Councils whose decisions on pay and working conditions, once officially confirmed, have the law behind them.

Another form of voluntary arbitration still available is through the Industrial Court, a permanent tribunal independent of the Government whose decisions are not binding, but both parties must assent before a dispute goes before it. Furthermore, in disputes, the conciliation services of the Ministry of Labour are still available to both sides and the Minister has power, where he so decides, to set up a Court of Inquiry or a Committee of Investigation to find out the facts and report with a view to promoting a settlement. These Courts are regarded as a last resort and are infrequently appointed. Their reports do not bind the parties but must be tabled in Parliament; the ensuring publicity can have a marked effect in the settlement of the dispute.

The independent tribunal that the Industrial Disputes Order created replaced an earlier body, which came into being in 1940 and continued for 11 years. This previous tribunal was part of an emergency arrangement during the Second World War under which strikes and lockouts became illegal and which introduced compulsory arbitration into British industry.

Talks with both the Trades Union Congress and the British Employers' Confederation led to a revision of this wartime Order in 1951. The new Order lifted the ban on strikes and lockouts and modified the arrangements for compulsory arbitration. But the change was not made a law; it remained an administrative measure under the Defence Regulations. For seven years the Industrial Disputes Order has allowed either party to take the other to arbitration without its assent. And the tribunal's award has legally bound both the employers and the workers concerned.

The Order has, however, operated only under certain conditions. First, the party which referred the dispute to the Minister had either to take part "habitually" in the settlement of wages and working conditions or to organize a substantial proportion of the workers or employers in the industry. Secondly, to ensure that available collective bargaining machinery was fully used, the Minister could refer the dispute to the tribunal only after he was satisfied that all other practicable ways of finding a solution had been tried.

Another important feature of the Order has been its offer of an avenue for a trade union or an employers' organization which "habitually" has been a party to settling pay and working conditions, to take an "issue" before the tribunal.

Such an issue could arise when a union reported an employer who was not honouring the recognized wage levels or other conditions of employment in the industry. By an award the tribunal could legally oblige him to do so.

The recent decision to end the Order arose from a Government wish to wind up the Defence Regulations under which it was made.

Asked by the Ministry of Labour for their views on the future of the Order, the TUC said that they would like its provisions embodied in legislation. While the Order was not perfect, it had worked well for seven years and the facilities it provided should not be dismantled. In September the 1958 Congress added its unanimous weight to these views by calling for the appropriate legislation.

The British Employers' Confederation did not agree with the TUC. Their view was that arbitration on the model of the Order should be open only to those industries where both sides agree in advance to contract into it. Such an agreement would, it was thought, put both parties under a moral obligation to honour the findings.

Last January talks at the Ministry of Labour failed to find a bridge between these different opinions. In face of this disagreement between the two sides the Minister had to take his decision.

In deciding to end the Order, the Minister acted on the grounds that it was out of keeping with the voluntary spirit of industrial relations in Britain to use, in normal times, a method by which one or other party could be coerced by law. Further, it had become plain that compulsory arbitration in its present form had features which did not command the support of many employers, and it had been understood at the outset in 1951 that the Order was an experiment to be reviewed at any time.

Protesting the Minister's decision, the TUC declared that, while trade unions always prefer joint agreement through collective bargaining and that while the vast majority of differences between managements and workers about wages were settled in this way, there is at times a need for arbitration; and, in the TUC's view, the Industrial Disputes Tribunal provided a method of arbitration which has given wide satisfaction for a long period, contributing much to industrial peace.

A particular feature of the Minister's decision which drew the fire of the TUC was the loss of machinery to deal with "issues". It said: "The TUC consider there were only minor differences between the

# Successful Rehabilitation—XIII

Thirteenth in series of articles on success in rehabilitation achieved through the precise matching of the handicapped person to the job

*This is the thirteenth in a series of articles illustrating that community co-operation in the treatment, training, guidance and placement of a disabled person can often enable him to meet all the essential requirements of a job. It was written by A. L. S. Ireton of the Public Relations Branch of the Unemployment Insurance Commission from material supplied by the Commission's Quebec Regional Office.*

Can a person who has undergone electro-shock treatment for severe mental depression be successfully re-employed within a short time after completion of the treatment? Yes—if the re-employment takes place under the proper circumstances and if the person has the benefit of proper guidance.

Here is an example of what can be and has been done in a case of this kind. Joan, 20 years old, completed high school and then attended a commercial school, from which she received a diploma. She went to work as a secretary with a large manufacturing firm; but her real interest was in hospital work. She registered at a general hospital as a student, with the aim of becoming an X-ray technician.

At the end of a year of work and study she was completely exhausted and the victim of severe mental depression. Her physician recommended that she undergo electro-shock therapy. The results of this treatment were so satisfactory that a few months later Joan decided to put her recovery to the test and visited her local National Employment Office.

She informed the general placement officer that she was unemployed following a nervous breakdown. As a result of this information the Special Placement Officer was called in and rehabilitation counselling was begun at once. Joan was still receiving psycho-therapeutic treatment, although the treatments were relatively infrequent. The Special Placement Officer was kept informed of these treatments and the progress that Joan was making.

The Special Placement Officer dissuaded Joan from pursuing her career of hospital work but recommended instead employment in a suitable environment that involved regular hours. This met with the complete approval of her physician.

While Joan could still perform office work she did complain of a certain inability to

concentrate and a lack of mental alertness as a result of the electro-shock therapy. This condition caused her considerable distress but fortunately showed steady improvement.

Joan's problem was further complicated by the fact that her father was an invalid and totally blind. She needed some sort of income to enable her to contribute to the support of her family.

Joan was first referred to part-time employment with a small manufacturer but the earnings were insufficient for her needs. She tried a Civil Service examination for employment as a typist. She passed the examination but no vacancies were immediately available.

While visiting an employer an officer of the National Employment Service was informed of a vacancy for an order clerk in a large departmental postal order office. When the personnel manager, who strangely enough was herself physically handicapped, was informed of Joan's case she agreed at once to interview her. She was impressed with Joan's sincerity, personality and qualifications and hired her immediately.

Joan is now happily and gainfully employed, a result that was achieved by her own determination, wise counselling on the part of the Special Placement Officer, and sympathetic understanding on the part of the employer.

When the National Employment Service was established by the Unemployment Insurance Act of 1940, a Handicapped Section of the Special Placements Division was set up to provide special employment assistance to physically disabled workers. It was created for the express purpose of rehabilitating into employment those disabled persons capable of working but who, because of their physical, mental or emotional handicaps, might otherwise remain on the fringe of the employment market. The Section's special placement officers concentrate their efforts on, in the words of the manual of instructions, persons who, on account of injury or disease of a character which is likely to last more than six months, or on account of congenital conditions, are substantially handicapped in obtaining or keeping employment of a kind generally suited to their age, previous experience and qualifications.

## Second Atlantic Region Workshop

More than 80 persons attend five-day conference on rehabilitation  
Construction begins on Rehabilitation Institute of Montreal. For sixth  
year in a row, Montreal holds "Employ the Handicapped Week"

The Second Atlantic Region Workshop on Rehabilitation of Disabled Persons was held on Prince Edward Island in October. More than 80 persons, representing various groups working in rehabilitation in Canada, attended the five-day conference.

Among the speakers who addressed the meeting were: L. T. Hancock, Principal of the Maritime School of Social Work; Dr. Dugald S. Arbuckle, professor at the School of Education, Boston University; and Dr. Gustave Gingras, Medical Director of the University of Montreal School of Rehabilitation and Executive Director of the Rehabilitation Institute of Montreal.

Three consecutive sessions on interviewing and counselling were conducted by Mr. Hancock and three lectures on vocational guidance and counselling were given by Dr. Arbuckle. Dr. Gingras addressed a dinner attended by the Workshop participants and members of Prince Edward Island's medical profession.

Conference delegates took part in two discussions entitled "The Place of the Handicapped in the Labour Force" and "The Employer and the Disabled". A panel discussion, "The Placement of the Handicapped," was also held, with Ian Campbell, National Co-ordinator of Civilian Rehabilitation, acting as moderator.

The Workshop concluded with an open discussion on "More Effective Rehabilitation Services in the Atlantic Provinces". Noel Meilleur, Assistant Co-ordinator of Civilian Rehabilitation, acted as moderator.

\* \* \*

Work at the site of the rehabilitation centre, hospital and headquarters of the Rehabilitation Institute of Montreal has been started.

The new building has been designed to include a six-storey section providing for 111 beds for patients requiring convalescent treatment or hospitalization.

The building will also include a swimming pool and treatment baths, and facilities for physiotherapy, occupational therapy, speech therapy, psychological treatments and other phases of rehabilitation.

At present the Rehabilitation Institute occupies two floors of the Montreal Convalescent Hospital.

Special efforts to interest Montreal employers in hiring handicapped persons were made during the week of October 5 to 11 by the National Employment Service and the Montreal Council for the Guidance of the Handicapped.

George P. Reid, Manager of the Montreal metropolitan NES office, said the aim of the campaign was to convince employers of the fine and varied work that the handicapped can do. A handicap is no barrier to employment as long as the NES can find the type of work they can do, he said.

He reported that some 2,500 disabled persons found jobs last year, but pointed out that this was far from the peak reached in 1956, when 6,000 were placed.

This was the sixth year an "Employ the Handicapped Week" has been held in Montreal. Sixteen other centres in the province held similar campaigns this year.

\* \* \*

### Around the Provinces

Because of the reduction in the incidence of polio, the Canadian Foundation for Poliomyelitis is making its rehabilitation services available to all disabled persons in need of them, the Foundation has announced.

The University of British Columbia's College of Education has opened the first school in Canada for teachers of handicapped children. Prof. J. A. Richardson, former Deputy Director of the Remedial Education Centre at the University of Queensland, Australia, has been appointed to head the new school. The new department is offering three courses, and will co-operate with the University's Faculty of Medicine at the rehabilitation centre at the Vancouver General Hospital.

The Ontario Workmen's Compensation Board Hospital and Rehabilitation Centre at Downsview was officially opened on October 29. The new buildings have been in use since July 1 (L.G., July, p. 715).

W. E. Milton has been appointed Superintendent for the Quebec Division of the Canadian National Institute for the Blind.

# Women's Exhibition in Switzerland

Two-month exhibition devoted to life and activities of Swiss women illustrates her place in her country's economy. Employers and unions co-operate in preparation of largest pavilion, "In Praise of Work"

An exhibition devoted to the life and activities of Swiss women was held in Zurich from July 17 to September 15.

The theme of the exhibition was the place of the Swiss woman in the economy of her country. Exhibits showed her activities and responsibilities in the family as well as in public life, her ideas on her position and her aspirations towards achievement of political rights. The Alliance of Swiss Women's Societies initiated the plan for the exhibition, which was organized by a committee representing all Swiss women's organizations. The chief architect, Mme. Annamarie Hubacher of Zurich, was assisted by 22 other women architects and 22 women designers and commercial artists.

One of the most colourful exhibits was the "House of the Cantons" containing displays revealing the characteristics, indus-

tries, handwork, arts and customs of the 22 Swiss cantons.

"In Praise of Work," the largest pavilion, showed women's many occupations and their importance to the country. Public authorities, employers and trade unions co-operated in the preparation of this section. Showings were given here of a documentary film financed by the Swiss Federation of Trades Unions on Swiss women's vocational and professional work.

Among the other exhibits were "Women and Money," which included a replica of a Swiss bank whose President is a woman; "Parents and Children," "Health and Medical Development," "Beaux Arts," "In Service of the Nation" and "The Ideal Home," as well as exhibits of fashions and food.

Daily programs of lectures, concerts, films, dances and special entertainments contributed to the liveliness and colour of this unique exhibition.

## Canadian Woman Elected to Executive Of International Bookbinders Union

Mrs. Betty Whittaker, President of Local 28 (Toronto) of the International Brotherhood of Bookbinders, was elected 6th Vice-president of the Brotherhood at this year's convention. She was the only Canadian running for office.

Mrs. Whittaker, a member of Local 28 for more than 12 years, is also Vice-president of the Ontario Federation of Printing Trades Unions and Secretary-Treasurer of the Ontario Bookbinders Council.

Women are at present eligible to run only for the offices of 2nd to 6th Vice-president in the International Brotherhood of Bookbinders. However, a resolution calling for the right of women members to run for the three top offices—President, Secretary-Treasurer and 1st Vice-president—was referred to the executive council by the international convention held in Montreal in July 1958. A report on this resolution will be made at the next convention.

**A model of the nine-storey building built especially for the Swiss Women's Exposition at Zurich this past summer**

## 50 Years Ago This Month

Strict supervision of immigration did much to curtail inconvenience resulting from over-supply of labour in 1908. That autumn, employment outlook was not good but greater activity predicted for spring of 1909

"The strict supervision of immigration by the Dominion Government has done much to curtail the inconvenience resulting from an over-supply of labour," the LABOUR GAZETTE reported in December 1908.

Immigration during the period April to October 1908 fell to 109,575 from 212,024 in the same period of 1907. Immigration from the United Kingdom did not decline as drastically as the total; the British Board of Trade reported that the number of emigrants leaving the United Kingdom for "British North America" during the period January to September 1908 had dropped only to 33,320 from 43,185 in the same period of 1907.

"The closing of navigation and the general cessation of outdoor work usual at this season threw a large number out of employment, and the outlook at many points was for a repetition of the conditions which prevailed last year," the same issue of the LABOUR GAZETTE reported.

It also pointed out that "owing to the comparative lack of activity during the past six months" the workmen affected were less able financially than they had been the year before "to face a period of enforced idleness".

However, the LABOUR GAZETTE predicted "a considerable increase in general activity with the resumption of work in 1909".

The LABOUR GAZETTE printed in full the report of a conciliation board that had been set up in the middle of September to mediate in a dispute between the Canadian Northern Railway Companies and the Brotherhood of Locomotive Engineers. The dispute affected "81 men directly and 261 men indirectly, and related to a question of wages and general conditions of employment". The men were demanding increased wages and "a uniform set of working articles".

The board made a personal inspection of certain conditions on the three railways contained in the Canadian Northern system. As a result of knowledge thus gained it had been able to recommend a number of improvements in the working conditions of the engineers, especially at points where the men "are frequently forced to remain over night and sometimes after a long trip

in most inclement weather". These suggestions were accepted immediately by the company.

The board decided that "the wages paid the engineers were insufficient in comparison with the services performed and compared unfavourably with those paid by other lines". However, in recommending an increased scale of pay it took into account the greater opportunities for promotion on that railway compared with the older roads.

The rates of pay recommended by the board ranged from \$3.10 to \$4.05 per 100 miles or day of 10 hours for senior engineers, and from \$2.75 to \$3.70 for juniors.

The board's report was accepted by the employees. It was believed at that time that the company's acceptance was being delayed only by the absence in England of D. B. Hanna, Vice President of the Canadian Northern system.

At a meeting in Moncton during November delegates from the various local unions of the International Brotherhood of Railway Employees in the Maritimes and Quebec decided to sever their affiliation with the union and to form "a purely Canadian Brotherhood of Railway Employees with headquarters at Halifax".

A grand council was constituted with A. R. Mosher, of Halifax, as grand president; W. N. Collins of Saint John, N.B., as grand vice president; and M. M. Maclean of Halifax as grand secretary-treasurer. "A general Board of Supervision was also formed," the LABOUR GAZETTE reported. (A. R. Mosher is now an honorary president of the Canadian Labour Congress, M. M. Maclean retired April 30 this year as Assistant Deputy Minister of Labour.)

"The membership of the brotherhood is stated to be in the neighbourhood of 1,000, with local unions at all important stations on the Intercolonial Railway system," the report added.

By an order-in-council dated November 21, 1908, Frederick A. Acland, Secretary of the Department of Labour, was appointed Deputy Minister of Labour to fill the vacancy caused by the resignation of W. L. Mackenzie King (L.G., Oct., p. 1137).

# TEAMWORK in INDUSTRY

Joint consultation spearheads a broad program of labour-management co-operation at Victory Soya Mills Limited, Toronto.

VSM, a subsidiary of Procter and Gamble of America, recently established its best safety record in 13 years: no lost-time accident in over 12 months. At last report, the figure was 380 accident-free days—and is still climbing.

Vice president R. G. Loftus and George Englefield, President of Local 247 of the International Chemical Workers Union, both attribute this achievement to the excellent working relations among labour and management members of the plant's three principal joint consultation committees: Labour-Management, Supervisors' Safety, and Plant Safety.

A continuing vigilance is needed to ensure that company "no smoking" regulations are obeyed by personnel of outside trucking and steamship lines. This responsibility is delegated to foremen of VSM crews loading and unloading in wharf and warehouse areas. Victory's traffic department also helps by conducting a continuous reminder-by-letter campaign.

Two special features of VSM's safety program are the Unsafe Act Report and the "buddy" system. The essence of the former is speed, because an unsafe act is stopped, criticized and documented on the spot. If a man is performing a job in a way that may harm him, the fellow employee or foreman who discovers it stops him and discusses the hazard. Only when the two parties agree that the act was potentially harmful is a report submitted. The plan provides a "running report" on safe conduct, making it easier to spot the "accident prone" worker.

The "buddy" system arose from the premise that if two new men work together, their accident potential is high. VSM's policy is that each new man should work alongside one experienced man. The "old hand at the game" is thus always present to teach the greenhorn the company's safety standards, and to remind him of the hazards that go with his job.

\* \* \*

Close partnership on plant operations is one of the highlights of labour-management relations at Canadian Refractories Limited, Kilmar, Que.

An employee-management committee, comprising three management representatives and three members appointed from the Magnesite Workers Federal Union, meets once a month to discuss a wide variety of plant problems. At a recent meeting, the committee covered a list of technical topics ranging from the spinning of bosun's chairs for raising and lowering men in silos, through the merits of grease fittings for rack carriers, to the pros and cons of power ventilation.

Company promotion in the field of safety has stimulated the interest and participation of the firm's 175 employees to such a pitch that they can now claim a safety record of more than 1,000,000 hours of work without a single lost-time accident. For two consecutive years, 1956 and 1957, the Kilmar staff has won the safety shield of the Industrial Accident Prevention Associations of the province of Quebec.

L. R. Thomas, Works Manager at Canadian Refractories, has nothing but praise for the spirit of co-operation generated throughout the plant by the Labour-Management Committee's activities; and Gilbert Pearson, President of Local 145 of the MWFU, asserts that the committee is providing an excellent two-way channel of communication between management and employees.

\* \* \*

Stepped-up operational efficiency in the building of dams and power plants, and an improved camp life, accompanied the establishment of labour-management committees at the Ontario Hydro Electric Power Commission's projects at Whitedog Falls and Caribou Falls in Northwestern Ontario.

Although the two projects are considered as one, there were difficulties because Whitedog and Caribou are 15 miles apart. The 1,800 employees involved in the work are located at a number of points over a wide area.

For these reasons the organization of committees at both sites established between labour and management a much needed channel of communication on matters concerning progress of the work. Throughout the building period, support for joint consultation has been supplied enthusiastically by management and by the various trade unions affiliated with the Ontario Hydro Construction Allied Council (CLC).

Establishment of Labour-Management Committees is encouraged and assisted by the Labour-Management Co-operation Service, Industrial Relations Branch, Department of Labour. In addition to field representatives located in key industrial centres, who are available to help both managements and trade unions, the Service provides various aids in the form of booklets, posters and films.

# INDUSTRIAL RELATIONS AND CONCILIATION

## Certification and Other Proceedings before the Canada Labour Relations Board

The Canada Labour Relations Board met for six days during October. The Board issued eight certificates designating bargaining agents, ordered seven representation votes, and rejected seven applications for certification. The Board also granted one application for revocation of certification and, following requests under Section 61 (2) of Act for review of earlier decisions, issued four amending certificates. During the month the Board received nine applications for certification and allowed the withdrawal of one application for certification.

### Applications for Certification Granted

1. International Union of Operating Engineers, Local 115, on behalf of a unit of construction equipment operators employed by the Poole Construction Company Limited in the area of Whitehorse, Y.T. (L.G., Oct., p. 1140).

2. United Mine Workers of America, District 50, on behalf of a unit of uranium fuel rod fabricators employed by AMF Atomics (Canada) Limited, at Port Hope, Ont. (L.G., Oct., p. 1140).

3. International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, on behalf of a unit of maintenance employees of Wheeler Airlines Limited, employed at St. Jovite, Montreal, and Val d'Or, Que., Frobisher Bay, Site 41, Great Whale and Fox, N.W.T., and Goose Bay, Labrador. The Wheeler Airlines Limited Employees' Association intervened (see representation votes, below).

4. International Association of Machinists, Automotive Lodge 1857, on behalf of a unit of vehicle maintenance and repair shop employees of Gill Interprovincial Lines Limited employed in its Vancouver Division (L.G., Oct., p. 1140).

5. Canadian Merchant Service Guild, Inc. (Eastern Branch), on behalf of a unit of deck officers employed aboard the MV *George Hindman* by the Hindman Transportation Company Limited, Owen Sound, Ont. (L.G., Nov., p. 1285).

6. Line Drivers, Warehousemen, Pickupmen and Dockmen's Union, Local No. 605, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of warehousemen, local and line drivers employed by East-West Transport Ltd., and operating in and out of its terminal at Burnaby, B.C. (L.G., Nov., p. 1285).

7. The Syndicate of Employees of CFGT, on behalf of a unit of employees of Radio Lac St-Jean Limitée employed at Radio Station CFGT, Alma, Que. The National Association of Broadcast Employees and Technicians, intervened (see applications for certification received below).

8. General Truck Drivers' and Helpers' Union, Local 31 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of employees of Hill the Mover (Canada) Limited employed in its sub-branch at Chilliwack, B.C. (see applications for certification received, below).

### Representation Votes Ordered

1. United Steelworkers of America, applicant, Consolidated Denison Mines Limited, Spragge, Ont., respondent, and International Union of Mine, Mill and Smelter Workers, intervener (L.G., Sept. p. 980). The Board directed that the names of both the applicant and intervener be placed on the ballot (Returning Officer: A. B. Whitfield) (see applications for certification received, below).

2. Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, Division 591, applicant, Hull City Transport Limited, Hull, Que.,

This section covers proceedings under the Industrial Relations and Disputes Investigation Act, involving the administrative services of the Minister of Labour, the Canada Labour Relations Board, and the Industrial Relations Branch of the Department.

respondent, and The Hull City Transport Employees' Syndicate, intervener (L.G., Sept., p. 980). The Board directed that the names of both the applicant and intervener be placed on the ballot (Returning Officer: B. H. Hardie) (see applications for certification rejected, below).

3. International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, applicant, Wheeler Airlines Limited, St. Jovite Station, Que., respondent, and Wheeler Airlines Limited Employees' Association, intervener (L.G., Oct., p. 1140). The Board directed that only the name of the applicant union be placed on the ballot (Returning Officer: C. E. Poirier) (see applications for certification granted, above).

4. Members of bargaining unit employed on *MV Imperial Namu*, *MV Imperial Nanaimo*, and *Barge No. 10*, applicants, the Seafarers' International Union of North America, Canadian District, respondent, and Imperial Oil Limited, Vancouver, respondent. The Board ordered a vote of the employees following consideration of an application for revocation of certification (L.G., Oct., p. 1141) (Returning Officer: D. S. Tysoe) (see application for revocation of certification granted, below).

5. Seafarers' International Union of North America, Canadian District, applicant, and Northern Transportation Company Limited, Edmonton, Alta., respondent (Western Arctic) (L.G., Sept., p. 980). The Board

## Scope and Administration of Industrial Relations and Disputes Investigation Act

Conciliation services under the Industrial Relations and Disputes Investigation Act are provided by the Minister of Labour through the Industrial Relations Branch. The branch also acts as the administrative arm of the Canada Labour Relations Board, in matters under the Act involving the board.

The Industrial Relations and Disputes Investigation Act came into force on September 1, 1948. It revoked the Wartime Labour Relations Regulations, P.C. 1003, which became effective in March, 1944, and repealed the Industrial Disputes Investigation Act, which had been in force from 1907 until superseded by the Wartime Regulations in 1944. Decisions, orders and certificates given under the Wartime Regulations by the Minister of Labour and the Wartime Labour Relations Board are continued in force and effect by the Act.

The Act applies to industries within federal jurisdiction, i.e., navigation, shipping, interprovincial railways, canals, telegraphs, interprovincial and, international steamship lines and ferries, aerodromes and air transportation, radio broadcasting stations and works declared by Parliament to be for the general advantage of Canada or two or more of its provinces. Additionally, the Act provides that provincial authorities, if they so desire, may enact similar legislation for application to industries within provincial jurisdiction and make mutually satisfactory arrangements with the federal Government for the administration of such legislation.

The Minister of Labour is charged with the administration of the Act and is directly responsible for the appointment of conciliation officers, conciliation boards, and Industrial Inquiry Commissions concerning complaints that the Act has been violated or that a party has failed to bargain collectively, and for applications for consent to prosecute.

The Canada Labour Relations Board is established under the Act as successor to

the Wartime Labour Relations Board to administer provisions concerning the certification of bargaining agents, the writing of provisions—for incorporation into collective agreements—fixing a procedure for the final settlement of disputes concerning the meaning or violation of such agreements and the investigation of complaints referred to it by the minister that a party has failed to bargain collectively and to make every reasonable effort to conclude a collective agreement.

Copies of the Industrial Relations and Disputes Investigation Act, the Regulations made under the Act, and the Rules of Procedure of the Canada Labour Relations Board are available upon request to the Department of Labour, Ottawa.

Proceedings under the Industrial Relations and Disputes Investigation Act are reported below under two headings: (1) Certification and other Proceedings before the Canada Labour Relations Board, and (2) Conciliation and other Proceedings before the Minister of Labour.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, Halifax and St. John's Newfoundland. The territory of two officers resident in Vancouver comprises British Columbia, Alberta and the Yukon and Northwest Territories; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; three officers resident in Toronto confine their activities to Ontario; three officers in Montreal are assigned to the province of Quebec, and a total of three officers resident in Fredericton, Halifax and St. John's represent the Department in the Maritime Provinces and Newfoundland. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

directed that the vote be taken at the opening of the 1959 navigation season (Returning Officer: D. S. Tysoe).

6. Transport Drivers, Warehousemen and Helpers' Union, Local 106, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, applicant, and Husband Transport Limited, London, Ont., (Montreal Terminal) respondent (L.G., Oct., p. 1139) (Returning Officer: C. E. Poirier).

7. Brotherhood of Railroad Trainmen, applicant, The New York Central Railroad Company (Northern District), respondent, and The Railroad Yardmasters of North America, Inc., intervener (yardmasters employed in Canada Southern Division) (L.G., Aug., p. 881). The Board directed that the names of both the applicant and intervener be placed on the ballot (Returning Officer: T. M. McRae).

### Applications for Certification Rejected

1. Brotherhood of Locomotive Engineers, applicant, Canadian National Railways, respondent, and Brotherhood of Locomotive Firemen and Enginemen, intervener (Newfoundland District). The application was rejected for the reason that it was not supported by a majority of the employees affected in the representation vote conducted by the Board (L.G., Oct., p. 1139).

2. United Steelworkers of America, applicant, Consolidated Denison Mines Limited, Spragge, Ont., respondent, and International Union of Mine, Mill and Smelter Workers, intervener. The application was rejected for the reason that it was not supported by a majority of the employees affected in the representation vote conducted by the Board (see representation votes, above).

3. Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, Division 591, applicant, Hull City Transport Limited, Hull, Que., respondent, and The Hull City Transport Employees' Syndicate, intervener. The application was rejected for the reason that the applicant did not secure the support of a majority of the employees in the voting unit agreed upon as appropriate by the parties (see representation votes, above).

4. International Union of Operating Engineers, Local 115, applicant, and Dawson & Hall Limited, Vancouver, B.C., respondent (Yukon Territory). The application was rejected for the reason that it was not supported by a majority of the employees affected (L.G., Oct., p. 1139).

5. International Union of Operating Engineers, Local 115, applicant, and John A. MacIsaac Construction Co. Ltd., Whitehorse, Y.T., respondent. The application was rejected for the reason that it was not supported by a majority of the employees affected (L.G., Oct., p. 1140).

6. The Transport and General Workers Union, Local 1050 of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, applicant, The Newfoundland-Great Lakes Steamships Limited, Botwood, Nfld., respondent, and Longshoremen's Protective Union of Botwood, Nfld., intervener. The application was rejected for the reason that the applicant had no members in good standing within the meaning of the provisions of Section 15 of the Board's Rules of Procedure, having regard to the provisions of the constitution of the applicant union (L.G., Nov., p. 1285).

7. Wheeler Airlines Limited Employees' Association, applicant, Wheeler Airlines Limited, St. Jovite Station, Que., respondent, and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, intervener. The application was rejected for the reason that the applicant had no members in good standing in the unit applied for under the provisions of Section 15 of the Board's Rules of Procedure (L.G., Nov., p. 1285) (see also applications for certification granted, above).

### Application for Revocation of Certification Granted

The Board granted an application for revocation of certification, following the taking of a representation vote, affecting members of the bargaining unit employed on *MV Imperial Namu*, *MV Imperial Nanaimo*, and *Barge No. 10*, applicants, the Seafarers' International Union of North America, Canadian District, respondent, and Imperial Oil Limited, Vancouver, respondent (see representation votes, above).

### Requests for Review under Section 61 (2) of Act Granted

International Longshoremen's Association, Independent, applicant, and Eastern Canada Stevedoring Co. Ltd., Terminal Warehouses Limited, Caledon Terminals Limited, and Cullen Stevedoring Company Limited, Toronto, respondents (L.G., Nov., p. 1285). The Board issued amending certificates extending the scope of the bargaining units previously established to include certain additional casual employees.

### Applications for Certification Received

1. The Syndicate of Employees of CFGT, on behalf of a unit of employees of Radio Lac St-Jean Limitée employed at Radio Station CFGT, Alma, Que. (Investigating Officer: R. Trépanier) (see applications for certification granted, above).

2. General Truck Drivers' and Helpers' Union, Local 31, of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of employees of Hill the Mover (Canada) Limited employed in its sub-branch at Chilliwack, B.C. (Investigating Officer: D. S. Tysoe) (see applications for certification granted, above).

3. International Woodworkers of America, Local 1-71, on behalf of a unit of employees of the Vancouver Tug Boat Co. Ltd., engaged in booming and rafting in the area of Twin Creeks, Howe Sound, B.C. (Investigating Officer: G. R. Currie).

4. International Association of Machinists, on behalf of a unit of employees of Canadian Arsenals Limited (Small Arms Division, Long Branch, Ont.) (Investigating Officer: F. J. Ainsborough).

5. International Union of Mine, Mill and Smelter Workers, on behalf of a unit of employees of Bicroft Uranium Mines Limited, Bancroft, Ont. (Investigating Officer: A. B. Whitfield).

6. National Association of Broadcast Employees and Technicians on behalf of a unit of Film Editing Department employees of the Western Ontario Broadcasting Company Limited (CKLW-TV), Windsor, Ont. (Investigating Officer: T. B. McRae).

7. Longshoremen's Protective Union, on behalf of a unit of longshoremen employed by The Newfoundland-Great Lakes Steamships Limited at Botwood, Nfld. (Investigating Officer: W. L. Taylor).

8. Warehousemen & Miscellaneous Drivers Union, Local 419, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, on behalf of a unit of mail truck drivers and helpers employed by H. W. Bacon, Toronto, Ont. (Investigating Officer: A. B. Whitfield).

9. The Nordair Employees' Syndicate, on behalf of a unit of maintenance employees of Nordair Ltd., Roberval, Que. (Investigating Officer: C. E. Poirier).

### Application for Certification Withdrawn

Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, Division 591, applicant, Transport Hull Metropolitain Limited, Hull, Que., respondent, and The Hull City Transport Employees' Syndicate, intervener (L.G., Sept., p. 980).

## Conciliation and Other Proceedings before the Minister of Labour

### Conciliation Officers Appointed

During October, the Minister of Labour appointed conciliation officers to deal with the following disputes:

1. Canadian Broadcasting Corporation and Canadian Wire Service Guild, Local 213, American Newspaper Guild (Conciliation Officer: F. J. Ainsborough).

2. British Columbia Towboat Owners' Association and Seafarers' International Union of North America, Canadian District (Conciliation Officer: G. R. Currie).

3. Hill the Mover (Canada) Limited, Winnipeg Terminal, and Local 979, General Drivers, Warehousemen and Helpers, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (Conciliation Officer: J. S. Gunn).

4. British Columbia Towboat Owners' Association and Canadian Merchant Service Guild, Inc. (Conciliation Officer: G. R. Currie).

### Settlement by Conciliation Officer

Canadian Broadcasting Corporation and Canadian Wire Service Guild, Local 213, American Newspaper Guild (Conciliation Officer: F. J. Ainsborough) (See above).

### Conciliation Boards Appointed

1. Smith Transport Limited (Maritimes) and Transport Drivers, Warehousemen and Helpers Union, Local 106 (L.G., Oct., p. 1141).

2. Minshull Storage and Van Limited, Halifax, and Local 927, International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America (L.G., Sept., p. 980).

### Board Reports Received during Month

1. Canadian Pacific Transport Limited, Winnipeg, and Canadian Brotherhood of Railway Employees and Other Transport

Workers, Division 198 (L.G., Oct., p. 1141). The text of the report is reproduced below.

2. Robin Hood Flour Mills, Limited, Calgary, and United Packinghouse Workers of America, Local 326 (L.G., Oct., p. 1141). The text of the report is reproduced below.

## Report of Board in Dispute between

**Canadian Pacific Transport Company Limited, Winnipeg  
and**

**Canadian Brotherhood of Railways Employees and Other  
Transport Workers**

The Conciliation Board appointed by you, consisting of G.P.R. Tallin, QC, Chairman; Harold J. Riley, QC, the Company's nominee; and Alistair Stewart, the Employees' nominee, was duly constituted.

The Board held several sittings, the dates of which are set out in the statement of sittings submitted with this report. The Company was represented by L. Jacobsen, C.P.R. Personnel Officer, Montreal; V. A. Birney, Superintendent of the Company at Winnipeg; and B. Pass and C. E. Aked, both of Winnipeg. The union was represented by W. H. Thompson, Blake Morden, Keith Gorrell, and G. Lanchberry.

The dispute referred to the Board arose out of the failure of the parties to agree upon amendments to be made to the collective agreement between them, effective from April 1, 1956.

### **Company's Operation**

The nature of the Company's business is described in its written submission to the Board. It consists in the transportation of commodities between certain points in Manitoba and Saskatchewan. It was acquired through purchase by the Canadian Pacific Transport Company Limited in 1948. Its head office is in Winnipeg, from which place

### **Settlement following Board Procedure**

Canadian National Railways (Barge and Ferry Service, Port Mann, B.C.) and National Association of Marine Engineers of Canada, Inc., and Canadian Merchant Service Guild, Inc. (L.G., July, p. 761).

its main line services extend through Brandon and Regina to Saskatoon and Swift Current. Short or peddle line services are provided between Swift Current and East End in Saskatchewan and between Brandon and Portage la Prairie in Manitoba. Maintenance requirements are performed in the Company's garage in Winnipeg. Terminals are maintained at Winnipeg, Brandon, Regina, Swift Current, and Saskatoon. A portion of the traffic is by way of semi-trailer on the highways, the greater part of the remainder by way of trailers on flat cars of the Canadian Pacific Railway—the so-called "piggy-back" service—and a much smaller part by way of boxcars of the Canadian Pacific Railway.

While the total number of employees represented by the union necessarily varies with the volume of traffic handled, it was 87 during March 1958. There were 13 over-the-road drivers, 3 line drivers, 62 warehousemen and pick-up men, 2 mechanics, 1 mechanic's helper, and 6 clerks and stenographers.

On November 18, 1948, the Canadian Brotherhood of Railway Employees and Other Transport Workers was certified as bargaining agent for the employees of the Company, and the first collective agreement was made effective January 1, 1949. The agreement presently in effect became effective April 1, 1956.

The warehousemen, who constitute 71 per cent of the employees represented by the union under the present agreement, receive \$1.25 per hour. Drivers receive 4.9 cents per mile or, if on an hourly rate, \$1.32 per hour, and in addition the great majority, who meet certain prescribed standards, receive what is known as a safe driving and safe handling bonus of four-tenths of a cent per mile. All employees represented by the union also receive, in addition to their wages, the benefit of

During October, the Minister of Labour received the report of the Board of Conciliation and Investigation appointed to deal with a dispute between the Canadian Brotherhood of Railway Employees and Other Transport Workers, Division 198, and Canadian Pacific Transport Company Limited, Winnipeg.

The Board was under the chairmanship of Dean G. P. R. Tallin, QC, Winnipeg, who was appointed by the Minister on the joint recommendation of the other two members, Harold J. Riley, QC, and Alistair Stewart, both of Winnipeg, nominees of the company and union respectively.

The text of the report is reproduced here.

participation in the Benefit Plan for Non-operating Employees of Canada Railways, which costs the Company \$4.25 per month per employee, and represents an increase in wage costs estimated by the Company at about 2 per cent per hour worked.

### Course of Negotiations

Under date of January 31, 1958, the representative of the employees gave notice to the Company of their desire to revise the collective agreement. A statement of proposed amendments accompanied the notice. The Company estimates that the annual cost of giving effect to the proposed amendments would be in excess of \$114,000.00. At a meeting between the parties on March 5 the employees' requests were reviewed, and their committee had the opportunity of presenting arguments in support of each proposal. The parties met again on March 25, when the Company pointed out that the wage rates and working conditions of the employees were better than those of the employees of any competitive trucking company in the area of the Company's operations, and for this reason, and because the requests were unrealistic, refused to grant them.

After several further meetings the Company on June 13 indicated that if a reasonable settlement of all other matters in dispute could be obtained, it would make a number of concessions, which may be summarized as follows:

1. Weather, terminal and road delay time for over-the-road drivers to be paid for at the minimum hourly wage rate at the nearest terminal instead of 72 cents per hour, an increase of between 38c. and 43c. per hour.

2. Over-the-road drivers' lay-over at away-from-home terminal after 16 hours to be paid for at 15 cents per hour less than the applicable terminal rate at the away-from-home terminal for a maximum of eight hours in twenty-four, instead of 72 cents per hour, an increase of between 23c. and 43c. per hour. If an employee is required to work while held over at away-from-home terminal he will be paid the applicable terminal rate.

3. One additional statutory holiday, Boxing Day.

4. Participation in the benefit plan of the organized, non-operating employees of Canadian Pacific, to the cost of which employer and employee will each contribute \$4.25 per month per employee.

5. Differential of 5 cents per hour now being paid to terminal employees at Regina and Saskatoon to be paid also to terminal employees at Swift Current.

6. Meal period for terminal and office employees to be not more than one hour instead of not more than 1½ hours, thus providing for nine hours' work in a spread of ten instead of 10½ for terminal employees and for eight hours' work in a spread of nine instead of 9½ for office employees.

7. The Company to pay the cost of laundering overalls of mechanics and mechanics' helpers.

With the understanding that the foregoing improvements would become part of a new agreement, all matters in issue between the parties were disposed of except:

1. Wage rates.
2. Hours of work.
3. Annual vacations.
4. Duration of the agreement.

On the matters remaining in dispute after June 13, the Company proposed at that time that:

1. (a) Wage rates for terminal employees would be increased by 2 per cent on April 1, 1958; by 2 per cent on October 1, 1958; and by a further 2 per cent on April 1, 1959.

- (b) Wage rates for office employees would be increased by 3 per cent on April 1, 1958; by 2 per cent on October 1, 1958; and by a further 2 per cent on April 1, 1959.

- (c) Wage rates for mileage-rated, over-the-road drivers would be increased by the percentages and on the same dates as increases for terminal employees.

(All the percentage increases referred to above were to be percentages of the present wage rates.)

2. No change would be made in hours of work.

3. No change would be made in annual vacations.

4. The duration of the agreement would be two years from April 1, 1958, but would continue thereafter subject to the same provisions for being re-opened as in the current agreement.

The employees' proposals were then as follows:

1. (a) That the per-mile rate for highway drivers be increased by one-tenth of a cent per mile.

- (b) That all road expenses should be paid by the Company.

- (c) That wage rates for line drivers would be increased by 35 cents per hour.

2. That a five-day, forty-hour week be established.

3. That overtime should be paid after eight hours' work in any one day.

4. That provision would be made for one day's vacation after each month's service up to a maximum of two weeks.

As the discussions had failed to produce agreement, the employees applied for conciliation services and a conciliation officer, Mr. J. J. Gunn, was appointed on June 17, 1958.

The parties met jointly with Mr. Gunn on several occasions, and each party met with him separately on a number of occasions, but though each party made certain concessions agreement was not reached on all points.

On the question of annual vacations with pay, the parties tentatively agreed to adopt the formula laid down in the federal Annual Vacations Act.

On the question of hours of work, the employees' request was reduced to nine hours per day, and forty-five hours per week for terminal staff, with daily overtime and to forty hours per week for office workers with daily overtime payable after eight hours. There was no change in the Company's position on this point.

On the question of wages, the employees' request was reduced to 20 cents per hour for all employees other than highway drivers, and for highway drivers was altered to an increase of a cent and one-tenth per mile, with drivers being responsible for their own road expenses, or an increase of one-tenth of a cent per mile with road expenses paid by the Company. After the conciliation officer had proposed an increase of 10 cents per hour, effective April 4, 1958, the Company submitted the following counter-proposal:

Terminal employees and monthly-rated drivers:

|                         |                  |
|-------------------------|------------------|
| Effective April 1, 1958 | —\$1.28 per hour |
| “ October 1, 1958—      | 1.32 “ “         |
| “ April 1, 1959         | — 1.36 “ “       |

Over-the-road drivers:

|                         |                    |
|-------------------------|--------------------|
| Effective April 1, 1958 | —5. cents per mile |
| “ October 1, 1958—      | 5.2 “ “ “          |
| “ April 1, 1959         | —5.4 “ “ “         |

(Before the Board, the Company representative stated that the above counter-proposals were put forward only on condition that a satisfactory agreement could be reached on all other points.) The counter-proposals were rejected by the employees.

On the question of duration of contract, the representatives of the employees stated that they were convinced they could prevail upon their national office to approve of an agreement to run for a two-year term from April 1, 1958, if such agreement provided for the wage increases and other terms requested by them.

Finally, as no agreement was reached in the proceedings before him, Mr. Gunn on July 30, 1958 recommended the appointment of a Board of Conciliation, and the present Board was appointed by you on August 5, 1958.

By consent of both parties meetings of the Board with the representatives of the parties did not commence until October 1, 1958, since which date numerous meetings have been held.

In the proceedings before the Board the issues other than that of wages have assumed little importance.

On the question of vacation with pay, both parties have agreed that the vacation clause in any new agreement to be made between them will be re-written to meet the requirements of the Annual Vacations Act.

On the question of hours of work, the employees' demands for a reduction of hours has in effect been dropped, except as it applies to eight office employees of the Company. The Board is of the opinion that this point will not stand in the way of agreement between the parties if agreement can be reached on the question of wages.

The question of duration is closely related to that of wages. Both parties would agree to a two-year agreement if wage provisions were satisfactory.

On the question of wages, neither party has been willing in proceedings before the Board to make any concessions. The employees still adhere to their demand for 20-cents-an-hour increase, and the Company to its original offer before the conciliation officer.

The employees in their brief argue that the Company should pay wages comparable to those paid to employees of the Canadian Pacific Railway Company who perform similar services, or in the alternative at least to the wages paid to the employees of other highway transport companies such as Dench, O.K. Valley, and Island Freight, all of which operate outside the Company's area of operation. Their brief, a copy of which accompanies this report, contains on Page Four a comparison of wages paid by the Company with those paid by the Canadian Pacific Railway Company. They also stressed the increase in the cost of living since the present agreement was signed, but apparently do not consider that when it was signed the parties had in mind to provide for any such increase during the time it would be in effect.

The Company on the other hand argues that wages paid by it should be in line with those paid by other similar transport companies competing with it in this area,

and that with the increases it has offered, and having regard to bonus payments and pension benefits, it will be paying wages appreciably higher than its competitors. Exhibit E of the Company's brief, a copy of which accompanies this report, sets out a comparison of the wages paid by the Company with those paid by competing companies.

### Recommendations

All the members of the Board are prepared to recommend increases in the wage rates set out in the agreement presently in force, but unfortunately can not agree as to the extent of those increases.

Mr. Riley recommends the following increases in wage rates, to be effective from the dates and for the periods specified, namely:

1. Increase in wage rates for terminal employees:

Effective from April 1 to Sept. 30, 1958—2% of present rates

Effective from Oct. 1, 1958 to March 31, 1959—4% of present rates

Effective from April 1, 1959 to March 31, 1960—6% of present rates.

2. Increase in wage rates for office employees:

Effective from April 1 to Sept. 30, 1958—3% of present rates

Effective from Oct. 1, 1958 to March 31, 1959—5% of present rates

Effective from April 1, 1959 to March 31, 1960—7% of present rates.

3. Wage rates for mileage-rated, over-the-road drivers to be increased by the same percentages, from the same dates, and for the same periods, as the increases for terminal employees.

(In none of the above instances are the percentages to be cumulative.)

Mr. Stewart recommends the following increases to be effective from the dates and for the periods specified, namely:

1. Increases for all hourly-paid employees:

Effective from April 1, 1958 to June 30, 1958—10 cents per hour over present rates

Effective from July 1, 1958 to March 31, 1960—20 cents per hour over present rates.

2. Wage rates for all other than hourly-paid employees to be increased in the same proportion, from the same dates, and for the same periods, as in the case of hourly-paid employees.

Unfortunately, the Chairman does not agree with either of the other members of the Board, and recommends the following

increases in wage rates, to be effective from the dates and for the periods specified, namely:

1. Increase in wage rates for terminal employees:

Effective from April 1 to Sept. 30, 1958—5% of present rates

Effective from Oct. 1, 1958 to March 31, 1959—7% of present rates

Effective from April 1, 1959 to March 31, 1960—9% of present rates.

2. Increases in wage rates for office employees:

Effective from April 1 to Sept. 30, 1958—6% of present rates

Effective from Oct. 1, 1958 to March 31, 1959—8% of present rates

Effective from April 1, 1959 to March 31, 1960—10% of present rates.

3. Wage rates for mileage-rated, over-the-road drivers to be increased by the same percentage, from the same dates, and for the same periods as the increases for terminal employees.

(In none of the above instances are the percentages to be cumulative.)

In view of the measure of agreement reached by the parties on points of difference, other than those of wages and the duration of the agreement, the members of the Board are of the opinion that if agreement is finally reached on the two latter issues, the other matters originally in issue will present no appreciable difficulty, and in consequence make no recommendations thereon.

Dated the 16th day of October, A.D. 1958.

All of which is respectfully submitted.

### REPORT OF UNION NOMINEE

Not being able to agree with either the report of the Chairman of the Conciliation Board or that of the appointee of the company, I beg to submit my own comments and recommendations in the matter of the above dispute.

The company did not at any time plead inability to pay. The union produced figures purporting to be taken from the company's financial statements for the years 1956 and 1957. The company refused to discuss or comment on the figures.

Accepting the figures as being reasonably accurate, they show operating revenues of the company to be \$1,300,000 in 1956 and \$1,600,000 in 1957. Since the company complained of the downward trend of rates due to competition, its business must be increasing.

About half the operating expenses of the company are accounted for by payments to the Canadian Pacific Railway for piggyback service. A trucking concern which finds that half its operating costs are due to rail operations could, conceivably, be as much in competition with the railway as with other trucking companies.

During the hearings the company admitted that some of its business came from former customers of the railway. But the company still refused to admit that it was in competition with the railroad. Had it agreed that such competition existed, of course, then the company would have left itself open to having its labour rates compared with those paid for similar work by the railway.

The company did not deny that there was a similarity in certain types of work done by its employees and those of the railroad. As a matter of fact, the work is identical in many cases. Yet the rates of pay for the same work are appreciably different. Railway rates are much higher.

The company said that piggyback service gave it no competitive advantage over other trucking companies. Yet the company stated in its rebuttal "There is ample evidence to suggest that in the very near future piggyback services will be in common use in the trucking industry in this area and will become characteristic of it."

Competitors will use piggyback services only if they see some economic advantage accruing to themselves. They are not likely to do so out of the goodness of their hearts. Therefore it is reasonable to assume that competitors appreciate the competitive advantages which the company now enjoys. The company has had the benefit of these advantages for some time.

The company argued, quite legitimately, that the pattern of wage increases in the area should not be ignored. The examples of wage increases which were submitted showed an average increase of almost 6 per cent per annum. Yet the offer of the company is 6 per cent for a two-year agreement.

Since the last agreement was signed, the cost of living has risen by some 6 per cent. The company's offer, which would bind the union until 1960, would not even cover the increase in the cost of living to the date of this report.

It was stated by the union, and not denied, that the company's wage bill represents about 20% of the company's gross annual costs. In most competitive trucking concerns the percentage of gross costs represented by wages is nearer 50%.

The company stated "Our wage costs must be kept in line with wage costs of our competitors." But there is a difference between wage costs and wage rates. The company argued its case on the basis of local wage rates.

It stands to reason that, with a base rate of \$1.25 an hour, a 20-cent-an-hour increase in wages would mean an additional increase in wage costs to the company of less than 4 per cent of its total costs. A similar increase by competitive concerns would mean an increase in total costs of some 8 per cent. In my opinion such an increase would not adversely affect the company's competitive position.

The company would not entertain any compromise suggestion such as 10 cents an hour retroactive to 1 April 1958 and another 10 cents an hour at a later date. The union had already reduced its demands from 35 cents an hour to 20 cents an hour.

I recommend that all employees receive an increase of 20 cents an hour retroactive to 1 April 1958 in return for a two-year agreement.

All of which is respectfully submitted.

Dated at Winnipeg, Manitoba, this 16th day of October 1958.

## Compulsory Arbitration *(Continued from page 1390)*

British Employers' Confederation and themselves on the procedure for obliging all employers in an industry to abide by its jointly-agreed conditions of work. But even in this limited sphere the good tradition of changing industrial relations legisla-

tion with the maximum agreement of two sides has been set aside on this occasion."

Now, the TUC is to make its own study of the problems of arbitration in industry through a special subcommittee which it has set up.

# Report of Board in Dispute between

Robin Hood Flour Mills Limited, Calgary

and

United Packinghouse Workers of America

Pursuant to the provisions of The Industrial Relations and Disputes Investigation Act, the Board of Conciliation and Investigation established to deal with the dispute between the above-named parties and appointed on August 6, 1958, convened to hear representations from the parties to the dispute.

The Members of the Conciliation Board were: Mr. Irwin A. Blackstone, Chairman; Mr. Hugh John Macdonald, MLA, QC, representing the employer; Mr. Robert Scott, representing the union.

Appearing before the Board were:

*For the employer:* Mr. H. V. Milvain, QC, Mr. W. G. Evans.

*For the union:* Mr. J. Hampson, spokesman; Messrs. H. Gerbholtz, J. Vincent and L. J. Saarinen.

After considering the evidence and the briefs submitted the Conciliation Board makes the following unanimous recommendations:

## 1. Duration of Agreement

Two-year agreement from April 12, 1958 to April 11, 1960.

## 2. Wages

A wage increase to be given as follows:

From April 12, 1958 to April 11, 1959—9c. per hour, subject to provisions of previous contract as to retroactivity.

From April 12, 1959 to April 11, 1960—8½c. per hour.

## Pay in Lieu of Retroactivity

A sum in general settlement of retroactivity beyond the period provided in previous contract of \$35.

## 3. Shift Premium

5c. for second shift, 7c. for third shift.

## 4. Vacations

One week at one year; two weeks at two years; three weeks at 15 years.

## 5. Total Contract

Save as herein provided previous contract to prevail except where other amendments have already been agreed to.

Dated at the City of Calgary in the Province of Alberta, this 1st day of October, A.D. 1958.

(Sgd.) IRWIN A. BLACKSTONE,  
Chairman.

(Sgd.) HUGH JOHN MACDONALD,  
Member.

(Sgd.) ROBERT SCOTT,  
Member.

During October, the Minister of Labour received the unanimous report of the Board of Conciliation and Investigation established to deal with a dispute between the United Packinghouse Workers of America, Local 326, and Robin Hood Flour Mills Limited, Calgary.

The Board was under the Chairmanship of Irwin A. Blackstone, Calgary, who was appointed by the Minister in the absence of a joint recommendation from the other two members, Hugh John MacDonald, MLA, QC, and Robert Scott, both of Calgary, nominees of the company and union respectively.

The text of the report is reproduced here.

## NEW YEAR MESSAGES

(Continued from page 1353)

head, leaving Fear astern. My hopes, indeed, sometimes fail; but not oftener than the forebodings of the gloomy. There are, I acknowledge, even in the happiest life, some terrible convulsions, heavy set offs against the opposite page of the account. I have often wondered for what good end the sensations of grief could be intended. All our other passions, within the proper bounds, have an opposite, and the perfec-

tion of the moral character is, not in stoical apathy, so hypocritically vaunted, and so truly too, because impossible, but in just equilibrium of all the passions. I wish the pathologists then would tell us what is the use of grief in the economy, and of what good is the cause, proximate or remote."

These are my sentiments for the past and the future.

# LABOUR LAW

## Legal Decisions Affecting Labour

British Columbia court dissolves injunction against picketing, Quebec court sets aside a writ of prohibition against a certification order

The Court of Appeal of British Columbia, in a case involving the plumbers' union, found that following a legal lockout, where picketing was properly carried on, there were no grounds for continuance of an injunction.

In Quebec, the Court of Queen's Bench (in appeal), in setting aside a writ of prohibition against certification of a union, held that the regulations issued by the Labour Relations Board "to govern the exercise of its powers" cannot restrain or extend the jurisdiction of the Board as provided in the Labour Relations Act.

### British Columbia Court of Appeal . . .

. . . dissolves injunction against picketing by union of plumbers and pipe-fitters after legal lockout

On June 2, 1958, the Court of Appeal of British Columbia dissolved an injunction which prevented the plumbing and pipe-fitting union from picketing.

The circumstances of the case were related by Mr. Justice O'Halloran, who delivered the judgment. Becker Construction Company Limited was the general contractor engaged in construction of the Ocean Towers Ltd. building in Vancouver. The plumbing work had been done by a plumbing contractor, Fred Welsh & Sons Ltd., a member of the National Association of Plumbers, who employed workers belonging to Local 170 of the United Association of Journeymen and Apprentices of the Plumbing and Pipe-fitting Industry.

On April 29, 1958, the National Association of Master Plumbers and Heating Contractors, B.C. Branch, notified Local 170 that the master plumbers had instituted lockout proceedings. The result was that the members of Local 170 engaged in construction on the Ocean Towers building could not proceed with their work. Union agents then asked the Becker Construction Company for permission to inspect periodically the plumbing and pipe-fitting work on the building, to be certain that no plumbing and pipe-fitting work was carried out by non-union workers during the lock-

out. When the company refused such permission the union started to picket the building by picketers carrying a sign reading: "Plumbers and Pipe-Fitters Local 170 Locked Out. A.F. of L., C.I.O., C.L.C."

On May 15, 1958, the company obtained an *ex parte* injunction restraining the union from (*inter alia*) picketing the premises of Ocean Towers Ltd. The injunction was obtained on the ground that the other union tradesmen employed in the construction of the building such as electricians, painters and teamsters would not cross the plumbing and pipe-fitting union picket line to continue their work. Hence serious delay and damage would occur in the construction of the building.

The injunction was challenged by the union. However, the Court's order of May 22 refused to dissolve the injunction. The Court held that since no plumbing was being done in the building when the application for the injunction was made, and since the Becker Company had no contract with Fred Welsh & Son Ltd., or any other plumbing contractor, to continue or complete the plumbing, the union had no right to establish or maintain a picket line.

The Court's order refusing to dissolve the injunction was appealed by the union.

The Court of Appeal in a unanimous decision allowed the appeal and set aside the injunction.

Mr. Justice O'Halloran in the reasons for judgment noted that the lockout had been treated by the opposing parties (and quite rightly in his view) as a legal lockout and therefore the union was legally entitled to picket under the Industrial Conciliation and Arbitration Act (now the Labour Relations Act) as interpreted by the Supreme Court of Canada in *Aristocratic Restaurants (1947) Ltd., v. Williams and Morrison (1951)*

This section, prepared by the Legislative Branch, reviews labour laws as they are enacted by Parliament and the provincial legislatures, regulations under these laws, and selected court decisions affecting labour.

S.C.R. 762. No submission was made that as regards picketing a legal lockout should be treated differently from a legal strike. There was no evidence of violence, threat or intimidation or other contravention of legal picketing within the meaning of that decision. The words on the picketers' placards did no more than give information that the union employees had been locked out; the conduct of the picketers went no further than that. Following the *Aristocratic* case, as decided in the Supreme Court of Canada, the appellant union legally was entitled to picket.

As to damage, actual and anticipatory, that the company was complaining of, the court thought it was not caused (in the sense of effective cause) by the union or by its picketing. It is true that the company might have suffered substantial damages because other union tradesmen declined to cross the picket line, but that was not caused by the union in question. The damage was caused by other union tradesmen, but they were not parties to this action. Whatever legal action the company might have had under existing law against such persons is outside the scope of the present litigation.

There was no evidence that the union in picketing did so on purpose to cause or inflict damage on the company as a reprisal for the employer's lockout. Nor was there any evidence of a conspiracy between the picketing union and other unions or persons to injure the company in question. The argument that picketing by its very nature contains elements which beget intimidation was not approved by the Supreme Court of Canada in the *Aristocratic* case.

The Court could not agree with the opinion of the judge below that there was no right to establish or maintain a picket line, since no plumbing was being done in the building when the application for injunction was made, and since the company had no contract with Fred Welsh & Son Ltd., or any other plumbing contractor, to continue or complete the plumbing. Whether this company was to continue with the plumbing work or some other plumbing contractor was to be engaged did not affect the defendant union's right to picket. Then Mr. Justice O'Halloran added:

It can hardly be suggested that if a plumbing or other contractor or the association of which he is a member declares a lockout, thus excluding union men previously employed from continuing with the work, that the general contractor can thereupon then enter into a new arrangement or contract with another plumbing contractor and by so doing deprive the union of a right to picket to which they would be entitled if no new plumbing contractor was engaged. The union's

right cannot, it seems to me, be defeated by any such procedure. Whether or not a new contractor is to be engaged or Fred Welsh & Son Ltd. is to be continued, or whether the plumbing work is to be delayed for the time being, does not affect the plaintiff's right to picket; nor does it do so whether there is no contract at all, but merely a day-to-day hiring.

The Court allowed the union's appeal and dissolved the injunction against picketing. *Becker Construction Company Limited v. United Association, etc. of Plumbing and Pipefitting Industry, etc. Local 170, et al*, (1958) 26 WWR, p. 231.

### Quebec Court of Queen's Bench...

... holds Labour Relations Board acted within its jurisdiction in granting certification to union

On May 27, 1958, the Quebec Court of Queen's Bench (in appeal) by a majority decision upheld a judgment of the Superior Court which set aside a writ of prohibition against a certification order of the Quebec Labour Relations Board.

The appeal Court held that the Board acted within its jurisdiction in granting certification to a union which received the required authorization from the employees by a resolution passed at ten different meetings held simultaneously at different places, instead of at a single meeting attended by all the employees concerned.

The circumstances of the dispute, as related in the reasons for judgment, were as follows.

The Quebec Labour Relations Board issued to *La Fraternité Unie des Charpentiers-Ménisiers d'Amérique, Local 2817, Bûcherons et Employés de Scieries*, a certificate of recognition as a bargaining agent for the employees of the E. B. Eddy Company. The certificate in question was issued upon evidence that 388 employees out of 771 eligible members were members of the union. The resolution authorizing the petition for recognition by the union was not passed at a single meeting attended by all the employees concerned, but at ten different meetings held simultaneously at different places. The company challenged the decision and a writ of prohibition against the Board was issued. On August 24, 1957, the Superior Court set aside this writ of prohibition on the ground that no absence or excess of jurisdiction on the part of the Board had been proved. The company appealed the judgment of the Superior Court, contending that the Board exceeded its jurisdiction or acted without jurisdiction in issuing a certificate of recognition to a union which did not possess the character of good faith required under By-Law No. 1 of the Labour Relations Board.

Mr. Justice Owen in his reasons for judgment quoted from Section 6 of the Labour Relations Act, dealing with petitions for recognition, the following:

The presenting of the petition contemplated in this section must be authorized by a resolution of the association and a copy of such resolution, certified by the signatures of the president and the secretary, must be filed in support thereof.

According to this section of the Act, his Lordship pointed out, the Board on receiving in writing a petition authorized by a resolution of the association, has jurisdiction to inquire and determine whether such association is entitled to be recognized. Section 38 of the Act authorizes the Board to make by-laws governing the exercise of its powers and the procedure to be followed and provides:

The Board may make regulations to govern the exercise of its powers, its internal management, the duties of its staff, the conducting of its sittings, the procedure at its investigations, the form of reports which must be made to it and, generally, the carrying out of this Act.

In virtue of these powers the Board passed By-law No. 1 with respect to recognition of associations, which reads in part as follows:

2. For the purpose of determining the character of good faith of an association, the following conditions shall be complied with: (b) the association shall file with the Board the text of a resolution authorizing the petition as adopted at a regular meeting (in French, *assemblée plénière*) of its members, at which there was quorum and to which the members concerned by the said petition had been convened.

The company contended that the law requires that the resolution authorizing the petition should be adopted at a regular plenary meeting (*assemblée plénière*) of the members of the association, and that the ten meetings (*assemblées partielles*) actually held did not constitute an *assemblée plénière* as required by By-law 1. Therefore, in the company's opinion, the Board acted without jurisdiction or exceeded its jurisdiction in issuing a certificate of recognition on the basis of a petition which was not authorized by resolution adopted in the manner required by law.

In rejecting the company's contentions, Mr. Justice Owen stated that the requirement of adoption of the resolution at a regular meeting is contained not in the Labour Relations Act but in a by-law

passed by the Labour Relations Board. In his opinion the Board cannot, by by-law, validly lessen or increase the jurisdiction established by the statute setting out the powers of the Board. The main problem as to whether the Board has jurisdiction to decide (even erroneously) that the particular resolution met the legal requirements is not affected by consideration as to whether such requirements are to be found in the Act alone or in the Act and the by-laws passed under its authority.

In Mr. Justice Owen's opinion the issue before the Court was whether the authorizing resolution is null and void in substance, in which event the Board would be exceeding its jurisdiction; or whether the resolution is defective in form, from a procedural rather than a substantive point of view, in which event the Board would not be exceeding its jurisdiction in dealing with such a petition. His Lordship maintained that when the Labour Relations Board after considering the petition and the resolution decided that the union was entitled to recognition, the Board also decided (at least by implication) that the resolution in question was valid. In so doing the Board acted within its jurisdiction. Whether this decision was right or wrong was not a matter with which the Court was concerned. He agreed with the trial judge that no want of jurisdiction or excess of jurisdiction on the part of the Board had been proved. He therefore dismissed the company's appeal and confirmed the judgment of the court below.

Mr. Justice Rinfret concurred, but presented separate reasons for judgment.

Mr. Justice Choquette, dissenting, was of the opinion that By-law No. 1 adopted by the Board under the Act "to govern the exercise of its powers," approved by the Lieutenant-Governor in Council and published in the Quebec Official Gazette, has the same binding force upon the Board as the Act itself. Therefore, in his opinion, in failing to abide by the by-law the Board exceeded its jurisdiction, and he would have allowed the appeal.

*The E. B. Eddy Company v. La Commission de Relations Ouvrières de la Province de Québec and La Fraternité Unie des Charpentiers-Menusiers d'Amérique, Local 2817, Bûcherons et Employés de Scieries*, (1958) B.R. No. 7, p. 542.

# Recent Regulations, Federal and Provincial

First regulations under Canada Annual Vacations Act are issued by federal Government. First apprenticeship regulations for recently designated trade of heavy duty mechanic have been issued in Alberta

First regulations under the Canada Annual Vacations Act set out the requirements for the keeping of records and other details necessary for the administration of the Act.

In Alberta, first regulations for the recently designated heavy duty mechanics trade provide that apprentices must have Grade 9 education or its equivalent.

Other regulations deal with work camps in Alberta and the licensing and inspection of elevators in Nova Scotia.

## FEDERAL

### Canada Annual Vacations Act

Regulations under the federal Annual Vacations Act were approved by P.C. 1958-1320 on September 22 and gazetted on October 8.

The Act, which was passed last winter, went into force on October 1. It makes it obligatory for employers in the federal industries to give their employees a week's vacation with pay after a year's service and two weeks after a second year (L.G., Oct., p. 1159).

The regulations, which may be cited as the "Annual Vacations Regulations," lay down requirements provided for but not spelled out in the Act. In particular, they exempt certain classes of employees from the Act, require employers to give each employee at least two weeks' notice of the date of commencement of his vacation unless otherwise agreed between the employer and the employee, set out the method of determining the cash value of board or lodging, specify the information to be submitted when applying for approval of a calendar year or other year of employment or an alternative vacation arrangement, define the conditions under which a vacation may be waived or postponed, prescribe the records to be kept by employers, and provide for the disposal of vacation pay in cases where an employee cannot be located.

The regulations exempt the following employees from the provisions of the Act: managers, superintendents and other persons of comparable status or higher; professional workers practising under provincial legislation; and salesmen paid in whole or in part by commission, share in profits or bonus who work outside the employer's premises and whose hours are not controlled by him.

The Act provides that an employee's vacation must commence not later than 10 months after the date of entitlement. However, because of the need for adjustment in the first year of operation of the Act, the regulations have modified this requirement to the extent of providing that an employee whose vacation period has expired or is less than six months must be given his vacation not less than six months after the coming into force of the Act (October 1). Vacation pay must be paid at least one day prior to commencement of the vacation in all cases.

Under the Act, entitlement to a vacation is expressed in terms of a "completed year of employment," by which is meant continuous employment with one employer for a period of 12 consecutive months beginning with the day the employee commenced work or any subsequent anniversary thereafter or for a calendar year or other year approved in relation to any federal work, undertaking or business by the Minister of Labour under the regulations. These provide that an application for an approval of a calendar year or other year of employment must be sent to the Director of Industrial Relations, Department of Labour, enclosing the following information: the name and address of the employer, the calendar year or other year for which approval is sought and the reasons for seeking such approval, a statement of present vacation arrangements, and such other information as the Minister may require.

The Minister may approve the application as submitted, or grant conditional approval on such terms as he considers desirable, or he may refuse the application.

As provided in the Act, employees in the federal industries must receive vacation pay equal to 2 per cent of their gross wages if entitled to a one-week vacation and 4 per cent if eligible for a two-week vacation. The Act further provides that gross wages includes vacation pay, overtime and the monetary value of board and lodging. This last has now been defined to mean the amount actually deducted from wages for such services or, in cases where board or lodging or both are received as part of remuneration, the amount agreed upon between the employer and the employee, or, if no such agreement exists, the amount fixed by the Minister.

Recognizing that parties to a collective agreement might wish to continue vacation-with-pay provisions, which, though inferior in some respects, were, on balance, more satisfactory for their purposes than those provided by the legislation, the Act gave the Minister authority to approve alternative vacation arrangements in agreements signed after the coming into force of the Act. To be approved, a written application signed by the authorized representatives of the parties, together with a signed copy of the agreement, must be sent to the Director. The following particulars are to be included: the names and addresses of the parties to the collective agreement, the date on which the agreement was entered into, a statement and explanation of the vacation pay arrangements showing the extent to which these provisions differ from those in the Act, and any other information requested by the Minister.

The Minister may either approve the submission or deny the application. If an alternative vacation plan is approved and later incorporated into a new or revised collective agreement, further approval by the Minister is not required, provided a written notice of the provisions of the plan and its previous approval is sent to the Director.

Vacations may be waived only in exceptional circumstances, the regulations providing that in such cases the Director may permit an employee to waive his vacation following a joint application by the employer and the employee. Notwithstanding such waiver, however, the employer is required to pay the employee the vacation pay to which he is entitled not later than 10 months immediately following the end of a completed year of employment.

A vacation may be postponed if a written agreement between the employer and the employee is filed with the Director. In exceptional circumstances, the Director may also grant permission to postpone an employee's vacation, following a written application by the employer.

The record-keeping provisions are substantially the same as those in most provincial Acts. Every employer is required to record the following particulars in respect of each employee: name and address, date of commencement of employment and place and date of termination, date upon which the employee becomes entitled to a vacation, date of commencement and completion of each annual vacation, total wages for the vacation period, the amount of vacation pay and date of payment, and the amount paid in lieu of a vacation upon termination of employment.

These records are to be retained for at least two years after an employee's services are terminated and must be produced for inspection upon the request of an authorized representative of the Minister. The employer may also be required to verify any entries by statutory declaration or affidavit or furnish additional information where necessary.

Under the Act, an employee with at least 30 days continuous service whose employment is terminated before he has completed a year of employment is entitled to vacation pay for the proportion of the year worked. The regulations provide that in cases where the employee cannot be located, the employer must, not later than six months after the vacation pay became due, forward the amount to the Minister, who will deposit it in the Annual Vacations Pay Suspense Account. If not claimed by the employee within three years from date of receipt by the Minister, the money will become Crown property.

## PROVINCIAL

### Alberta Apprenticeship Act

The first apprenticeship regulations to be issued for the recently designated heavy duty mechanics trade (L.G., Sept., p. 1033) were gazetted on September 30 as Alta. Reg. 245/58. In line with the usual practice, the regulations lay down rules with respect to eligibility, term of apprenticeship, quotas, training of apprentices, certificates of progress, hours and wages, most of which are similar to provisions in other trade rules.

For purposes of these regulations, a heavy duty mechanic means any person, other than a motor vehicle mechanic, who is engaged in the repair, fitting and construction of internal combustion engines or tractors and other mobile equipment used in agriculture and industry.

To be eligible for apprenticeship, an apprentice must have completed Grade 9 or its equivalent. No age requirements are laid down, however.

The term of apprenticeship is four years, including the three-month probationary period. As is customary, time-credits will be given for approved technical or vocational training or previous experience in the trade.

The ratio of apprentices to journeymen is one to two except that an employer who employs a journeyman or who is himself a journeyman is allowed one apprentice. If circumstances warrant it, however, the Local Advisory Committee may recommend the employment of additional apprentices.

Following the practice in other trades, the regulations make it compulsory for apprentices in the heavy duty mechanics trade to attend the prescribed educational classes and require employers to give sufficient instruction and practical training to enable them to develop into skilled journeymen.

As in other trades, an apprentice must pass the prescribed trade tests and examinations and receive a satisfactory report from his employer or trade school before he may be granted an annual certificate of progress or a final certificate of qualification as a journeyman.

During his first year, an apprentice in the heavy duty mechanics trade must be paid not less than 55 per cent of the prevailing journeyman's wage. The rate increases by 10 per cent each year until the fourth year, when the minimum wage payable is 85 per cent of the journeyman's rate. If time-credits are given, corresponding adjustments must be made in the minimum wage.

### **Alberta Gas Protection Act**

A new publication of the Canadian Standards Association entitled "Installation Code for Gas Burning Appliances and Equipment" (B. 149-1958) has just been adopted as a regulation under the Alberta Gas Protection Act, replacing Standards 52 and 54 of the National Fire Protection Association and Standard 58 of the Dominion Board of Insurance Underwriters, which were adopted as interim standards in October 1956.

### **Alberta Public Health Act**

Regulations of the Alberta Board of Health setting out requirements for industrial and work camps (Division 19 of Alta. Reg. 1943/57) have been replaced by new regulations gazetted on September 30 as Alta. Reg. 265/58.

The provisions are substantially the same, the regulations, as before, laying down rules with respect to location of camps, construction standards, lighting, ventilation and heating of buildings, equipment, sanitation and hygiene.

As formerly, the rules apply to all lumber, sawmill, mining, construction and road building camps. Under the new regulations, however, "camp" has been expressly defined as any permanent or temporary tents, buildings or other structures or mobile units maintained by an employer or contractor as living quarters for his employees.

In line with this change in definition, some modification of the requirements is now permitted in mobile units. Wherever a mobile unit is used as a bunk house, the

minimum air space requirement for each occupant may be reduced from 400 cubic feet (the general standard for bunk houses) to 300 cubic feet per occupant, provided the unit operates with a system of mechanical ventilation approved by the Board. In such cases, also two-tier bunks or bedsteads may be used instead of the single tier variety. This provision does not apply immediately to units already in use. After November 1, 1963, however, it will apply to all mobile units.

In other respects the new regulations are stricter than formerly, one difference being that operators must now supply blankets.

New requirements are also laid down with respect to the cleansing and bactericidal treatment of vessels and utensils.

Another new provision states that the operator must report to the local Board of Health all known or suspected cases of communicable disease, including all cases of food infections.

As previously, an operator who intends to operate a camp for a limited time only may apply to the Board for permission to dispense with some of the requirements, in which case the Board may make an inspection, hear representations or take such action as it considers proper. It is no longer necessary, however, to notify the Board of the establishment of a camp.

### **British Columbia Civil Defence Act**

By a proclamation gazetted on October 16, the British Columbia Government declared that an emergency no longer exists in those areas of the province served by Black Ball Ferries Ltd. Another proclamation gazetted the same day stated that the sections of the Civil Defence Act giving the Government emergency powers to deal with the situation were inoperative, effective from November 1. A state of emergency had been declared to exist in those areas by a proclamation of June 23 (L.G., Sept., p. 1033).

### **Nova Scotia Elevators and Lifts Act**

Regulations under the Nova Scotia Elevators and Lifts Act (L.G. 1956, p. 1026), which came into force January 1, 1958, have not previously been reported in this section and are described below.

These regulations contain seven main parts, and are designed to enable the Department of Labour to regulate the operation of elevators, dumb-waiters, escalators, manlifts and incline lifts. The first four parts deal with the licensing of elevating devices, certificates of competency for government inspectors and others, drawings and specifications for elevating devices, and

the registration of contractors. The remaining sections cover the kinds of notices which must be affixed to elevating devices, the conduct of persons and inspection fees.

### **Licences for Elevating Devices**

Part 1 of the regulations deals with the granting, transfer and suspension of licences for elevating devices.

In order to obtain a licence for an elevating device the owner must make application in the prescribed form to the Chief Inspector, appointed under the Act, enclosing the appropriate fee. The Chief Inspector must be satisfied that the elevating device complies with the requirements of the Act and the regulations, and that it will be operated safely. It is provided in the Act that the inspector will, subject to the Act and regulations, apply the CSA Safety Code for Passengers and Freight Elevators.

To transfer a licence, the applicant for transfer must submit an application to the Chief Inspector in the prescribed form and enclose the appropriate fee. The Chief Inspector must be satisfied that the elevating device complies with the requirements of the Act and the regulations and will be operated safely. The Chief Inspector may not transfer a licence for an elevating device while the licence is suspended, where conditions exist that would result in the suspension of a licence, or where the applicant for transfer is in arrears in paying any fee or expense under the Act or regulations.

A licence for an elevating device may be suspended if the Act or the regulations are being violated, a major alteration as defined in the regulations has been commenced, the owner has not complied with a notice or order of an inspector, an insurer has cancelled or rejected the insurance because the elevating device or its operation does not meet the requirements of the Act or the regulations, or a licensee is in arrears for payment of fees or expenses.

When the Chief Inspector suspends a licence he must immediately give the licensee a notice stating the reasons and the date of the suspension; the licensee must also be given a transcript of the regulations relating to the duration and lifting of suspensions. He must then return his licence to the Chief Inspector immediately. A licence continues to be suspended until the Chief Inspector is satisfied that all conditions for which it was suspended have been remedied and he gives a written order discontinuing the suspension. The licensee, upon payment of a fee, is entitled to a true copy of the order discontinuing the suspension; if the suspension is due to a major alteration to an elevating device, and the

owner has complied with the provisions of the Act and the regulations, the copy must be furnished free.

### **Certificates of Competency**

Part 2 of the regulations deals with the qualification and certification of inspectors.

To qualify to be a government inspector the person must prove that he has had adequate training and experience in the design, construction, maintenance or inspection of elevating devices to make him competent to discharge his duties capably. To qualify to make inspections under the Act, a person who is not a government inspector must have the qualifications already mentioned. In addition, he must file with the Minister of Labour a letter from an insurer stating that the insurer has employed him to make inspections, or proposes to do so when he obtains a certificate of competency. The letter must also certify the person's integrity and ability to make inspections and recommend that a certificate of competency be issued to him.

An applicant for a certificate must make application in the prescribed form and, if not a government inspector, pay the stated fee. A certificate of competency is valid during the year for which it is issued and must be renewed annually before December 31.

The Minister may suspend or cancel a certificate of competency if the holder is untrustworthy, wilfully negligent in making an inspection, knowingly falsifies an inspection report or, being a government inspector, has direct or indirect interest in the manufacture, sale, installation or maintenance of elevating devices.

### **Drawings and Specifications**

Part 3 of the regulations provides that the owner of an elevating device must not permit its operation unless the device and all related equipment are so designed and constructed that the safety of persons and freight are ensured.

This part also outlines the procedure for the submission of drawings and specifications for approval of the Chief Inspector when a new installation or a major alteration of an elevating device is proposed.

### **Registration of Contractors**

Part 4 of the regulations requires that contractors who construct, install, alter, repair, maintain, service or test elevating devices must register annually with the Chief Inspector and pay the prescribed fee. A registration is valid until December 31 of the current year, and must be renewed prior to January 1 of each succeeding year.

The Chief Inspector may suspend or cancel a registration if the contractor, or his servant with his approval, has violated or failed to comply with any provision of the Act or the regulations; caused or permitted an elevating device to be overloaded or used in an unsafe condition; performed work, or knowingly permitted any subcontractor to perform work, on or about an elevating device or machine in a manner that impairs its safe operation or endangers the safety of persons or freight, or while his ability is impaired by the use of alcohol or drugs.

### **Notices and Markings**

Part 5 of the regulations provides that the owner of an elevating device must affix a notice in the load-carrying unit or near the bottom landing, depending on the type of elevating device, giving its maximum capacity in number of persons or in pounds, as specified. He must also display a notice, supplied by the Chief Inspector, giving the installation number. The owner of a freight elevator must display a notice stating that only the attendant and freight-handlers may ride on it.

This part also imposes on the owner the obligation of ensuring that an elevating device is not operated in an unsafe condition. It further requires him to maintain the elevating device so that it will not travel beyond, or deviate from, the safe limits of its fixed position or proper line of travel. In addition, it provides that an

elevating device must not be operated unless all required notices are properly affixed.

### **Conduct of Persons**

Part 6 of the regulations requires that no person may conduct himself in or about an elevating device in such a manner as to impair its safe operation or endanger the safety of himself, any other person, or freight. Nor may he remove, displace, interfere with or damage any safety device, unless he is making an inspection under the Act, or is a contractor or competent mechanic making a test or repair.

When a safety device has been removed, interfered with, or damaged, the elevating device may not be operated except for inspection, testing, or repair until it is working properly. The person making the inspection, the contractor, or the mechanic must ensure that the elevating device is not entered or operated for other purposes.

### **Fees and Expenses for Inspections**

Part 7 provides that the fees payable for the inspection of an elevating device, for a certificate of competency as an inspector and for other purposes, are as set out in Table I of the regulations.

If an inspection is made and the condition of the elevating device does not justify recommending the grant, transfer, or discontinuance of suspension of a licence, and the owner requests further inspection, he must pay the prescribed fee for each subsequent inspection.

---

## **11 U.S. States Require Reports from Unions**

Laws have been enacted in 11 U.S. States and Hawaii that require unions to file organizational data or financial statements, or both, with a state official, or to make available to members certain financial information, it is reported by the Bureau of Labor Standards, U.S. Department of Labor.

The 11 states are: Alabama, Connecticut, Florida, Kansas, Massachusetts, Minnesota, Oregon, South Dakota, Texas, Utah and Wisconsin.

In most of the jurisdictions the unions are subjected to only one or two of the requirements. Only three of them have all three of them in their laws; four others have two and the remaining five only one.

The earliest of the laws was that of Utah, passed in 1937; the latest is that

of Connecticut, enacted in 1957. No legislation of similar type had been enacted in 1958 up to September.

Some of the acts include provisions relating to other internal activities of the union, such as the method and time of election of union officers or limitations on the amount of fees and dues that may be charged. An analysis of these provisions is not included in the report.

Most of the laws cover all labour unions.

Under some of the laws reports are required on such items as name of union, locations of union offices, names and addresses of local officers, and names and addresses of organizations with which the union is affiliated.

In most cases the financial statement must be verified by an official under oath.

# UNEMPLOYMENT INSURANCE

## Monthly Report on Operation of the Unemployment Insurance Act

Initial claims for benefit in September were about 13 per cent more than in August and 26 per cent more than a year earlier; registered claimants decline 4 per cent in the month, however, statistics\* show

The number of initial and renewal claims for unemployment insurance benefit in September was 157,556, about 13 per cent more than the August total of 139,690; and 26 per cent more than the 124,949 claims recorded a year earlier.

Continuing the downward movement prevailing since last February, claimants for unemployment insurance benefit showed a further decline on September 30 to 282,587, some 4 per cent below the August 29 figure of 294,587. The decline occurred among males only, the number of female claimants having increased slightly. The September total was 25 per cent in excess of the 226,530 claimants shown for September 30, 1957.

Males accounted for 69.5 per cent of the September 30 claimant group, compared with 72 per cent for both August 29 this year and September 30 last year.

Postal claimants constituted 27.4 per cent of the September 30 total, down slightly from 28.8 per cent on August 29 but unchanged from September 30 last year. Males consistently show a higher incidence of postal claims than females, the current ratios being 28.1 and 25.9 per cent, respectively. During the winter season of heavy claim the ratio of postal claimants for males is substantially higher than for females.

In a little over three-quarters of the initial and renewal claims cleared during the month the claimant was considered entitled to benefit. The qualifying ratio was considerably lower for initial than for renewal claims (64 and 94 per cent respectively) due mainly to the different purpose served by the two types of claim. Of the 30,096 initial claims classed "not entitled to benefit",

21,578 or 72 per cent failed the minimum contribution requirements. The failure rate on initial claims was 26 per cent for the month under review, 25 per cent in August and 18 per cent in September 1957.

The average weekly number of beneficiaries was estimated at 224,000 for September, virtually unchanged from August but 35 per cent higher than the estimate of 166,000 for September 1957.

September benefit payments amounted to \$19,900,000, which was 2 per cent more than in August but 44 per cent above the \$13,800,000 payments for one year ago.

Weekly payments averaged \$21.10 for September, \$20.79 for August and \$20.80 for September 1957.

### Insurance Registrations

Reports received from local offices of the Unemployment Insurance Commission for September show that insurance books or contribution cards have been issued to 4,432,021 employees who have made contributions to the Unemployment Insurance Fund since April 1, 1958.

At September 30 employers registered numbered 308,619, an increase of 2,426 since August 31.

### Enforcement Statistics

During September, 5,908 investigations were conducted by enforcement officers across Canada. Of these, 4,053 were spot

In a comparison of current employment statistics with those for a previous period, consideration should be given to relevant factors other than numbers such as the opening and closing of seasonal industries, increase in area population, influence of weather conditions, and the general employment situation.

\*See Tables E-1 to E-4 at back of book.

checks of postal and counter claims to verify the fulfilment of statutory conditions, and 99 were miscellaneous investigations. The remaining 1,756 were investigations in connection with claimants suspected of making false statements to obtain benefit.

Prosecutions were begun in 175 cases, 56 against employers and 119 against claimants.\* Punitive disqualifications as a result of claimants making false statements or misrepresentations numbered 1,028.\*

## Unemployment Insurance Fund

Revenue received in September totalled \$22,780,521.77 compared with \$20,078,081.64 in August and \$21,655,746.82 in September 1957. Benefits paid in September totalled \$19,813,097.35 compared with \$19,459,737.42 in August and \$13,786,969.73 in September 1957. The balance in the fund on September 30 was \$643,876,775.25; on August 31 it was \$640,909,350.83 and on September 30, 1957, \$878,248,621.73.

# Decisions of Umpire under the Unemployment Insurance Act

## Decision CUB-1575, October 3, 1958

**Summary of the Main Facts:** The claimant, married, 62 years of age, filed an initial application for benefit on May 1, 1958. He stated that he had worked as a cylinder pressman for a company that two months earlier had moved to a new location about 10 miles from his home, at a wage of \$2.60 an hour, from November 1955 to April 25, 1958, when he voluntarily left because of the transportation problem and the time spent travelling to his home upon completing his work after midnight, as a result of the company's move.

On the evidence before him, the insurance officer disqualified the claimant from receipt of benefit for the period from April 27, 1958, to May 17, 1958, inclusive, because, in his opinion, he had voluntarily left his employment without just cause within the meaning of section 60(1) of the Act. The insurance officer drew attention to the fact that the reduced disqualification was imposed because of the long distance the claimant was required to travel to and from the said employment.

The claimant appealed to a board of referees, stating that while he realized the insurance officer had "made some allowance" in his case, he felt that under the circumstances he had left his employment with just cause within the meaning of the Act. He explained that early in March 1958, the company had moved its plant; that to travel by streetcar and bus to and from the job took almost four hours a day; that he worked on the night shift, finishing at 12.30 a.m.; that the bus stop was located about one mile from the plant and the last bus departed at 12.45 a.m., which

meant that from the time he left his machine, he had only 15 minutes to walk to the bus stop; that in his opinion this was quite an achievement for a man of his age; that in addition to the foregoing, he had a wife who was an invalid and, therefore, besides doing his regular work he had to perform all the household duties; that he felt he had given the job a fair trial during the seven weeks he had worked in the new location but in view of the long travelling time involved and his home responsibilities, he found the situation more than he could cope with.

The board of referees, after having heard a representative of the claimant's union on June 10, 1958, by a unanimous decision disallowed the appeal on the ground that the claimant should have had some assurance of other work before voluntarily leaving the aforementioned employment. In his testimony before the board, the union's representative said that according to the union's rules the claimant would have to separate from his employment before making application for another job.

The interested union appealed to the Umpire and, in addition to basing the case on substantially the same grounds as those contained in the claimant's appeal to the board of referees, stated that on April 18, 1958, the same date as the claimant had given the employer one week's notice of his intention to quit his job, he had notified the union's office of his action and requested that his name be placed on the union's employment rolls as desiring work; that, according to the by-laws of the union, it is not permissible for a member to negotiate either directly or indirectly with an employer regarding employment in his trade; that a member is subject to

\*These do not necessarily relate to the investigations conducted during this period.

penalty or suspension for violation of this or any other section of the union's constitution and by-laws; that it is virtually impossible for one of its members to change his employment without first leaving his present employment, this being especially so during a period of recession such as that which the trade was experiencing at the time of this occurrence; that the claimant had done everything possible to obtain employment prior to severing his employment with the company; and, finally, that as the claimant was unable to solicit his own employment, it was impossible for him to be certain of other employment before leaving his job with the aforementioned company. The union also thought that the travelling time involved to and from the claimant's work and his domestic responsibilities were such as to justify his action in voluntarily leaving his employment.

**Considerations and Conclusions:** The claimant has failed to show that if he had remained in his employment he would, because of the rules of his union, have lost his right to continue to be a member thereof. Neither has he shown that the rules of his union were any material factor in causing him to leave his employment. Therefore, he cannot plead the benefit of the exceptions set forth in section 61 of the Act and I see no reason to take issue with the decision of the board of referees which confirmed the insurance officer's disqualification, particularly as the claimant, who was employed in a highly specialized, highly paid occupation, has failed to show that before leaving his employment he sought assurance of any kind from anybody with respect to other employment.

Finally, and quite apart from the above reasons, the claimant has failed to show that he had no reasonable alternative but to leave his employment by reason of the re-location of the company's plant some further distance away from his residence. The claimant has not shown, as he might well have, that he had carefully examined the possibilities of moving his residence to a point closer to the plant's new location; nor has he shown that any such move would have entailed considerable inconvenience or undue hardship to the extent that it was not a feasible alternative in his case.

For these several reasons, the claimant must be held to have failed to prove he had just cause for voluntarily leaving his employment and my decision is that he was properly disqualified under section 60(1) of the Act. As the disqualification imposed by the insurance officer was for three weeks only, which would appear to have taken

any extenuating circumstances into account, and as such disqualification was unanimously endorsed by the board of referees, I am not disposed to alter its duration.

The union's appeal is disallowed.

### Decision CUB-1578, October 14, 1958

**Summary of the Main Facts:** On April 8, 1958, the claimant, 28 years of age, who resides in R....., Ont., registered for employment as a dictaphone operator and filed an initial application (postal) for benefit, stating that she had worked as secretary for a company at H....., Ont., from October 1950 to February 28, 1958, when she voluntarily left to get married. She stated also that her husband was employed in T..... and that, because of lack of transportation, she could work in R..... only. Her rate of pay at the time of separation from the aforementioned employment was \$290.00 a month.

On April 18, 1958, the insurance officer notified the claimant that she was disqualified from receipt of benefit as from the effective date of her claim, April 6, 1958, because, in his opinion, she was not available for work in that she had restricted the area in which she would accept employment (section 54(2)(a) of the Act).

The claimant appealed to a board of referees on April 28, 1958, stating, *inter alia*, that the only reason she had left her job in H..... was that she had remarried at the end of March and had to live in R.....; that she was willing and able to work and was at present unemployed; that on filing her claim for benefit she had said she would work in R....., not knowing it was such a small area; that she was now willing to accept employment not only in R..... but in O....., W....., and as far south as the city limits; that she was under the impression it was not compulsory for her to take employment in T....., which would necessitate her travelling a total distance of 40 miles a day and inasmuch as she would have to travel by bus, such employment, taking into account such travel time, would entail an 11- or 12-hour day.

The employment officer subsequently commented that opportunities for employment in the area referred to by the claimant were practically non-existent.

The board of referees which heard the case in T..... on May 23, 1958, by a majority decision disallowed the appeal on the grounds that, because of the restriction the claimant had placed on the area in

(Continued on page 1431)

# LABOUR CONDITIONS IN FEDERAL GOVERNMENT CONTRACTS

## Wage Schedules Prepared and Contracts awarded during October

### Works of Construction, Remodelling, Repair or Demolition

During October the Department of Labour prepared 271 wage schedules for inclusion in contracts proposed to be undertaken by departments of the federal Government and its Crown corporations in various areas of Canada, for works of construction, remodelling, repair or demolition. In the same period, a total of 302 contracts in these categories was awarded. Particulars of these contracts appear below.

A copy of the wage schedule issued for each contract is available on request to trade unions concerned or to others who have a *bona fide* interest in the execution of the contract.

(The labour conditions included in each of the contracts listed under this heading provide that:

(a) the wage rate for each classification of labour shown in the wage schedule included in the contract is a minimum rate only and contractors and subcontractors are not exempted from the payment of higher wages in any instance where, during the continuation of the work, wage rates in excess of those shown in the wage schedule have been fixed by provincial legislation, by collective agreements in the district, or by current practice;

(b) hours of work shall not exceed eight in the day and 44 in the week, except in emergency conditions approved by the Minister of Labour;

(c) overtime rates of pay may be established by the Minister of Labour for all hours worked in excess of eight per day and 44 per week;

(d) no person shall be discriminated against in regard to employment because of his race, national origin, colour or religion, nor because he has made a complaint with respect to alleged discrimination.)

### Contracts for the Manufacture of Supplies and Equipment

Contracts awarded in October for the manufacture of supplies and equipment were as follows:

| Department               | No. of Contracts | Aggregate Amount |
|--------------------------|------------------|------------------|
| Defence Production ..... | 110              | \$ 487,747.00    |
| Post Office .....        | 19               | 274,896.22       |
| R.C.M.P. ....            | 1                | 423.00           |

The Fair Wages and Hours of Labour legislation of the federal Government has the purpose of insuring that all Government contracts for works of construction and for the manufacture of supplies and equipment contain provisions to secure the payment of wages generally accepted as fair and reasonable in each trade or classification employed in the district where the work is being performed.

The practice of Government departments and those Crown corporations to which the legislation applies, before entering into contracts for any work of construction, remodelling, repair or demolition, is to obtain wage schedules from the Department of Labour, showing the applicable wage rate for each classification of workmen deemed to be required in the execution of the work. These

wage schedules are thereupon included with other relevant labour conditions as terms of such contracts to be observed by the contractors.

Wage schedules are not included in contracts for the manufacture of supplies and equipment because it is not possible to determine in advance the classifications to be employed in the execution of a contract. A statement of the labour conditions which must be observed in every such contract is however, included therein and is of the same nature and effect as those which apply in works of construction.

Copies of the federal Government's Fair Wages and Hours of Labour legislation may be had upon request to the Industrial Relations Branch of the Department of Labour, Ottawa.

(The labour conditions included in contracts for the manufacture of supplies and equipment provide that:

(a) all persons who perform labour on such contracts shall be paid such wages as are currently paid in the district to competent workmen; and if there is no current rate, then a fair and reasonable rate; but in no event shall the wages paid be less than those established by the laws of the province in which the work is being performed;

(b) the working hours shall be those fixed by the custom of the trade in the district, or if there be no such custom, then fair and reasonable hours;

(c) overtime rates of pay may be established by the Minister of Labour for all hours worked in excess of those fixed by custom of the trade in the district, or in excess of fair and reasonable hours;

(d) no person shall be discriminated against in regard to employment because of his race, national origin, colour or religion, nor because he has made a complaint with respect to alleged discrimination.)

## Wage Claims Received and Payments Made during October

During October the sum of \$13,951.59 was collected from eight contractors for wage arrears due their employees arising out of the failure of the contractors, or their sub-contractors, to apply the wage rates and other conditions of employment required by the schedule of labour conditions forming part of their contracts. This amount has been or will be distributed to the 311 workers concerned.

## Contracts Containing Fair Wage Schedules Awarded during October

(The labour conditions of the contracts marked (\*) contain the General Fair Wages Clause providing for the observance of current or fair and reasonable rates of wages and hours of labour not in excess of eight per day and 44 per week, and also empower the Minister of Labour to deal with any question which may arise with regard thereto.)

### Department of Agriculture

*Manitou Man:* Don Middleton, construction of earthfill dam—Mary Jane Creek. *Near Loreburn Sask:* Evans Construction Co Ltd, construction of access road to construction headquarters, South Saskatchewan River Damsite. *near Hillspring Alta:* Assiniboia Construction Co Ltd, construction of diversion tunnel for Waterton Dam, St. Mary River project.

### Atomic Energy of Canada Limited

*Chalk River Ont:* M Sullivan & Son Ltd, construction of south extension to Bldg 465.

### Central Mortgage and Housing Corporation

*Chatham N B:* Eastern Landscape Co Ltd, site improvement & planting at sewage disposal plant, St Margaret's (DND 6/54). *Oromocto N B:* Key Land Services Ltd, site improvement & planting for 100 housing units (FP 1/56). *Chicoutimi Que:* Dallaire & Fils, \*repairs to stairs (Project 3/49). *Montreal Que:* Canit Construction Ltd, construction of 5 high rise apartment bldgs, central heating plant & distribution system (Phase 1); Alphonse Gratton Inc, construction of 9 apartment blocks & 1 block row housing (Phase 2). *Barriefield Ont:* Raymond C Crowe & Co, site improvement & planting for 19 apartment bldgs (DND 6/53). *Brockville Ont:* Raymond C Crowe & Co, site improvements & planting for 26 housing units (FP 4/57). *Hamilton Ont:* Evans Contracting Co, site improvement & planting for 87 housing units (FP 4/55); Evans Contracting Co, site improvement & planting for 76 housing units (FP 4/55). *Petawawa Ont:* Emmett Clouthier, \*clearing, grubbing & burning. *Stratford Ont:* Carl C Schaum, site improvement & planting for 24 housing units (FP 3/57). *Toronto Ont:* Evans Contracting Co Ltd, site improvement & planting, Regional office bldg; Evans Contracting Co Ltd, site improvement & planting for 6 apartment bldgs, Lawrence Heights. *Windsor Ont:* R F Walsh, \*packing aluminum windows (12/48 & 13/49). *Cold Lake Alta:* May & Son Nurseries, site improvement & planting for 300 housing units (DND 4/55). *Belmont Park B C:* Farmer Construction Ltd, construction of 6 room school (DND 4/57).

### Department of Citizenship and Immigration

*Shubenacadie Indian Agency N S:* W J Christie, plumbing renovations, Shubenacadie Indian day school. *Pointe Bleue Indian Agency Que:* J P Pelletier Inc, installation of water works system, Pointe Bleue Reserve. *Kenora Indian Agency Ont:* Lindstrom & Nilson Ltd, installation of dishwashing unit, Cecilia Jeffrey IRS. *Sault Ste Marie Indian Agency Ont:* Modern Plumbing & Heating, installation of new heating & laundry

boilers, Fort Frances IRS. *Sioux Lookout Indian Agency Ont*: Paul G Wallin, reconstruction of sewage disposal system, McIntosh IRS. *Six Nations Indian Agency Ont*: Anguish & Whitfield Ltd, supply & installation of automatic sprinkler system, Mohawk IRS. *Meadow Lake Indian Agency Sask*: Gullickson & Benson Construction Co, construction of roothouse, Onion Lake IRS. *Blackfoot Indian Agency Alta*: Lundmark Construction Ltd, installation of water supply system & shower, Old Sun IRS. *Blood Indian Agency Alta*: Remington Construction Co Ltd, installation of sewage disposal to lagoon, St Pauls IRS. *Edmonton Indian Agency Alta*: J G Brown & Son, floor covering, Edmonton IRS. *Lesser Slave Lake Indian Agency Alta*: Dandurand & Desaulniers, installation of cupboards & shelving, Wabasca IRS. *Stony-Sarcee Indian Agency Alta*: Industrial Plumbers Ltd, plumbing installation, Morley IRS. *Vancouver Indian Agency B C*: Smith & Peterson Construction Ltd, installation of sewage disposal system, Sechelt IRS. *Stuart Lake Indian Agency B C*: R Patterson, exterior painting, masonry repairs & carpentry work, Lejac IRS. *West Coast Indian Agency B C*: Port Alberni Home Builders Ltd, construction of staff residences, Alberni IRS.

### Defence Construction (1951) Limited

*Torbay Nfld*: Newhool & Morgan Engineering Ltd, construction of transmitter bldg, RCAF Station. *Summerside P E I*: Robb Engineering Works Ltd, supply & erection of structural steel for cantilever hangar, RCAF Station; Forbes & Sloat Ltd, construction of roads, etc, RCAF Station. *Summerside P E I & Greenwood N S*: Richards-Wilcox Canadian Co Ltd, supply & erection of electrically operated hangar doors, RCAF Stations. *Bedford Basin N S*: Frost Steel & Wire Co (Quebec) Ltd, supply & erection of chain link fence, RCN Magazine. *Cornwallis N S*: Cardinal Painting & Decorating Co Ltd, interior painting of P & RT bldg, Naval Base. *Dartmouth N S*: Quemar Co Ltd, construction of masonry bldg, Bedford Basin Magazine. *Greenwood N S*: Robb Engineering Works Ltd, supply & erection of structural steel for cantilever hangar, RCAF Station. *Halifax N S*: Fundy Construction Co Ltd, construction of lumber storage bldg, HMC Dockyard; Cameron Contracting Ltd, construction of concrete reservoir with booster pump, etc, Osborne Head; D A Cummings Ltd, re-roofing bldg S 15, HMCS *Stadacona*; McDonald Construction Co Ltd, renewal of exterior siding & other related work on Administration Bldg (Bldg D-34), HMC Dockyard; Standard Construction Co Ltd, construction of leanto bldg D66, HMC Dockyard. *Shelburne N S*: Acadia Construction Ltd, construction of terminal bldg & generator bldg, RCN Station. *Chatham N B*: Cameron Contracting Ltd, construction of standard auxiliary power unit bldg, RCAF Station. *Bagotville Que*: J A Simard, construction of standard auxiliary power unit bldg, RCAF Station. *Longue Pointe Que*: Canit Construction Ltd, construction of dynamometer bldg. *St Hubert Que*: Rapid Construction Ltee, construction of standard auxiliary power unit bldg, RCAF Station. *Valcartier Que*: Allan Construction Ltd, construction of command medical equipment depot & inflammable stores bldg; C Jobin Ltee, construction of WO's & Sgts' mess. *Camp Borden Ont*: Barclay Construction Ltd, construction of vehicle garage. *Clinton Ont*: Dickson Larkey Ltd, replacement of underground steam distribution system. *Ottawa Ont*: Ottawa Hydro Electric Commission, \*installation of electric service to curling rink, HMCS *Carleton*; Thomas Fuller Construction Co Ltd, construction of National Defence Medical Centre. *Uplands Ont*: North Shore Construction Co Ltd, construction of roads, walks & parking areas, RCAF Station; Metallierete Floor Co Ltd, resurfacing concrete floors in Armament Bldgs, RCAF Station. *Fort Churchill Man*: McNamara Construction Ltd & Henry J Kaiser Co (Canada) Ltd, construction of runway extension, taxiway & parking aprons & aerodrome lighting facilities; Henry J Kaiser Co (Canada) Ltd, McNamara Construction Co Ltd & The Tower Co Ltd, construction of Air Force refuelling base (various bldgs, services & POL installation). *Portage La Prairie Man*: Shaver Construction Co Ltd, erection of control tower bldg & outside services, RCAF Station; Tallman Construction Co Ltd, reconstruction of access road, RCAF Station. *Calgary (Sarcee) Alta*: Poole Construction Co Ltd, construction of unit drill hall, medical equipment depot & inflammable stores bldg. *Edmonton Alta*: Burns & Dutton Co Ltd, erection & finishing of prefabricated steel garages, Griesbach Barracks. *Namao Alta*: New West Construction Co Ltd, construction of standard control tower & outside services, RCAF Station. *Penhold Alta*: Sandquist Construction Ltd, erection of control tower bldg & outside services, RCAF Station. *Comox B C*: A & B Construction Co Ltd, construction of standard auxiliary power unit bldg, RCAF Station. *Near Taylor B C*: Dominion Bridge Co Ltd, construction of superstructure for Peace River Bridge, Alaska Highway.

## Building and Maintenance

*Summerside P E I*: Curran & Briggs Ltd, resurfacing of walks & driveways in PMQ area. *Greenwood N S*: Bedard-Girard Ltd, rehabilitation of electrical distribution system, RCAF Station. *Halifax N S*: Martin & Moore Ltd, exterior painting of 37 bldgs, Windsor Park. *St Margarets (Chatham) N B*: Melvin J Hayes, grading & seeding, RCAF Station. *St Hubert Que*: Kredl Roofing Corp, re-roofing of hanger No 12, RCAF Station. *St Johns Que*: Kredl Roofing Corp, replacement of roof covering & flashings on Hangar No 101. *Ste Sylvestre Que*: Dominion Transport Moving & Storage Reg'd, \*crating & transportation of boiler & ancillary equipment to RCAF Station, Moisie. *Camp Borden Ont*: W A Moffatt Co, re-roofing of bldgs E141 to 146 inclusive. *Centralia Ont*: Walmsley Bros Ltd, replacement of hangar apron, RCAF Station. *Kingston Ont*: Will-Mac Construction Ltd, construction of tennis courts, RMC. *Calgary Alta*: Wm Clark Roofing & Bldg Supplies Ltd, re-roofing & re-flashing of hangar No 39 & two leantos. *Edmonton Alta*: New West Construction Co Ltd, construction of respirator testing chamber bldg, Griesbach Barracks.

## Department of Defence Production

*Summerside P E I*: M F Schurman Co Ltd, exterior painting of 62 PMQs, RCAF Station. *Cornwallis N S*: Banfield & Miles, interior painting of RCN Hospital, Bldg No 7, HMCS *Cornwallis*; Marsh Plumbing & Heating, installation of plumbing system, South Officers' Block, Bldg No 31-2, HMCS *Cornwallis*. *Camp Gagetown N B*: Saint John Iron Works Ltd, \*painting of smokestack, Central Heating Plant, Bldg B-11. *Moncton N B*: G E Carr, interior painting & floor refinishing of 24 PMQs, HMCS *Coverdale*. *Quebec Que*: Arthur Tessier, replacement of linoleum & tile, Armoury Bldg, La Citadelle. *St Sylvestre Que*: Phessis Construction Ltee, replacement of curb, RCAF Station. *Barriefield Ont*: L M Welter Ltd, installation of underground communication system (line training), Royal Canadian School of Signals, Vimy Barracks. *Hagersville Ont*: Totum Construction Co Ltd, enlargement of steelox bldg, No 45, Army Camp. *Ottawa Ont*: Wm D'Aoust Construction Ltd, replacement of roof slabs on septic tank etc, Connaught Rifle Range. *Picton Ont*: Lundy Fence Co Ltd, erection of chain link security fence, Old Camp. *Rockcliffe Ont*: Metallierete Floor Co Ltd, finishing concrete slab for garage floors, RCAF Station. *Trenton Ont*: Argo Roofing Co Ltd, reroofing of four bldgs, No 6 Repair Depot, RCAF Station. *Camp Shilo Man*: Maple Leaf Construction Ltd, asphalt surfacing of driveways, Townsite area; Maple Leaf Construction Ltd, landscaping of centre strip, Boulevard, Kingston Ave; Barr's Transfer, \*supply, loading & tailspreading of gravel on range roads, Shilo Military Camp (areas I & III); Burton Construction Co Ltd, \*supply, loading & tailspreading of gravel on range roads, Shilo Military Camp (Area II). *Fort Churchill Man*: Canada Catering Co Ltd, catering. *Winnipeg Man*: Twin Cities Painting & Building Cleaning Co, exterior painting of nine bldgs, Fort Osborne Barracks; Venus Venetian Blind Co Ltd, installation of venetian blinds in PMQs, Fort Osborne Barracks area. *Regina Sask*: A P Green Fire Brick Co Ltd, repairs to furnace refractory in No 2 & No 3 boilers, DND heating plant; Lesliès Painting Contractors, interior painting of 211 Base Workshop, RCME. *Edmonton Alta*: New Method Concrete & Builders Ltd, \*construction of addition to locker room, Bldg No H-15, Griesbach Barracks. *Belmont Park B C*: Colebank, Noble & Davies Ltd, installation of cast iron pipe, Seward Defence. *Lynn Creek B C*: Skyline Roofing Ltd, reroofing of bldg No 2. *Victoria B C*: Geo E Goodwin, interior painting of PMQs, Work Point Barracks. *North West Highway System B C*: B C Department of Highways, \*application of traffic lines between Mile 14 & Mile 35.

## National Harbours Board

*Halifax N S*: Standard Paving Maritime Ltd, crushed gravel surfacing of Pier A-1 & paving Berth 35 & Pier A-1, roadway & approaches, Ocean Terminals.

## Department of National Revenue

*Frelighsburg Que*: Miquelon & Simard, construction of customs officer's residence. *Hereford Road Que*: Morin Construction Ltd, construction of office bldg. *Haskett Man*: G F Thompson, construction of customs examining warehouse. *Treelon Sask*: Weyburn Builders & Supplies, construction of customs officer's residence. *Nelway B C*: Inland Construction, construction of office bldg.

## Department of Northern Affairs and National Resources

*Prince Edward Island National Park P E I:* Nelson Good, \*supply & installation of heating system, Warden's residence; Curran & Briggs Ltd, \*excavation & backfill for water line trench, Green Gables Golf Course. *Baddeck N S:* Leo's Appliances, \*supply & installation of new heating system, Alexander Graham Bell Museum; Leonard Harvey, \*supply, placement & compaction of fill material & topsoil along entrance road, Alexander Graham Bell Museum. *Grand Pre National Historic Park N S:* Church Electric, \*supply & installation of electric wiring; Willie E Smith, \*construction of combined workshop, garage & storage bldg. *Port Royal N S:* Valley Services Ltd, \*installation of new electrical service, Champlain Habitation. *Fort Beausejour National Historic Park N B:* Gordon F Goodwin, \*supply & installation of drinking fountains & two hot water tanks, Aulac; Rayworth Electrical Service, \*supply & installation of ventilating fan, Aulac. *Fort Lennox National Historic Park Que:* Roger Electric Inc, installation of underground electrical distribution system; Antonio Levesque, \*plastering ceiling, Museum Bldg. *Fort Wellington National Historic Park Ont:* Stewart & Broad Construction Co Ltd, \*supply & installation of friseses, Prescott. *Lower Fort Garry Historic Park Man:* H Dukelow, installation of underground wiring system. *Prince Albert National Park Sask:* Patrick Construction Co Ltd, construction of garage. *Riding Mountain National Park Alta:* R A McGimpsey, \*installation of heating system, staff quarters bldg. *Waterton Lakes National Park Alta:* Schow Electric, \*electrical wiring, Warden's residence; Hall Bros, \*supply & installation of heating system & plumbing, Warden's residence.

## Department of Public Works

& storage bldg. *St Laurent, I O, Que*: J B Vaillancourt, construction of protection wall. *Ste Marie de Beauce Que*: South Shore Construction Reg'd, construction of protection wall. *St Simon Que*: J M G Construction Inc, wharf repairs. *Sept Iles Que*: Gulf Maritime Construction Ltd, construction of retaining wall. *Sorel Que*: Tracy Construction Inc, construction of retaining wall. *Tracy Que*: Lucien Danis, construction of retaining wall. *Varennes Que*: Pierre de Martigny, repairs to protection wall. *Vercheres Que*: Henri Louis Martel, construction of retaining wall. *Big Bay Ont*: R A Blyth, wharf repairs. *Burlington Ont*: Sir Robert McAlpine (Canada) Ltd, construction of Burlington Canal lift bridge substructure & Canal wall bulkhead. *Chatham Ont*: Wm L Green, construction of RCMP detachment quarters. *Kenora Ont*: Bergman & Nelson Ltd, construction of wharf. *Kingston Ont*: James Kemp Construction Ltd, demolition of Crawford bldg & construction of new Customs Wharf office. *Mallorytown Ont*: Robert D Mackey Construction Co Ltd, wharf reconstruction. *Moose Factory Ont*: Universal Plumbing & Heating Co Ltd, improvement of municipal services, phase 7, & revisions to heating mains. *Ottawa Ont*: L Beaudoin Construction Ltd, application of new tar & gravel roof with related flashing & masonry repairs, Science Service bldg, Central Experimental Farm; John Colford Contracting Co Ltd, supply & installation of warm air heating unit & air conditioning apparatus in Rooms 15, 17, 19 & 21, Dominion Bureau of Statistics bldg, Tunney's Park; L Beaudoin Construction Co Ltd, general roofing & related flashing & coping repairs, 75 St Patrick St; Ontario Building Cleaning Co, repairs to Norlite Bldg; L Beaudoin Construction Ltd, repointing & resetting stonework, East Block Courtyard, Parliament Bldgs; L Beaudoin Construction Ltd, conversion of Room 660, Centre Block, Parliament Bldgs, to washroom; A Lanctot Construction Co Ltd, alterations & repairs at 479 Bank St; Roland Lariviere Ltd, repointing & repairs to stonework, Geodetic Survey bldg, Central Experimental Farm. *Pelee Island Ont*: Pinch Electric Co, harbour improvements (lighting—wharf & warehouse). *Peterborough Ont*: Mortlock Construction Ltd, construction of UIC Bldg. *Port Maitland Ont*: The Cementation Co (Canada) Ltd, repairs to piers. *Altona Man*: A W Peterson Construction Co Ltd, construction of Post Office bldg. *Fisher River Man*: Louis Ducharme & Associates Ltd, construction of nurses' residence. *Pine Falls Man*: North American Buildings Ltd, construction of nurses' residence, Indian Hospital. *Transcona Man*: Steel Structures (Western) Ltd, erection of prefabricated metal bldg for Grain Inspection Board. *Winnipeg Man*: Peter Leitch Construction Ltd, construction of controlled temperature rooms, Science Service Laboratory, Dept of Agriculture; Swanson Construction Co Ltd, repairs & improvements, Immigration Hall. *Assiniboia Sask*: Pals Construction Ltd, construction of RCMP detachment quarters. *Hanley Sask*: Shoquist Construction Ltd, construction of RCMP detachment quarters. *Maidstone Sask*: C M Miners Construction Co Ltd, construction of RCMP detachment quarters. *Nipawin Sask*: C M Miners Construction Co Ltd, construction of RCMP detachment quarters. *Prince Albert Sask*: Royal Davis, additions & alterations to Immigration bldg. *Banff National Park Alta*: Shaw Construction Co Ltd, application of base course & prime, Mile 22 to Mile 46, Banff-Jasper Highway; Storms Contracting Co (Pacific) Ltd, grading, culverts, base course & prime, Mile 74 to Mile 82.3, Banff-Jasper Highway. *Banff National Park Alta & Yoho National Park B C*: Cunningham & Shannon Ltd, removal of rock bluff at junction of Trans-Canada & Banff-Jasper highways, Banff National Park, Alta, & construction of access road, bridge & approaches, Kicking Horse Pass, B C. *Derwent Alta*: Adanac Contracting & Developing Ltd, construction of RCMP detachment quarters. *Manning Alta*: Lloyd Christenson Ltd, construction of RCMP detachment quarters. *Ahousat B C*: Ivan Ossinger, wharf repairs. *Chemainus B C*: Pacific Pile Driving Co Ltd, wharf improvements. *Dodge Cove B C*: Skeena River Pile Driving Co, construction of float extension. *Fanny Bay B C*: Victoria Pile Driving Co Ltd, construction of approach & wharf repairs. *Gibson's Landing B C*: Greenlees Pile Driving Co Ltd, harbour improvements. *Heriot Bay B C*: Horie & Tynan Construction Ltd, float extension. *New Westminster B C*: Vancouver Pile Driving & Contracting Co Ltd, construction of pontoon slipway, Annacis Slough. *Ocean Falls B C*: Horie & Tynan Construction Ltd, construction of floats. *Shawinigan Lake B C*: Seaward Construction Ltd, construction of RCMP detachment quarters. *South Pender B C*: Fraser River Pile Driving Co Ltd, wharf reconstruction. *Vancouver B C*: E H Shockley & Son Ltd, construction of science service laboratory bldg, University of British Columbia; Turnbull & Gale Construction Co Ltd, installation of sanitary sewer services to Government laboratories, UBC Campus. *Victoria B C*: G H Wheaton Ltd, construction of Prosthetic Services Bldg, DVA Hospital. *Port Resolution N W T*: Progress Electric Ltd, installation of electrical services in various bldgs.

## Contracts Containing the General Fair Wages Clause

*Fishing Cove P E I:* Maritime Dredging Ltd, dredging. *Liverpool N S:* Everett Refuse, alterations to federal bldg. *Lower Sandy Point N S:* Kenney Construction Co Ltd, dredging. *McAdam N B:* A W Thompson, renovations to federal bldg. *Grindstone Que:* Fred Lapierre, interior painting in federal bldg; Fred Lapierre, basement alterations in federal bldg. *La Malbaie Que:* Gerard Savard, construction of curbs & fence around federal property. *La Sarre Que:* Adelard Pelletier Inc, construction of fence, federal bldg. *Little English Bay (Baie Comeau) Que:* McNamara Construction Co Ltd, dredging. *Nicolet River Que:* Theode Robidoux Inc, dredging. *Quebec Que:* J P Lajeunesse Inc, repairs to roof, Temporary Bldg; Talbot, Hunter Eng & Boiler Works Ltd, repairs to boiler, Temporary Bldg. *St Eustache Que:* Lionel Berthelet, repairs to cornices & fence, Federal Bldg. *Yamachiche River Que:* Theode Robidoux Inc, dredging. *Arnprior Ont:* M Sullivan & Son, construction of fence, Civil Defence College. *Hamilton Ont:* Sherwood Construction Co, general repairs, Revenue Bldg. *Ottawa Ont:* A C McDonald & Sons, installation of light fixtures, Storage Archives Bldg, Tunney's Pasture; Alf Grodde Ltd, redecoration at 38 Bank St; Unida Plumbing & Heating Co, installation of floor drains, National Research Bldg, Sussex Drive; A Bruce Benson, structural repairs, "A" Bldg, Cartier Square; Leopold Beaudoin Construction, washroom repairs, Senate Chambers, Parliament Bldgs; Roland Lariviere Ltd, repairs to gate, Senate Chambers; Roland Motard Electric, installation of electrical power outlets, Finance Bldg, Tunney's Pasture; J Strathom, sidewalk repairs, Central Experimental Farm; F E Cummings, alterations to Woods-Canadian Bldg; Edward Levesque & Co, redecoration, No 8 Temporary Bldg; Oak Construction Co, installation of railings & counters, Mortimer Bldg; Roy Soderlind & Co, electrical rewiring, 45 Spencer St; Dominion Electric Protection, installation of fire alarm system, Public Archives; Dominion Electric Protection, installation of fire alarm system, Norlite Bldg; Leopold Beaudoin Ltd, construction of catwalks, Forest Products Laboratory, Montreal Road. *Point Traverse Ont:* Ontario Marine & Dredging Ltd, dredging. *Toronto Ont:* A C Horn Co Ltd, stonework repairs at City Delivery Bldg; Huntley Steeplejack Co, repairs to windows, City Delivery Bldg; Taylor Bros, installation of partitions in Prudential House; Richard & B A Ryan, repairs to roof, Postal Station "A". *Wheatley Ont:* Granite Construction Ltd, paving at federal bldg. *Winnipeg Man:* Malcolm Construction Co, paving at Immigration bldg. *Saskatoon Sask:* Shoquist Construction Co, construction of storage space, Bldg No 8. *Nanaimo B C:* V B Johnson Ltd, landscaping, Federal Bldg. *Vancouver B C:* B C Marine Engineers & Shipbuilders Ltd, overhaul of PWD Snagboat *Essington I.*

## Department of Transport

*Gander Nfld:* McNamara Construction Co Ltd, additional airport development; Kenney Construction Co Ltd, alterations & extension to Signal Centre bldg. *Near Lark Harbour Nfld:* Harold R Sheppard, construction of NDB bldg, etc, at Devil's Head. *Port Hastings N S:* Clarence W LeLacheur, erection of canal superintendent's dwelling; T C Gorman (NS) Ltd, construction of north entrance wall at Canso Lock. *Moncton N B:* Hi-Lite Electric Ltd, installation of control cables for AASR. *Montreal Que:* J R Robillard Ltd, alterations to domestic Terminal bldg, Airport. *Pointe des Monts Que:* Arthur Lafontaine & Fernand Belanger, construction of power house & related works. *St Joseph d'Alma Que:* Jean-Joseph Riverin Ltee, airport development. *Brockville Ont:* McNamara Construction Co Ltd, construction of 6 concrete piers for navigation lights. *Dunnville Ont:* S G Powell Shipyard Ltd, \*construction of two self-propelled steel scows for use in Eastern waters. *Earlton Ont:* La Societe d'Entreprises Generales Ltee, additional airport development. *Fort William Ont:* Davidson & Exell, additions to water supply system, Lakehead Airport. *Kinburn Ont:* H S Clark, construction of radio beacon bldg & related work. *Malton Ont:* Roy Beattie Construction, construction of sewage disposal system for new hangar area; Modern Building Cleaning Service of Canada Ltd, cleaning of Air Terminal bldgs, Toronto Airport. *North Bay Ont:* Bedard-Girard Ltd, installation of readiness button lighting, Airport. *Pagwa Ont:* J M Fuller Ltd, general repairs to radio bldgs, Radio Range Station. *Port Colborne Ont:* E B Magee Ltd, \*construction of two landing barges for use at St John's, Nfld. *Thorold Ont:* Lorenzo Contracting Co Ltd, construction of intake & conduit from Welland Ship Canal to Second Welland Canal. *Wallaceburg Ont:* Lee Marine Ltd, \*removal of five wrecks, Stag Island, St Clair River. *Beechy Sask:* Swift Construction Co Ltd, construction of radio beacon bldg, omni range, dwelling, etc. *Swift Current Sask:* Swift Construction Co Ltd, construction of airport boundary fencing. *Grande Prairie Alta:* Everall Engineering Ltd, paving of Airport access

road; D & B Construction, construction of double staff dwelling & related work. *New Westminster B C*: Star Shipyard (Mercer's) Ltd, \*construction of self-propelled scow. *Patricia Bay B C*: Perini (Pacific) Ltd, additional airport development. *Penticton B C*: Storms Contracting Co (Pacific) Ltd, additional airport development. *Port Hardy B C*: Industrial Water Supply Co Ltd, \*drilling, developing & completing well at Airport. *Frobisher Bay N W T*: C A Pitts General Contractor Ltd, construction of bldgs at Townsite. *Snag Y T*: Rush & Tompkins (Canada) Ltd, reconstruction of access road. *Teslin Y T*: Dawson & Hall Ltd, supply & erection of prefabricated metal storage & carpenter shop bldg & related work.

# STRIKES AND LOCKOUTS

## October 1958

During October, 40,037 workers in Canada were involved in 48 work stoppages resulting in a time loss of 828,890 man-days. Although the number of work stoppages decreased slightly from the preceding month, the time loss was up by more than 300,000 man-days, amounting to the highest monthly total recorded since July 1952\*.

The substantial increase in time loss from September was the result of three large work stoppages that began in previous months and continued throughout October. These included the strike of 11,000 workers employed by the International Nickel Co. in Sudbury and Port Colborne, and stoppages involving 15,000 construction workers in Toronto and 8,000 steelworkers in Hamilton. These three stoppages caused more than nine-tenths of the total time loss during October. (The steel strike in Hamilton and the dispute involving construction workers in Toronto were settled in early November.)

Of the 48 work stoppages in progress during October, 16 involved 100 or more workers. Ten of these larger work stoppages began prior to October and five of the ten were still in progress at the end of the month. Of the six larger work stoppages

\*Table G-1 at the back of this issue compares, on a monthly basis, the number of strikes and lockouts in existence during 1958 and 1957. The approximate number of workers involved and the time loss resulting are also compared on a monthly basis and the number of strikes and lockouts beginning during each month is indicated.

Table G-2 deals more specifically with the stoppages involving 100 or more workers in existence during 1958. The approximate time loss, together with the number of workers involved, is indicated for each stoppage. The major issues and the major terms of settlement, if the stoppage has ended, are also mentioned. Other details include such information as the dates on which the stoppages began and ended and the industries in which they occurred.

that started during October, only one was still in progress at the end of the month.

During October, Ontario had by far the highest time loss; in fact, close to 95 per cent of the total time loss for the month was recorded in that province, where the three largest stoppages mentioned earlier were in progress.

In Quebec, approximately two-thirds of the recorded time loss was caused by a strike involving 1,800 shipbuilding workers in Lauzon. This stoppage ended on October 20.

TABLE 1—NUMBER OF STRIKES AND LOCKOUTS, WORKERS AND TIME LOSS INVOLVED, BY INDUSTRY, OCTOBER 1958.

| Industry           | No. of<br>Strikes and<br>Lockouts | No. of<br>Workers | Time<br>Loss |
|--------------------|-----------------------------------|-------------------|--------------|
| Mining .....       | 3                                 | 11,426            | 252,325      |
| Manufacturing .... | 24                                | 12,283            | 230,775      |
| Construction ..... | 7                                 | 15,295            | 339,310      |
| Transportation ... | 4                                 | 154               | 1,705        |
| Trade .....        | 3                                 | 73                | 1,335        |
| Service .....      | 7                                 | 806               | 3,440        |

TABLE 2—NUMBER OF STRIKES AND LOCKOUTS, WORKERS AND TIME LOSS INVOLVED, BY PROVINCE, OCTOBER 1958.

| Province            | No. of<br>Strikes and<br>Lockouts | No. of<br>Workers | Time<br>Loss |
|---------------------|-----------------------------------|-------------------|--------------|
| Nova Scotia .....   | 4                                 | 620               | 9,045        |
| Quebec .....        | 8                                 | 2,677             | 34,460       |
| Ontario .....       | 28                                | 35,897            | 781,310      |
| Manitoba .....      | 2                                 | 380               | 1,530        |
| Alberta .....       | 2                                 | 254               | 955          |
| British Columbia..  | 3                                 | 119               | 1,500        |
| More than one Prov. | 1                                 | 90                | 90           |

Work stoppages, mostly small, were also reported from many other provinces but in none of these did the number of man-days lost exceed the 10,000 mark. In the largest strike outside Ontario and Quebec, 170 quarry workers were idled in Wentworth and Hantsport, N.S.; this stoppage, which started on October 31, 1957, was still in progress at the end of October 1958.

# PRICES AND THE COST OF LIVING

## Consumer Price Index, November 1958

The consumer price index (1949=100) rose 0.2 per cent from 126.0 to 126.3, an all-time high, between the beginning of October and November 1958. A year ago the index stood at 123.3\*.

Although four of the five group indexes were higher in the month, an increase of 1.0 per cent in other commodities and services accounted for most of the change in the total index. This latter group rose from 131.8 to 133.1, with most of this increase resulting from the initial pricing of 1959 passenger cars, which showed a rise of approximately 5 per cent over introductory prices on 1958 models a year ago, and 12 per cent over October prices of 1958 models. A scatter of price increases occurred in other items in this group, namely, hospital rates, theatre admissions, pharmaceuticals, cigarette tobacco, haircuts, and personal care items.

The food index declined from 123.4 to 123.2 as prices were lower for pork, chicken, grapefruit, apples, and some canned fruits. Higher prices were reported for beef, bananas, oranges, tomatoes, potatoes, and celery.

The shelter index increased from 139.6 to 139.8 as both the rent and home-ownership components rose fractionally.

The clothing index moved from 109.9 to 110.4, mainly as a result of a number of prices moving up from previous month's sale prices. Some piece goods were higher.

The household operation index rose from 121.3 to 121.5 as higher prices for coal, household utensils and equipment and some household supplies more than balanced sale price declines on furniture and floor coverings.

Group indexes one year earlier (November 1957) were: food, 120.2, shelter 136.3, clothing 109.8, household operation 120.5, and other commodities and services 127.7.

## City Consumer Price Indexes, October 1958

Consumer price indexes (1949=100) rose in all ten regional cities between the beginning of September and October 1958, with increases ranging from a fractional 0.1 per cent in Saskatoon-Regina to 0.6 per cent in both Ottawa and Vancouver\*.

Food indexes were higher in all regional cities except St. John's (down 0.7 per cent) and Toronto (unchanged). Beef prices rose in all regions while pork prices recorded an even more substantial decline in most regional cities. Most imported fruits and vegetables, particularly oranges and grapefruit, were higher whereas domestically grown produce showed lower prices, especially apples and potatoes. Egg prices declined in most eastern cities but were up generally in western cities. Coffee continued to decline in most regional cities. Bread prices increased in Vancouver.

The shelter index was unchanged in five of the ten regional cities and rose fractionally in the other five, with an increase of 0.3 per cent the largest change.

Clothing indexes were unchanged in two cities, Saint John and Saskatoon-Regina, and higher in all other eight regional cities, increases ranging from 0.1 per cent in Toronto to 1.2 per cent in Vancouver.

Household operation indexes rose in eight of the ten regional cities; an increase of 0.9 per cent in Saint John was the largest change. Indexes for both St. John's and Saskatoon-Regina were unchanged.

Increases occurred in all ten regional cities for the other commodities and services indexes, with changes ranging from 0.1 per cent in Saint John to 1.6 per cent in St. John's.

Regional consumer price index point changes between September and October were as follows: Ottawa +0.7 to 126.4; Vancouver +0.7 to 126.7; Halifax +0.6 to 123.7; Edmonton-Calgary +0.6 to 122.4; Saint John +0.5 to 126.2; Montreal +0.5 to 126.6; St. John's +0.2 to 112.7†; Toronto +0.2 to 128.9; Winnipeg +0.2 to 123.5; Saskatoon-Regina +0.1 to 123.1.

## Wholesale Prices, October 1958

The general wholesale price index (1935-39=100) eased slightly -0.1 per cent—between September and October, moving from 227.1 to 226.9, which is 0.8 per cent higher than October 1957. Four of the major groups declined and the remaining four advanced.

\*See Table F-1 at back of book.

†On base June 1951=100.

\*See Table F-1 at back of book.

# CONSUMER PRICE INDEX

Index 1949=100

Index 1949=100

Yearly Averages

Monthly Indexes

Vegetable products moved 0.7 per cent lower from 198.2 to 196.9, wood products decreased 0.6 per cent from 301.5 to 299.8, textile products moved down 0.5 per cent from 228.2 to 227.0 (the lowest point since December 1955), and animal products declined 0.1 per cent from 246.1 to 245.8.

Non-ferrous metals rose—the third successive increase—2.4 per cent from 165.6 to 169.5, non-metallic minerals advanced 0.4 per cent from 187.5 to 188.2, iron products moved up 0.2 per cent from 251.6 to 252.0, and chemical products increased 0.2 per cent from 183.4 to 183.8.

The index of farm product prices at terminal markets rose from 211.1 in September to 211.8 in October. The field products index dropped from 155.2 to 154.4 but the animal products index rose, from 266.9 to 269.3. The eastern index advanced from 227.3 to 228.2 and the western index from 194.8 to 195.5.

The residential building materials price index (1949=100) was down 0.5 per cent

from 128.4 to 127.8 between September and October; the non-residential building materials price index advanced 0.2 per cent from 129.6 to 129.8.

## U.S. Consumer Price Index, October 1958

The United States consumer price index (1947-49=100) at mid-October was unchanged at 123.7 for the third successive month. The all-time high was 123.9, reached last July. Between mid-September and mid-October, the food index dropped 0.5 per cent, the apparel and the recreation indexes were unchanged, and all other group indexes rose.

## U.K. Index of Retail Prices, September 1958

The United Kingdom index of retail prices (Jan. 17, 1956=100) rose fractionally, from 108.3 to 108.4, between mid-August and mid-September. A year earlier it was 106.1.

The all-time high was 109.6, reached last April.

Employees of Class 1 railroads in the United States in 1957 were more than 56,000 fewer than in the preceding year, according to a bulletin published by the Association of American Railroads. It was the sixth consecutive drop, 1952 to 1957, and the largest.

(Class 1 railroads are now classified as those with annual operating revenues of \$3 million or more. Prior to January 1, 1956, this amount was \$1 million or more.)

Total hours paid for, and average number of hours paid for also declined, but total compensation rose.

7. CYPRUS. DEPARTMENT OF LABOUR. *Annual Report for the Year, 1957*. Nicosia, Government Printing Office, 1958. Pp. 86.

8. GREAT BRITAIN. MINISTRY OF LABOUR AND NATIONAL SERVICE. *Time Rates of Wages and Hours of Labour, 1st April, 1958*. London, H.M.S.O., 1958. Pp. 294.

9. NATIONAL BUREAU OF ECONOMIC RESEARCH. *Investing in Economic Knowledge: Thirty-Eighth Annual Report; a Record for 1957 and Plans for 1958*. New York, 1958. Pp. 108.

10. NEW ZEALAND. DEPARTMENT OF STATISTICS. *Report on the Industrial Accidents Statistics of New Zealand for the Year 1956*. Wellington, Government Printer, 1958. Pp. 48.

11. PENNSYLVANIA. LABOR RELATIONS BOARD. *Twenty-First Annual Report for the Calendar Year ending December 31, 1957*. Harrisburg, 1958. Pp. 156.

### Atomic Power

12. AMERICAN ASSEMBLY. *Atoms for Power; United States Policy in Atomic Energy Developments. Background Papers prepared for the use of Participants and the Final Report of the Twelfth American Assembly, Arden House, Harriman Campus of Columbia University, Harriman, New York, October 17-20, 1957*. Final ed. New York, American Assembly, Columbia University, 1957. Pp. 165.

Contents: Introduction: The Nature of the Atomic Power Problem, by Philip C. Jessup. The Environs of Atomic Power, by Robert Oppenheimer. The Atomic Power Program in the United States, by Oliver Townsend. An Appraisal of the United States Nuclear Power Program, by Walter H. Zinn. American Foreign Policy and the Peaceful Uses of Atomic Energy, by Klaus Knorr. Nuclear Power in the United Kingdom, by Sir John Cockcroft. Europe and Atoms for Power, by Max Kohnstamm. Final Report of the Twelfth American Assembly.

13. EUROPEAN PRODUCTIVITY AGENCY. *The Industrial Challenge of Nuclear Energy; Research, Uses, Social Problems. Papers given during the Second Information Conference on Nuclear Energy for Management, Amsterdam, 24-28 June 1957*, by P. Akar, and others. Paris, O.E.E.C., 1958. Pp. 301.

Contains information on the following: "the organization and progress of nuclear research (including fusion) and industry's part in this field; nuclear fuel resources, mineral prospecting, the manufacture of fuel elements, and the treatment of irradiated

fuels; nuclear energy as a source for generating electric power and for propulsion: technical, economic and financial problems; risks resulting from nuclear installations, the effects of radiation, methods of protection, the liability of operators of nuclear plant and insurance coverage."

## Automation

14. *Automation and the Consumer*, by eight Tory back-benchers: Sir John Barlow, and others. Foreword by Iain MacLeod. London, 1956. Pp. 40.

Contents: The Meaning of Automation. The Probable Effects of Automation. The Penalties of Failure to use Automation. Automation and the Mobility of Labour. Suggested Action by Management, Trade Unions and Government—Alone and Together. For Whose Benefit is Automation? Summary of Conclusions and Recommendations.

15. ILLINOIS. UNIVERSITY. INSTITUTE OF LABOR AND INDUSTRIAL RELATIONS. *The Meaning of Work in an Age of Automation*, by Bernard Karsh. Urbana, 1957. Pp. 3-13.

Some results of automation: 1. a smaller labour force in plants; 2. relocation of plant facilities outside a city; 3. twenty-four hour a day operation of the plant because of the expense of letting the machines be idle.

## Automobile Industry and Trade

16. EDITORIAL RESEARCH REPORTS. *Profit Sharing and Union Strategy*, by Helen B. Shafer. Washington, 1958. Pp. 183-199.

Deals with the United Automobile Workers' demand that American automobile manufacturers should share profits with their employees and with their customers.

17. REUTHER, WALTER PHILIP. *Price Policy and Public Responsibility; Administered Prices in the Automobile Industry; Statement prepared for Presentation... to the Subcommittee on Antitrust and Monopoly of the Committee on the Judiciary, United States Senate... January 28, 1958*. Detroit, UAW Publications Dept., 1958. Pp. 108.

(Also) *Reply Statement*. April 3, 1958. Pp. 55.

## Canada's Economic Prospects

18. HOOD, WILLIAM CLARENCE. *Output, Labour and Capital in the Canadian Economy*, by Wm. C. Hood and Anthony Scott. Hull, Queen's Printer, 1957. Pp. 513.

A study prepared for the Royal Commission on Canada's Economic Prospects.

Contents: Introduction. A Synoptic View of Growth. Theory of Economic Growth. The Population and the Labour Force. The Gross National Product and the Gross Domestic Product. The Accumulation of Capital. Divisions of Employment Output and Expenditures.

19. KENT, TOM. *Inside the Gordon Report*. Winnipeg, Winnipeg Free Press, 1958. Pp. 35. Reprinted from the Winnipeg Free Press.

## Congresses and Conventions

20. AMERICAN FEDERATION OF LABOR AND CONGRESS OF INDUSTRIAL ORGANIZATIONS. *Proceedings of the Second Constitutional Convention of the AFL-CIO, Atlantic City, New Jersey, December 5-12, 1957*. Washington, 1958? 2 volumes.

Contents: v. 1. Daily Proceedings. v. 2. Report and Supplemental Reports of the Executive Council.

21. CANADIAN PULP AND PAPER ASSOCIATION. *Proceedings, Forty-Fifth Annual Meeting, 1958*. Montreal, 1958. Pp. 50.

22. INSTITUTE OF PUBLIC ADMINISTRATION OF CANADA. *Proceedings of the Ninth Annual Conference, Queen's University, Kingston, Ontario, September 4-7, 1957*. Edited by Philip T. Clark and Frank J. McGilly. Toronto, Distributed for the Institute... by the University of Toronto Press, 1958? Pp. 376.

Topics discussed: Impact of Monetary Policy on Financial Administration. Administrative Training in Canadian Governments. Conservation and Taxation of Natural Resources. Advisory Committees in Administration. The Changing Structure of Local Government. The Role of the Departmental Personnel Officer. Co-ordination in Administration. The Fowler Commission Report on Broadcasting in Canada.

23. INTERNATIONAL ASSOCIATION OF GOVERNMENTAL LABOR OFFICIALS. *Labor Laws and their Administration; Proceedings of the Fortieth Convention, Boise, Idaho, September 29-October 3, 1957*. Washington, G.P.O., 1958. Pp. 135.

24. INTERNATIONAL ASSOCIATION OF INDUSTRIAL ACCIDENT BOARDS AND COMMISSIONS. *Workmen's Compensation Problems, 1957; Proceedings, 43rd Annual Convention, St. Paul, Minn., September 22-26, 1957*. Washington, U.S. Bureau of Labor Standards, 1958. Pp. 204.

25. SASKATCHEWAN CIVIL SERVICE ASSOCIATION. *Proceedings and Minutes of the Forty-Fifth Annual Convention held in... Regina, May 21, 22 and 23, 1958*. Regina, 1958. Pp. 105.

## Education, Vocational

26. GREAT BRITAIN. CENTRAL OFFICE OF INFORMATION. *Technological Education in Britain*. London, H.M.S.O., 1957. Pp. 35.

Briefly describes "provision made in Great Britain for training in engineering and in such applied sciences as industrial chemistry, applied physics and mineral survey."

27. U.S. OFFICE OF EDUCATION. *Administration of Vocational Education; Regulations for the Administration of Vocational Education Programs under the Provisions of the Federal Vocational Education Acts*. Rev. ed. Washington, G.P.O., 1958. Pp. 44.

## Efficiency, Industrial

28. BRITISH PRODUCTIVITY COUNCIL. *Industry uses Work Study*. London, n.d., 1957? Pp. 48.

Gives brief examples of work study in 23 British firms. Work study is defined here as "the systematic analysis of methods, and it aims at increasing productivity by more effective use of labour, plant, materials and other resources."

29. EUROPEAN PRODUCTIVITY AGENCY. *Company Planning and Production Control; the Story of a Manufacturing Company*, by George M. Arisman. Project no. 173. Paris, O.E.E.C., 1958. Pp. 92.

A case study of an American company which overcame its financial difficulties by setting up a "Basic Management Structure of the Firm" which formulated company objectives and policies; by establishing a forecasting system; by planning manufacturing more effectively; by setting up purchase planning and procedure; by financial planning; by production control; and by learning to evaluate and interpret the results of planning.

## Employment Management

30. DARTNELL CORPORATION. *Planning, preparing, and revising Employee Handbooks; a Management Guide for strengthening Personnel Policies, improving Communication, simplifying Supervision*. Chicago, c1958. 1 volume.

Covers planning, preparing, revising, and using employee handbooks.

31. HOOK, CHARLES RUFFIN. *What a Supervisor should know about himself*. Chicago, Dartnell Corporation, 1958. Pp. 23.

The author, who is Chairman of Armco Steel Corporation, outlines his views on the qualities of a good supervisor.

## Industry—Location

The following four pamphlets were published by the Alberta Industrial Development Branch in Edmonton in 1957 and 1958.

32. *Survey of Athabaska*. Rev. February, 1958. Pp. 16.

33. *Survey of Edson*. Rev. July 1957. Pp. 16.

34. *Survey of Ponoka*. Rev. January, 1958. Pp. 12.

35. *Survey of St. Paul*. Rev. June, 1958. Pp. 16.

## Labour Laws and Legislation

36. ILLINOIS. UNIVERSITY. INSTITUTE OF LABOR AND INDUSTRIAL RELATIONS. *Interest Representation and Policy Choice in Labor Law Administration*, by Murray Edelman. Urbana, 1958. Pp. 218-226.

Examines the manner in which government agencies administer policy which has been laid down by a regulatory statute.

37. JAMES, ARCHIE. *The Industrial Injuries Act, Damages at Common Law, and Other Legislation*. Cardiff, Published for, National Union of Mineworkers (South Wales Area) by Cymric Federation Press, 1957. Pp. 282.

A survey of workmen's compensation and industrial injuries laws in Great Britain.

38. TRADES UNION CONGRESS. *Industrial Law; an Introduction for Trade Union Officers*. London, 1957. Pp. 40.

A bird's-eye view of the English legal system and trade union law.

39. U.S. BUREAU OF EMPLOYMENT SECURITY. *Comparison of State Unemployment Insurance Laws as of January 1, 1958*. Washington, G.P.O., 1958. Pp. 145.

## Labour Organization

40. CANADIAN ASSOCIATION FOR ADULT EDUCATION. *Are Big Unions less Democratic?* Toronto, 1958. Pp. 9. A Citizens' Forum pamphlet.

41. COCKBURN, JOHN. *The Hungry Heart; a Romantic Biography of James Keir Hardie*. London, Jarrolds, 1956. Pp. 286.

James Keir Hardie was one of the prime organizers of the British Labour Party. He edited various trade union papers during his lifetime, in particular, the *Labour Leader*, the official organ of the Independent Labour Party.

42. DANIELS, WALTER MACHRAY, Ed. *The American Labor Movement*. New York, H. W. Wilson Co., 1958. Pp. 223.

Gives a brief history of the American labour movement and discusses the merger of the AF of L and CIO, the provisions of the National Labor Relations Act of 1947 (the Taft-Hartley Act) and its application as seen by labour, management, and government spokesmen, the "right-to-work" laws, and internal union democracy and union ethics.

43. KERR, CLARK. *Unions and Union Leaders of Their Own Choosing*. New York, The Fund for the Republic, 1957. Pp. 24.

The author suggests six ways in which industrial trade union members can achieve more freedom: "Local union autonomy, a new faith for the union movement, secret elections of officers, independent judicial processes, permissive rules on entry to the union and on movement within industry, and narrow limits to union functions."

44. TRADES UNION CONGRESS. *What the TUC is doing, 1958*. London, 1958. Pp. 46.

## Labouring Classes

45. BEVERSTOCK, A. G. *Modern Apprenticeship*. London, Classic Publications Ltd. n.d., 1958? Pp. 89.

46. CLAGUE, EWAN. *Manpower Problems of the Next Decade*. (Speech) before the Louisiana Personnel Management Conference, Baton Rouge, Louisiana, February 27, 1958. Washington, 1958. Pp. 8.

Topics discussed are the labour force, industrial shifts, and occupational shifts.

47. HENRIPIN, JACQUES. *Les collets blancs (croissance et structure)*. Montreal, Service d'Education, Confederation des travailleurs catholiques du Canada, 1958. Pp. 14.

Concerns the unionization of office workers.

48. MYERS, CHARLES ANDREW. *Labor Problems in the Industrialization of India*. Cambridge, Mass., Harvard University Press, 1958. Pp. 297.

This book is concerned with the problems facing labour, management, and government in the industrial development of the Indian economy.

49. ILLINOIS. UNIVERSITY. INSTITUTE OF LABOR AND INDUSTRIAL RELATIONS. *The Labor Contract: Provision and Practice*, by Milton Derber. W. E. Chalmers, and Ross Stagner. Urbana, 1958. Pp. 12.

Compares the practices of 48 companies regarding 11 contract items together with the relevant contract clauses.

50. PARIZEAU, ROBERT. *Enquête sur le salaire annuel garanti*. Montreal, Ecole des Hautes Commerciales, Service de documentation économique, 1958. Pp. 66.

This study is based on the replies to a questionnaire which the author and the Association Professionnelle des Industriels sent out to over a thousand firms in the Province of Quebec. The questionnaire sought the opinion of the firm on the guaranteed annual wage.

## Occupation

51. BEDFORD, JAMES HIRAM. *Your Future Job, a Guide to Personal and Occupational Orientation of Youth in the Atomic Age*. New rev. ed. Los Angeles, Society for Occupational Research, 1956. Pp. 366.

52. CANADA. DEPARTMENT OF LABOUR. ECONOMICS AND RESEARCH BRANCH. *Careers in Meteorology*. Ottawa, Queen's Printer, 1958. Pp. 20.

Explains briefly the nature of the work, working conditions, earnings, personal qualifications, preparation and training, advancement, related occupations, advantages and disadvantages, and how to enter the field.

53. CANADA. DEPARTMENT OF LABOUR. ECONOMICS AND RESEARCH BRANCH. *Optometrist*. Rev. ed. Ottawa, Queen's Printer, 1958. Pp. 20.

Outlines education requirements, duties, working conditions, earnings, advantages and disadvantages.

## Open and Closed Shop

54. AMERICAN FEDERATION OF LABOR AND CONGRESS OF INDUSTRIAL ORGANIZATIONS. IN-

DUSTRIAL UNION DEPARTMENT. *The Case for the Union Shop*. Washington, n.d., 1958? Pp. 31.

This pamphlet argues that "the union shop is a guarantee of stability on the job for the period of the contract." It also alleges that without the union shop collective bargaining would be undermined and that unions would lose their effectiveness.

55. INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS. *The I.B.E.W. looks at Restrictive Labor Laws*. Washington, n.d., 1958? Pp. 13.

An argument against right-to-work laws in the U.S.

56. PETRO, SYLVESTER. *Personal Freedom and Labor Policy*. New York, Institute of Economic Affairs, New York University, c1958. Pp. 15.

The author, Professor of Law at New York University Law School, advocates the right of employees to choose whether or not to join unions, among other things.

## United Nations

57. UNITED NATIONS. COMMISSION ON THE STATUS OF WOMEN. *Report of the Twelfth Session, 17 March-3 April 1958*. New York, 1958. Pp. 23.

58. UNITED NATIONS. DEPARTMENT OF ECONOMIC AND SOCIAL AFFAIRS. *World Economic Survey, 1957*. New York, 1958. Pp. 227.

59. UNITED NATIONS. ECONOMIC COMMISSION FOR ASIA AND THE FAR EAST. *Annual Report, 29 March 1957-15 March 1958*. New York, 1958. Pp. 68.

60. UNITED NATIONS. ECONOMIC COMMISSION FOR LATIN AMERICA. *Annual Report, 30 May 1957-8 April 1958*. New York, 1958. Pp. 29.

61. UNITED NATIONS. ECONOMIC COMMISSION FOR LATIN AMERICA. *Economic Survey of Latin America, 1956*. New York, United Nations, Dept. of Economic and Social Affairs, 1957. Pp. 183.

## Miscellaneous

62. CANADA. CIVIL SERVICE COMMISSION. *Civil Service Examinations; Specimen Questions and General Information*. Ottawa, Queen's Printer, 1958. Pp. 27.

63. LATIN AMERICAN MEETING OF EXPERTS ON STEEL MAKING AND TRANSFORMING INDUSTRIES, SAO PAULO, 1956. *Problems of the Steel Making and Transforming Industries in Latin America*. I. Report of the Latin American Meeting of Experts on Steel Making and Transforming Industries. New York, United Nations, 1958. Pp. 62.

Sponsored by the secretariats of the Economic Commission for Latin America and of the Technical Assistance Administration, in collaboration with the *Associacao Brasileira de Metais*.

64. U.S. COMMITTEE OF ENGINEERS AND SCIENTISTS FOR FEDERAL GOVERNMENT PROGRAMS. *Summary Report of Survey of Attitudes of Scientists and Engineers in Government and Industry*. Washington, G.P.O., 1957. Pp. 78.

This study is based on the answers to a questionnaire of about 17,500 engineers and scientists in the U.S. Federal Government service and about 3,400 similar individuals employed outside the Government. The information was collected between September 1956 and January 1957. The questions concerned the following: 1. employer and place of employment; 2. relative importance of 15 elements which determine their over-all satisfaction with a research position; 3. job

satisfaction, professional freedom and opportunity for professional growth; 4. working conditions and resources for research; 5. utilization and relationships with immediate supervisors and with higher management; 6. pay, promotion and classification; 7. training; 8. career prospects; and, 9. fringe benefits.

65. U.S. NATIONAL SCIENCE FOUNDATION. *Basic Research, a National Resource*. Washington, G.P.O., 1957. Pp. 64.

Examines the need for more basic research in science. Basic research provides new knowledge to develop new products and new industries to keep up the economy. Basic research is necessary for national security.

## Revised Edition of "The Labour Force" Now Available

*The Labour Force, November 1945-July 1958*, containing a revised historical series of the employment characteristics of the Canadian population, is now available through the Information Services Division of the Dominion Bureau of Statistics at the price of \$2.00.

It is a revised edition of the Reference Paper No. 58 with labour force statistics

for the period August 1951 to July 1958 adjusted to population estimates based on the 1956 census rather than the 1951 census.

Labour force data published in the regular monthly reports from August 1958 take account of revised population estimates, and will form a consistent series with material in Reference Paper No. 58, the Bureau announced.

---

### Decisions of Umpire (Continued from page 1416)

which she was willing to accept employment, she had failed to prove that she was available for work from April 6, 1958.

The dissenting member of the board held that the claimant had indicated her willingness to accept employment in quite a large area where there were many types of industries and that she had proved she was available for work within the meaning of the Act from April 28, 1958. He held also that it was unreasonable to expect the claimant to travel 40 miles to and from employment "with the kind of transportation facilities available".

The claimant appealed to the Umpire on substantially the same grounds as those contained in her appeal to the board of referees with respect to her availability for work.

**Considerations and Conclusions:** The present case hinges on whether there were opportunities of employment within the capabilities of the claimant in the larger area where, as she stated in her appeal to the board of referees, she was willing to accept suitable work.

This is purely a question of fact, and I must say that I am more impressed with the statement of the dissenting member regarding the "many types of industries" which exist in the larger area than with the vague reference made by the employ-

ment officer with regard to the practically non-existent opportunities of employment in the area. But even the statement of the dissenting member lacks precision. There might be many types of industries in the locality that would give ample opportunities for employees such as mechanics or operators, but little for clerical staff. In a case such as the present one which turns on the conditions of the local labour field, I think that the record should contain more detailed information.

In this case, it is to be remembered that the claimant, who at first restricted her availability to R....., subsequently extended it to O....., W..... and as far south as the city limits; and it is not clear whether the employment officer's statement regarding the scant opportunities of work dealt also with all the types of employment which the claimant was capable of performing in view of her qualifications and experience.

Under the circumstances, I am prepared to give the benefit of the doubt to the claimant; but since during the period she restricted her availability to R..... she could not have been available, I must disqualify her from April 6 to 27, 1958, inclusive.

But for this modification of the period of disqualification, the claimant's appeal is allowed.

# LABOUR STATISTICS

|                                                      | PAGE |
|------------------------------------------------------|------|

| Tables G-1 and G-2—Strikes and Lockouts.....         | 1453 |

## A—Labour Force

NOTE—Small adjustments have been made in the labour force figures to bring them into line with population estimates based on the 1956 Census; consequently, the figures in Tables A-1 and A-2 are not strictly comparable with those for months prior to August 1958. Adjusted figures for those earlier months are given in the Supplement to The Labour Force, September 1958, a Dominion Bureau of Statistics publication, and detailed figures on the revised basis will appear in the forthcoming DBS Reference Paper No. 58, The Labour Force.

<sup>(1)</sup> To obtain number seeking part-time work, subtract figures in this column from those in the "Total" column.

\* Less than 10,000.

**B—Labour Income**

NOTE: The estimates of labour income in this table have been revised in accordance with recent revisions to the National Accounts. Note particularly the use of annual totals instead of monthly averages, and the introduction of quarterly instead of monthly totals for some industries. Monthly and quarterly figures may not add to annual totals because of rounding.

Tables C-4 and C-5 are based on reports from a somewhat smaller number of firms than Tables C-1 to C-3. They relate only to wage-earners for whom statistics of hours of work are also available whereas Tables C-1 to C-3 relate to salaried employees as well as to all wage-earners of the co-operative firms.

# TABLE C-4.—HOURS AND EARNINGS IN MANUFACTURING BY PROVINCES

(Hourly-Rated Wage-Earners) SOURCE: Man-hours and Hourly Earnings (Dominion Bureau of Statistics)

## D—National Employment Service Statistics

Tables D-1 to D-5 are based on regular statistical reports from local offices of the National Employment Service. These statistics are compiled from two different reporting forms, UIC 751: statistical report on employment operations by industry, and UIC 757: inventory of registrations and vacancies by occupation. The data on applicants and vacancies in these two reporting forms are not identical.

(a) The record of the Department includes lockouts as well as strikes but a lockout or an industrial condition which is undoubtedly a lockout, is not often encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused but a separate record of such strikes is maintained in the Department. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees for a short period of time is frequently not received until some time after its commencement.

(b) Strikes unconcluded at the end of the previous year are included in these totals.

### “CANADIAN OCCUPATIONS” SERIES

This Series is prepared by the Economics and Research Branch of the Department of Labour to help young people choose a career, and as an aid to those engaged in vocational guidance work. Each booklet covers an occupation or occupational field, outlining the kind of work done, the preparation and training needed, how to enter the occupation, career opportunities and employment outlook.

All monographs in the “Canadian Occupations” series are priced at 10 cents per copy, with the exception of *Careers in Natural Science and Engineering*, which is 25 cents. A discount of 25 per cent is allowed on quantities of 100 or more of the same title.

Send remittance by cheque or money order, made payable to the Receiver General of Canada, to The Queen’s Printer, Ottawa, Canada.

School guidance counsellors should inquire from their provincial Department of Education for supplies.

#### FILMSTRIPS

\*The Department of Labour, in collaboration with the National Film Board, has prepared a number of occupational filmstrips based on titles in the “Canadian Occupations” series. Titles covered to date are indicated by an asterisk. Monographs 20-35 have been covered in two filmstrips, entitled *Careers in Natural Science and Careers in the Engineering Profession*.

Filmstrips are priced at \$1.50 each and may be purchased from the National Film Board, Box 6100, Montreal.
